**CERTIFICATION PURSUANT TO SECTION 60(2) OF THE INVESTMENT AND
SECURITIES
ACT NO.29 OF 2007**

I the undersigned at this moment certify the following about the financial statement for the period ended 31/12/2025:

- A. I have reviewed the report and to the best of my knowledge, the report does not contain; any untrue statement of a material fact, or Omission to state a material fact, which would make the statements, misleading in the light of circumstances under which such statements were made.

To the best of my knowledge, the financial statements and other financial information included in the report fairly present in all material respects the company's financial condition and results of operation as of and for the periods presented in the report.

- B. I am responsible for establishing and maintaining internal controls. I have designed such internal controls to ensure that material information relating to the Company is made known to such officers by others within those entities, particularly during the periods in which these reports are being prepared; have evaluated the effectiveness of the Company's internal controls as of the date of the report; have presented in the report my conclusions about the effectiveness of my internal controls based on my evaluation as of that date;

- C. I have disclosed to the auditors of the Company and Audit Committee:

All significant deficiencies in the design or operation of internal controls which would adversely affect the Company's ability to record, process, summarize and report financial data and have identified for the Company's auditors any material weakness in internal controls, and any fraud, whether or not material, that involves management or other employees who have a significant role in the Company's internal controls;

I have identified in the report whether or not there were significant changes in internal controls or other factors that could significantly affect internal controls after the date of my evaluation, Including any corrective actions for significant deficiencies and material weaknesses.

1 General Information:

The financial statements of the Company for the period ended 31, March 2026 were authorised for issue in accordance with a resolution of the Directors.

The Company is a public limited company incorporated and domiciled in Nigeria. The corporate head office is located at 8, Gbagada Expressway, Anthony, Lagos.

The Company is principally engaged in the business of providing risk underwriting, related financial services and hospitality services to its customers.

2 Summary of Significant Accounting Policies:

The principal accounting policies applied in the preparation of these financial statements are disclosed .

3 Critical accounting estimates and judgements:

The Company makes estimates and assumptions that affect the reported amounts of assets and liabilities within the period.

Estimates and judgements are continually evaluated and based on historical experience and other factors, including expectations of future events that are

3. (i) Fair value of financial assets:

Financial assets are deemed to be impaired when there has been a significant or prolonged decline in the fair value below its cost.

This determination of what is significant or prolonged requires judgement. In making this judgement, group evaluates the normal volatility in share price, the financial health of the investee industry and sector performance, technological changes and cash flow among other factors valuation techniques.

The fair value of financial instruments where no active market exists or where quoted prices are not available are determined by using

In these cases, the fair values are estimated from observable data derived for that instrument and valued in the case of the group, by applying the ruling

3. (ii) Liabilities arising from insurance contract:

Liabilities for unpaid claims are estimated on case by case basis. The reserves made for claims fluctuate based on the nature and severity of the claim reported.

Claims incurred but not reported (IBNR) are determined using statistical analyses. The group believes that the reserves are adequate for the period.

4 Insurance and Financial Risks Management

The Company issues contracts that transfer insurance risk or financial risk or both.

4.1 Insurance Risks Management

The Company accepts insurance risk through its insurance contracts and certain investments contracts where it assumes the risk of loss from persons or

The Company manages its risk via its underwriting and reinsurance strategy within an overall risk management framework.

Pricing is based on assumptions which have regard to trends and past experience. Exposures are managed by having documented underwriting limits and criteria.

Reinsurance is purchased to mitigate the effect of potential loss to the Company from individual large or catastrophic events and also to provide access to specialist risks and to assist in managing capital. Reinsurance policies are written with approved reinsurers on either a proportional or excess of loss treaty basis.

The Company writes general insurance businesses. The most significant risks arise from persistency, longevity, morbidity, expense variations and investment returns. Concentration of risk may arise from geographic regions, epidemics, accumulation of risks and market risk.

4.2 Financial Risk Management

The company monitors and manages the financial risks relating to the operations of the company through internal risk reports magnitude of risks.

These risks include:

- Market risk
- Credit risk
- Liquidity risk

4.2.1 Market Risk

Market risk is the risk of adverse financial impact as a consequence of market movements such as currency exchange rates, interest rates and other price

These market risks arise due to fluctuations in both value of assets and liabilities. The company has established policies and procedures in order to

Interest rate risk management

Interest rate risk is the risk that the value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The company is exposed to interest rate risk as the company invests in short term investments at fixed interest rates. Interest rate risks also exists in products sold by the Company. The company manages this risk by adopting close asset/liability matching criteria, to minimise the impact of mismatches between asset and liability values arising from interest rate movements.

4.2.2 Credit Risk

Credit risk is the risk that one party to a financial instrument will fail to honour its obligations and cause the Company to incur a financial loss. The Company has adopted a policy of dealing only with creditworthy counterparties and obtaining sufficient collateral where appropriate, as a means of mitigating the risk of financial loss from defaults. The Company's exposure and the credit ratings of its counterparties are continuously monitored and the aggregate value of transactions concluded is spread amongst approved counterparties. Credit exposure is controlled by counterparty limits that are reviewed and approved by the Risk Management Committee annually.

4.2.3 Liquidity risk

Liquidity risk is the risk that the Company cannot meet its obligations associated with financial liabilities as they fall due. The Company has adopted an appropriate liquidity risk management framework for the management of the Company's liquidity requirements. The Company manages liquidity risk by maintaining banking and reserve borrowing facilities by continuously monitoring forecast and actual cash flows and matching the maturity profiles of assets and liabilities. The Company is exposed to liquidity risk arising from clients on its insurance contracts. In respect of catastrophic events, there is liquidity risk from a difference in timing between claim payments and recoveries thereon from reinsurers.

Liquidity management ensures that the Company has sufficient access to funds necessary to cover insurance claims, and maturing liabilities.

Company's assets contain marketable securities which could be converted into cash when required.

Impairment Assessment (Policy Applicable from 1 January 2021)

4.3 The Company's ECL assessment and measurement method is set out below.

Significant increase in credit risk, default and cure

The Company continuously monitors all assets subject to ECLs. In order to determine whether an instrument or a portfolio of instruments is subject to 12mECL or LTECL, the Company assesses whether there has been a significant increase in credit risk since initial recognition. The Company considers that there has been a significant increase in credit risk when any contractual payments are more than 30 days past due. In addition, the Company also considers a variety of instances that may indicate unlikelihood to pay by assessing whether there has been a significant increase in credit risk. Such events include:

'The Company's process to assess changes in credit risk is multi-factor and has three main elements (or 'pillars'):

- quantitative element (i.e. reflecting a quantitative comparison of PD at the reporting date and
- a qualitative element; and
- 'backstop' indicators

Quantitative elements

The quantitative element is the primary indicator of significant increases in credit risk, with the qualitative element playing a secondary role. The quantitative element is calculated based on the change in lifetime PDs by comparing:

- the remaining lifetime PD as at the reporting date; with
 - the remaining lifetime PD for this point in time that was estimated based on facts and circumstances at the time of initial recognition of the exposure (adjusted where relevant for changes in prepayment expectations)
- included in the quantitative assessment and not in a separate qualitative assessment. However, if it is not possible to include all current information about such qualitative factors in the quantitative assessment, they are considered separately in a qualitative assessment as to whether there has been a significant increase in credit risk. If there are qualitative factors that indicate an increase in credit risk that have not been included in the calculation of PDs used in the quantitative assessment, the Company recalibrates the PD or otherwise adjusts its estimate when calculating ECLs.

In general, qualitative factors that are indicative of an increase in credit risk are reflected in PD models on a timely basis and thus are Backstop indicators

Instruments which are more than 30 days past due or have been granted forbearance are generally regarded as having significantly increased in credit risk and may be credit-impaired. There is a rebuttable presumption that the credit risk has increased significantly if contractual payments are more than 30 days past due; this presumption is applied unless the Company has reasonable and supportable information demonstrating that the credit risk has not increased significantly since initial recognition.

During the year, there has been no significant increase in credit risk on the financial asset of the company. However, a Corporate bond

held by the company defaulted during the year and was considered credit impaired individually using lifetime PD.

Expected credit losses

'The Company assesses the possible default events within 12 months for the calculation of the 12mECL and lifetime for the calculation of the expected loss given default ratio varies for different instruments. In cases where a lifetime ECL is required to be calculated, the probability of default is estimated based on economic scenarios.

LTECL. Given the investment policy, the probability of default for new instruments acquired is generally determined to be minimal

4.4 Impairment Assessment (Policy Applicable from 1 January 2022)

Amounts Arising from ECL

Inputs, assumptions and techniques used for estimating impairment.

When determining whether the credit risk (i.e. Risk of default) on a financial instrument has increased significantly since initial recognition, the Company considers reasonable and supportable information that is relevant and available without undue cost of effort, This includes both qualitative and quantitative information analysis based on the Company's experience, expert credit assessment and forward looking information. The Company primarily identifies whether a significant increase in credit risk has occurred for an exposure by using days past due and assessing other information obtained externally.

Whenever available, the Company monitors changes in credit risk by tracking published external credit ratings. To determine whether published ratings remain up to date and to assess whether there has been a significant increase in credit risk at the reporting date that has not been reflected in the published rating, the Company also reviews changes in Bond yields together with available press and regulatory information about issuers.

Where external credit ratings are not available, the Company allocates each exposure to a credit risk grade based on data that is determined to be predictive of the risk of default (including but not limited to the audited financial statement, management accounts and cashflow projections, available regulatory and press information about the borrowers and apply experiences credit judgement. Credit risk grades are defined by using qualitative and quantitative factors that are indicative of the risk of default and are aligned with the external credit rating definition from Moody's and standards and Poor.

The Company has assumed that the credit risk of a financial asset has not increased significantly since the initial recognition if the financial asset has low credit risk at reporting date.

The company considers a financial asset to have low credit risk when its credit risk rating is equivalent to the globally understood definition of "investment grade".

As a back stop, the Company considers that a significant increase in credit risk occurs no later than when the asset is more than 30 days past due.

- The criteria do not align with the point in time when the asset becomes 30 days past due;
- The average time between the identification of a significant increase in credit risk and default appears reasonable
- Exposures are not generally transferred from 12-month ECL measurement to credit impaired and
- There is no unwarranted volatility in loss allowance from transfers between 12-month ECL and Lifetime ECL measurement.

Days past due are determined by counting the numbers of days since the earliest elapsed due date in respect of which full payments has not been received. Due dates are determined without considering any grace period that might be available to the borrower.

The Company monitors the effectiveness of the criteria used to identify significant increase in credit risk by regular reviews to confirm that:

- The criteria are capable of identifying significant increase in credit risk before an exposure is in default;

Modified financial assets

The contractual terms of a financial asset may be modified for a number of reasons, including changing market conditions and other factors not related to a current or potential credit deterioration of the borrower.

An existing financial asset whose terms have been modified may

be derecognized and the renegotiated asset recognized as a new financial asset at fair value in accordance with the accounting policies.

When the terms of a financial asset are modified and the modification does not result in derecognition, the determination of whether the asset's credit risk has increased significantly reflects a comparison of:

- Its risk of default occurring at the reporting date based on the modified term; with

The risk of default occurring estimated based on data on initial recognition and The original contractual terms.

Definition of default

A default is considered to have occurred with regard to a particular obligor

- The Company considers that the obligor is unlikely to pay its credit obligations to the Company in full, without recourse by the insurer to actions such as realising security (if held).
- The obligor is past due more than 90 days on any material credit obligation to the company.

The elements to be taken as indications of unlikelihood to pay include: - The insurer puts the credit obligation on non-accrued status.
to the bank taking on the exposure.

-The insurer sells The credit obligation at a material credit-related economic loss.

-The insurer consents to a distressed restructuring of the credit obligation where this is likely to result in a diminished financial obligation caused by the material forgiveness, or postponement, of principal, interest or (where relevant) fees

4.4.1 Analysis of inputs to the ECL model under multiple economic scenarios

An overview of the approach to estimating ECLs is set out in Note 2.11.4 Summary of significant accounting policies and in Note 2.5 Significant accounting judgements, estimates and assumptions.

To ensure completeness and accuracy, the company obtains the data used from third party sources (Central Bank of Nigeria, Trading Economies e.t.c.). The following tables set out the key drivers of expected loss and the assumptions used for the company's base case estimate, ECLs based on the base case, plus the effect of the use of multiple economic scenarios as at 31 March 2024 and 31 March 2025

5 Capital Management

The Company manages its capital to ensure that the Company will be able to continue as a going concern and comply with the regulators' capital requirements of the markets in which the Company operates while maximising the return to stakeholders through the optimisation of the debt and equity balance. The capital structure of the Company consists of equity attributable to equity holders of the parent, comprising issued capital, reserves and retained earnings. Reinsurance is also used as part of capital management.

35c Reconciliation of the liability for remaining coverage and the liability for incurred claims (reinsurance)

The following table shows the reconciliation from the opening to the closing balances of the net asset for the remaining coverage and the assets for incurred claims recoverable from reinsurance. The coverage period of reinsurance contracts held for insurance contracts issued by the Company under the general business have either a coverage period of one year or less.

Company 31-Mar-26	Aggregated		Incurred claims		Total
