PRESS RELEASE

Regulated information

Ellah Lakes Reports H1 2026 Revenue Growth, Strengthens Balance Sheet and Advances Execution Across Processing and Livestock Operations

Lagos, Nigeria – 3 August 2026 – Ellah Lakes Plc. (“Ellah Lakes”, or “the Company”) Nigeria’s integrated agro-industrial company, today publishes its unaudited financial results for the six months ended 30 June 2026.

The first half of 2026 marked an important period in Ellah Lakes’ development, as the Company combined revenue growth with a significant strengthening of its capital structure and continued progress across key operating initiatives.

During H1 2026, Ellah Lakes recorded revenue of ₦533.86 million, reflecting increased commercial activity across the Group’s operating platform and continued progress in scaling its commercial operations. The Company also completed the conversion of outstanding directors’ loans into equity, materially reducing leverage and providing a stronger financial platform for the next phase of operational execution. With the balance sheet significantly strengthened, management’s focus is now on improving asset utilisation, increasing production throughput, expanding processing capacity and strengthening cash generation across the Company’s integrated agribusiness platform.

Business Update

- **Commercial Activity and Revenue Diversification**

Ellah Lakes continued to build commercial activity across its operating platform during H1 2026, reflecting the gradual transition of its asset base into revenue-generating operations. This progress supports the Company’s broader objective of developing a more diversified and cash-generative agribusiness model.

- **Processing Expansion and Production Efficiency**

Ellah Lakes continued to advance its processing strategy during the period through investments aimed at improving production reliability and deepening value capture across the palm value chain. The Company procured a new press for its CPO Mill to enhance milling reliability and production efficiency, with the equipment expected to arrive in September 2026. Once installed, the new press is expected to support improved throughput and stronger CPO production performance. Ellah Lakes also acquired the first set of expellers and presses for its Palm Kernel Oil (“PKO”) Mill, marking a key step in the expansion of its palm kernel processing operations. Installation is expected to be completed by the end of the third quarter of 2026, after which the Company plans to commence production of Palm Kernel Oil and Palm Kernel Cake (“PKC”). The ability to produce PKO and PKC is expected to broaden the Company’s product base, create

Head Office:

No. 10 Muritala Mohammed Way
Benin City, Edo State

Website: www.ellahlakes.com
info@ellahlakes.com

additional revenue streams and improve value capture from palm kernel by-products that would otherwise have limited contribution within the value chain.

- **Scaling Livestock Operations**

Ellah Lakes has surpassed 1,000 pigs on its farm and commenced the sale of gilts, expanding the commercial contribution of its livestock operations through the supply of young female breeding pigs. This reflects continued progress in developing the piggery business as an important operating vertical within the Company's integrated agribusiness model.

- **Strengthening the Capital Structure**

During the period, Ellah Lakes completed the conversion of outstanding directors' loans into equity, significantly improving the Company's balance sheet. Share capital increased to ₦3.20 billion from ₦1.93 billion, while share premium increased to ₦14.03 billion from ₦8.20 billion. The conversion eliminated ₦7.08 billion in directors' loans from the liability base, reducing total liabilities by 93.6% to ₦504.66 million. This has substantially reduced the Company's leverage profile and improved its financial flexibility as it continues to execute the next phase of its operating plan.

- **Land Asset Protection Update**

During the period, Ellah Lakes commenced legal action against Olumide Akinsanya and Median Agro Limited in relation to alleged encroachment on part of the Company's cultivated land in Iguelaba, Edo State. The Company is pursuing appropriate legal remedies while continuing to safeguard its land assets and maintain focus on its operating priorities

Commenting on the results, **Chuka Mordi, Chief Executive Officer of Ellah Lakes Plc** said: *"The first half of 2026 was an important period in strengthening the foundations of our business. We recorded continued revenue growth, completed a major balance sheet restructuring and advanced key operating initiatives across processing and livestock. These developments provide a stronger platform for Ellah Lakes as we continue to move deeper into commercial execution.*

Our immediate focus is to improve production reliability, restore stronger CPO Mill performance and complete the next stage of our processing roadmap. The planned replacement of the CPO press is an important step in improving milling efficiency, while the acquisition of PKO Mill equipment supports our broader objective of capturing more value across the palm value chain.

We are also pleased with the continued scale-up of our livestock operations, which provides an important shorter-cycle revenue vertical within our integrated agribusiness model. As our plantation assets continue to mature, we remain focused on broadening our revenue base, improving operating efficiency, strengthening cash generation and building a more resilient platform for long-term shareholder value"

Financial Review

- **Revenue:** Total revenue stood at ₦533.86 million in H1 2026, reflecting stronger commercial activity across the Group's operating platform. On a quarterly basis, revenue increased to ₦173.87 million in Q2 2026 (Q2 2025: ₦58.56 million), driven primarily by oil palm sales, with additional contributions from palm kernel-related sales, livestock and sludge sales.
- **Gross Profit:** Gross profit stood at ₦342.41 million in H1 2026, supported by stronger revenue generation during the period. On a quarterly basis, gross profit stood at ₦55.66 million in Q2 2026 (Q2 2025: ₦57.65 million). While Q2 revenue increased year-on-year, gross profit remained broadly stable as higher cost of sales moderated the benefit of stronger sales during the quarter.

Benin City, Edo State

Website: www.ellahlakes.com
info@ellahlakes.com

- **Operating Profit/(Loss):** Operating loss stood at ₦782.63 million in H1 2026. The result reflects the Company's ongoing scale-up phase, including the operating cost base required to support farm operations, processing activities, personnel, logistics, security and other business support functions. On a quarterly basis, operating loss stood at ₦509.02 million in Q2 2026 (Q2 2025: ₦294.64 million). The Q2 movement reflects the combined effect of higher cost of sales, lower CPO Mill efficiency during the period and the cost base required to support the Company's expanding operating platform.
- **Operating Costs:** Total expenses stood at ₦1.16 billion in H1 2026, reflecting continued investment in the people, systems and operating infrastructure required to support the Company's scale-up phase. On a quarterly basis, operating costs stood at ₦573.19 million in Q2 2026 (Q2 2025: ₦352.89 million). The movement was driven mainly by higher administrative and personnel expenses, alongside depreciation and other operating costs linked to the Company's expanding asset and operating base. Administrative expenses stood at ₦253.46 million in Q2 2026, while personnel expenses stood at ₦259.51 million.
Management's priority remains to improve operating efficiency and ensure that the Company's cost base is increasingly supported by higher production volumes, improved asset utilisation and expanded processing activity.
- **Total Assets:** Total Assets stood at ₦25.25 billion as at 30 June 2026 (31 December 2025: ₦28.26 billion). The movement was mainly driven by a reduction in current assets, particularly cash and cash equivalents, while non-current assets remained broadly stable at ₦24.98 billion. The Company's core asset base continues to be anchored by property, plant and equipment of ₦24.72 billion, reflecting the long-term productive assets supporting its integrated agro-industrial strategy. The reduction in cash reflects the utilisation of cash resources during the period, reinforcing management's focus on improving operating cash flow and converting the asset base into stronger commercial performance.
- **Liabilities and Borrowings:** Total liabilities decreased significantly to ₦504.66 million (31 December 2025: ₦7.83 billion). This reduction was driven primarily by the conversion of outstanding directors' loans into equity during the period. Borrowings also reduced by 24.0% to ₦297.67 million, compared with ₦391.67 million as at 31 December 2025, reflecting continued repayment of the Company's secured borrowing obligations. This has improved the Company's financial flexibility and reduced financing obligations as it continues to execute its operating plan.
- **Total Equity:** Total equity increased by 21.1% to ₦24.75 billion (31 December 2025: ₦20.43 billion). The increase reflects the impact of the debt-to-equity conversion, which strengthened the Company's issued capital and share premium.
- **Leverage:** Debt-to-assets declined to 2.0% as at 30 June 2026 (31 December 2025: 27.7%). while debt-to-equity also reduced to 2.0% (31 December 2025: 38.3%). This reflects the substantial improvement in the Company's balance sheet following the conversion of directors' loans into equity and the

Head Office:

Website: www.ellahlakes.com
info@ellahlakes.com

reduction in secured borrowings. Management remains focused on maintaining funding discipline, improving cash conversion and supporting growth through an appropriate capital structure.

Outlook

Ellah Lakes enters the second half of 2026 with clear priorities across production efficiency, processing expansion and livestock scale-up. Management's near-term focus is to complete the CPO Mill equipment upgrade, progress the installation of the PKO Mill equipment and continue strengthening operating execution across the business.

Following installation, the replacement CPO press is expected to support improved milling reliability, while the PKO Mill is expected to broaden the Company's processing base through the production of PKO and PKC. Livestock operations remain an important part of Ellah Lakes' integrated agribusiness model. The Company will continue to scale the piggery business and deepen the sale of gilts.

As part of the next phase of growth, Ellah Lakes plans to install its abattoir and cold chain facility to support the continued expansion of its livestock operations. The facility is expected to enhance processing capacity, improve product handling and storage, and strengthen market access for livestock products.

Management also continues to prioritise disciplined execution, stronger cash generation, asset protection, risk management and clearer shareholder communication as the Company moves further into its execution phase. Ellah Lakes remains committed to building a scalable agro-industrial platform anchored on operational integration, disciplined execution and long-term value creation.

About Ellah Lakes Plc

Ellah Lakes Plc is a rapidly growing indigenous agribusiness company leading Nigeria's agricultural transformation. Established in 1980 as a fish farming enterprise, the Company underwent a strategic shift in 2019 following the acquisition of Telluria Limited. It repositioned itself as a vertically integrated agro-industrial player focused on crop cultivation, processing and sustainable value creation. Headquartered in Benin City, Edo State, Ellah Lakes is dedicated to the production and processing of high-demand staple crops such as oil palm, cassava, maize and soybean. The Company has successfully transitioned from traditional farming methods to a multi-vertical operation that integrates crop production, edible oils, animal feed, biofuels and agro-processing. Its' long-term vision is to become the leading indigenous agribusiness in West Africa.

Forward-looking statements

Certain statements in this document may constitute forward-looking information or forward-looking statements under applicable Nigerian securities law (collectively "forward-looking statements"). Forward-looking statements are statements that relate to future events, including the Company's future performance, opportunities, or business prospects. Any statements that express or involve discussions with respect to expectations, forecasts, assumptions, objectives, beliefs, projections, plans, guidance, predictions, future events or performance (often, but not always, identified by words such as "believes", "seeks", "anticipates", "expects", "continues", "may", "projects", "estimates", "forecasts", "pending", "intends", "plans", "could", "might", "should", "will", "would have" or similar words suggesting future outcomes) are not statements of historical fact and may be forward-looking statements. By their nature, forward-looking statements involve assumptions, inherent risks and uncertainties, many of which are difficult to predict, and are usually beyond the control of management, that could cause actual results to be materially different from those expressed by these forward-looking statements. Undue reliance should not be placed on these forward-looking statements because the Company cannot assure that the forward-looking statements will prove to be correct. As forward-looking information address future conditions and events, they could involve risks and uncertainties including, but are not limited to, risk with respect to general economic conditions, regulations and taxes, civil unrest, corporate restructuring and related costs, capital and operating expenses, pricing and availability of financing and currency exchange rate fluctuations. Readers are cautioned that the assumptions used in the preparation of such information, although considered reasonable at the time of preparation, may prove to be imprecise and, as such, undue reliance should not be placed on forward-looking statements.
