# Directors' Report

*For the period ended 30 June, 2026*

**The Directors have the pleasure in presenting their report on the affairs of Access Holdings Plc ("the Company") and its subsidiaries (together referred to as "the Group" and separately referred to as "Group entities"), the Company and the Group's Consolidated and Separate Interim Financial Statements for the period ended 30 June 2026.**

## Legal form and principal activities

Access Holdings Plc was incorporated as a public limited liability company on 10 February 2021. The Company is a Nigerian Exchange premium board listed parent non-operating Financial Holding Company for Access Bank ('the Bank') and the related Group entities that emerged from the court-sanctioned Scheme of Arrangement between the Bank and holders of its fully paid ordinary shares of 50 Kobo each.

The Company's business segments comprise deposit money banking, wealth and investment management, financial technology and insurance while its operating and direct subsidiaries are Access Bank Plc, Hydrogen Payment Services Company Limited, Oxygen X Finance Company Limited and Access Insurance Brokers Limited. Access Golf Limited is a Special Purpose Vehicle for the Company's equity investment in its indirect subsidiary, Access ARM Pension Limited.

| | | **2,227,807,228** |

## Property and equipment

Information relating to changes in property and equipment is given in Note 28 to the consolidated and separate interim financial statements. In the Directors' opinion, the fair value of the Group's property and equipment is not less than the carrying value in the financial statements.

# Human resources

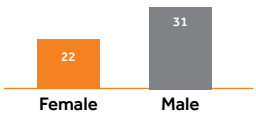

### (i) Report on diversity in employment

The Company as at June 30, 2026 operates a non-discriminatory policy in the consideration of applications for employment. The Company's policy is that the most qualified and experienced persons are recruited for appropriate job levels, irrespective of an applicant's state of origin, ethnicity, religion, gender or physical condition.

We believe diversity and inclusion are powerful drivers of competitive advantage in developing and understanding of our customers' needs and creatively addressing them.

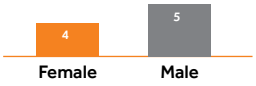

**Composition of employees by gender**

| | |
|---|---|
| Total number of female employees | 22 |
| Total number of male employees | 31 |

**Board Composition By Gender**

| | |
|---|---|
| Total number of females on the Board | 4 |
| Total number of males on the Board | 5 |

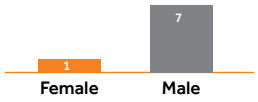

**Top Management (Executive Director To GMD/CEO) Composition By Gender**

| | |
|---|---|
| Total number of females in Executive Management position | 1 |
| Total number of males in Executive Management position | 2 |

**Top Management (AGM To GM) Composition By Gender**

| | |
|---|---|
| Total number of females in Top Management position | 1 |
| Total number of males in Top Management position | 7 |

### (ii) Employment of physically challenged

The Company has a non-discriminatory policy on the consideration of applications for employment, including those received from physically challenged. All employees are given equal opportunities to develop themselves. The Company's policy is that the highest qualified and most experienced persons are recruited for appropriate job levels irrespective of an applicant's state of origin, ethnicity, religion or physical condition.

As at June 30, 2026, the Company had 0ne person (December 2025:Nil) that is physically challenged on the staff list.

### (iii) Health, safety and welfare of employee

The Company maintains business premises designed with a view to guaranteeing the safety and healthy living conditions of its employees and customers alike. Employees are adequately insured against occupational and other hazards. In addition, the Company retains top-class hospitals where medical facilities are provided for its employees and their immediate families at its expense.

Fire prevention and fire-fighting equipment are installed in strategic locations within the Company's premises.

The Company operates Group Personal Accident and the Workmen's Compensation Insurance covers for the benefit of its employees. It also operates a contributory pension plan in line with the Pension Reform Act 2014 as Amended and other benefit schemes for its employees.

### (iv) Employee involvement and training

The Company encourages participation of employees in arriving at decisions in respect of matters affecting their wellbeing. Towards this end, the Company provides opportunities where employees deliberate on issues affecting the Company and its employees' interests, with a view to making inputs to decisions thereon. The Company places a high premium on the development of its manpower. Consequently, the Company sponsors its employees for various training courses, both locally and overseas.

### (v) Statement of commitment to maintain positive work environment

The Company shall strive to maintain a positive work environment that is consistent with best practice to ensure that business is conducted in a positive and professional manner and to ensure that equal opportunity is given to all qualified members of the Group's operating environment.

### (vi) Audit committee

Pursuant to Section 404(3) of the Companies and Allied Matters Act of Nigeria, the Company's Audit Committee for the period ended 30 June 2026 comprised Directors and shareholders as follows:

| | | | |
|---|---|---|---|
| 1 | Mr. Henry Omatsola Aragho | Shareholder | Chairman |
| 2 | Mr. Idaere Gogo Ogan | Shareholder | Member |
| 3 | Mr. Akindele Gbogboade | Shareholder | Member |
| 4 | Mr. Abubakar Aribidesi Jimoh | Director | Member |
| 5 | Mrs. Ojinika Nkechinyelu Olaghere | Director | Member |

The functions of the Audit Committee are as provided in Section 404(7) of the Companies and Allied Matters Act of Nigeria.

### Auditors

Messrs. KPMG Professional Services, having satisfied the relevant corporate governance rules on their tenure in office have indicated their willingness to continue in office as auditors to the Company. In accordance with Section 401 (2) of the Companies and Allied Matters Act, 2020, therefore, the auditors will be re-appointed at the next annual general meeting of the Company without any resolution being passed.

# Customer Complaints and Feedback

**Access Holdings Plc is fully committed to its core value of passion for customers. The group prides itself on providing exceptional services to customers at all times. At the same time, given the number and complexity of financial transactions that take place every day, the Group recognises that there will inevitably be occasions when mistakes and misunderstandings occur. In these situations, Access Bank encourages customers to bring their concerns to the attention of the Group for prompt resolution. In addition, deliberate efforts are made to solicit customers' feedback on its products and services.**

### Complaints Channels

In order to facilitate seamless complaint and feedback process, the Bank has provided various channels for customers. These include:

- 24 hour contact centre with feedback through emails, telephone, SMS, Livechat, Social Media etc.
- Feedback portal on the Bank's website
- Customer service desks in over 300 branches and toll-free telephone lines to the office of the Group Managing Director in the banking halls of key branches.
- Correspondence from customers
- The Voice of Customer Solution
- The Ombudsman desk

### Complaints Handling

We handle customer complaints with sensitivity and in due regard for the needs and understanding of each complainant. Efforts are made to resolve customer's complaints at first level. Where this cannot be done, they are immediately referred to the appropriate persons for resolution. All complaints are logged and tracked for resolution and feedback is provided to the customer.

### Resolve or Refer command Centre

The 'Resolve or Refer' command centre serves to encourage timely service delivery and First Time Resolution (FTR) of customer issues. The 'Resolve or Refer Command Centre' which is being run by a senior management staff has the mandate to ensure that most customer issues are resolved same day. The command centre provides support to all our departments and branches on issue resolution.

### Complaints Tracking and Reporting

We diligently track complaint information for continuous improvement of our processes and services. An independent review of the root causes of complaints made is carried out and lessons learnt are fed back to the relevant business units to avoid future repetition. Customer complaint metrics are analysed and reports presented to Executive Management and the Operational Risk Management committee. Reports on customer complaints are also sent to the Central Bank as required.

## Solicited Customer Feedback

Deliberate efforts are made to solicit feedback from customers and staff on the services and products of the Bank through the following:

- Questionnaires
- Customer interviews
- Customers forum
- Quest for Excellence Sessions (for staff)
- Voice of Customer Surveys

The various feedback efforts are coordinated by our Service and innovation Group

The feedback obtained from customers are reviewed and lessons learnt are used for staff training and service improvement across the Group.

## REPORTS TO THE CBN ON FRAUDS AND FORGERIES

### Reports to National Pension Commission (PENCOM) on Fraud and Forgeries

This report represents the fraud and forgery incidents that occurred during the year. It is a summation of attempted and successful fraud incidents. We have nil report on this.

# Governance Report

## 1. Introduction

### About this Report

This Governance Report sets out how the Board of Access Holdings Plc (the Company or the Group) discharged its governance responsibilities during the six months ended 30 June 2026. It describes the framework through which the Board directs and oversees the Group, the matters to which the Board applied its attention during the period, and the way that oversight supports delivery of the Group's strategy. The report forms part of the Company's interim reporting suite and should be read together with the interim financial statements for the same period.

Our governance framework is designed to align Management's actions with the interests of shareholders while achieving an appropriate balance with the interests of other stakeholders. Our governance structures and processes comply with global best practice, the Company's charters, the applicable corporate governance codes, and the post-listing requirements of Nigerian Exchange Limited.

### Key Frameworks

The disclosure requirements of the following statutes, codes and rules, among others, are considered in preparing this report:

a) Companies and Allied Matters Act 2020

b) Central Bank of Nigeria Corporate Governance Guidelines for Financial Holding Companies in Nigeria

c) Securities and Exchange Commission Corporate Governance Guidelines

d) Nigerian Code of Corporate Governance 2018, issued by the Financial Reporting Council of Nigeria

e) Nigerian Exchange Limited Rules for Listing on the Premium Board

f) Post-Listing Rules of Nigerian Exchange Limited

## 2. Our Approach to Governance

### Our Governance Philosophy

The primary responsibility of the Board is to provide effective leadership and direction that enhances the long-term value of the Company to its shareholders and other stakeholders. The Board discharges that mandate through a framework of board and committee oversight, clearly delegated authority, robust systems of internal control, and transparent engagement with the Company's stakeholders. The Chairman provides leadership to the Board in establishing the Group's strategic direction and determining its risk appetite, while the Board considers Management's recommendations and approves the capital and operational plans through which the Group's strategic objectives are pursued.

The Group's agenda for the current phase of its journey is From Scale to Value. Addressing shareholders at the 4th Annual General Meeting held on 10 June 2026, the Chairman described the strategy as the natural evolution of the Group's journey, observing that "scale created opportunity; value creation is how we fully realise it". The governance consequence of that shift is direct. The Board's oversight is weighted increasingly towards the quality, resilience and sustainability of earnings, the discipline with which capital is allocated across the Group's businesses, and the efficiency of the operating model, rather than towards the pace of expansion alone.

The Group's evolution beyond traditional banking into a diversified financial services ecosystem, spanning investment management, insurance, pensions, consumer finance and payments alongside the core banking franchise, also shapes the governance model. Oversight must reach consistently across regulated entities in several jurisdictions and industries. The Board achieves this through subsidiary board alignment, the Group Committee of CEOs of Subsidiaries, and committee mandates that extend across the whole Group.

**How Governance Supports From Scale to Value**

The table below sets out how the Board's oversight structures are aligned to the value drivers of the Group's strategy.

| Value driver | Governance mechanism | Primary board oversight |
|---|---|---|
| Capital allocation discipline | Investment planning, execution and monitoring; review of expansion strategies | Board Finance and Investment Committee |
| Earnings quality and balance sheet resilience | Risk appetite, risk culture and risk management strategy; integrity of financial reporting and internal control | Board Risk Management Committee; Board Audit Committee |
| Operating model efficiency and digital delivery | IT strategy, digital ecosystem, customer experience, information and cyber security | Board Digital and Information Technology Committee |
| People, culture and sustainability | Human resource policies, plans and processes; sustainability practices | Board Human Resources and Sustainability Committee |
| Accountability and stewardship | Board composition, succession, evaluation and remuneration | Board Governance, Nomination and Remuneration Committee |

**Application of the Governance Codes**

We confirm, to the best of our knowledge, that the Company complied with the following codes of corporate governance and listing standards during the period under review:

a) The Securities and Exchange Commission Corporate Governance Guidelines

b) The Central Bank of Nigeria's Corporate Governance Guidelines for Financial Holding Companies in Nigeria

c) The Financial Reporting Council's Nigerian Code of Corporate Governance

d) The Nigerian Exchange Rules for Listing on the Premium Board

e) The Post-Listing Rules of Nigerian Exchange Limited

In the event of any conflict between the provisions of the respective codes and rules, the Company defers to the provisions of the CBN Corporate Governance Guidelines, the CBN being its primary regulator.

**Key Board Considerations During the Period**

The Board devoted considerable time and attention to the following matters during the first half of 2026.

**Financial reporting and performance**

The Board approved the interim and full year unaudited financial statements and the Company's 2026 result release calendar. Management's report on the Group's actual financial performance was presented relative to the approved budget at each quarterly review, enabling the Board to assess execution against plan.

**Board and executive appointments**

The Board approved senior Management and Board appointments, including appointments to the boards of subsidiaries. Ms. Bolaji Olaitan Agbede retired as Executive Director with effect from 30 June 2026. At the 4th Annual General Meeting held on 10 June 2026, Mr. Olusegun Ogbonnewo and Mrs. Ojinika Olaghere retired by rotation and, being eligible, were re-elected by shareholders.

**Portfolio and expansion decisions**

The Board approved subsidiary expansion activities and, through the Board Finance and Investment Committee, reviewed the Company's expansion strategies. These reviews were conducted through the lens of the Group's transition from scale to value, with attention to the returns expected from capital committed and the contribution of each platform to the Group's earnings mix.

**Governance framework and policies**

The Board reviewed and approved a range of policies and approved revised charters for its Committees, ensuring that Committee mandates remain aligned to the Group's strategy, its expanding subsidiary footprint and the expectations of its regulators.

**Shareholder engagement**

The Board approved the Notice of the 4th Annual General Meeting and oversaw the Company's engagement with shareholders at that meeting on the Group's performance, its capital position and the outlook for dividend distributions.

## 3. The Board of Directors

**Composition of the Board**

The composition of the Board for the period ended 30 June 2026 is set out below.

| S/N | Name | Designation |
|---|---|---|
| 1. | Mr. Aigboje Aig-Imoukhuede | Chairman / Non-Executive Director |
| 2. | Mr. Abubakar Aribidesi Jimoh | Independent Non-Executive Director |
| 3. | Mrs. Fatimah Bintah Bello-Ismail | Independent Non-Executive Director |
| 4. | Mrs. Ojinika Nkechinyelu Olaghere | Non-Executive Director |
| 5. | Mr. Olusegun Babalola Ogbonnewo | Non-Executive Director |
| 6. | Mrs. Ibironke Olatokunbo Adeyemi | Independent Non-Executive Director |
| 7. | Mr. Innocent C. Ike | Group Managing Director / Chief Executive Officer |
| 8. | Ms. Bolaji Olaitan Agbede* | Executive Director |
| 9. | Mr. Olanrewaju Babatunde Bamisebi | Executive Director |

* Ms. Bolaji Olaitan Agbede retired as Executive Director with effect from 30 June 2026.

As at 30 June 2026 the Board comprised nine members: six Non-Executive Directors, three of whom are independent, and three Executive Directors. Four members of the Board are female, representing 44% of its membership. The composition subscribes to the global best-practice principle that Non-Executive Directors should exceed Executive Directors in number, and there are no shadow or alternate directors, so that the independence of the Non-Executive Directors is brought fully to bear on the decisions of the Board.

## DIRECTOR PROFILES

### Mr. Aigboje Aig-Imoukhuede, CFR

*Chairman and Non-Executive Director*

Aigboje Aig-Imoukhuede is a highly respected investor, banker and philanthropist with a track record of major accomplishments in for-profit and non-profit endeavours within and beyond Nigeria. He oversees an ecosystem of investments encompassing banking and finance, insurance, technology, real estate, and oil and gas. His career in banking and finance spans four decades and has earned him national and international recognition, including Commander of the Order of the Federal Republic (CFR), conferred by the Federal Republic of Nigeria; Ernst & Young Entrepreneur of the Year (West Africa) in 2011; and African Banker Magazine's African Banker of the Year in 2013 and African Banker Lifetime Achievement in 2024.

He was Group Managing Director and Chief Executive Officer of Access Bank Plc from 2002, following a management buy-in transaction. Under his leadership, Access Bank was transformed from a minor player into a leading African bank with a significant global footprint. Having retired as Chief Executive Officer in 2013, he returned in March 2024 as Chairman of Access Holdings Plc.

He was the founding Chairman of the FMDQ Securities Exchange and served as President of the Nigerian Stock Exchange, becoming the first African to chair two national exchange platforms. He holds an executive MBA awarded jointly by the London School of Economics, NYU Stern Business School and HEC Paris, an LLB from the University of Benin, and a BL from the Nigerian Law School.

Through the Aig-Imoukhuede Foundation, Aigboje and his wife, Ofovwe, drive initiatives focused on grooming Nigeria's future government leaders, transforming public sector effectiveness and improving access to quality primary healthcare, including the Adopt-A-Healthcare-Facility Programme. He is a member of the International Advisory Board of Oxford University's Blavatnik School of Government and an inducted member of the American Academy of Arts and Sciences.

He was 59 years old as at the end of the reporting period and is resident in Nigeria.

### Mr. Abubakar Aribidesi Jimoh, CFA

*Independent Non-Executive Director*

Mr. Jimoh is a versatile professional with over thirty years' experience in the financial services sector, covering client relationship management, treasury, market risk, credit risk management, operational risk management, and project and portfolio management. He is the Group Managing Director of Trustbanc Group, an investment management firm. Prior to his current role, he led the transformation of Associated Discount House from a failing discount house into a merchant bank, now Coronation Merchant Bank Limited.

Before joining Associated Discount House, he was a General Manager and Divisional Head at the UBA Group with responsibility for balance sheet management, market risk and investor relations, and served as Chief Risk Officer for various business segments including UBA Africa and UBA Capital. He worked with the Royal Bank of Canada Financial Group between 1999 and 2005, and was Chief Internal Control Officer and Divisional Chief in charge of Private Sector Portfolio Management at the African Development Bank between 2005 and 2008. He served as an Independent Non-Executive Director on the board of Shelter Afrique between 2012 and 2013, and currently sits on the boards of TrustBanc Financial Group, J Six Group, Impact Credit Guarantee Limited and Film One Group.

He holds a Bachelor of Science and a Master of Science in Finance from the University of Lagos. He is a Chartered Financial Analyst, an Associate of the Institute of Chartered Accountants of Nigeria and of the Chartered Institute of Bankers of Nigeria, a Chartered Internal Auditor, and a Certified General Accountant of Ontario, Canada. He has attended executive management development programmes at Harvard Business School, London Business School and Lagos Business School.

He is the Chairman of the Board Finance and Investment Committee and the Vice-Chairman of the Board Risk Management Committee. He was 60 years old as at the end of the reporting period and is resident in Nigeria.

## Mrs. Fatimah Bintah Bello-Ismail

*Independent Non-Executive Director*

Mrs. Bello-Ismail is a lawyer with more than thirty-six years' experience in the legal and financial services fields. She began her legal career at the Department of Public Prosecution in the Federal Ministry of Justice, Lagos, before working as counsel in the firm of Kehinde Sofola & Co. She also worked at the Nigerian Social Insurance Trust Fund and Continental Merchant Bank, formerly Chase Merchant Bank, before becoming Managing Partner at Universal Chambers, a full-service commercial law firm.

She obtained her bachelor's degree in law from Ahmadu Bello University, Zaria in 1984 and was called to the Nigerian Bar in 1985.

She sits on the boards of Jex Markets Limited and the Katsina State Development Board, and is a member of the Nigerian Bar Association and the International Bar Association, and Founder and Trustee of the Home of Hospitality Development Initiative. She was a Council Member of the Nigerian Stock Exchange between 2017 and 2020 and a Non-Executive Director of Nigerian Exchange Group between 2020 and 2022.

She is the Chairman of the Board Governance, Nomination and Remuneration Committee. She was 64 years old as at the end of the reporting period and is resident in Nigeria.

## Mrs. Ibironke Olatokunbo Adeyemi

*Independent Non-Executive Director*

Mrs. Adeyemi is an accomplished professional with over thirty years' experience in education and corporate governance, with a record of strategic management, transformative leadership and financial acumen. She is currently the Managing Director of Chrisland Schools Limited. Prior to that role she served as an Executive Director of Chemo-Pharma Laboratories, driving financial efficiency and operational growth, and she previously worked with Peat Marwick Ani and Ogunde, now KPMG Professional Services, as an audit trainee and chartered accountant.

She is the Chairperson of Salvation International School, Ikeja, and a member of the Institute of Directors in Nigeria. She also serves on the boards of Chrisland University, the Victor and Winifred Awosika Foundation, Holy Trinity Hospital and City Commercial Enterprises Limited.

She obtained a bachelor's degree in Economics in 1986, a Postgraduate Diploma in Education in 2018 and a master's degree in Educational Administration and Planning in 2020, all from the University of Lagos. She qualified as a chartered accountant over thirty years ago and has attended the Lagos Business School Advanced Management Programme II in 2000, the Institute of Directors' Company Directors' Course in 2012 and a Harvard Business School executive course in 2022.

She is the Chairman of the Board Audit Committee. She was 60 years old as at the end of the reporting period and is resident in Nigeria.

## Mrs. Ojinika Nkechinyelu Olaghere, FCA

*Non-Executive Director*

Mrs. Olaghere is a seasoned professional with over thirty-five years' experience in banking, administration and consulting. She is currently the Managing Director of Rickela Consulting Limited, a management consultancy that provides training, capacity building, coaching and advisory services to companies in the financial services sector.

She joined Access Bank Plc in 2007 as a General Manager in the Enterprise Resource Support Group, where she spearheaded the rationalisation of the Bank's assets following the acquisition of Intercontinental Bank. She retired from the Bank in June 2018 as Executive Director, Operations and Information Technology, having led the upgrade of the Bank's major IT infrastructure and executed the Operations Transformation Programme, which resulted in the Bank being ranked among the top five in KPMG's 2018 Banking Industry Customer Service Satisfaction Survey. Prior to joining Access Bank she spent sixteen years with Ecobank Nigeria in the Operations and Consumer Banking Groups.

She sits on the boards of Nigerian Exchange Group Plc, Coronation Life Assurance Limited and Pelijini Nigeria Limited. She holds a Bachelor of Arts in French from the University of Nigeria, Nsukka, is a Fellow of the Institute of Chartered Accountants of Nigeria, and has attended leadership development programmes at INSEAD, London Business School, Harvard Business School, Lagos Business School and the Massachusetts Institute of Technology.

She is the Chairman of the Board Human Resources and Sustainability Committee and of the Board Digital and Information Technology Committee. She was 63 years old as at the end of the reporting period and is resident in Nigeria.

## Mr. Olusegun Babalola Ogbonnewo

*Non-Executive Director*

Mr. Ogbonnewo has over thirty years' professional experience spanning retail and commercial banking, human capital development, operations and technology, financial inclusion, payment systems and financial technology. He was Operating Director of Tengen Family Office between September 2017 and December 2023 and is currently a financial services consultant and board adviser.

He held several roles at Access Bank Plc between 2006 and 2017, including Group Head, Channels Services; Head, Transaction Services Division; Group Head, Domestic Payments; Group Head, Central Processing Centre; Group Head, Settlements and Payments; and Group Head, Branch Operations. He served in various capacities at Guaranty Trust Bank between 1993 and 2006, including Head, International Settlements and Divisional Head, Banking Operations and Information Technology at Guaranty Trust Bank Gambia Limited, the Bank's first offshore subsidiary. He was earlier a Branch Manager and Programme Officer at Peoples Bank of Nigeria Limited between 1990 and 1992.

He sits on the boards of Coronation Insurance Plc, Coronation Registrars Limited, Trium Limited, Fiducia Data Services Limited, Oxygen X Limited, Remita and Coronation Insurance Ghana Limited. He served on sub-committees of the CBN-led Payments System Vision 2020 between 2007 and 2012 and was a member of the Verve Card Advisory Council. He holds a Bachelor of Arts in Education and a master's degree in public administration from the University of Ilorin, and an MBA from IESE, University of Navarra, Barcelona, in partnership with Lagos Business School. He is an Honorary Senior Member of the Chartered Institute of Bankers of Nigeria.

He is the Chairman of the Board Risk Management Committee. He was 65 years old as at the end of the reporting period.

## Mr. Innocent C. Ike, FCA, FCIB

*Group Managing Director and Chief Executive Officer*

Mr. Ike is a seasoned banker, strategist and corporate leader with over three decades of experience in banking and financial services, ten years of which were spent at Access Bank, where he rose to General Manager overseeing portfolios in the corporate, commercial and public sectors. His career spans commercial and investment banking, digital innovation and strategic leadership, marked by a consistent record of institutional growth and operational excellence.

He served as Managing Director and Chief Executive Officer of Polaris Bank from 2020 to 2022, during which he launched VULTe, the bank's digital banking platform, which earned the BusinessDay BAFI Digital Bank of the Year Award and the Nigerian Fintech Digital Bank of the Year Award in 2021 and 2022 respectively. As Executive Director in charge of Technology and Services he led a comprehensive overhaul of the Bank's technology infrastructure. He previously held the position of Executive Director at Skye Bank Plc and Keystone Bank Limited, and his earlier career at Guaranty Trust Bank and Deloitte built strong foundations in audit, treasury, technology, operations and business development.

He graduated from the University of Lagos with a BSc (Hons) in Accounting in 1988 as Best Graduating Student. He is a Fellow of the Chartered Institute of Bankers of Nigeria, a Fellow of the Institute of Chartered Accountants of Nigeria, a certified IFRS expert, an Associate of the Chartered Institute of Stockbrokers of Nigeria and an authorised dealing clerk of the Nigerian Exchange. He holds an Executive Certificate in Strategy and Innovation from the MIT Sloan School of Management and a Certificate in Private Equity from the Saïd Business School, Oxford University, and has completed advanced leadership programmes at Harvard Business School, Wharton and IMD.

He has served on the boards of Skye Bank Gambia Limited, MainOne Cable Company, Unified Payments Systems Limited and Pay Attitude Global Limited. He was 62 years old as at the end of the reporting period.

## Ms. Bolaji Olaitan Agbede

*Executive Director (retired with effect from 30 June 2026)*

Ms. Agbede is a versatile professional with over three decades of experience in human resources management, customer relationship management and banking operations. She has a proven record of people's integration during mergers and acquisitions, culture transformation and the execution of corporate strategies.

She began her professional career at Guaranty Trust Bank, holding multiple roles within commercial banking and operations and advancing from Executive Trainee in 1992 to Manager by 2001. In 2003 she was appointed Chief Executive Officer of JKG Limited, a business consulting firm, and later that year joined Access Bank as an Assistant General Manager responsible for the Bank's portfolio of chemical trading companies. She was Group Head, Human Resources of Access Bank Plc between 2010 and 2022.

She holds a bachelor's degree in Mathematics and Statistics from the University of Lagos (1990) and an MBA from Cranfield University (2002). She is a member of the Chartered Institute of Management, UK and the Chartered Institute of Personnel Management of Nigeria, and has attended the High-Performance Leadership Programme at IMD and the Strategic Talent Management Programme at London Business School. She has served on the boards of Access ARM Pensions Limited, the Nigerian Business Coalition Against AIDS, the HIV Trust Fund of Nigeria and Nigerian Mortgage Refinance Company Plc.

She was 56 years old as at the end of the reporting period and is resident in Nigeria.

## Mr. Lanre Bamisebi

*Executive Director*

Mr. Bamisebi is a technology and business executive with over two decades of experience spanning information technology, cyber security, talent development and finance. He has extensive pan-African experience, having managed IT operations across 22 African countries, and is a pioneer advocate for Generative AI for Good, committed to leveraging artificial intelligence and digital transformation to drive innovation and business growth.

Before his appointment as Executive Director at Access Holdings, he served as Managing Director of Finserve Africa, the financial technology arm of Equity Bank, and as Group Director for IT and Operations at Equity Group Holdings Limited, Kenya. Prior to that he was Group Chief Information Officer at Diamond Bank Plc and United Bank for Africa.

He holds a Higher National Diploma in Computer Science from The Polytechnic, Ibadan, and dual bachelor's degrees in Accounting from Olabisi Onabanjo University and in Computing and Information Technology from the University of Derby, United Kingdom. He also holds an MBA from Durham Business School and an Executive MBA from Quantic School of Business and Technology, and has completed executive management development programmes at Harvard, Wharton, IMD and Cambridge Judge Business School. He is a director of Hydrogen Payment Services Company Limited.

He was 53 years old as at the end of the reporting period.

## Mr. Sunday Ekwochi, HCIB

*Company Secretary*

Mr. Ekwochi was appointed Company Secretary of the Company in May 2022. He graduated as a top student in Law from the University of Jos with a second class upper division degree in 1996 and from the Nigerian Law School in February 1998, also with a second class upper division. He has over two decades of banking experience acquired at the then African Express Bank, Fidelity Bank and Access Bank Plc.

He qualified as a Chartered Secretary with the Institute of Chartered Secretaries and Administrators, London in 2003 and has attended management development programmes at London Business School, Euromoney, Wharton Business School and IMD. He is an Honorary Senior Member of the Chartered Institute of Bankers of Nigeria and a member of the Chartered Institute of Directors of Nigeria.

He served as Vice-Chair of the Association of Banks Legal Advisers and Company Secretaries and as Chairman of its Capacity Development Committee.

## 4. Governing Structures and Delegation of Authority

**Role and Responsibilities of the Board**

The principal responsibility of the Board is to promote the long-term success of the Company by creating and delivering sustainable shareholder value. The Board leads and provides direction for Management by setting policy direction and strategy and by overseeing their implementation. It seeks to ensure that Management delivers on both long-term growth and short-term objectives, striking the right balance between the two. In setting and monitoring the execution of strategy, consideration is given to the impact of those decisions on the Company's obligations to its stakeholders, including shareholders, employees, suppliers and the communities in which the Group operates.

The Board is responsible for ensuring that robust systems of internal control are maintained, and that Management operates an effective risk management and oversight process across the Company, so that growth is delivered in a controlled and sustainable way. The Board is also responsible for determining and promoting the collective vision of the Company's purpose, values, culture and behaviours. It has overall responsibility for reviewing strategic plans and performance objectives, financial plans and the annual budget, key operational initiatives, major funding and investment proposals, financial performance and corporate governance practices.

Matters reserved for the Board include, but are not limited to, the following:

a) Defining the business strategy and objectives.

b) Formulating risk policies.

c) Approval of quarterly, half-yearly and full year financial statements.

d) Approval of significant changes in accounting policies and practices.

e) Appointment or removal of Directors and the Company Secretary.

f) Approval of major acquisitions, divestments of operating companies, disposal of capital assets or capital expenditure.

g) Approval of the charters and membership of Board Committees.

h) Setting annual Board objectives and goals.

i) Approval of the allotment of shares.

j) Approval of the framework for determining the policy and specific remuneration of Executive Directors.

k) Monitoring delivery of the strategy and performance against plan.

l) Reviewing and monitoring the performance of the Group Chief Executive Officer and the executive team.

m) Ensuring the maintenance of ethical standards and compliance with relevant laws.

n) Performance appraisal and compensation of Board members and senior executives.

o) Ensuring effective communication with shareholders.

p) Ensuring the integrity of financial reports by promoting disclosure and transparency.

q) Succession planning for key positions.

**Oversight of Strategy**

In discharging its oversight function, the Board engages Management on the planning, definition and execution of the Company's strategy. Management presents reports on the implementation of defined strategic objectives as a standing item on the Board's agenda, enabling the Board to evaluate and provide constructive feedback on execution.

The Board holds an annual retreat at which the strategy for the coming year is rigorously debated and agreed between Management and the Board. The Group Retreat for the year under review was held on 10 and 11 April 2026, followed by a Board Talent Retreat on 12 and 13 April 2026.

Management provides the Board with quarterly updates on the implementation of strategy, affording the Board the opportunity to challenge performance and to assess significant risk issues together with the mitigating controls in place. Actual financial performance is reported relative to the planned budget, and peer comparison is a regular feature of Management reporting so that performance is benchmarked against that of competitors.

In the current phase of the Group's strategy, the Board's challenge to Management is directed at the quality of returns as much as at the pace of growth: whether capital deployed across the Group's businesses earns more than its cost, whether the operating model is releasing efficiency, and whether the diversified platform of banking, investment management, insurance, pensions, consumer finance and payments is converting the Group's scale into durable value for shareholders.

**The Role of the Group Chairman**

The principal role of the Group Chairman is to provide leadership and direction to the Board. The Chairman is accountable to the Board and to shareholders and liaises with Management through the Group Managing Director and Chief Executive Officer. The duties and responsibilities of the Chairman are as follows:

a) Taking primary responsibility for the effective operation of the Board and ensuring that the Board works towards achieving the Company's strategic objectives.

b) Setting the agenda for Board meetings in conjunction with the Group Chief Executive Officer and the Company Secretary.

c) Approving the annual Board activities calendar.

d) Playing a leading role in ensuring that the Board and its Committees have the relevant skills and competencies for their roles.

e) Ensuring that Board meetings are properly conducted and that the Board is effective and functions in a cohesive manner.

f) Ensuring that Directors receive accurate and clear information about the affairs of the Company in a timely manner to enable them to take sound decisions.

g) Acting as the main link between the Board and the Group Managing Director and Chief Executive Officer, and advising him on the effective discharge of his duties.

h) Ensuring that all Directors focus on their key responsibilities and play constructive roles in the affairs of the Company.

i) Ensuring that induction programmes are conducted for new Directors and that continuing education programmes are in place for all Directors.

j) Ensuring effective communication with the Company's institutional shareholders and strategic stakeholders.

k) Taking a leading role in the assessment, improvement and development of the Board.

l) Presiding over general meetings of shareholders.

**The Role of the Group Managing Director and Chief Executive Officer**

The Group Managing Director and Chief Executive Officer has overall responsibility for leading the development and execution of the Company's long-term strategy with a view to creating sustainable shareholder value. He manages day-to-day operations and ensures that they are consistent with the policies approved by the Board. His duties and responsibilities include the following:

a) Acting as head of the Management team and being answerable to the Board.

b) Ensuring that a culture of integrity and legal compliance is imbibed by personnel at all levels of the Company.

c) Ensuring the Company's consistent achievement of its financial objectives and goals.

d) Ensuring that the Company's philosophy, vision, mission and values are disseminated and practised throughout the Company.

e) Ensuring that the allocation of capital reflects the Company's risk management philosophy.

f) Ensuring that the Company's risks are controlled and managed effectively and optimally, in line with its strategies and objectives.

g) Serving as the Company's chief spokesman and ensuring that it is properly presented to its various publics.

h) Ensuring that Directors are provided with sufficient information to support their decision making.

**Separation of Roles**

In line with best practice, the roles of Chairman and Group Chief Executive Officer are assumed by different individuals to ensure a balance of power and authority. The Board can reach impartial decisions because its Non-Executive Directors comprise a blend of independent and non-independent directors, with no shadow or alternate directors.

**The Role of the Company Secretary**

Directors have separate and independent access to the Company Secretary. The Company Secretary is responsible, among other things, for ensuring that Board procedures are observed and that the Company's Memorandum and Articles of Association and the relevant rules and regulations are complied with. He assists the Chairman and the Board in implementing and strengthening corporate governance practices and processes with a view to enhancing long-term shareholder value and supports the Chairman in ensuring good information flow within the Board and its Committees and between Management and the Non-Executive Directors.

The Company Secretary facilitates the orientation of new Directors and coordinates their professional development. As primary compliance officer for the Company's compliance with the listing rules of Nigerian Exchange Limited, he is responsible for designing and implementing the framework for that compliance, including advising Management on the prompt disclosure of material information. He attends and prepares the minutes of all Board meetings, serves as secretary to all Board Committees, assists in developing the agenda for Board and Committee meetings, and ensures coordination and liaison between the Board, its Committees and Management. The appointment and removal of the Company Secretary are the exclusive preserve of the Board.

**Delegation of Authority**

Ultimate responsibility for the Company's operations rests with the Board. The Board retains effective control through a well-developed committee structure that provides in-depth focus on its responsibilities. Each Board Committee has written terms of reference and presents regular reports to the Board on its activities. The Board delegates authority to the Group Managing Director and Chief Executive Officer to manage the affairs of the Company within the parameters it establishes from time to time.

The Company operates a Delegation of Authority Policy that defines the limits of authority assigned to specified positions of responsibility and establishes the maximum obligations that may be approved by individuals and committees. The approval of commitments and transactions must always be made by the parties to whom approval authority has been assigned.

**Management Committee**

The Management Committee is chaired by the Group Managing Director and Chief Executive Officer and comprises the Executive Directors and all Group Heads. It is primarily responsible for implementing the strategies approved by the Board and for ensuring the efficient deployment of the Company's resources.

**Group Committee of CEOs of Subsidiaries**

The Group Committee of CEOs of Subsidiaries supports the Group Managing Director and Chief Executive Officer in guiding and controlling the overall direction and success of the businesses of the Company and its subsidiaries. Its responsibilities include the following:

a) Ensuring effective implementation of, and alignment with,

the Group strategy by the subsidiaries.

b) Ensuring overall alignment of the business performance of the subsidiaries with the Company's overarching strategy and plans.

c) Reviewing the strategic and business performance of the subsidiaries against approved plans and budgets and agreeing recommendations for corrective action.

d) Promoting the identification of synergies and ensuring the implementation of initiatives designed to deliver them.

e) Discussing and monitoring major reputation and brand management risk issues as they affect the Company or any of its subsidiaries.

**Board Meetings**

The Board meets quarterly, and emergency meetings are convened as required. The annual calendar of Board and Committee meetings is approved by the Board in advance during the last quarter of the preceding year. Material decisions may be taken between meetings through written resolutions in accordance with the Company's Articles of Association.

All Directors are provided with notices, agenda and meeting papers in advance of each meeting so that they can prepare adequately. Where a Director is unable to attend, he or she is still provided with the relevant papers and reserves the right to discuss with the Chairman any matter that he or she may wish to raise at the meeting. Directors also receive regular updates on developments in the regulatory and business environment.

In demonstration of its commitment to environmental sustainability, the Board circulates board documentation to members through a secure electronic portal, Diligent Boardbooks.

The Board met six times during the period under review, in addition to the Group Retreat, the Board Talent Retreat and the Annual General Meeting.

**Board Meeting Attendance**

Attendance by Directors at Board meetings and other Board events during the first half of 2026 is set out below. The six Board meetings were held on 29 January, 20 February (two meetings), 30 April, 22 May and 30 May 2026.

| Director | Board meetings | Group Retreat | Talent Retreat | AGM |
|---|---|---|---|---|
| Aigboje Aig-Imoukhuede | 6/6 | Attended | Attended | Attended |
| Abubakar Jimoh | 6/6 | Attended | Attended | Attended |
| Fatimah Bello-Ismail | 6/6 | Attended | Attended | Attended |
| Ibironke Adeyemi | 6/6 | Attended | Attended | Attended |
| Ojinika Olaghere | 6/6 | Attended | Attended | Attended |
| Olusegun Ogbonnewo | 6/6 | Attended | Attended | Attended |
| Innocent C. Ike | 6/6 | Attended | Attended | Attended |
| Bolaji Agbede | 6/6 | Attended | Attended | Attended |
| Lanre Bamisebi | 6/6 | Attended | Attended | Attended |

Attendance is expressed as the number of meetings attended out of the number held while the Director was a member of the Board.

## 5. Board Composition and Effectiveness

**Board Composition: Guiding Principles**

The Fit and Proper Person Policy is designed to ensure that the Company and its subsidiaries are managed and overseen by capable and trustworthy individuals. The Board Governance, Nomination and Remuneration Committee is responsible for Executive Director succession planning and recommends new appointments to the Board. The Committee takes account of the existing range of skills, experience, background and diversity on the Board, in the context of the Group's strategic direction, before articulating the specification for the candidate sought, and considers the need for appropriate demographic and gender balance. Candidates who meet the criteria set by the Committee are subjected to enhanced due diligence enquiries.

The Board's composition subscribes to global best practice on the need for Non-Executive Directors to exceed Executive Directors in number. In the first half of 2026 the Board had more Non-Executive Directors than Executive Directors, three of the Non-Executive Directors being independent. Non-Executive Directors are appointed to bring independent, specialist knowledge and impartiality to the development of strategy and the monitoring of its execution. The Board is committed to improving gender diversity in line

with its diversity policy and had 44% female membership as at 30 June 2026. The Board is satisfied that it is sufficiently diversified to optimise its performance and to deliver sustainable value to stakeholders.

### Term of Office

Non-Executive Directors are appointed for an initial term of four years and may be re-elected for a maximum of two further terms of four years each, subject to satisfactory performance and shareholder approval. Independent Non-Executive Directors are subject to a maximum tenure of eight years, while Executive Directors are appointed for an initial term of four years subject to a maximum cumulative tenure of twelve years, in line with the CBN Corporate Governance Guidelines. Executive Directors are prohibited from holding other directorships outside the Group or its investee companies.

### Election and Re-Election of Directors

In accordance with the Company's Articles of Association, one third of all Non-Executive Directors, rounded down, are offered for re-election each year depending on their tenure on the Board, together with any Directors appointed by the Board since the last Annual General Meeting.

Mr. Olusegun Ogbonnewo and Mrs. Ojinika Olaghere retired from office at the Company's 4th Annual General Meeting held on 10 June 2026 and being eligible for re-election, were duly re-elected by shareholders.

### Board Effectiveness

Boards today are required to be more engaged, more knowledgeable and more effective than in the past as they contend with new pressures, challenges and risks. As stakeholder expectations continue to grow, the Board must set strategic priorities across diverse business segments and markets and monitor the Group's risk profile, demonstrating that good corporate governance is not a box-ticking exercise by setting the right ethical tone from the top. The effectiveness of the Board is achieved through composition, induction, training and a rigorous evaluation process, and derives from the diverse range of skills and competencies of Executive and Non-Executive Directors with deep banking, financial, professional and entrepreneurial experience.

### Induction and Continuing Development

The Company has a Directors' Orientation and Continuous Education Policy which provides that Directors should be exposed to domestic and international training to improve their decision-making capacity and thereby contribute to the overall effectiveness of the Board.

New Directors are taken through a personalised induction programme which includes one-on-one meetings with Executive Directors and the senior executives responsible for the Group's key business areas. Those sessions focus on the challenges, opportunities and risks facing each business area, and the programme covers an overview of the strategic business units as well as Board processes and policies.

A new Director is provided with an induction pack containing the charters of the various Board Committees, significant reports, important statutes and policies, minutes of previous Board meetings and a calendar of Board activities. On the recommendation of the Board Governance, Nomination and Remuneration Committee, the Board approves the annual training plan and budget for Directors, and the Company Secretary ensures implementation of the plan and reports regularly to the Board.

The training programme attended by Directors during the period under review is set out below.

| Director | Programme | Facilitator | Date |
|---|---|---|---|
| Mrs. Ojinika Olaghere | Leading the AI-Driven Organization | MIT Executive Education Programme | 20 to 24 April 2026 |
| Mr. Aigboje Aig-Imoukhuede<br>Mr. Abubakar Aribidesi Jimoh<br>Mrs. Fatimah Bintah Bello-Ismail<br>Mrs. Ojinika Nkechinyelu Olaghere<br>Mr. Olusegun Babalola Ogbonnewo<br>Mrs. Ibironke Olatokunbo Adeyemi<br>Mr. Innocent C. Ike<br>Ms. Bolaji Olaitan Agbede<br>Mr. Lanre Bamisebi | Training on Derivatives and Other Comprehensive Income | KPMG professional services | 21 May 2026 |

### Access to Information and Resources

Management recognises the importance of ensuring the flow of complete, adequate and timely information to Directors on an ongoing basis so that they can make informed decisions in the discharge of their responsibilities. There is continuing engagement between executive Management and the Board, and the heads of strategic business units attend Board meetings to make presentations. The Company's external auditors attend meetings of the Board Audit Committee and the Statutory Audit Committee to present on the audit of the Company's financial statements. Directors have unrestricted access to Management and to Company information, together with the resources necessary to carry out their responsibilities, including access to external professional advice at the Company's expense in line with policy.

### Board Evaluation and Performance

Board assessment, conducted effectively, gives the Board the opportunity to identify and remove obstacles to better performance and to strengthen what already works well. The Board has established a policy on performance evaluation which provides for the independent annual evaluation of its own performance, that of its Committees and that of individual Directors. The evaluation is carried out by an independent consultant approved by the Board.

The Board believes that the use of an independent consultant promotes the objectivity and transparency of the evaluation process. The assessment transcends box-ticking and involves a rigorous process of online self-evaluation and 360-degree feedback with a heavy focus on qualitative considerations. It includes an assessment of the Company's corporate governance frameworks and policies, an evaluation of the Board and its Committees, and a review of the effectiveness of the Independent Directors.

In compliance with the CBN Code of Corporate Governance, the 2025 Annual Board Performance Evaluation Report was presented at the Board meeting held on 29 January 2026 by a representative of Ernst & Young, the Company's board evaluation consultants.

The Company's performance on corporate governance is monitored and reported. The Company also carries out extensive reviews of its compliance with the corporate governance guidelines issued by the CBN and the SEC and with the Nigerian Code of Corporate Governance 2018, with appropriate reports rendered to the regulators.

## 6. Board Committees

The Board exercises oversight responsibility through its standing committees, each of which has a charter that clearly defines its purpose, composition, structure, frequency of meetings, duties, tenure and reporting line to the Board. In line with best practice, the Chairman of the Board is not a member of any Committee.

The Board had six standing committees as at 30 June 2026: the Board Audit Committee, the Board Digital and Information Technology Committee, the Board Finance and Investment Committee, the Board Governance, Nomination and Remuneration Committee, the Board Human Resources and Sustainability Committee, and the Board Risk Management Committee.

While each Committee has authority to examine issues within its remit and to report its decisions or recommendations to the Board, ultimate responsibility for all matters lies with the Board. This section sets out the activities of the Committees during the first half of 2026.

### Board Audit Committee

The Committee supports the Board in performing its oversight responsibility relating to the integrity of the Group's financial statements and the financial reporting process, and to the independence and performance of the Group's internal and external auditors. It oversees the Group's system of internal control and the mechanism for receiving complaints regarding the Group's accounting and operating procedures.

During the review period the Committee considered the Group's financial performance and recommended the internal audit reports and the Chief Financial Officer's reports to the Board for approval. Its work is central to the credibility of the Group's earnings, which is the foundation on which the transition from scale to value rests. The Committee met four times during the reporting period and is chaired by Mrs. Ibironke Adeyemi.

Membership and attendance for the period were as follows.

| Member | Role | Meetings attended |
|---|---|---|
| Ibironke Adeyemi | Chairman | 4/4 |
| Abubakar Jimoh | Vice-Chairman | 4/4 |
| Ojinika Olaghere | Member | 4/4 |
| Fatimah Bello-Ismail | Member | 4/4 |

**Board Digital and Information Technology Committee**

The Committee oversees the end-to-end digital delivery of the Group's products and services. It receives regular reports on the Group's digital ecosystem and customer experience, oversees the Group's IT strategy, and monitors investment in IT infrastructure and support systems to ensure the safe and effective delivery of products and services.

The key issues considered by the Committee during the period included reports on information technology, information and cyber security, customer feedback, and the internal audit report on the Company's information technology and digital systems. Efficiency of the operating model and resilience of the digital platform are principal levers of value creation for the Group, and the Committee's oversight is directed accordingly. The Committee met three times during the reporting period and is chaired by Mrs. Ojinika Olaghere.

Membership and attendance for the period were as follows.

| Member | Role | Meetings attended |
|---|---|---|
| Ojinika Olaghere | Chairman | 3/3 |
| Olusegun Ogbonnewo | Vice-Chairman | 3/3 |
| Fatimah Bello-Ismail | Member | 3/3 |
| Innocent C. Ike | Member | 3/3 |
| Lanre Bamisebi | Member | 3/3 |

**Board Finance and Investment Committee**

The Committee assists in monitoring the Group's strategy formulation and implementation process and oversees investment planning, execution and monitoring.

The key issues considered by the Committee during the period included strategy updates on corporate strategy implementation, portfolio management, investor relation, financial reporting and innovation management. The Committee is the primary forum through which the Board tests capital allocation discipline, satisfying itself that capital committed to the Group's businesses is expected to earn a return above its cost. The Committee met twice during the reporting period and is chaired by Mr. Abubakar Jimoh.

Membership and attendance for the period were as follows.

| Member | Role | Meetings attended |
|---|---|---|
| Abubakar Jimoh | Chairman | 2/2 |
| Olusegun Ogbonnewo | Vice-Chairman | 2/2 |
| Fatimah Bello-Ismail | Member | 2/2 |
| Ibironke Adeyemi | Member | 2/2 |
| Innocent C. Ike | Member | 2/2 |

**Board Governance, Nomination and Remuneration Committee**

The Committee advises the Board on its oversight responsibilities in relation to governance and to the appointment, re-election and removal of Directors. It also advises on Directors' induction and training and on Board performance evaluation, and is responsible for recommending appropriate remuneration for Directors and other staff to the Board for approval.

The key decisions of the Committee during the reporting period were Board appointments, including subsidiary board appointments, the approval of policies, the review of employee remuneration, and the recommendation of the Directors' training plan and budget. The Committee met three times during the reporting period and is chaired by Mrs. Fatimah Bello-Ismail.

Membership and attendance for the period were as follows.

| Member | Role | Meetings attended |
|---|---|---|
| Fatimah Bello-Ismail | Chairman | 3/3 |
| Abubakar Jimoh | Vice-Chairman | 3/3 |
| Ojinika Olaghere | Member | 3/3 |

**Board Human Resources and Sustainability Committee**

The Committee advises the Board on its oversight responsibilities in relation to the Company's human resource policies, plans, processes and procedures, and to its sustainability practices.

During the review period the Committee considered the Company's human resources and sustainability reports and made recommendations to the Board. Talent, culture and sustainability are treated as value drivers rather than support functions, since the Group's ability to convert scale into value depends on the capability and conduct of its people. The Committee met twice during the reporting period and is chaired by Mrs. Ojinika Olaghere.

Membership and attendance for the period were as follows.

| Member | Role | Meetings attended |
|---|---|---|
| Ojinika Olaghere | Chairman | 2/2 |
| Abubakar Jimoh | Vice-Chairman | 2/2 |
| Olusegun Ogbonnewo | Member | 2/2 |
| Fatimah Bello-Ismail | Member | 2/2 |
| Ibironke Adeyemi | Member | 2/2 |
| Innocent C. Ike | Member | 2/2 |
| Bolaji Agbede | Member | 2/2 |

**Board Risk Management Committee**

The Committee is responsible for oversight of the Group's risk management framework and advises the Board on risk appetite as well as on the risk culture and risk management strategy of the Group.

During the period under review the Committee considered the quarterly macroeconomic report, the Chief Risk Officer's report and the Chief Conduct and Compliance Officer's report. The Committee met twice during the reporting period and is chaired by Mr. Olusegun Ogbonnewo.

Membership and attendance for the period were as follows.

| Member | Role | Meetings attended |
|---|---|---|
| Olusegun Ogbonnewo | Chairman | 2/2 |
| Abubakar Jimoh | Vice-Chairman | 2/2 |
| Ojinika Olaghere | Member | 2/2 |
| Ibironke Adeyemi | Member | 2/2 |
| Innocent C. Ike | Member | 2/2 |

**Directors' Interest in Contracts**

Disclosures on Directors' interest in contracts are contained elsewhere in the Company's interim report.

## 7. Statutory Audit Committee

In compliance with Section 404 of the Companies and Allied Matters Act 2020, the Company has a Statutory Audit Committee. The Committee is constituted to ensure its independence, which is fundamental to upholding stakeholder confidence in the reliability of the Committee's report and of the Group's financial statements. No Executive Director sits on the Committee. The Chairman of the Committee is an ordinary shareholder, and the shareholders' representatives are independent and answerable to the shareholders.

The composition of the Committee follows the Companies and Allied Matters Act 2020 and comprises three shareholders and two Non-Executive Directors, one of whom is an Independent Non-Executive Director while the other is independent of the management of the Company.

The duties of the Committee are as enshrined in Section 404(3) and (4) of the Companies and Allied Matters Act 2020. Those statutory provisions are supplemented by the codes of corporate governance issued by the CBN and the SEC, and are summarised as follows:

a) Ascertaining whether the accounting and reporting policies of the Company are in accordance with legal requirements and

agreed ethical practices.

b) Reviewing the scope and planning of audit requirements.

c) Reviewing the findings on management matters in conjunction with the external auditor, together with management's responses to them.

d) Keeping under review the effectiveness of the Company's system of accounting and internal control.

e) Making recommendations to the Board on the appointment, removal and remuneration of the external auditors, ensuring their independence and objectivity and that there is no conflict of interest capable of impairing their independent judgement.

f) Authorising the internal auditor to carry out investigations into any activity of the Company which may be of interest or concern to the Committee.

g) Assisting in the oversight of the integrity of the Company's financial statements and establishing and developing the internal audit function.

## Shareholders' Representatives

**Mr. Henry Omatsola Aragho, FCA**
*Chairman, Statutory Audit Committee*

Mr. Aragho obtained a Higher National Diploma in Accounting from the Federal Polytechnic, Auchi in 1981 and a master's degree in business administration from Ogun State University in 1999. He qualified as a Chartered Accountant with the Institute of Chartered Accountants of Nigeria in 1985, was admitted as an Associate of the Institute in March 1986 and subsequently qualified as a Fellow. He joined the Nigerian Ports Authority in 1982 and retired as General Manager, Audit in 2005. He is presently Managing Consultant of Henrose Consulting Limited and Managing Director of Henrose Global Resources Limited.

**Mr. Idaere Gogo-Ogan**
*Member, Statutory Audit Committee*

Mr. Gogo-Ogan graduated in Economics from the University of Port Harcourt in 1987 and holds a master's degree in international finance from Middlesex University, London. He joined the Corporate Banking Department of Guaranty Trust Bank Plc in 1996 and left to found D'Group, incorporating Becca Petroleum Limited and Valuestream and Cordero Engineering Limited. He is a Non-Executive Director of Coronation Merchant Bank Limited and Chairman of Coronation Registrars Limited.

**Mr. Akindele Gbogboade**
*Member, Statutory Audit Committee*

Mr. Gbogboade holds a Bachelor of Science degree in Microbiology from Obafemi Awolowo University. He is a member of the Chartered Institute of Taxation of Nigeria and a Fellow of both the Institute of Chartered Accountants of Nigeria and the Chartered Institute of Procurement and Supply, United Kingdom. He is currently a Partner at Gbogboade Akindele and Co. Chartered Accountants and Managing Director of Diversified Procurement Solutions Limited.

### Attendance

The Committee met three times during the period under review, on 27 January, 19 February and 28 April 2026. Membership and attendance were as follows.

| Member | Role | Meetings attended |
|---|---|---|
| Henry Omatsola Aragho | Chairman | 3/3 |
| Idaere Gogo-Ogan | Vice-Chairman | 3/3 |
| Akindele Gbogboade | Member | 3/3 |
| Abubakar Aribidesi Jimoh | Member | 3/3 |
| Ojinika Nkechinyelu Olaghere | Member | 3/3 |

### Tenure

The tenure of each Committee member runs from the date of election at an Annual General Meeting until the next such meeting. Membership may be renewed through re-election at the next Annual General Meeting.

## 8. Governance of Functional Areas

### Assurance

Messrs KPMG acted as external auditors for the 2026 financial year. The Board confirms that the Company has complied with the regulatory requirements enshrined in the CBN and SEC codes of corporate governance on the rotation of audit firms and audit partners. KPMG was appointed the Company's sole external auditors with effect from 1 January 2023.

The audit fee paid by the Company to KPMG for the 2026 half year statutory audit was N50,000,000, while fees for non-audit services rendered to the Company during the period amounted to N53,000,000.

Assurance over the Group's control environment is provided through three reinforcing channels. The Board Audit Committee oversees the system of internal control and the mechanism for receiving complaints regarding accounting and operating procedures; the Statutory Audit Committee keeps the effectiveness of the Company's system of accounting and internal control under review and may authorise investigations by the internal auditor; and the external auditors attend meetings of both Committees to present on the audit of the Company's financial statements.

### Going Concern

The Directors confirm that, after making appropriate enquiries, they have a reasonable expectation that the Company has adequate resources to continue in operational existence for the foreseeable future. Accordingly, they continue to adopt the going concern basis in preparing the financial statements.

### Risk and Compliance Governance

The Board Risk Management Committee has oversight of the Group's risk management framework and advises the Board on risk appetite, risk culture and risk management strategy, with the Chairman providing leadership to the Board in determining that appetite. During the period the Committee considered the quarterly macroeconomic report and Risk and Compliance report. Risk oversight is inseparable from the Group's value agenda: the quality and resilience of earnings depend on the discipline with which credit, market, operational and conduct risks are identified, priced and controlled across every entity in the Group. To strengthen the Risk and Compliance function the Board recruited a Chief Risk and Compliance Officer during the review period whose appointment has been approved by the CBN.

### Information, Data and Technology Governance

The Board Digital and Information Technology Committee oversees the Group's IT strategy, its digital ecosystem and the customer experience, and monitors investment in IT infrastructure and support systems to ensure the safe and effective delivery of products and services. Information and cyber security reports are considered at each meeting, alongside internal audit reporting on the Company's information technology and digital systems, so that the Board can satisfy itself that the digital platform on which the Group's efficiency gains depend remains secure and resilient.

### Remuneration Governance

The Company has established a remuneration policy that seeks to attract and retain the best talent in the countries in which it operates, positioning the Group among the best performing and best employee rewarding companies in its industry in every such market. The objective of the policy is to ensure that salary structures, including short-term and long-term incentives, motivate sustained high performance and are linked to corporate performance, and that stakeholders can make a reasonable assessment of the Group's reward practices. The Company complies with local tax requirements in each country of operation.

Within those guidelines, compensation for country staff reflects conditions in the local economic environment and the requirements of local labour law. The Group Office commissions independent annual compensation surveys in the subsidiaries to obtain independent statistics on local market pay and to arrive at specific compensation structures for each country. Compensation is determined annually at the end of the financial year.

Total compensation typically includes guaranteed and variable portions, with the specific proportion of each defined at country level. Guaranteed pay includes base pay and other guaranteed elements, while variable pay may be both performance-based and discretionary.

The Company operates a performance bonus scheme designed to attract and retain high-performing employees. Awards to individuals are based on job level, business unit performance and individual performance, and other determinants include pay levels for each skill set, which may be influenced by the relative scarcity of skills in a particular area.

The Company complies with the Pension Reform Act on the provision of retirement benefits to employees at all levels and operates

an Employee Performance Share Plan for the award of units of its shares to employees, subject to terms and conditions determined by the Board.

### Non-Executive Director Remuneration

The Company has developed a Remuneration Policy for Non-Executive Directors to ensure fair and transparent compensation that aligns with regulatory standards and the organisation's long-term interests, and to attract and retain qualified directors while upholding sound governance practices. The Board Governance, Nomination and Remuneration Committee reviews recommendations before submission by the Board to shareholders for approval at a general meeting.

Remuneration principles are benchmarked against comparable organisations, typically targeting the 80th percentile to secure highly skilled directors, with adjustments reflecting company-specific circumstances and regular competitiveness reviews. The components of Non-Executive Director remuneration comprise fees, sitting allowances and reimbursement of travel and accommodation expenses.

Restrictions are in place to safeguard independence and to align directors' interests with those of shareholders. Non-Executive Directors do not receive performance-related pay, share options, severance or pension benefits. They may acquire Company shares in line with long-term incentives, subject to a recommended retention period after tenure to maintain alignment.

The policy is reviewed annually to ensure its continued relevance and compliance, with remuneration details disclosed in the Annual Report. The option to engage independent consultants for remuneration advice is also available.

### Clawback Policy

The objective of the Clawback Policy is to recover excess and undeserved rewards, such as bonuses, incentives, profit sharing and other performance-based compensation, from current and former executives and applicable senior management employees.

The policy is triggered if the financial performance on which a reward was based is discovered to be materially false, misstated or erroneous, or in instances of misdemeanour, fraud, material violation of Company policy or regulatory infraction.

The executive, Chief Financial Officer or applicable senior management employee must have served the Company during the look-back period, and the incentives paid must have been tied to a financial parameter. The policy applies to any incentive-based compensation paid during any of the three completed fiscal years immediately preceding the date on which the Company is required to restate its financial results, that date being the earlier of:

1. The date on which the Audit Committee concludes that the Company's previously issued financial statements contain a material error; or
2. The date on which a court, regulator or other similarly authorised body causes the Company to restate its financial information to correct a material error.

## Ethics and Conduct

### Code of Ethics

The Company's Codes of Conduct specify the behaviours expected of employees and Directors. The Codes are designed to empower employees and Directors and to enable effective decision making at all levels of the business according to defined ethical principles.

### Dealing in Company Securities

The Company implements a Securities Trading Policy that prohibits Directors, members of the Audit Committee, employees and all other insiders from abusing, or placing themselves under suspicion of abusing, price sensitive information in relation to the Company's securities. Affected persons are prohibited from trading in the Company's securities during a closed period, which is announced by the Company Secretary, and the Company has put in place a mechanism for monitoring compliance with the policy.

### Whistle-Blowing

The Company expects all employees and Directors to observe the highest level of probity in their dealings with the Company and its stakeholders. The whistle-blowing structure covers internal and external whistle-blowers and extends to the conduct of stakeholders including employees, vendors and customers, providing the framework for reporting suspected breaches of internal policies, laws and regulations.

The Company has engaged Deloitte to provide consulting assistance in the implementation of the policy. Suspected wrongdoing by an employee, vendor, supplier or consultant may be reported through the Company's or Deloitte's ethics lines or email addresses, as set out below.

*Internal channel:* Whistleblower@theaccesscorporation.com

*External channels:* toll-free hotline 0800TIP-OFFS (0800 847 6337); email tip-offs@deloitte.com.ng; web portal https://tip-offs.deloittemanagedsolutions.com.ng/; and the Deloitte Tip-Offs Anonymous mobile application, available on the Google Play Store for Android and the App Store for Apple devices.

Stakeholders may also report unethical practices to the Central Bank of Nigeria at anticorruptionunit@cbn.gov.ng.

### Succession Planning

The Board has a robust succession policy aligned to the Company's performance management process. The policy identifies the key positions in respect of which formal succession planning is undertaken and provides that potential candidates for those positions are identified at the beginning of each financial year.

**Sustainability and Responsible Corporate Citizenship**

The Company's sustainability vision and strategy are underpinned by international principles, frameworks and standards that support the design of best-in-class local policies, enabling the effective mainstreaming of sustainability for strategic growth and long-term success. The Company's policies and frameworks facilitate the achievement of that vision, and strict adherence to them is one of the ways in which the Company ensures that it remains a responsible corporate citizen. Oversight of sustainability practice sits with the Board Human Resources and Sustainability Committee, which reports to the Board.

## 9. Stakeholder Relationships

**Shareholder and Regulatory Engagement**

The Board recognises the importance of a free flow of complete, adequate and timely information to shareholders to enable them to make informed decisions and is committed to maintaining high standards of corporate disclosure. Implementation of the Investor Communication and Disclosure Policy helps the Board to understand shareholders' views, and the Company's website, www.accessholdingsplc.com, is regularly updated with both financial and non-financial information.

Shareholders' meetings are convened and held in an open manner in line with the Articles of Association and the applicable statutory and regulatory regimes, for the purpose of deliberating on issues affecting the Group's strategic direction. The Annual General Meeting is a medium for promoting interaction between the Board, Management and shareholders. Attendance is open to shareholders and their proxies, and proceedings are monitored by members of the press and by representatives of Nigerian Exchange Limited, the Central Bank of Nigeria and the Securities and Exchange Commission.

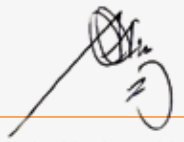

The Company has a dedicated Investor Relations unit that facilitates regular communication with shareholders and analysts and addresses their queries and concerns. Investors and stakeholders receive information about the Company through a range of channels, including quarterly investor conference calls, general meetings, the Company's website, the Annual Report and Accounts, non-deal roadshows and the investor forum at Nigerian Exchange Limited.

The Board ensures that communication with the investing public about the Company and its subsidiaries is timely, factual, broadly disseminated and accurate, in accordance with all applicable legal and regulatory requirements, and that reports and communications are presented in plain, readable and understandable form. The Board ensures that shareholders' statutory and general rights are always protected, particularly the right to vote at general meetings, and that all shareholders are treated equally regardless of the size of their shareholding or their social circumstances. Shareholders are encouraged to share in the responsibility of sustaining the Company's corporate values by exercising the rights protected by law.

**Investor Enquiries and Complaints**

In line with the rules of the Securities and Exchange Commission, the Company has implemented an Investor Enquiries and Complaints Management Policy through which enquiries and complaints from investors are received, tracked and resolved.

**Signed on behalf of the Board:**

**Aigboje Aig-Imoukhuede, CFR**
Chairman

**Sunday Ekwochi, HCIB**
Company Secretary

# Directors' Responsibilities

## Statement of Directors' responsibilities in relation to the consolidated and separate Interim financial statements for the period ended 30 June 2026

The Directors accept responsibility for the preparation of the consolidated and separate interim financial statements that give a true and fair view of the financial position of the Company and Group as at 30 June 2026 and the results of its operations, cash flows and changes in equity for the year ended, in compliance with IFRS Accounting Standards as issued by the International Accounting Standards Board (IFRS Accounting Standards) and in the manner required by the Companies and Allied Matters Act, 2020 and the Financial Reporting Council of Nigeria Act, 2011 (Amended), the Banks and other Financial Institutions Act, 2020 and relevant Central Bank of Nigeria (CBN) Guidelines and Circulars

The Directors further accept responsibility for maintaining adequate accounting records as required by the Companies and Allied Matters Act, 2020 and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement whether due to fraud or error.

The Directors have made an assessment of the Group and Company's ability to continue as a going concern and have no reason to believe the Group and Company will not remain a going concern in the year ahead.

# Report of the statutory audit committee

## To the members of Access Holdings Plc:

In accordance with the provisions of Section 404(1) of the Companies and Allied Matters Act of Nigeria, the members of the Statutory Audit Committee of Access Holdings Plc hereby report on the financial statements for the period ended 30 June 2026 as follows:

We have exercised our statutory functions under section 404(7) of the Companies and Allied Matters Act of Nigeria and acknowledge the co-operation of management and staff in the conduct of these responsibilities.

We are of the opinion that the accounting and reporting policies of the Company and Group are in agreement with legal requirements and agreed ethical practices and that the scope and planning of both the external and internal audits for the period ended 30 June 2026 were satisfactory and reinforce the Group's internal control systems.

We are satisfied that the Bank has complied with the provisions of Central Bank of Nigeria Circular BSD/1/2004 dated 18 February 2004 on "Disclosure of insider related credits in the financial statements of banks". We hereby confirm that an aggregate amount of N592,483,600 (December 2025: N570,397,550) was outstanding as at 30 June 2026 and was performing as at 30 June 2026 (see note 45)

We have deliberated on the findings of the external auditors who have confirmed that necessary cooperation was received from management in the course of their audit and we are satisfied with management's responses thereon and with the effectiveness of the Company's system of accounting and internal control.

# Statement of Corporate Responsibility

## Statement of corporate responsibility for the consolidated and separate interim financial statements for the period ended 30 June 2026

Further to the provisions of section 405 of the Companies and Allied Matters Act (CAMA), 2020, we, the Group Managing Director and Chief Financial Officer, hereby certify the consolidated and separate interim financial statements of the Group for the period ended 30 June 2026 as follows:

(a) That we have reviewed the unaudited financial statements of the Group for the period ended 30 June 2026.

(b) That the unaudited financial statements do not contain any untrue statement of material fact or omit to state a material fact which would make the statements misleading, in the light of the circumstances under which such statement was made.

(c) That the unaudited financial statements and all other financial information included in the statements fairly present, in all material respects, the financial condition and results of operation of the Group as of and for, the period ended 30 June 2026.

(d) That we are responsible for establishing and maintaining internal controls and have designed such internal controls to ensure that material information relating to the Group is made known to the officer by other officers of the companies, during the period ended 30 June 2026.

(e) That we have evaluated the effectiveness of the Group's internal controls prior to the date of the unaudited financial statements.

(f) That there were no significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our evaluation, including any corrective action with regard to significant deficiencies and material weaknesses.

(g) That we have disclosed the following information to the Group's Auditors:

- there are no significant deficiencies in the design or operation of internal controls which could adversely affect the Group's ability to record, process, summarise and report financial data, and have identified for the Group's auditors any material weaknesses in internal controls, and
- there is no fraud that involves management or other employees who have a significant role in the Group's internal control.

# Risk Management

## Macroeconomic Outlook

The first half of 2026 was characterised by a resilient but increasingly complex global operating environment. Geopolitical tensions in the Middle East, evolving trade dynamics and persistent inflationary pressures contributed to heightened uncertainty across financial markets and global supply chains. While the International Monetary Fund (IMF) expects global growth to moderate in the near term, economic activity continues to be supported by technological innovation, resilient consumer demand and investment in digital infrastructure.

Across Sub-Saharan Africa, economic conditions remained broadly stable despite external pressures. Higher energy prices provided support for oil-exporting economies, while tighter financing conditions, elevated debt levels and structural challenges continued to shape the regional outlook.

In Nigeria, economic momentum strengthened further, supported by reform initiatives, improved oil production, stronger investor confidence and enhanced external sector resilience. The sovereign credit rating upgrade and Nigeria's removal from the European Union's list of high-risk anti-money laundering jurisdictions further reinforced confidence in the economy.

Against this backdrop, Access Holdings Plc maintained a disciplined and forward-looking approach to risk management. The Group continued to monitor and respond to developments across geopolitical, credit, market, liquidity, operational, cyber and regulatory risk landscapes, ensuring emerging risks were identified early and managed within approved risk appetite thresholds.

Our diversified business model, strong governance framework and sound capital position continue to support resilience across our markets. Ongoing investments in technology, data analytics and digital capabilities further strengthen our ability to anticipate emerging risks, enhance operational effectiveness and deliver sustainable value to stakeholders.

As we enter the second half of the year, we remain mindful of the uncertainties within the global environment while maintaining confidence in the opportunities across our markets. Through prudent risk management, disciplined execution and strong governance, the Group remains well positioned to navigate an evolving risk landscape and support sustainable long-term growth.

## ENTERPRISE-WIDE RISK MANAGEMENT

With our promise to be the world's most respected African Financial Services Group, our Enterprise-Wide Risk Management (ERM) Policy is hinged on establishing risk oversight, monitoring, and reporting that fosters enterprise-wide risk integration. The ERM policy ensures that Access Holdings Plc (The Company) strives for sustainable financial success while strengthening its relationship with diverse stakeholders.

We apply a bespoke risk management framework in identifying, assessing, monitoring, controlling, and reporting the inherent and residual risks associated with the pursuit of these ambitions and ensuring they are achieved optimally.

Risk strategies and policies are set and approved by the Board of Directors of the Company. These policies, which define acceptable levels of risk for day-to-day operations as well as the willingness of the Company to assume risk, weighed against the expected rewards, are detailed in the Enterprise-Wide Risk Management (ERM) Policy. ERM is a structured approach to identifying opportunities, assessing the risk inherent in these opportunities, and actively managing these risks. Specific policies are also in place for managing risks in the different core risk areas, including credit, compliance, market, operational, liquidity, strategic, reputational, Information and cybersecurity, payment system, and investment risks.

The Company's overall risk tolerance is established in the context of our earning power, capital, and diversified business model. On the other hand, the organisational structure and business strategy are aligned with our risk management philosophy.

The Company regularly reviews risk exposure limits, risk control, and self-assessment and conducts scenario analysis to position itself against adverse events. These are invaluable tools that are used to predict and successfully manage both local and global shocks. To manage market volatility and economic uncertainties, the company regularly subjects its exposures to stress tests across various products, currencies, portfolios, and customer segments.

The Risk Management Division is part of the second line of defense. It supports the Company's risk policy through oversight of the subsidiaries by constantly monitoring risk to identify and quantify significant risk exposures and acting upon such exposures as necessary.

Our Risk Management practices are also cascaded across the Company. Each Subsidiary has unique risks and an overall governance framework to manage these risks.

Access Holdings Plc approaches risk, capital, and value management in a comprehensive and integrated manner, and we believe that our initiatives and practices have positioned us at the leading edge of risk management.

## RISK MANAGEMENT PHILOSOPHY, CULTURE, APPETITE, AND OBJECTIVES

Access Holdings Risk Management philosophy and culture remain fundamental to delivering our strategic objectives and are at the core of the Company's operating structure. We seek to limit adverse variations in earnings and capital by managing risk exposures within our moderate risk appetite. Our risk management approach includes minimising undue exposure concentrations, limiting potential losses from stress events, and prudent liquidity management.

The Company's risk-conscious management process across all the subsidiaries will continue to achieve desired results as evidenced by improved risk ratios and independent risk ratings. Also, in line with our core value of excellence, the Risk Management groups are continuously evolving and improving, given the context that all market developments, including those of extreme nature, need to be anticipated and planned for.

Executive Management has remained closely involved with significant risk management initiatives, which have focused on preserving appropriate levels of asset quality, liquidity, and capital while optimising the risk portfolios.

Risk management is fundamental to the Company's decision-making and management process. It is embedded in the role of all employees via the organisational culture, thus enhancing the quality of strategic, capital allocation, and day-to-day business decisions.

Access Holdings Plc considers risk management philosophy and culture as the set of shared beliefs, values, attitudes, and practices that characterise how it considers risk in everything it does, from strategy development and implementation to its day-to-day activities. In this regard, the Company's risk management philosophy is that a moderate and guarded risk attitude ensures sustainable growth in shareholder value and reputation.

The Company believes that enterprise-wide risk management provides superior capabilities to identify and assess the full spectrum of risks and enables staff at all levels to better understand and manage risks. Enterprise-wide risk management ensures that:

- Risk acceptance is done in a responsible manner.
- The Executives and the Board of the Bank have adequate risk management support.
- Uncertain outcomes are better anticipated.
- Accountability is strengthened.
- Stewardship is enhanced.

The company's risk culture is guided by the principles of Integrity and transparency, Accountability, Prudent risk-taking, Customer fairness, Effective challenge, Timely escalation of issues, Compliance with legal, regulatory, policy, and ethical obligations, Learning from incidents, near misses, complaints, audits, and external events, Collaboration and data discipline; and Policy accountability.

These guiding principles set the behavioural and decision-making standards expected across Access Holdings Plc and its subsidiaries.

They provide the foundation for fostering a strong risk culture and are reflected in our day-to-day activities, strategic decision-making, and interactions with customers, regulators, shareholders, and other stakeholders.

The attributes of our Enterprise risk management include the following;

a) Management and staff:

- Consider all forms of risks in decision-making
- Work with the subsidiaries to create and evaluate their risk profiles to consider what is best for each business and what is optimal for the Company.
- Adopt a portfolio view of risk in addition to understanding individual risk elements.
- Retain ownership and accountability for risk and risk management at the business unit or other points of influence.
- Accept that enterprise-wide risk management is mandatory and not optional.
- Document and report all significant risks and enterprise-wide risk management deficiencies.
- Adopt a holistic and integrated approach to risk management and bring all risk reporting together under a simple point of truth.
- Empower risk officers to perform their duties professionally and independently without undue interference.
- Ensure a clearly defined risk management governance structure
- Strive to maintain a conservative balance between risk and profit considerations
- Continue to demonstrate appropriate standards of behaviour in the development of strategy and pursuit of objectives.

b) Risk officers partner with other stakeholders within and outside the company in each entity and are guided in exercising their powers by a deep sense of responsibility, professionalism, and respect for other parties.

c) The Company ensures the entities partner with their customers to improve their attitude to risk management and encourage them to build a corporate governance culture into their business management.

d) Risk management is governed by well-defined policies, which are communicated across the Company.

e) Equal attention is paid to both quantifiable and non-quantifiable risks.

f) The Company avoids products and businesses it does not understand.

## GROUP RISK OVERSIGHT APPROACH

Managing risk is a fundamental part of all businesses. Access Holdings Plc operates risk as part of a long-term resilience strategy. Risk management is embedded in all levels of the Company and is part of the daily business activities and strategic planning to have a sustainable competitive advantage.

Each year, the Company identifies and sets its key risk priorities, starting from the Board and cascading through Management. As part of our risk culture, we take a close and deliberate look at the most significant risks, examining how severe they are, the potential impact they may have on our business, and the strength of the mitigation measures in place. This ensures we stay proactive and protect the organisation from potential losses.

To achieve our risk management objectives, the Company relies on a risk management framework comprising risk policies and procedures formulated for assessing, measuring, monitoring, and reporting risks, including limits set to manage the exposure to quantifiable risks. The Company recognises that effective risk management is based on a sound risk culture, which is characterised, amongst others, by a high level of awareness concerning the organisation's risk management.

Our risk governance framework, of which the risk appetite framework is a significant element, ensures the appropriate oversight and accountability for effectively managing risk. Our oversight starts with the strategy setting and business planning process. These plans help us articulate our risk appetite, which is set as risk appetite limits for each subsidiary.

We actively promote a strong risk culture where employees are encouraged to be accountable for identifying and escalating risks.

Expectations for risk culture are regularly communicated by senior management, reinforced through policies and training, and considered in the performance assessment and compensation processes.

The Risk function coordinates the monitoring and reporting of risks across the Company and its subsidiaries.

Internal Audit is responsible for auditing the functions of risk management and control structures to ensure that all units charged with risk management (both first and second lines of defense) perform their roles effectively. They also test the adequacy of internal control and make appropriate recommendations where necessary.

## RISK APPETITE

Considering all relevant risks and those of its Subsidiaries, the Company's risk appetite, which the Board of Directors owns, expresses the aggregate level of risk that we are willing to assume in the context of achieving our strategic objectives.

Risk appetite is derived using both quantitative and qualitative criteria. Risk appetite concerning the major risks the Company is exposed to is regulated by limits and thresholds. These metrics aid in reaching our financial targets and guiding the Bank's profitability profile.

Following the Company's risk appetite, we are firmly committed to maintaining a moderate risk profile, which has been defined and cascaded measurably. The risk profile is managed based on an integrated risk management framework. This framework identifies all types of risks to provide an integrated view of the risk profile for all the business entities.

## RISK MANAGEMENT OBJECTIVES

The broad risk management objectives of Access Holdings Plc are:

- To achieve leading financial stability indicator metrics such as cost of risk, asset quality, capital, and liquidity ratios.
- To enhance credit ratings, as well as depositor, analyst, investor, and regulator perception.
- To protect against unforeseen losses and ensure the stability of earnings across the subsidiaries.
- To minimise adverse reputation risk issues as well as regulatory compliance issues.
- To identify and manage existing and new risks in a planned and coordinated manner with minimal disruption and cost.
- To maximise earnings potential and opportunities.
- To maximise share price and stakeholder protection.
- To develop a risk culture that encourages all staff to identify risks and associated opportunities and to respond to them with cost-effective actions.

### Scope of risks

The Company identifies the following key risk categories within its risk management framework, among others.

- Credit Risk
- Operational Risk
- Market and Liquidity Risk
- Capital Risk Management
- Legal and Compliance Risk
- Information and Cyber Security Risk
- Environmental and Social Risk
- Digital and Technology Risks
- Reputational Risk
- Strategic Risk
- Investment Risk
- Pension Risks
- Payment System Risks
- Fraud Risk
- Settlement Risks
- Compliance Risks etc.

### THE BOARD AND MANAGEMENT COMMITTEES

The Board is responsible for the Company's risk organisation

and ensuring satisfactory internal control. It carries out its oversight function through its standing committees. Each charter clearly defines its purpose, composition, structure, frequency of meetings, duties, tenure, and reporting lines to the Board.

In line with best practice, the Chairman of the Board does not sit on any of the Committees. The Board has seven standing committees: The Board Risk Management Committee, the Board Audit Committee, the Board Remuneration Committee, the Board Governance and Nomination Committee, the Board Digital and IT Committee, and the Board Finance and Investment Committee.

The management committees that exist in the company and its Subsidiaries include:

- Group Committee of CEOs of Subsidiaries.
- The Management Committee meeting of the corporation (MANCO).
- Group Risk Management Committee (GRMC).
- Executive Committee (EXCO) at the various subsidiaries.
- Risk committees at the various Subsidiaries.
- Management Credit Committee (MCC) and Group Asset & Liability Committee (Group ALCO) at the Banking group.
- Digital Steering Committee (DSC), Information Security Council (ISC), and Operational Risk Management Committee (ORMC) at the Banking group, among others.

Without prejudice to the roles of these committees, the full Board retains ultimate responsibility for risk management.

The Company uses consistent risk terminology as best as possible to enable alignment in risk aggregation and measurement across its Subsidiaries. The Banking Group forms a major part of its risk.

The following are the risks across the company:

## CREDIT RISK MANAGEMENT

In Access Holdings Plc and its Subsidiaries, everyone is involved in Risk Management, with ultimate responsibility residing with the Board. We operate the three (3) lines of the defense model, which enhance the understanding of risk management and control by clarifying roles and responsibilities. The risk management process of the Subsidiaries is well fortified to mitigate and/or eliminate any risk events in their business.

The banking group consistently takes a proactive approach to protect the loan book from economic shocks, leveraging scenario planning and stress test exercises. This has enabled our understanding of the customers' challenges and outlook, and the steps to ensure loan repayment of our borrowers and preserve the risk asset quality of the Bank, working within regulatory guidance.

The Risk Management function of each subsidiary is encouraged to take advantage of advancements and innovations in the technology space to automate the management of risk. Credit and analytics tools are used to enhance the credit decision-making and monitoring process in various businesses. The Risk Dashboard has been enhanced to present measurable risk metrics for ease of decision-making. These dashboards exist at the individual business and aggregate at the Company level to ensure adequate and timely tracking of risks.

## PRINCIPAL CREDIT POLICIES

The following are some of the principal credit policies across the relevant businesses of the Company:

Credit Risk Management Policy: The core objective is to enable the maximisation of returns on a risk-adjusted basis from banking book credit risk exposures that are brought under the ambit of the Credit Risk Management Policy. This is done by putting in place robust credit risk management systems consisting of risk identification, risk measurement, setting of exposure and risk limits, risk monitoring and control, as well as reporting of credit risk in the banking book.

## CREDIT PROCESS

The credit process in the lending subsidiaries starts with portfolio planning and target market identification. Within identified target markets, credits are initiated by relationship managers. The proposed credits are reviewed and approved by the relevant credit approval authorities. After appropriate approvals, loans are disbursed to beneficiaries.

Both relationship management teams and the Credit Risk Management Group undertake ongoing monitoring and management of loans.

A loan request is initiated by the relationship officer and reviewed by the relationship manager/Sector Head/Group Head of the respective business teams, or through a digital platform after fulfilling all the required KYC and documentation and required risk assessment. Further detailed review is carried out by Credit Risk Management. The concurrence of Credit Risk Management must be obtained for any credit extension. If the loan application goes through the detailed analysis, it is submitted to the appropriate approval authority based on the size and risk rating of the facility.

The standard credit evaluation process is based both on quantitative figures from the Financial Statements and on an array of qualitative factors such as the PESTLE analysis, SWOT analysis, Porter's five forces, etc. Information on the borrower and pertinent macroeconomic data is collected, such as an outlook for the relevant sector. These factors are assessed by the analyst and all individuals involved in the credit approval process, relying not only on quantitative factors but also on extensive knowledge of the company in question, its management, industry, the country of operation, and the impact of globalisation.

## CREDIT RISK CONTROL AND MITIGATION

### AUTHORITY LIMITS ON CREDIT IN THE BANKING GROUP

The highest credit approval authority is the Board of Directors, supported by the Board Credit Committee and followed by the Management Credit Committee in the banking group. Individuals are also assigned credit approval authorities in line with the Banking group's criteria for such delegation set out in its Credit Risk and Portfolio Management Plan.

The approval and exposure limits for the banking group are based on internal Obligor Risk Ratings that have been approved by the Board for the relevant approving authorities and credit committees.

## OPERATIONAL RISK MANAGEMENT

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people, or systems, or from external events. Our definition of operational risk excludes regulatory risks, strategic risks, and potential losses related solely to judgments about taking credit, market, interest rate, liquidity, or insurance risks.

It also includes the reputation and franchise risk associated with business practices or market conduct in which all the subsidiaries of Access Holdings Plc are involved. Operational risk is inherent in the business activities across the subsidiaries and, as with other risk types, is managed through an overall framework designed to balance strong corporate oversight with well-defined independent risk management.

This framework across the company and its subsidiaries reflects:

- Recognition of risk ownership by the businesses.
- Oversight by independent risk management.
- Independent review by Internal Audit.

Access Holdings Plc and all its subsidiaries have a Business Continuity Plan that defines how it manages incidents in case of a disaster or other disruptive incidents and how to recover its activities within set deadlines.

**The purpose of the plan is to:**

- Predefine the resources and specify actions required to minimise losses that might otherwise result from a business interruption, irrespective of the cause
- Ensure a business-as-usual level of performance while in contingency mode
- Ensure the timely and orderly restoration of business activities across all its subsidiaries.

The Business Continuity Plan (BCP) activities carried out have also been documented in the necessary policies.

We seek to minimise exposure to operational risk, subject to cost trade-offs. Operational risk exposures are managed through a consistent set of management processes that drive risk identification, assessment, control, and monitoring. Our operational risk strategy seeks to minimise the impact that operational risk can have on stakeholder value. The strategy is to:

- Reduce the likelihood of expected events and related costs by managing the risk factors and implementing loss prevention or reduction techniques to reduce variation in earnings across the subsidiaries.
- Minimise the impact of unexpected and catastrophic events and related costs through risk financing strategies supporting long-term growth, cash flow management, and balance sheet protection.
- Eliminate inefficiencies, improve productivity, optimise capital requirements, and improve overall performance within the Company through well-designed and implemented internal controls

To create and promote a culture that emphasises effective operational risk management and adherence to operating controls, there are three distinct levels of operational risk governance structure across the company and its subsidiaries:

**Level 3** refers to the oversight function carried out by the Board of Directors, the Board Risk Management Committee, and the Executive Management. Responsibilities at this level include ensuring effective management of operational risk and adherence to the approved operational risk policies.

**Level 2** refers to the management function carried out by the risk management functions in each subsidiary across the Company. It has direct responsibility for formulating and implementing the Bank's operational risk management framework, including methodologies, policies, and procedures approved by the Board.

**Level 1** refers to the operational risk ownership carried out by all the business units and support functions across Access Holdings Plc and its subsidiaries. These units/functions are fully responsible and accountable for the management of operational risk in their units. They work in liaison with Risk Management to define and review controls to mitigate identified risks.

The Internal Audit function across the company and its subsidiaries provides an independent assessment and evaluation of the Bank's operational risk management framework. This periodic confirmation to test controls and compliance with approved policies and procedures assures the effectiveness of the company's operational risk management framework as well as its Subsidiaries.

Some of the tools being used to assess, measure and monitor operational risks include a loss database of operational risk events; an effective risk and control self-assessment process that helps to analyse business activities and identify operational risks that could affect the achievement of business objectives; and key risk indicators which are used to monitor operational risks on an ongoing basis.

## MARKET RISK MANAGEMENT

Market risk refers to the potential for loss due to adverse movements in market variables such as interest rates, foreign exchange rates, and equity prices. These movements can impact on the value of our holdings, our projected earnings, and future cash flows.

To safeguard the company's capital and earnings, we maintain a comprehensive enterprise risk framework which covers market risk. Our objective is to ensure that all exposures, whether from our trading book or banking book, remain within the Board's defined risk appetite and tolerance limits.

## FRAMEWORK AND GOVERNANCE

The Board of Directors across the Company bear the ultimate responsibility for market risk, setting strategic direction and approving risk appetite and policies. This oversight is delegated to the Board of Risk Management Committee (BRMC), which reports back to the board. The Risk Committees in the relevant subsidiaries monitor market risk, ensuring exposures align with our risk appetite.

### Trading Book

The Banking group, which is a significant part of the Group's Market risk, has a trading book that contains financial instruments held for trading activities. All such activities are centralised within the Treasury operations, with market risk functions operating independently to provide objective oversight into market risk. Board-approved market risk limits are monitored daily to identify potential deviations and enable quick corrective action proactively.

Market risk within the trading book is assessed and monitored through using risk-measurement techniques. These include Value at Risk (VaR), back testing, sensitivity analysis, stop-loss thresholds, and stress-testing.

Value-at-Risk (VaR): The Banking Group uses the historical simulation approach in computing Value at Risk (VaR). Recognising the method's inherent limitations, the Group does not rely on it in isolation. To ensure the ongoing reliability and accuracy of its risk estimates, the Banking Group conducts regular back-testing to validate the model's predictive performance.

Sensitivity Analysis: The Banking Group uses scenario and sensitivity analysis to evaluate its exposures per time. The Present Value of Basis Point (PV01), one of the metrics, is used to measure the portfolio's sensitivity to small interest rate movements and support daily limit monitoring

Stop-Loss Triggers: This limit sets predefined loss thresholds that prompt position reviews and proactive intervention, which will trigger the closing or reduction of a position to avoid any further loss based on existing exposures.

Stress Testing: Stress testing is an integral part of the market risk management framework and considers both historical market events and forward-looking scenarios. This helps evaluate potential losses under severe yet plausible market conditions, providing an important complement to our VaR analysis.

Supplementary Measures: Including Net Open Position limits for fixed income, money market and FX positions, ensure comprehensive oversight of all trading exposures. These limits are set with adequate buffers to enable timely interventions where necessary,

## INTEREST RATE RISK IN THE BANKING BOOK (IRRBB)

IRRBB is the risk to our earnings and economic value from adverse interest rate movements affecting the banking book. Changes in rates impact both our Net Interest Income (NII) and the Economic Value of Equity (EVE).

To measure EVE, the Banking Group employs behavioural models for non-maturity deposits and loans with prepayment features. The analysis uses multiple interest rate scenarios (parallel shifts, twists, internal forecasts) to project NII over a 12-month horizon and to calculate EVE sensitivity under six standard shock scenarios. These measures are integral to the Internal Capital Adequacy Assessment Process (ICAAP).

The Asset and Liability Management Committee (ALCO) in the Banking Group monitors the interest rate risk profile, supported by strong governance processes to ensure accurate measurement and effective risk management.

## LIQUIDITY RISK MANAGEMENT

Liquidity risk is inherent in our business. The Group maintains a robust framework to ensure we can meet all payment obligations under both normal and stressful conditions, thereby protecting earnings, capital, and ongoing viability.

The group assesses its liquidity profile using several metrics where relevant:

Regulatory Metrics: The Group closely monitors the Liquidity Coverage Ratio (LCR), Net Stable Funding Ratio (NSFR), and a regulatory Liquidity Ratio (LR), consistently maintaining buffers well above minimum requirements.

Funding Structure Analysis: This includes Loan-to-Deposit Ratios in the lending subsidiaries (for both local and foreign currency) and Interbank Funding Limits to ensure a stable, diversified funding base.

Forward-Looking Analysis: Liquidity stress tests are conducted using multiple scenarios, including daily Liquidity Gap Analysis (In the Banking Group), Survival Horizon analysis.

## LIQUIDITY RISK GOVERNANCE

Liquidity risk is defined as the risk that the Group may not have sufficient liquid financial assets to meet obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

The Board and Executive Management treat liquidity as a critical priority. The Board, through its Risk Management Committee, oversees the liquidity strategy, while relevant management committees monitor compliance and liquidity metrics on an ongoing basis.

## CONTINGENCY FUNDING PLAN (CFP)

The Banking Group has a documented CFP that provides a clear action plan for liquidity stress. It outlines early warning indicators, escalation procedures, and available contingent funding sources to ensure a structured, proactive response to potential disruptions, thereby preserving financial stability.

## CAPITAL RISK MANAGEMENT

Capital risk is the risk of possible erosion of Access Holdings Plc and its subsidiaries' capital base due to poor capital management.

**Capital management objectives:**

The capital management objectives include:

- To meet the capital ratios required by its regulators and the Board.
- To maintain an adequate level of available capital resources as cover for the economic capital (EC) requirements.
- To generate enough capital to support asset growth.
- To ensure optimisation of capital through adequate risk-adjusted returns.
- To have adequate buffers to withstand periods of stress.

## CAPITAL MANAGEMENT STRATEGY:

The capital management strategy is focused on maximising shareholder value by optimising the level and mix of capital resources. Decisions on the allocation of capital resources are based on several factors, including return on economic capital (EC) and regulatory capital (RC) and are part of the internal capital adequacy assessment process (ICAAP).

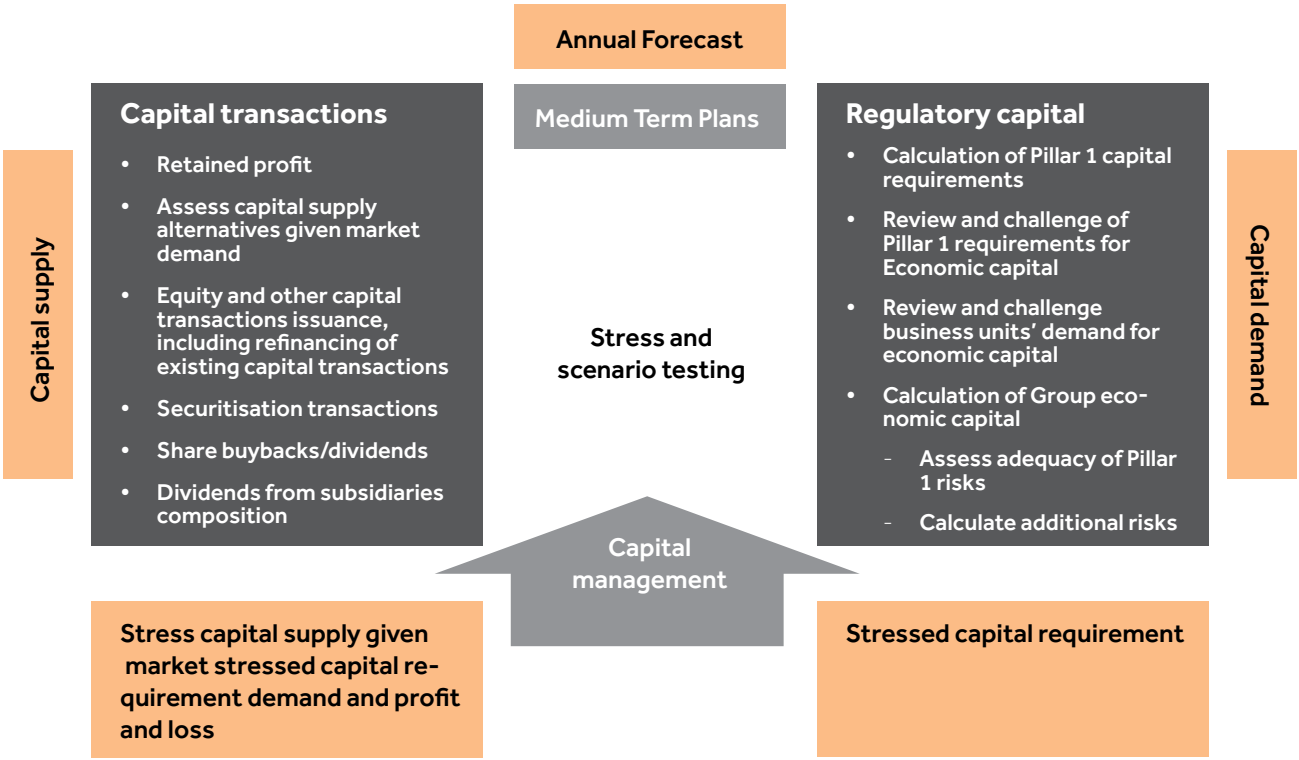

The Group views Capital using three lenses, viz., Sufficiency, efficiency and Quality.

Capital Sufficiency: The Group ensures sufficient capital to absorb potential losses and meet regulatory requirements across all jurisdictions in which we operate.

Capital Efficiency: As part of our strategy, we strive to ensure that capital is deployed in a way that delivers strong and sustainable returns. We focus on optimising capital while maintaining sound risk discipline. We also prioritise investing in strategic initiatives and ensuring that resources are directed where they create the most value.

Capital Quality: To ensure capital quality, we test the strength and resilience of the Group's capital base to ensure it can continue to support our activities and absorb potential losses.

## Capital Management Process

## CAPITAL MANAGEMENT AND GOVERNANCE

Capital management is critical to survival. Hence, capital is managed as a board-level priority. The Board is responsible for assessing and approving the Group's capital management policy, capital target levels, and capital strategy. A capital management framework provides effective capital planning, capital issuance, alignment with the Basel accord, EC utilisation and economic profit (EP) performance measurement criteria. The diagram above illustrates the process to ensure end-to-end integration of strategy, risk management, and financial processes into the capital management process. The purpose is to ensure that capital consumption in the businesses is planned for and reflected in their performance measurement, which in turn translates into management performance assessment, product pricing requirements, and achievement of the overall strategy within the company's risk appetite.

## COMPLIANCE RISK MANAGEMENT

The compliance functions organise and set priorities for the management of its compliance risk in a way that is consistent with the company's low risk appetite.

The integrated compliance function works closely with Internal Audit and Risk Management to achieve risk convergence, providing the backbone for integrated assurance and higher visibility of risk management and control consciousness across the Company and its subsidiaries.

The compliance functions have continued to redefine, fine-tune its approach and improve on its advisory role with an intense focus on regulatory intelligence gathering, compliance monitoring, compliance testing, and closer cooperation with business units within the Group. The Compliance Officers and Quality Assurance desks across the company have further strengthened and deepened the cooperation with the first line of defence.

The company is implementing an enhanced transaction monitoring tool across the subsidiaries to enable online real-time review and prompt action on compliance concerns. Transaction alerts are set up using a risk-based approach by focusing on the high-risk areas, thereby spotting non-conformities on time.

## MEASUREMENT, MONITORING, AND MANAGEMENT OF COMPLIANCE RISK

In the Subsidiaries and across the company, compliance is monitored by the following:

- A reference to identified metrics, incident assessments (whether affecting it or the wider industry), regulatory feedback, Compliance Testing and regulatory guideline compliance revews, and the judgment of our external assessors as it relates to AML/CFT and other compliance vulnerabilities
- Monitored against our compliance risk assessments and metrics, the results of the continuous monitoring and reporting activities of the compliance function, and the results of internal and external audits and regulatory inspections
- Managed by establishing and communicating appropriate policies and procedures, training employees on them, and monitoring activity to ensure their observance.

The effective convergence of risk management deepens the compliance risk management philosophy through the 'Three Lines of Defence model and all staff are committed to high standards of integrity and fair dealing in business conduct. The Company continues to recognise its accountability to all its stakeholders under the legal and regulatory requirements applicable to its business.

## INFORMATION AND CYBERSECURITY RISK MANAGEMENT

The global cybersecurity landscape continues to evolve at an unprecedented pace, driven by rising geopolitical tensions, AI-powered cyber threats, and the increasing sophistication of cybercriminal syndicates. Since the pandemic, threat actors have leveraged digital connectivity to enhance collaboration, accelerating the rapid commercialisation of cybercrime. Ransomware-as-a-Service (RaaS), supply chain attacks, AI-driven phishing, and cloud vulnerabilities have now become persistent threats to financial institutions. To combat this, our multi-layered cybersecurity strategy remains proactive and intelligence-driven, combining a strong defensive foundation, advanced threat intelligence, and robust resilience capabilities to safeguard the Group and its stakeholders.

### Strengthening Our Cybersecurity Framework

As part of our strategic initiatives, the Group has implemented a comprehensive cybersecurity framework, reinforced by a Defence-in-Depth (DiD) approach to protect our information & digital assets, workforce, and business operations. Our Security functions have also been expanded and modernised to include:

- Cybersecurity Governance & Compliance
- Third-Party Risk & API Security
- Advanced Incident Response & Threat Hunting

A major focus is on improving detection speed and response effectiveness to enable earlier containment, reduce business disruption, and measurably lower breach likelihood and impact.

### Mitigating Digital Risks Amidst Growth

With the Group's expanding retail base and deepening digital footprint, our cybersecurity efforts remain critical. We are proactively reducing our attack surface to the barest minimum, ensuring zero financial loss exposure through continuous risk assessment and real-time anomaly detection across all digital interactions. At the core of this strategy is our world-class 24/7 Security Operations Center (SOC), which provides enhanced threat visibility, real-time monitoring, and AI-driven behavioural analytics to detect and neutralise threats before they escalate.

### Compliance, Resilience & Cybersecurity Awareness

In alignment with global best practices and regulatory requirements, the Group has implemented top-tier security frameworks that undergo annual compliance reassessments. Additionally, our cyber governance model ensures ongoing risk assessments to adapt to evolving regulatory landscapes and security threats. Recognising that people remain the weakest cybersecurity link, we have embedded a strong human-centric security culture through continuous awareness training and phishing simulation exercises; by equipping employees with the skills to identify and disrupt cyber threats, we significantly reduce the risk of social engineering attacks, breaking the cyber-attack chain before damage occurs.

### Navigating the Future: Digital Banking, Fintech, and Cloud Security

As the Group advances its Digital Banking, Fintech Integration, and Cloud Adoption strategy, cybersecurity remains a key enabler. We are embedding security-by-design principles into these innovations to minimize risks while maximizing operational efficiency. Leveraging adaptive security controls, zero-trust frameworks, and AI-powered risk mitigation, we ensure that business expansion aligns with robust cybersecurity safeguards.

Our commitment is unwavering, as we maintain a "moderate overall cyber risk appetite" while driving a resilient, compliant, and digitally secure banking ecosystem. As we continue to

strengthen our defenses, our focus remains on staying ahead of emerging threats, protecting our customers, and ensuring business continuity in an increasingly complex cyber world.

ENVIRONMENTAL AND SOCIAL RISK MANAGEMENT The main objective of our environmental and social ("E&S") risk management strategy is to reduce the negative impacts of climate change and harness the opportunities inherent in portfolio transition towards a near-zero economy on our business. We recognise that our customers' activities and operations can impact the environment and communities around them. We have developed, implemented, and refined our approach to working with our customers to understand and manage these issues. Our robust governance framework, policies, and procedures have ensured that we remain resilient in our E&S risk management commitments, particularly as the Banking group has acquired new markets in Africa and globally. The key to managing environmental risk is creating partnerships with our customers across the Subsidiaries in the Company, aligning activities on our transition path to more sustainable environmental practices. More importantly, our Environmental, Social, and Governance (ESG) systems have evolved from environmental and social risks into environmental and social opportunities. This continuous evolution has ensured that we strive towards attaining a more refined ESG risk management structure, thus building on our E&S pedigree, including embedding and automation of our E&S lending risk review processes, and pioneering corporate-certified green bonds amongst others.

Responding to Climate Change We consider climate change to be one of the greatest challenges facing the world today. We are dedicated to achieving the commitments of the Paris Agreement on carbon emissions reductions, whilst ensuring that we stay focused on managing the potential environmental issues. With the increasing awareness around financed emissions and the impact of climate change potential within our portfolio, we have taken strategic steps towards understanding these potential exposures, their implications and incorporating requisite mitigating measures to manage these risks. We have therefore taken forward-looking measures by becoming a core participating member of internationally recognised climate risk initiatives. These initiatives include: UNEP FI's Taskforce on Climate-related Financial Disclosures (TCFD) was adopted by leading global financial institutions and aimed at identifying and managing the impact of climate risks in the portfolio of Financial Institutions. The banking group became a member of the working group in 2019 and has been working on aligning the emissions from both our operations and our financing activities to the Paris Goal of below two degrees of global warming. Partnership for Carbon Accounting Financials (PCAF) is a global partnership aimed at harmonising the approach to accessing and disclosing greenhouse gas (GHG) emissions associated with loans and investments. The Banking group became a member of the steering group in June 2020. We have built capacity around data collection and incorporating the PCAF methodology to measure our financed emissions. We have also further developed our climate risk strategy by expanding our portfolio of green assets. We have designed a system to identify, measure, track and report on the progress made in developing a diversified green loan portfolio. We recognise the critical role green product development plays in achieving this objective, and we are at an advanced stage in developing a bouquet of green products to catalyse more green loans into our loan portfolio. We have set targets for reducing the carbon emissions from our operations and have taken strong steps toward achieving this goal.

## REPUTATIONAL RISK MANAGEMENT

Reputational risk arises when the reputation of one of the Company's or its subsidiaries is marred by one or more reputational events from negative publicity about the organisation's business practices, conduct or financial condition. Reputational Risk Management is mandated to protect the company from potential threats to its reputation. The risk management function continuously uses proactive means in minimising the effects of reputational events, thereby averting the likelihood of major reputational crises to ultimately ensure the survival of the organisation. The company and its subsidiaries have put in place a framework to properly articulate, analyse and manage reputational risk factors.

The management of reputational risk is taken seriously because of its far-reaching implications, which are buttressed by the fact that most of the subsidiaries operate under:

- A highly regulated industry with high visibility and vulnerability to regulatory actions that may adversely impact its reputation. (e.g. corporate governance crises)
- Keen competition and largely homogeneous products and services have led customers not to perceive significant differences between financial service providers
- Given the nature of the products and services provided, the reputation risk exposure also includes third parties and clients.
- Increasing use of social media platforms for the dissemination of news, where it is difficult to manage and control negative news, even if it is false.

The Company's Subsidiaries operate in a global environment; hence, risks emerge from a host of different sources and locations that are difficult to keep up with and to know how best to respond if they occur. The effects of the occurrence of a reputational risk event include, but are not limited to, the following:

- Erosion of Customer Trust: The loss of both existing and prospective customers, with direct implications for revenue growth and market share.
- Diminished Public Confidence: Negative perceptions that weaken brand equity, reduce stakeholder goodwill and undermine competitive positioning.
- Talent Drain: An impaired reputation can discourage top talent from joining, increase hiring and retention costs, and disrupt workforce productivity.
- Weakening Business Partnerships: Reputational challenges may erode investor confidence, reduce access to strategic alliances and trigger contract cancellations.
- Loss of Strategic Opportunities: Reputational damage can limit the Bank's ability to pursue mergers, acquisitions, or expansion opportunities in new markets.
- Reduced Customer Advocacy: A negative reputation can discourage customers from recommending the Bank's services, weakening its brand presence and growth prospects.
- Increased Cost of Capital: A tarnished reputation can result

in higher borrowing costs across credit and equity markets.

- Regulatory Penalties: Breaches in compliance may attract fines, legal liabilities, and heightened supervisory oversight.
- License Revocation: In extreme circumstances, persistent reputational crises may lead to the suspension or revocation of banking licenses, constraining operations.
- The reputational risk framework provides for the preservation of reputation. Reputational risk will arise from the failure to effectively mitigate any or a combination of country, credit, liquidity, market, regulatory and operational risks. It may also arise from the failure to comply with social, environmental, governance and ethical standards. All employees are responsible for the day-to-day identification and management of reputational risk.

## COMPILATION OF TRIGGER EVENTS

To assist in the identification of key reputational risk events, triggers that would set off the risk drivers are compiled through regular workshops with participants across the Company, which include Negative Mentions, Staff expertise, Regulatory Compliance deviations, Corporate Culture, Risk Management and Control Environment, Financial Soundness and Business Viability, amongst others.

## APPROACH TO MANAGING REPUTATION RISK EVENTS

The approach to managing reputational events, including any relevant strategy and policies, is approved by the Board or its delegated committee and subject to periodic review and regularly updated by senior management to ensure that it remains appropriate over time. In addition, the approach is well documented and communicated to all relevant personnel.

Key elements of the Company's approach include:

- **Strategic Governance:** A well-documented framework that defines clear responsibilities for managing reputational risk across all levels of the organisation.
- **Continuous Monitoring & Early Detection:** Leveraging advanced analytics, media tracking, and stakeholder engagement to identify emerging risks before theyescalate.
- **Crisis Response & Mitigation:** A proactive and coordinated response strategy to manage reputational threats, including crisis communication protocols and contingency planning.
- **Transparent Communication:** Ensuring all relevant personnel are well-informed about reputational risk management policies, with clear guidelines on escalation procedures and response mechanisms.
- **Regular Policy Updates:** The Bank remains agile by regularly updating its risk management policies to reflect changes in the regulatory environment, market conditions, and stakeholder expectations.

## POST-REPUTATION EVENT REVIEWS

After a reputational event, the post-event review is conducted by the Internal Audit and Risk Management Division to identify any lessons learnt, or problems and weaknesses revealed, from the event. Such reviews are useful for providing feedback and recommendations for enhancing the reputation across the Company's reputation risk management process and are conducted on any major event affecting any of the Subsidiaries. The Board and senior management are informed of the results of any such review conducted to take appropriate actions to enhance their capacity to manage reputational risk.

## STRATEGIC RISK MANAGEMENT

Strategic Risk Management is defined as the process of identifying, assessing and managing risks and uncertainties affected by internal and external events or scenarios that could inhibit the ability to achieve strategic objectives to create and protect shareholder and stakeholder value. It is a primary component and necessary foundation of our Enterprise Risk Management.

Strategic risk management, therefore, is the current or prospective risk to earnings and capital arising from adverse business decisions, improper implementation of decisions, or lack of responsiveness to changes in the business environment. It can also be defined as the management of the risk associated with future business plans and strategies, including plans for entering new business lines, expanding existing services through mergers and acquisitions, and enhancing infrastructure.

The following principles govern strategic risk management across the Company:

The Board and Senior Management are responsible for Strategic Risk Management and oversee the effective functioning of the strategic risk management framework.

The functional units (i.e. the units which carry out business or operational functions) assist the Board and Senior Management in formulating and implementing strategies, providing input to the strategic planning and management processes, as well as implementing the strategic risk management framework.

The risk management function supports the Board and senior management in managing strategic risks and other related processes.

To strengthen the effectiveness of strategic risk management, the company has instituted a comprehensive set of measures and controls designed to ensure resilience, alignment and accountability across its operations. These include:

- Board-Approved Strategic Plans: All strategic initiatives are subject to rigorous evaluation and approval by the Board of Directors, with ongoing monitoring to trackprogress, execution quality, and overall impact.
- Environmental Scanning and Strategy Sessions: Regular assessments of macroeconomic, industry and market dynamics enable the Bank to anticipate risks and opportunities, providing a solid foundation for informed strategic decision-making.
- Alignment with Business Model: Strategic initiatives are closely reviewed to ensure consistency with the Bank's core business objectives, risk appetite and long-term growth trajectory.
- Performance Monitoring and Review: Executive Management conducts structured performance reviews to evaluate

progress, identify gaps and adapt business plans in response to evolving internal and external conditions.

- Succession Planning and Governance Integrity: Robust succession planning frameworks and governance structures are maintained to safeguard leadership continuity, uphold accountability and ensure adherence to global best practices.

## ECONOMIC INTELLIGENCE

The Economic Intelligence (EI) team provides economic, business, and financial analysis supporting the Company to achieve its strategic objectives. Its value propositions include assisting the Company in realising the respective targeted moderate risk appetite, price competitiveness, improvement to business intelligence, and brand enhancement.

Some of the Unit's roles and responsibilities include:

- Industry & Investment Analysis: Evaluating global market opportunities, sectoral developments and investment trends that drive sustainable growth. This includes rigorous assessments of sovereign creditworthiness, structural reforms and geopolitical exposures shaping cross-border banking activity.
- Policy Research & Interpretation: Conducting forward-looking analysis of fiscal, monetary, regulatory and trade policy developments worldwide, with a strong focus on their implications for the subsidiaries, international expansion and operational efficiency.
- Strategic Risk & Vulnerability Assessment: Leveraging the proprietary Composite Index to assess sovereign fragilities, geopolitical uncertainties and country-level exposures. This enables the company to proactively mitigate vulnerabilities associated with its diversified operations while positioning itself to capture opportunities in higher-rated sovereign markets.
- Strategic Partnerships & Intelligence Sharing: Collaborating with multilateral institutions, international research organisations, and global data providers to enhance forecasting accuracy, scenario modeling and risk intelligence. These partnerships reinforce the Bank's ability to navigate volatility and support evidence-based strategic decision-making.

# NOTES TO THE FINANCIAL STATEMENT

## 1 General information

Access Holdings Plc ("the company") is domiciled in Nigeria. The address of the company's registered office is No 14/15, Prince Alaba Oniru Road, Oniru, Lagos (formerly Plot 999c, Danmole Street, off Adeola Odeku/Idejo Street, Victoria Island, Lagos). The consolidated and separate interim financial statements of the Company for the period ended 30 June 2026 comprises the Holding Company and its subsidiaries (together referred to as "the Group" and separately referred to as "Group entities"). The Company's business segments include banking, consumer lending, payment services, insurance brokerage and pension funds administration. The Company is listed on Nigerian Exchange Group.

These financial statements were approved and authorised for issue by the Board of Directors on 27 August, 2026.

## 2 Statement of compliance with International Financial Reporting Standards

The consolidated and separate interim financial statements of the Group and Company respectively, have been prepared in accordance with IFRS Accounting Standards issued by the International Accounting Standards Board (IASB). Additional information required by national regulations are included where appropriate.

## 3 Basis of preparation

This financial statement has been prepared in accordance with the guidelines set by International Financial Reporting Standards (IFRS Accounting Standards) and interpretations issued by the IFRS Interpretations Committee (IFRIC) applicable to companies reporting under IFRS. This consolidated and separate interim financial statement comprise the consolidated and separate statement of comprehensive income, the consolidated and separate statement of financial position, the consolidated and separate statements of changes in equity, the consolidated and separate cash flow statement and the accompanying notes.

The financial statements have also been prepared in the manner required by the Companies and Allied Matters Act (CAMA), 2020, the Financial Reporting Council of Nigeria Act, 2011 (as amended), the Banks and Other Financial Institutions Act (BOFIA), 2020 and relevant Central Bank of Nigeria (CBN) Guidelines and Circulars.

The financial statements have been prepared in accordance with the going concern principle under the historical cost convention, modified to include fair valuation of particular financial instruments, non current assets held for sale and investment properties to the extent required or permitted under IFRS as set out in the relevant accounting policies. ,as management is satisfied that the Group has adequate resources to continue as a going concern for the foreseeable future. In making this assessment, management has considered a wide range of information including projections of profitability, regulatory capital requirements and funding needs.

### (a) Functional and presentation currency

Items included in the financial interim statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The consolidated and separate interim financial statements are presented in naira, which is Access Holdings Plc's functional and presentation currency; except where indicated, financial information presented in Naira has been rounded to the nearest millions.

### (b) Basis of measurement

These consolidated and separate interim financial statements have been prepared on the historical cost basis except for the following:

- derivative financial instruments are measured at fair value.
- non-derivative financial instruments at fair value through profit or loss are measured at fair value.
- financial instruments at fair value through OCI are measured at fair value.
- the liability for defined benefit obligations is recognised as the present value of the defined benefit obligation and related current service cost.
- non-current assets held for sale measured at lower of carrying amount and fair value less costs to sell.
- share based payment at fair value or an approximation of fair value allowed by the relevant standard.
- Investment properties are measured at fair value.
- Deferred consideration payable and receivable is recognised as the present value of the future payment or receipt.

### (c) Use of estimates and judgments

The preparation of the consolidated and separate interim financial statements in conformity with IFRS Accounting standards requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised, if the revision affects only that period, or in the period of the revision and future periods, if the revision affects both current and future periods.

Information about significant areas of estimation uncertainties and critical judgments in applying accounting policies that have the most significant effect on the amounts recognised in the consolidated and separate interim financial statements are described in note 4.

## Notes to the Financial Statement continued

## 3 Basis of preparation continued

### 3.1 IFRS Accounting standards

The material principal accounting policies adopted in the preparation of these financial statements are set out below. These policies have been consistently applied to all periods presented, unless otherwise stated.

Amendments to the following standard(s) became effective in the annual period starting from 1 January, 2026. The new reporting requirements as a result of the amendments and/or clarifications have been evaluated and their impact or otherwise are noted below:

**(a) Changes in material accounting policies and disclosures**

Amendments to the following standard(s) became effective in the annual period starting from 1 January 2026. The new reporting requirements as a result of the amendments and/or clarifications have been evaluated and their impact or otherwise are noted below:

Annual Improvements to IFRS Accounting Standards (Amendments to IFRS 1, IFRS 7, IFRS 9, IFRS 10 and IAS 7)

IFRS 1, IFRS 7, IFRS 9, IFRS 10, and IAS 7 Amendment – Annual improvements to IFRS Accounting Standards

IFRS 1 First-time Adoption of International Financial Reporting Standards:

IFRS 1 First-time Adoption of International Financial Reporting Standards was amended to improve its consistency in wording with the requirements in IFRS 9 Financial Instruments; and add cross-references to improve the understandability of IFRS 1.

### 3.2 Standards and interpretations issued/ amended but not yet effective

The following standards have been issued or amended by the IASB but are yet to become effective for annual periods beginning on 1 January 2026:

**IFRS 18 – Presentation and Disclosure in Financial Statements**

In April 2024, the Board issued IFRS 18 Presentation and Disclosure In April 2024, the Board issued IFRS 18 Presentation and Disclosure in Financial Statements which replaces IAS 1 Presentation in Financial Statements.

IFRS 18 introduces new categories and subtotals in the statement of profit or loss. It also requires disclosure of management-defined performance measures (as defined) and includes new requirements for the location, aggregation and disaggregation of financial information. The objective of the Standard is to set out requirements for the presentation and disclosure of information in general purpose financial statements to help ensure they provide relevant information that faithfully represents an entity's assets, liabilities, equity, income and expenses.

For the purposes of classifying its income and expenses into the categories required by IFRS 18, an entity will need to assess whether it has a 'main business activity' of investing in assets or providing financing to customers, as specific classification requirements will apply to such entities. Determining whether an entity has such a specified main business activity is a matter of fact and circumstances which requires judgement. An entity may have more than one main business activity.

IFRS 18 introduces the concept of a management-defined performance measure (MPM) which it defines as a subtotal of income and expenses that an entity uses in public communications outside financial statements, to communicate management's view of an aspect of the financial performance of the entity as a whole to users. IFRS 18 is effective for reporting periods beginning on or after 1 January 2027 and will apply retrospectively. Early adoption is permitted and must be disclosed.

IFRS 18, and the amendments to the other accounting standards, is effective for reporting periods beginning on or after 1 January 2027 and will apply retrospectively. Early adoption is permitted and must disclose the expected impact of adoption.

***Subsidiaries without Public Accountability Disclosures: IFRS 19 Effective for annual periods beginning on or after 1 January 2027.***

IFRS 19 is effective for reporting periods beginning on or after 1 January 2027 and earlier adoption is permitted. If an eligible entity chooses to apply the standard earlier, it is required to disclose that fact. An entity is required, during the first period (annual and ) in which it applies the standard, to align the disclosures in the comparative period with the disclosures included in the current period under IFRS 19, unless IFRS 19 or another IFRS accounting standard permits or requires otherwise. The entity need to disclose the expected impact of adoption.

### 3.3 Basis of consolidation

**(a) Subsidiaries**

Subsidiaries are entities over which the Group exercises control.

Control is achieved when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the activities of the entity:

[i] power over the investee;

[ii] exposure, or rights, to variable returns from its involvement with the investee; and

[iii] the ability to use its power over the investee to affect the amount of the investor's returns

The Group reassess periodically whether it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed. The existence and effect of potential voting rights are considered when assessing whether the group controls another entity.

The Group assesses existence of control where it does not have

## Notes to the Financial Statement continued

### 3 Basis of preparation continued

more than 50% of the voting power i.e. when it holds less than a majority of the voting rights of an investee. The group considers all relevant facts and circumstances in assessing whether or not it's voting rights are sufficient to give it power, including:

[i] a contractual arrangement between the group and other vote holders

[ii] rights arising from other contractual arrangements

[iii] the group's voting rights (including voting patterns at previous shareholders' meetings)

[iv] potential voting rights

The subsidiaries are included in the consolidated financial statements from the date on which control commences until the date on which control ceases.

Subsidiaries are measured at cost less impairment in the separate financial statement.

**(b) Business combinations**

The Group applies IFRS 3 Business Combinations (revised) in accounting for business combinations.

Business combinations are accounted for using the acquisition method as at the acquisition date, which is the date on which control is transferred to the Group. Control is the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. In assessing control, the Group takes into consideration potential voting rights and requirements for regulatory approvals where considered substantive.

The Group measures goodwill at the acquisition date as:

- the fair value of the consideration transferred; plus
- the recognised amount of any non-controlling interests in the acquiree; plus if the business combination is achieved in stages, the fair value of the pre-existing equity interest in the acquiree; less
- the net recognised amount (generally fair value) of the identifiable assets acquired and liabilities assumed.

Goodwill from business acquisition are tested annually for impairment. When this total is negative, a gain from bargain purchase is recognised immediately in statement of profit or loss.

The consideration transferred in the acquisition is generally measured at fair value, as are the identifiable net assets acquired and does not include amounts related to the settlement of pre-existing relationships. Such amounts are generally recognised in the statement of profit or loss

Transactions costs related to the acquisition, other than those associated with the issue of debt or equity securities, that the Group incurs in connection with a business combination are expensed as incurred.

Any contingent consideration payable is measured at fair value at the acquisition date. If the contingent consideration is classified as equity, then it is not re-measured and settlement is accounted for within equity. Otherwise, subsequent changes in the fair value of the contingent consideration are recognised in the income statement.

When share-based payment awards (replacement awards) are required to be exchanged for awards held by the acquiree's employees (acquiree's awards) and relate to past services, then all or a portion of the amount of the acquirer's replacement awards is included in measuring the consideration transferred in the business combination. This determination is based on the market-based value of the replacement awards compared with the market-based value of the acquiree's awards and the extent to which the replacement awards relate to past and/or future service.

The Group elects on a transaction-by-transaction basis whether to measure non-controlling interest at its fair value, or at its proportionate share of the recognised amount of the identifiable net assets, at the acquisition date.

***Measurement Period Adjustments***

Where the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports provisional amounts for the items for which the accounting is incomplete. During the measurement period, which shall not exceed one year from the acquisition date, the Group retrospectively adjusts the provisional amounts recognised at the acquisition date to reflect new information obtained about facts and circumstances that existed as of the acquisition date and, if known, would have affected the measurement of the amounts recognised. Measurement period adjustments may result in changes to the fair values of identifiable assets acquired and liabilities assumed, including identifiable intangible assets, with a corresponding adjustment to goodwill. Comparative information for prior periods presented is revised retrospectively as if the accounting for the business combination had been completed at the acquisition date.

After the measurement period ends, revisions to estimates are recognised only to correct an error in accordance with IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors and are not accounted for as measurement period adjustments.

**(c) Loss of control**

Upon loss of control, the Group derecognises the assets and liabilities of the subsidiary, any non-controlling interests and the other components of equity related to the subsidiary. Any surplus or deficit arising on the loss of control is recognised in the statement of profit or loss. If the Group retains any interest in the previous subsidiary, then such interest is measured at fair value at the date that control is lost. Subsequently it is accounted for as an equity-accounted investee or in accordance with the Group's accounting policy for financial instruments.

**(d) Disposal of subsidiaries**

When the Group ceases to have control, any retained interest in the entity is remeasured to its fair value at the date when control

## Notes to the Financial Statement continued

### 3 Basis of preparation continued

is lost, with the change in carrying amount recognised in income statement. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to the income statement.

The gain/loss arising from disposal of subsidiaries is included in the profit/loss of discontinued operations in the statement of comprehensive income, if the disposed subsidiary meets the criteria specified in IFRS 5.

Foreign currency translation differences become realised when the related subsidiary is disposed when a parent company disposes of a partial interest in a subsidiary but retains control, this transaction is treated as an equity transaction. In such cases, no gain or loss is recognised in profit or loss; instead, the transaction affects the equity of the parent company. The difference between the proceeds from the disposal and the carrying amount of the interest sold is recorded as an adjustment to equity, reflecting the nature of the transaction as one between owner.

**(e) Changes in ownership interests in subsidiaries without change of control**

**Consolidated financial statements**

Transactions with non-controlling interests that do not result in a loss of control are accounted for as equity transactions, being transactions with owners in their capacity as owners. The carrying amounts of the controlling and non-controlling interests are adjusted to reflect changes in their relative interests in the subsidiary. Any difference between the consideration paid or received and the adjustment to the non-controlling interest is recognised directly in equity and attributed to the owners of the Bank. No gain or loss is recognised in profit or loss.

**Separate financial statements**

In the separate financial statements, investments in subsidiaries are carried at cost. Where the Bank disposes of or acquires an additional interest in a subsidiary without losing control, the carrying amount of the investment is adjusted to reflect the proportion of the interest disposed of or acquired. Any difference between the consideration paid or received and the carrying amount of the portion of the investment acquired or disposed of is recognised in statement of profit or loss.

**(f) Transactions eliminated on consolidation**

Inter-company transactions, balances, income and expenses on transactions between group companies are eliminated. Profits and losses resulting from intercompany transactions that are recognised in assets are also eliminated unless the transaction provides evidence of an impairment of the transferred asset. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the group.

**(g) Non controlling interest**

The group recognises non-controlling interests in an acquired entity either at fair value or at the noncontrolling interest's proportionate share of the acquired entity's net identifiable assets. This decision is made on an acquisition-by-acquisition basis.

### 3.4 Segment reporting

An operating segment is a component of the Group that engages in business activities from which it can earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the Group's other components, whose operating results are reviewed regularly by the Executive Committee (being the chief operating decision maker) to make decisions about resources allocated to each segment and assess its performance, and for which discrete financial information is available.

Segment results that are reported to the Executive Committee include items that are directly attributable to a segment as well as those that can be allocated on a reasonable basis. Unallocated Segments represents all other transactions than are outside the normal course of business and can not be directly related to a specific segment financial information

### 3.5 Foreign currency translation

**(a) Functional and presentation currency**

Items included in the financial statements of each of the group's entities are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The consolidated financial statements are presented in Naira', which is the Company's presentation currency.

**(b) Transactions and balances**

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are re-measured. Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the exchange rate at the reporting date. The foreign currency gain or loss on monetary items is the difference between the amortised cost in the functional currency at the beginning of the period, adjusted for effective interest, impairment and payments during the period, and the amortised cost in the foreign currency translated at the spot exchange rate at the end of the period. Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated into the functional currency at the exchange rate when the fair value is determined. Non-monetary items that are measured based on historical cost in a foreign currency are translated at the exchange rate at the date of the transaction.

Foreign currency differences arising on translation are generally recognised in profit or loss. However, foreign currency differences arising from the translation of the following items are recognised

## Notes to the Financial Statement continued

## 3 Basis of preparation continued

in OCI:

- equity investments in respect of which an election has been made to present subsequent changes in fair value in OCI;
- a financial liability designated as a hedge of the net investment in a foreign operation to the extent that the hedge is effective; and
- qualifying cash flow hedges to the extent that the hedges are effective.

### (c) Group Entities

The results and financial position of all the group entities (Access Ghana and Access Sierra Leone have a currency of a hyper-inflationary economy that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

[i] assets and liabilities for each balance sheet presented are translated at the closing rate at the reporting date of that balance sheet;

[ii] income and expenses for each income statement are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the rate on the dates of the transactions); and

[iii] all foreign currency differences are recognised in OCI and accumulated in the translation reserve, except to the extent that the translation difference is allocated to NCI.

When a partial or full disposal of a foreign operations resulted in lost of control, the cumulative amount in the translation reserve related to that foreign operation is reclassified to profit or loss as as part of the gain or loss on disposal. If the group disposes of only part of its interest in a subsidiary that includes a foreign operation while retaining control, then the relevant proportion of the cumulative amount is re-attributed to NCI.

Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate. Exchange differences arising are recognised in other comprehensive income.

### (d) Hyperinflationary Accounting

**Discontinuation of Hyperinflation**

The Group discontinues the application of IAS 29 Financial Reporting in Hyperinflationary Economies once the relevant economy is assessed to have ceased being hyperinflationary, in line with IAS 29 requirements. When hyperinflationary accounting ceases, the amounts expressed in the measuring unit current at the end of the last reporting period in which IAS 29 was applied are used as the basis for the carrying amounts in subsequent financial statements. These restated balances are treated as the opening balances for future periods and are not subsequently re indexed. Judgement is required in determining when an economy ceases to be hyperinflationary, taking into consideration indicators such as improvements in macroeconomic stability, sustained decreases in inflation, and other qualitative economic factors, in accordance with IAS 29.38. For the Group's operations in Ghana, the application of IAS 29 was discontinued in December 2025, as the Ghanaian economy was assessed to have ceased hyperinflation. Consequently, restated figures as at December 2025, being the last period in which IAS 29 was applied, have been used as the basis for carrying amounts in subsequent reporting periods.

## 3.6 Operating income

It is the Group's policy to recognise revenue from a contract when it has been approved by both parties, rights have been clearly identified, payment terms have been defined, the contract has commercial substance, and collectability has been ascertained as probable.

Revenue is recognised when control of goods or services have been transferred. Control of an asset refers to the ability to direct the use of and obtain substantially all of the remaining benefits (potential cash inflows or savings in cash outflows) associated with the asset.

**Principal versus Agency considerations**

The Group is the principal in an arrangement where it obtains control of the goods or services of another party in advance of transferring control of those goods or services to a customer. The Group is the principal in its card services.

The Group is an agent where its performance obligation is to arrange for another party to provide the goods and services. The Group is the agent in its arrangement with mobile network providers, card vendors and insurance companies.

Where the group is acting as an agent, it recognises as revenue only the commission retained by the group (in other words, revenue is recognised net of the amounts paid to the principal). Where the group is the principal, it will recognise as revenue the gross amount paid and allocated to the performance obligation. It will also recognise an expense for the direct costs of satisfying the performance obligation.

### (a) Interest income and expense

Interest income and expense for all interest-bearing financial instruments are recognised within "interest income" and "interest expense" in the consolidated and separate income statement using the effective interest method.

The Group calculates interest income by applying the Effective interest rate (EIR) to the gross carrying amount of financial assets other than credit-impaired assets.

When a financial asset becomes credit-impaired and is, therefore,

## Notes to the Financial Statement continued

### 3 Basis of preparation continued

regarded as 'Stage 3', the Group calculates interest income by applying the effective interest rate to the net amortised cost of the financial asset. If the financial assets is no longer credit-impaired, the Group reverts to calculating interest income on a gross basis.

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts the estimated future cash payments and receipts through the expected life of the financial asset or liability (or, where appropriate, a shorter period) to the net carrying amount of the financial asset or liability. When calculating the effective interest rate, the Group estimates future cash flows considering all contractual terms of the financial instruments but not future credit losses.

The calculation of the effective interest rate includes contractual fees paid or received, transaction costs, and discounts or premiums that are an integral part of the effective interest rate. Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or liability.

Interest income and expense presented in the statement of comprehensive income include:

- interest on financial assets and financial liabilities measured at amortised cost calculated on an effective interest rate basis.
- interest on fair value through other comprehensive income investment securities calculated on an effective interest basis.

Interest income on fair value through profit or loss instruments is recognised using the contractual interest rate on investment securities.

**(b) Modification Gain or Loss**

A modification gain or loss arises when the terms of a financial instrument are modified or changed, leading to a difference between the present value of the revised cash flows and the present value of the original cash flows, discounted at the original effective interest rate.

IFRS 9: Financial Instruments provide guidance on the accounting treatment for modifications of financial instruments.

When the terms of a financial instrument (such as a loan) are modified, the entity must assess whether the modification is considered a substantial modification or a non-substantial modification.

(a) Substantial Modification
(b) Non-Substantial Modification

If the modification is not substantial, the carrying amount of the original financial instrument is adjusted to reflect the new cash flows, discounted at the original effective interest rate.

The difference between the original carrying amount and the revised carrying amount is recognised immediately in the income statement as a modification gain or loss.

**(c) Fees and commission income and expense**

Fees and commission income and expenses that are integral to the effective interest rate on a financial asset or liability are included in the measurement of the effective interest rate.

Fee and commission presented in the income statement includes:

- Credit related fees: This includes advisory, penal and commitment fees. These are fees charged for administration and advisory services to the customer up to the customer's acceptance of the offer letter. The advisory and commitment fees are earned at the point in time where the customer accepts the offer letter which is when the Group recognises its income. These fees are not integral to the loan, therefore, they are not considered in determining the effective interest rate. The penal fee on default also forms part of the items warehoused in this line. When a loan commitment is not expected to result in the draw-down of a loan, loan commitment fees are recognised on a straight-line basis over the commitment period.
- Account maintenance fees: These are fees charged to current accounts. N1 on every N1,000 in respect of all customer induced debit transactions is charged on these accounts. These fees are earned by the Group at the time of each transaction and the Group recognises its income accordingly.
- Card maintenance fees: The Group charges these fees to customers for maintaining their cards. The fees are earned and recognised by the Group over the validity period of the card. The Group charges the customers for this service on a monthly basis.
- Other fees and commission income, includes commission on bills and letters of credit, account handling charge, commissions on other financial services, commission on foreign currency denominated transactions, channel and other e-business income, and retail account charges. These fees and commissions are recognised as the related services are performed.

Fees and commissions expenses are fees charged for the provision of services to customers transacting on alternate channels platform of the Group and on the various debit and credit cards issued for the purpose of these payments. They are charged to the Group on services rendered on internet Grouping, mobile Grouping and online purchasing platforms. The corresponding income lines for these expenses include the income on cards (both foreign and local cards), online purchases and bill payments included in fees and commissions.

**(d) Net loss/gains on financial instruments at fair value**

## Notes to the Financial Statement continued

## 3 Basis of preparation continued

Net loss/gains on financial instruments comprise of the following:

- Net gains/losses on financial instruments classified as fair value through profit or loss: This includes the gains and losses arising both on sale of trading instruments and from changes in fair value of derivatives and non-derivative instruments measured at fair value through profit or loss.
- Net gains on financial instruments held as Fair value through other comprehensive income: This relates to gains arising from the disposal of financial instruments held as Fair value through other comprehensive income as well as fair value changes reclassified from other comprehensive income upon disposal of debt instruments carried at fair value through other comprehensive income.

### (e) Net Foreign exchange gain and losses

Net foreign exchange gain and losses include realised and unrealised foreign exchange gains or losses on revaluation of the foreign currency denominated transactions

### (f) Other operating income

Other operating income includes items such as dividends, gains on disposal of properties, rental income, income from asset management, brokerage and agency as well as income from other investments.

Dividend on Fair value through profit or loss equity securities: This is recognised net of withholding tax when the right to receive payment is established. Dividends are reflected as a component of other operating income in the income statement.

## 3.7 Income tax

The tax expense for the year comprises current and deferred tax. Tax is recognised in the income statement, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

### (a) Current tax

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Bank and its subsidiaries operate and generate taxable income. Following the enactment of the Nigeria Tax Act, 2025 (NTA), which repealed and consolidated the Companies Income Tax Act (CITA) and other extant tax laws with effect from 1 January 2026, the Bank calculates its income tax expense in accordance with the provisions of the NTA and the Nigeria Tax Administration Act, 2025 (NTAA), which governs the administration and assessment of taxes payable thereunder. Management periodically evaluates positions taken in tax returns with respect to situations in which the applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities. This is recognised in the current tax liabilities caption in the statement of financial position and considers whether it is probable that a taxation authority will accept an uncertain tax treatment. The Group measures its tax balances either based on the most likely amount or the expected value, depending on which method provides a better prediction of the resolution of the uncertainty.

Current tax assets and liabilities are offset only if certain criteria are met.

### (b) Minimum tax

Following the enactment of the Nigeria Tax Act, 2025 (NTA), which took effect from 1 January 2026 and repealed the minimum tax provisions previously applicable under the Finance Act, 2019, the Group is now subject to a minimum effective tax rate (ETR) of 15% of Net Income. This applies to Nigerian companies that are members of a multinational group that have an annual turnover of N50 billion or above. Net Income for this purpose is defined as profit before tax, excluding franked investment income and unrealised gains or losses. Where the Group's effective tax rate on this basis falls below 15%, a top-up tax is payable to bring the effective rate to the statutory minimum. This is shown in note 16.

### (c) Deferred tax

Deferred income tax is recognised, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated statement of financial position. However, deferred tax liabilities are not recognised if they arise from the initial recognition of goodwill; deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred tax assets are recognised for unused tax losses, unused tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be used. Future taxable profits are determined based on the reversal of relevant taxable temporary differences. If the amount of taxable temporary differences is insufficient to recognise a deferred tax asset in full, then future taxable profits, adjusted for reversals of existing temporary differences, are considered, based on business plans for individual subsidiaries in the Group. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised; such reductions are reversed when the probability of future taxable profits improves. Unrecognised deferred tax assets are reassessed at each reporting date and recognised to the extent that it has become probable that future taxable profits will be available against which they can be used.

## Notes to the Financial Statement continued

## 3 Basis of preparation continued

The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Group expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities. For this purpose, the carrying amount of investment property measured at fair value is presumed to be recovered through sale, and the Group has not rebutted this presumption.

**(d) Tax windfall**

The Nigerian government, through the Finance (Amendment) Bill 2024, imposed a 70% windfall tax on realised profits from foreign exchange transactions by banks in the 2023, 2024 and 2025 financial years, to be assessed and collected by the Federal Inland Revenue Service (FIRS) now The Nigeria Revenue Service (NRS). This has been treated by making a provision for this in the company income tax computation for 2025 for the 2025 financial year. There is no provision for the windfall levy for the period ended 30 June 2026, as the assessment period concluded in December 31, 2025 in line with Finance (Amendment) Bill 2024.

## 3.8 Financial assets and liabilities

**Investments and other financial assets**

**Recognition and derecognition**

The Group initially recognises financial instruments (including regular-way purchases and sales of financial assets) on the settlement date, which is the date that the instrument is delivered to or by the Group.

**(a) Financial assets**

**i Classification**

The group classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through OCI or through profit or loss), and
- those to be measured subsequently at amortised cost.

The classification for debt financial assets depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will either be recorded in profit or loss or OCI. For investments in equity instruments that are not held for trading, this will depend on whether the group has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income (FVOCI). The group reclassifies debt investments when and only when its business model for managing those assets changes. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the group has transferred substantially all the risks and rewards of ownership.

**Measurement**

At initial recognition, the group measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss (FVPL), transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVPL are expensed in profit or loss. Where the fair value is different from the transaction price, the resulting gain or loss is recognised in trading gains or losses on financial instruments only when the fair value is evidenced by a quoted price in an active market for an identical asset (i.e. level 1 input) or based on a valuation technique that uses only data from observable markets

**ii Debt instruments**

Subsequent measurement of debt instruments depends on the group's business model for managing the asset and the contractual cash flow characteristics of the asset. There are three measurement categories into which the group classifies its debt instruments:

- **Amortised cost:** Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. Interest income from these financial assets is included in interest income using the effective interest rate method. Any gain or loss arising on derecognition is recognised directly in profit or loss and presented in Net (loss)/gain on financial instruments at fair value together with foreign exchange gains and losses. Impairment losses are presented as separate line item in the statement of profit or loss.
- **FVOCI:** Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVOCI. Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest income and foreign exchange gains and losses which are recognised in profit or loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss and recognised in other operating income. Interest income from these financial assets is included in interest income using the effective interest rate method. Foreign exchange gains and losses are presented in net gains/(loss) on financial instruments at fair value and impairment expenses are presented as separate line item in net impairment charge on financial assets.
- **FVPL:** Assets that do not meet the criteria for amortised cost or FVOCI are measured at FVPL. A gain or loss on a debt investment that is subsequently measured at FVPL is recognised in profit or loss and presented net within net gains/(loss) on financial instruments at fair value in the period in which it arises.

If in a subsequent period, the fair value of an impaired fair value through other comprehensive income debt security increases and the increase can be related objectively to an event occurring

## Notes to the Financial Statement continued

### 3 Basis of preparation continued

after the impairment loss was recognised, then the impairment loss is reversed through the income statement; otherwise, any increase in fair value is recognised through OCI.

The Group only measures cash and balances with Groups, Loans and advances to Groups and customers and other financial investments at amortised cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

The details of these conditions are outlined below.

**iii Business model assessment**

The Group determines its business model at the level that best reflects how it manages groups of financial assets to achieve its business objective.

The Group's business model is not assessed on an instrument-by-instrument basis, but at a higher level of aggregated portfolios and is based on observable factors such as:

- How the performance of the business model and the financial assets held within that business model are evaluated and reported to the entity's key management personnel.
- The risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way those risks are managed.
- How managers of the business are compensated (for example, whether the compensation is based on the fair value of the assets managed or on the contractual cash flows collected).
- The expected frequency, value and timing of sales are also important aspects of the Group's assessment.

The business model assessment is based on reasonably expected scenarios without taking 'worst case' or 'stress case' scenarios into account. If cash flows after initial recognition are realised in a way that is different from the Group's original expectations, the Group does not change the classification of the remaining financial assets held in that business model, but incorporates such information when assessing newly originated or newly purchased financial assets going forward.

**iv The SPPI test**

As a second step of its classification process, the Group assesses the contractual terms of financial instruments to identify whether they meet the SPPI test.

'Principal' for the purpose of this test is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset (for example, if there are repayments of principal or amortisation of the premium/discount).

The most significant elements of interest within a lending arrangement are typically the consideration for the time value of money and credit risk. To make the SPPI assessment, the Group applies judgement and considers relevant factors such as the currency in which the financial asset is denominated, and the period for which the interest rate is set.

In contrast, contractual terms that introduce a more than de minimis exposure to risks or volatility in the contractual cash flows that are unrelated to a basic lending arrangement do not give rise to contractual cash flows that are solely payments of principal and interest on the amount outstanding. In such cases, the financial asset is required to be measured at FVPL.

**v Equity instruments**

The group initially measures all equity investments at fair value through profit or loss. Where the group's management has elected to present fair value gains and losses on equity investments in OCI, there is no subsequent reclassification of fair value gains and losses to profit or loss following the derecognition of the investment. Dividends from such investments continue to be recognised in profit or loss as other income when the group's right to receive payments is established.

Changes in the fair value of financial assets at FVPL are recognised in net gains/(loss) on financial instrument at fair value in the statement of profit or loss as applicable.

**(b) Financial Liabilities**

Financial liabilities that are not classified at fair value through profit or loss are measured at amortised cost using the effective interest method. Amortised cost is calculated by taking into account any discount or premium on issue funds, and costs that are an integral part of the EIR. A compound financial instrument which contains both a liability and an equity component is separated at the issue date. Interest expense is included in 'Interest expense' in the Statement of comprehensive income.

Financial liabilities that are classified at fair value through profit or loss include derivatives, financial liabilities held for trading and other financial liabilities designated as such at initial recognition. Gains and losses attributable to changes in Group's credit risk are recognised in other comprehensive income and the fair value of the liability are recognised in profit or loss.

If recognition of own credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss, all fair value gains/losses are recognised in profit or loss.

The table below reconciles classification of financial instruments to the respective IFRS 9 category.

## Notes to the Financial Statement continued

### 3 Basis of preparation continued

| | |
|---|---|
| Financial assets | Financial assets at fair value through profit or loss |
| | Financial assets at amortised cost |
| | Fair value through other comprehensive income |
| Financial liabilities | Financial liabilities at fair value through profit or loss |
| | Financial liabilities at amortised cost |

**(c) Classification of financial assets**

**[i] Fair value through profit or loss**

This category comprises financial assets classified as hold to sell upon initial recognition.

A financial asset is classified as fair value through profit or loss if it is acquired or incurred principally for the purpose of selling or repurchasing it in the near term or if it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking. Derivatives are also categorised measured at fair value through profit or loss unless they are designated and effective as hedging instruments. Financial assets held for trading consist of debt instruments, including money-market instruments, as well as financial assets with embedded derivatives. They are recognised in the consolidated statement of financial position as 'non-pledged trading assets'.

Financial assets included in this category are recognised initially at fair value; transaction costs are taken directly to the consolidated income statement. Gains and losses arising from changes in fair value are included directly in the consolidated income statement and are reported as " Net (loss)/gain on financial instruments at fair value". Interest income and expense and dividend income on financial assets held for trading are included in 'Interest income', "Interest expense' or 'Other operating income', respectively. The instruments are derecognised when the rights to receive cash flows have expired or the Group has transferred substantially all the risks and rewards of ownership and the transfer qualifies for derecognising.

The Group is mandated to classify certain financial assets upon initial recognition as at fair value through profit or loss (fair value option) when the following conditions are met:

- The asset does not meet the solely principal and interest on the principal amount outstanding (SPPI) test
- The financial asset is held within a business model whose objective is achieved by selling financial assets.

The Group may designate certain financial assets upon initial recognition as at fair value through profit or loss (fair value option). This designation cannot subsequently be changed. The fair value option is only applied when the designation eliminates or significantly reduces an accounting mismatch which would otherwise arise.

**[ii] Amortised cost**

Amortised cost financial assets are assets that are held for collection of contractual cashflows, where those cashflows represent solely payments of principal and interest.

These are initially recognised at fair value including direct and incremental transaction costs and measured subsequently at amortised cost, using the effective interest method. Any sale or reclassification of a significant amount of amortised cost investments not close to their maturity would result in a reassessment of the Group's business model for managing the assets. However, sales and reclassifications in any of the following circumstances would not trigger a reclassification:

- Sales or reclassification that are so close to maturity that changes on the market rate of interest would not have a significant effect on the financial asset's fair value.
- Sales or reclassification after the Group has collected substantially all the asset's original principal.
- Sales or reclassification attributable to non-recurring isolated events beyond the Group's control that could not have been reasonably anticipated.

Interest on amortised cost investments is included in the consolidated income statement and reported as 'Interest income'. In the case of an impairment, the impairment loss is been reported as a deduction from the carrying value of the investment and recognised in the consolidated income statement as 'net impairment loss on financial assets'. Amortised cost investments include treasury bills and bonds.

**[iv] Fair value through other comprehensive income**

Financial assets at fair value through other comprehensive income are assets that are held for the collection of contractual cashflows and selling of the financial assets where the asset's cashflow represents solely payments of principal and interest.

Unquoted equity securities that have been elected as fair value through other comprehensive and other fair value through other comprehensive income investments are carried at fair value.

Interest income is recognised in the income statement using the effective interest method. Dividend income is recognised in the income statement when the Group becomes entitled to the dividend. Foreign exchange gains or losses on such investments are recognised in the income statement.

Other fair value changes are recognised directly in other comprehensive income until the debt investment is sold or impaired whereupon the cumulative gains and loses previously recognised in other comprehensive income are recognised to the income statement as a reclassification adjustment.

Fair value through other comprehensive income instruments include investment securities and equity investments that are so elected.

## Notes to the Financial Statement continued

## 3 Basis of preparation continued

### (d) Classification of financial liabilities

The Group classifies its financial liabilities, other than financial guarantees and loan commitments, as measured at amortised cost or fair value through profit or loss.

### (i) Financial liabilities at amortised cost

Financial liabilities that are not classified as at fair value through profit or loss are measured at amortised cost using the effective interest method. Interest expense is included in 'Interest expense' in the Statement of comprehensive income.

Deposits and debt securities issued are the Group's sources of debt funding. When the Group sells a financial asset and simultaneously enters into a "repo" or "stock lending" agreement to repurchase the asset (or a similar asset) at a fixed price on a future date, the arrangement is accounted for as a deposit, and the underlying asset continues to be recognised in the Group's financial statements as pledged assets.

The Group classifies debt instruments as financial liabilities in accordance with the contractual terms of the instrument.

Deposits and debt securities issued are initially measured at fair value minus incremental direct transaction costs, and subsequently measured at their amortised cost using the effective interest method, except where the Group designates liabilities at fair value through profit or loss.

On this statement of financial position, other financial liabilities carried at amortised cost include deposit from Groups, deposit from customers, interest bearing borrowings, debt securities issued and other liabilities.

### (ii) Financial liabilities at fair value

The Group may enter into a variety of derivative financial instruments to manage its exposure to interest rate and foreign exchange rate risk, including foreign exchange forward contracts, interest rate swaps and foreign currency options. Further details of derivative financial instruments are disclosed in Note 21 to the financial statements.

Derivatives are initially recognised at fair value at the date a derivative contract is entered into and are subsequently remeasured to their fair value at each balance sheet date. A derivative with a positive fair value is recognised as a financial asset whereas a derivative with a negative fair value is recognised as a financial liability. The resulting gain or loss is recognised in profit or loss immediately unless the derivative is designated and effective as a hedging instrument, in which event the timing of the recognition in profit or loss depends on the nature of the hedge relationship. Derivatives are presented as financial assets or financial liabilities.

Derivative assets and liabilities are only offset if the transactions are with the same counterparty, a legal right of offset exists and the parties intend to settle on a net basis.

### (e) Measurement of financial asset and liabilities

### [i] Amortised cost measurement and carrying amount

The amortised cost of a financial asset or liability is the amount at which the financial asset or liability is measured at initial recognition, minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between the initial amount recognised and the maturity amount, minus any reduction for impairment.

The "gross carrying amount of a financial asset" is the amortised cost of a financial asset before adjusting for any expected credit loss allowance.

### [ii] Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

When available, the Group measures the fair value of an instrument using quoted prices in an active market for that instrument. A market is regarded as active if quoted prices are readily available and represent actual and regularly occurring market transactions on an arm's length basis.

If a market for a financial instrument is not active, the Group establishes fair value using valuation techniques. Valuation techniques include using recent arm's length transactions between knowledgeable, willing parties (if available), reference to the current fair value of other instruments that are substantially the same, and discounted cash flow analysis. The chosen valuation technique makes maximum use of market inputs, relies as little as possible on estimates specific to the Group, incorporates all factors that market participants would consider in setting a price, and is consistent with accepted economic methodologies for pricing financial instruments. Inputs to valuation techniques reasonably represent market expectations and measures of the risk-return factors inherent in the financial instrument. The Group calibrates valuation techniques and tests them for validity using prices from observable current market transactions in the same instrument or based on other available observable market data.

The best evidence of the fair value of a financial instrument at initial recognition is the transaction price – i.e. the fair value of the consideration given or received. However, in some cases, the fair value of a financial instrument on initial recognition may be different to its transaction price. If such fair value is evidenced by comparison with other observable current market transactions in the same instrument (without modification or repackaging) or based on a valuation technique whose variables include only data from observable markets, then the difference is recognised in the income statement on initial recognition of the instrument.

In other cases the difference is not recognised in the income statement immediately but is recognised over the life of the instrument on an appropriate basis or when the instrument is redeemed, transferred or sold, or the fair value becomes observable.

## Notes to the Financial Statement continued

### 3 Basis of preparation continued

Assets and long positions are measured at a bid price; liabilities and short positions are measured at an asking price. Where the Group has positions with offsetting risks, mid-market prices are used to measure the offsetting risk positions and a bid or asking price adjustment is applied only to the net open position as appropriate. Fair values reflect the credit risk of the instrument and include adjustments to take account of the credit risk of the Group entity and the counterparty where appropriate. Fair value estimates obtained from models are adjusted for any other factors, such as liquidity risk or model uncertainties, to the extent that the Group believes a third-party market participant would take them into account in pricing a transaction.

**Reclassification of financial assets and liabilities**

**(f) Reclassification of financial assets**

The Group does not reclassify its financial assets subsequent to their initial recognition, apart from the exceptional circumstances in which the Group changes its business model for managing a financial asset; the Group acquires, disposes of, or terminates a business line. Financial liabilities are never reclassified.

Financial assets other than loans and receivables are permitted to be reclassified out of the fair value through profit or loss category only in rare circumstances arising from a single event that is unusual and highly unlikely to recur in the near-term. In addition, the Group may choose to reclassify financial assets that would meet the definition of loans and receivables out of the fair value through profit or loss or fair value through other comprehensive income categories if the Group has the intention and ability to hold these financial assets for the foreseeable future or until maturity at the date of reclassification.

Reclassifications are made at fair value as of the reclassification date. Fair value becomes the new cost or amortised cost as applicable, and no reversals of fair value gains or losses recorded before reclassification date are subsequently made. Effective interest rates for financial assets reclassified to amortised cost categories are determined at the reclassification date. Further increases in estimates of cash flows adjust effective interest rates prospectively.

**Reclassification date**

The first day of the first reporting period following the change in business model that results in an entity reclassifying financial assets.

A change in the objective of the Group's business model must be effected before the reclassification date. For example, if Group decides on 15 February to shut down its Corporate & investment Grouping business and hence must reclassify all affected financial assets on 1 April (i.e. the first day of the Group's next reporting period), the Group must not accept new Corporate & investment Grouping business or otherwise engage in activities consistent with its former business model after 15 February.

All reclassifications are applied prospectively from the reclassification date.

**(g) Derecognition of financial assets and liabilities**

Derecognition due to substantial modification of terms and conditions

The Group derecognises a financial asset or liability, such as a loan to a customer, when the terms and conditions have been renegotiated to the extent that, substantially, it becomes a new loan, with the difference recognised as a derecognition in the statement of comprehensive income, to the extent that an impairment loss has not already been recorded. The terms and conditions have been renegotiated substantially if the discounted cash flows under the new terms are at least 10 per cent different from the discounted remaining cash flows of the original terms. The newly recognised loans are classified as Stage 1 for ECL measurement purposes, unless the new loan is deemed to be Purchased or Originated Credit Impaired (POCI).

When assessing whether or not to derecognise a loan to a customer, amongst others, the Group considers the following factors:

- Change in currency of the loan
- Introduction of an equity feature
- Change in counterparty
- If the modification is such that the instrument would no longer meet the SPPI criterion

If the modification does not result in cash flows that are substantially different, the modification does not result in derecognition. Based on the change in cash flows discounted at the original EIR, the Group records a modification gain or loss, to the extent that an impairment loss has not already been recorded. This is recognised in the statement of comprehensive income as part of interest income

**(i) Derecognition other than for substantial modification - Financial assets**

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised when the rights to receive cash flows from the financial asset have expired. The Group also derecognises the financial asset if it has both transferred the financial asset and the transfer qualifies for derecognition.

The Group has transferred the financial asset if, and only if, either:

- The Group has transferred its contractual rights to receive cash flows from the financial asset or
- It retains the rights to the cash flows, but has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass–through' arrangement

Pass-through arrangements are transactions whereby the Group retains the contractual rights to receive the cash flows of a financial asset (the 'original asset'), but assumes a contractual obligation to pay those cash flows to one or more entities (the 'eventual recipients'), when all of the following three conditions are met:

## Notes to the Financial Statement continued

### 3 Basis of preparation continued

- The Group has no obligation to pay amounts to the eventual recipients unless it has collected equivalent amounts from the original asset, excluding short-term advances with the right to full recovery of the amount lent plus accrued interest at market rates
- The Group cannot sell or pledge the original asset other than as security to the eventual recipients
- The Group has to remit any cash flows it collects on behalf of the eventual recipients without material delay.

In addition, the Group is not entitled to reinvest such cash flows, except for investments in cash or cash equivalents including interest earned, during the period between the collection date and the date of required remittance to the eventual recipients.

For floating-rate financial assets, the original effective interest rate used to calculate the modification gain or loss is adjusted to reflect current market terms at the time of the modification. Any costs or fees incurred and modification fees received adjust the gross carrying amount of the modified financial assets and are amortised over the remaining term of the modified financial asset.

A transfer only qualifies for derecognition if either:

- The Group has transferred substantially all the risks and rewards of the asset or
- The Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset

The Group considers control to be transferred if and only if, the transferee has the practical ability to sell the asset in its entirety to an unrelated third party and is able to exercise that ability unilaterally and without imposing additional restrictions on the transfer.

When the Group has neither transferred nor retained substantially all the risks and rewards and has retained control of the asset, the asset continues to be recognised only to the extent of the Group's continuing involvement, in which case, the Group also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration the Group could be required to pay.

If continuing involvement takes the form of a written or purchased option (or both) on the transferred asset, the continuing involvement is measured at the value the Bank would be required to pay upon repurchase. In the case of a written put option on an asset that is measured at fair value, the extent of the entity's continuing involvement is limited to the lower of the fair value of the transferred asset and the option exercise price.

**(ii) Derecognition other than for substantial modification - Financial Liabilities**

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expires. Where an existing financial liability is replaced by another from the same lender on substantially different terms such as the beneficiary, tenor, principal amount or the interest rate, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability. The difference between the carrying value of the original financial liability and the consideration paid is recognised in profit or loss.

For floating-rate financial liabilities, the original effective interest rate used to calculate the modification gain or loss is adjusted to reflect current market terms at the time of the modification. Any costs and fees incurred are recognised as an adjustment to the carrying amount of the liability and amortised over the remaining term of the modified financial liability by re-computing the effective interest rate on the instrument.

The Group originates interest and principal strips by separating cash flows from underlying investment portfolios. Upon stripping, the carrying amount of the original debt instrument is allocated between the principal and interest components based on their relative fair values at the date of separation.

As the stripped instrument does not give rise to cash flows that represent solely payments of principal and interest, it is classified and measured at fair value through profit or loss.

Transfers of interest or principal strips are assessed for derecognition on the basis of whether the Group has transferred substantially all the risks and rewards or control of the assets. Transfers that do not meet derecognition criteria are accounted for as secured borrowings and proceeds are recognised as liabilities.

For transfers that meet derecognition criteria, the asset is derecognised and any difference between the carrying amount and the consideration received is recognised in profit or loss within the net (loss)/gains on financial instruments at fair value. The remaining principal or interest component continues to be recognised and subsequently measured at fair value through profit or loss.

**(h) Offsetting**

Financial assets and liabilities are set off and the net amount presented in the statement of financial position when, and only when, the Group has a legal enforceable right to set off the amounts and intends either to settle on a net basis or to realise the asset and settle the liability simultaneously.

Income and expenses are presented on a net basis only when permitted under IFRSs, or for gains and losses arising from a group of similar transactions such as in the Group's trading activity.

## Notes to the Financial Statement continued

## 3 Basis of preparation continued

**Sale and repurchase agreements**

Securities sold subject to repurchase agreements ('repos') remain on the statement of financial position; the counterparty liability is included in amounts due to other Groups, deposits from Groups, other deposits or deposits due to customers, as appropriate. Securities purchased under agreements to resell (reverse repos') are recorded as investment securities. The difference between sale and repurchase price is treated as interest and accrued over the life of the agreements using the effective interest method.

Securities lent to counterparties are also retained in the financial statements. Securities borrowed are not recognised in the financial statements, unless these are sold to third parties, in which case the purchase and sale are recorded with the gain or loss included in Net (loss)/gain on financial instruments at fair value.

**(i) Measurement of specific financial assets**

**(i) Cash and balances with Groups**

Cash and balances with Groups include notes and coins on hand, balances held with central Groups and highly liquid financial assets with original maturities of less than three months, which are subject to insignificant risk of changes in their fair value, and are used by the Group in the management of its short-term commitments.

In the consolidated statement of cash flows, cash and cash equivalents includes cash in hand, unrestricted balances with foreign and central Groups, money market placements and other short-term highly liquid investments with original maturities of three months or less.

**(ii) Repossessed collateral**

Repossessed collateral are equities, investment properties or other investments repossessed from a customer and used to settle the outstanding obligation. Such investments are classified in accordance with the intention of the Group in the asset class which they belong and are also separately disclosed in the financial statement.

When collaterals are repossessed in satisfaction of a loan, the receivable is written down against the allowance for losses. Repossessed collaterals are included in the financial statement based on how the Group intends to realise benefit from such collateral such as "Non current assets held for sale" and carried at the lower of cost or estimated fair value less costs to sell, if the Group intends to sell or cost less accumulated depreciation, if for use in the normal course of business.

**(iii) Derivative financial instruments**

Derivative financial instruments are initially recognised at fair value on the date the derivative contract is entered into and are subsequently measured at fair value through profit or loss (FVTPL). The Group uses derivative instruments, including forward foreign exchange contracts and swaps, to manage exposures to currency risk arising from operational and financing activities.

Fair value is determined using a valuation technique (mark-to-model) that maximises the use of observable market inputs and minimises unobservable inputs. The valuation is based on the interest rate parity (IRP) model, which considers:

- The spot exchange rate at valuation date,
- Relevant currency-specific interest rates over the term of the derivative contract; inclusive of spread for the local currency-specific interest rates
- The time to maturity of the instrument.

This approach reflects the theoretical forward rate derived from the relationship between spot exchange rates and interest rates in each currency, in accordance with economic principles and IFRS 13 requirements.

For derivatives not designated in a hedge accounting relationship, changes in fair value are recognised in profit or loss as they arise.

Where a derivative is designated and qualifies as a hedging instrument in a fair value hedge under IFRS 9, changes in the fair value of both the hedging instrument and the hedged item (attributable to the hedged risk) are recognised in profit or loss.

Derivatives are presented as financial assets when their fair values are positive and as financial liabilities when their fair values are negative.

**(iv) Pledged assets**

Financial assets transferred to external parties that do not qualify for de-recognition are reclassified in the statement of financial position from financial assets carried at fair value through profit or loss or investment securities to assets pledged as collateral, if the transferee has received the right to sell or re-pledge them in the event of default from agreed terms.

Initial recognition of assets pledged as collateral is at fair value, whilst subsequent measurement is based on the classification of the financial asset. Assets pledged as collateral are either classified as fair value through profit or loss, Fair value through other comprehensive income or Amortised cost. Where the assets pledged as collateral are classified as fair value through profit or loss, subsequent measurement is at fair value through profit and loss, whilst assets pledged as collateral classified as Fair value through other comprehensive income are measured at fair-value through OCI. Assets pledged as collateral are classified as Amortised cost.

**[v] Investment under management**

Investment under management are funds entrusted to Asset management firms who acts as agents to the Company for safe keeping and management for investment purpose with returns on the underlying investments accruable to the Company, who is the principal.

## Notes to the Financial Statement continued

### 3 Basis of preparation continued

The investment decision made by the Asset management is within an agreed portfolio of high quality Nigerian fixed income and money market instruments which are usually short tenured.

The investments are carried at fair value based on the valuation report provided by the asset manager.

### 3.9 Impairment of financial assets

**Overview of the ECL principles**

The Group assesses on a forward-looking basis the expected credit losses ('ECL') associated with its debt instrument assets carried at amortised cost and FVOCI and with the exposure arising from loan commitments and financial guarantee contracts. The Group recognises a loss allowance for such losses at each reporting date. The measurement of ECL reflects:

- An unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- The time value of money; and
- Reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

**Staging Assessment**

The Group has established a policy to perform an assessment, at the end of each reporting period, of whether a financial instrument's credit risk has increased significantly since initial recognition, by considering the change in the risk of default occurring over the remaining life of the financial instrument.

Based on the above process, the Group categorises its financial instruments into Stage 1, Stage 2,Stage 3, as described below. All POCI (Purchased or originated credit impaired) financial instruments are categorised under stage 3.

- **Stage 1:** When a financial instrument is first recognised, the Group recognises an allowance based on 12m Expected credit Loss. Stage 1 also includes financial instruments where the credit risk has improved (after review over a period of 90 days) and the financial instruments has been reclassified from Stage 2.
- **Stage 2:** When a financial instrument has shown a significant increase in credit risk since origination, the Group records an allowance for the Lifetime ECLs. Stage 2 financial instruments also include instances, where the credit risk has improved (after review over a period of 90 days) and the financial instrument has been reclassified from Stage 3.
- **Stage 3:** Financial instruments considered credit-impaired. The Group records an allowance for the Lifetime ECLs.

**POCI:** Purchased or originated credit impaired (POCI) assets are financial assets that are credit impaired on initial recognition. POCI assets are recorded at fair value at original recognition and interest income is subsequently recognised based on a credit-adjusted EIR. ECLs are only recognised or released to the extent that there is a subsequent change in the expected credit losses.

**Change in credit quality since initial recognition**

| Stage 1 | Stage 2 | Stage 3 |
|---|---|---|
| (Initial Recognition) 12-months expected credit losses | (Initial Recognition) Lifetime expected credit losses | (Credit-impaired assets) Lifetime expected credit losses |

**Measuring the Expected Credit Loss**

The Expected Credit Loss (ECL) is measured on either a 12-month (12M) or Lifetime basis depending on whether a significant increase in credit risk has occurred since initial recognition or whether an asset is considered to be credit-impaired. Expected credit losses are the discounted product of the Probability of Default (PD), Exposure at Default (EAD), and Loss Given Default (LGD), defined as follows:

- The PD represents the likelihood of a borrower defaulting on its financial obligation (as per Definition of default and credit-impaired above), either over the next 12 months (12M PD), or over the remaining lifetime (Lifetime PD) of the obligation.
- EAD is based on the amounts the Group expects to be owed at the time of default, over the next 12 months (12M EAD) or over the remaining lifetime (Lifetime EAD). For example, for a revolving commitment, the Group includes the current drawn balance plus any further amount that is expected to be drawn up to the current contractual limit by the time of default, should it occur.
- Loss Given Default represents the Group's expectation of the extent of loss on a defaulted exposure. LGD varies by type of counterparty, type and seniority of claim and availability of collateral or other credit support. LGD is expressed as a percentage loss per unit of exposure at the time of default (EAD). LGD is calculated on a 12-month or lifetime basis, where 12-month LGD is the percentage of loss expected to be made if the default occurs in the next 12 months and Lifetime LGD is the percentage of loss expected to be made if the default occurs over the remaining expected lifetime of the loan.

The Lifetime PD is developed by applying a maturity profile to the current 12M PD. The maturity profile looks at how defaults develop on a portfolio from the point of initial recognition throughout the lifetime of the loans. The maturity profile is based on historical observed data and is assumed to be the same across all assets within a portfolio and credit grade band. This is supported by historical analysis.

The 12-month and lifetime EADs are determined based on the expected payment profile, which varies by product type.

## Notes to the Financial Statement continued

### 3 Basis of preparation continued

- For amortising products and bullet repayment loans, this is based on the contractual repayments owed by the borrower over a 12month or lifetime basis. This will also be adjusted for any expected overpayments made by a borrower. Early repayment/refinance assumptions are also incorporated into the calculation.

- For revolving products, the exposure at default is predicted by taking current drawn balance and adding a credit conversion factor which allows for the expected drawdown of the remaining limit by the time of default. These assumptions vary by product type and current limit utilisation band, based on analysis of the Group's recent default data.

When estimating the ECLs, the Group considers three scenarios (optimistic, best-estimate and downturn) and each of these is associated with different PDs and LGDs. When relevant, the assessment of multiple scenarios also incorporates how defaulted loans are expected to be recovered, including the probability that the loans will cure (i.e. be paid in full or no longer credit-impaired) and the value of collateral or the amount that might be received for selling the asset.

The 12-month and lifetime LGDs are determined based on the factors which impact the recoveries made post default. These vary by product type.

- For secured products, this is primarily based on collateral type and projected collateral values, historical discounts to market/book values due to forced sales, time to repossession and recovery costs observed.

- For unsecured products, LGDs are typically set at product level due to the limitation in recoveries achieved across different borrower. These LGDs are influenced by collection strategies, including contracted debt sales and price.

The mechanics of the ECL method are summarised below:

- Stage 1: The 12 month ECL is calculated as the portion of Lifetime ECLs that represent the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date. The Group calculates the 12 month ECL allowance based on the expectation of a default occurring in the 12 months following the reporting date.

These expected 12-month default probabilities are applied to a forecast 12 month EAD and multiplied by the expected 12 month LGD and discounted by an approximation to the original EIR. This calculation is made for each of the three scenarios, as explained above.

- Stage 2: When a loan has shown a significant increase in credit risk since origination, the Group records an allowance for the Lifetime ECLs. The mechanics are similar to those explained above, including the use of multiple scenarios, but PDs and LGDs are estimated over the lifetime of the instrument. The expected cash shortfalls are discounted by an approximation to the original EIR.

- Stage 3: For loans considered credit-impaired, the Group recognises the lifetime expected credit losses for these loans. The method is similar to that for Stage 2 assets, with the PD set at 100%.

- POCI: Purchase or Originated Credit Impaired (POCI) assets are financial assets that are credit impaired on initial recognition. The Group only recognises the cumulative changes in lifetime ECLs since initial recognition, based on a probability-weighting of the three scenarios, discounted by the credit adjusted EIR.

- Loan commitments and letters of credit: When estimating Lifetime ECLs for undrawn loan commitments, the Group estimates the expected portion of the loan commitment that will be drawn down over its expected life. The ECL is then based on the present value of the expected shortfalls in cash flows if the loan is drawn down, based on a probability-weighting of the three scenarios. The expected cash shortfalls are discounted at an approximation to the expected EIR on the loan.

For credit cards and revolving facilities that include both a loan and an undrawn commitment, ECLs are calculated and presented together with the loan. For loan commitments and letters of credit, the ECL is recognised within net impairment charge on financial assets.

- Financial guarantee contracts: The Group's liability under each guarantee is measured at the higher of the amount initially recognised less cumulative amortisation recognised in the income statement, and the ECL provision. For this purpose, the Group estimates ECLs based on the present value of the expected payments to reimburse the holder for a credit loss that it incurs The shortfalls are discounted by the risk-adjusted interest rate relevant to the exposure. The calculation is made using a probability-weighting of the three scenarios. The ECLs related to financial guarantee contracts are recognised within net impairment charge on financial assets

- Sovereign Debt investments at amortised cost and FVOCI are considered to have low credit risk, and the loss allowance recognised during the period was therefore limited to 12 months' expected losses. Management considers 'low credit risk' for such instruments to be an investment grade credit rating with at least one major rating agency. Other instruments are considered to be low credit risk where they have a low risk of default and the issuer has a strong capacity to meet its contractual cash flow obligations in the near term.

**Significant increase in credit risk (SICR)**

The Group considers a financial instrument to have experienced a significant increase in credit risk when one or more of the following quantitative, qualitative or backstop criteria have been met:

**Quantitative criteria:**

The remaining Lifetime PD at the reporting date has increased, compared to the residual Lifetime PD expected at the reporting date when the exposure was first recognised.

Deterioration in the credit rating of an obligor either based on the Group's internal rating system or an international credit rating.

## Notes to the Financial Statement continued

### 3 Basis of preparation continued

However, the downgrade considers movement from a grade band to another e.g. Investment grade to Standard.

The group also considers accounts that meet the criteria to be put on the watchlist bucket in line with CBN prudential guidelines since they have significantly increased in credit risk.

The group continuously monitors all assets subject to ECL. In order to determine whether an instrument or a portfolio of instruments is subject to 12mECL or LTECL, the Group assesses whether there has been a significant increase in credit risk since initial recognition.

When determining whether the risk of default on a financial instrument has increased significantly since initial recognition, the Group considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Group's historical experience and expert credit assessment and including forward-looking information. The objective of the assessment is to identify whether a significant increase in credit risk has occurred for an exposure by comparing:

- The remaining lifetime PD as at the reporting date, with
- The remaining lifetime PD for this point in time that was estimated at the time of initial recognition of the exposure

The Group uses three criteria for determining whether there has been a significant increase in credit risk:

- A quantitative test based on movement in PD
- Qualitative indicators; and
- A backstop of 30 days past due for all financial assets (regardless of the change in internal credit grades

**Qualitative criteria:**

For Retail loans, if the borrower meets one or more of the following criteria:

- In short-term forbearance
- Direct debit cancellation
- Extension to the terms granted
- Previous arrears within the last [12] months

For Corporate portfolio, if the borrower is on the watchlist and/or the instrument meets one or more of the following criteria:

- Significant increase in credit spread
- Significant adverse changes in business, financial and/or economic conditions in which the borrower operates
- Actual or expected forbearance or restructuring
- Actual or expected significant adverse change in operating results of the borrower
- Significant change in collateral value (secured facilities only) which is expected to increase risk of default
- Early signs of cash flow/liquidity problems such as delay in servicing of trade creditors/loans

The assessment of SICR incorporates forward-looking information and is performed on a quarterly basis at a portfolio level for all Retail financial instruments held by the Group. In relation to Wholesale and Treasury financial instruments, where a Watchlist is used to monitor credit risk, this assessment is performed at the counterparty level and on a periodic basis. The criteria used to identify SICR are monitored and reviewed periodically for appropriateness by the independent Credit Risk team.

For modified financial assets the Group assesses whether there has been a significant increase in credit risk of the financial instrument by comparing the risk of default occurring at the reporting date (based on the modified contractual terms) and the risk of default occurring at initial recognition (based on the original unmodified contractual terms)

**Backstop**

A backstop indicator is applied and the financial instrument is considered to have experienced a significant increase in credit risk if the borrower is more than 30 days past due and 90 days past due on its contractual payments for both stage 2 and stage 3 respectively.

**Definition of default and credit-impaired assets**

The Group defines a financial instrument as in default, which is fully aligned with the definition of credit-impaired, when it meets one or more of the following criteria:

**Quantitative criteria**

The borrower is more than 90 days past due on its contractual payments.

**Qualitative criteria**

The borrower meets unlikeliness to pay criteria, which indicates the borrower is in significant financial difficulty. These are instances where:

- The borrower is in long-term forbearance
- The borrower is deceased
- The borrower is insolvent
- The borrower is in breach of financial covenant(s)
- An active market for that financial asset has disappeared because of financial difficulties
- It is becoming probable that the borrower will enter bankruptcy

## Notes to the Financial Statement continued

### 3 Basis of preparation continued

- Financial assets are purchased or originated at a deep discount that reflects the incurred credit losses

The criteria above have been applied to all financial instruments held by the Group and are consistent with the definition of default used for internal credit risk management purposes. The default definition has been applied consistently to model the Probability of Default (PD), Exposure at Default (EAD) and Loss given Default (LGD) throughout the Group's expected loss calculations.

**Incorporation of forward looking information and macroeconomic factors**

In its ECL models, the Group relies on a broad range of forward looking information as economic inputs. The macroeconomic variables considered for the adjustment of the probabilities of default are listed below:

- Crude oil prices,
- Prime lending rate

The inputs and models used for calculating ECLs may not always capture all characteristics of the market at the date of the financial statements. To reflect this, qualitative adjustments or overlays are occasionally made as temporary adjustments when such differences are significantly material.

The ECLs include forward-looking information which translates into an allowance for changes in macro-economic conditions and forecasts when estimating lifetime ECLs. It is important to understand the effect of forecasted changes in the macro-economic environment on ECLs, so that an appropriate level of provisions can be raised.

A regression model was built to explain and predict the impact of macro-economic indicators on default rates. Such regression models are usually built on a history of default rates and macro-economic variables covering at least one economic cycle, but preferable more.

Historical data on macro-economic indicators from a host of reliable sources, including the International Monetary Fund was gathered. As a proxy for default rates, the Group provided their non-performing loans as a percentage of gross loans ("NPL%") metric.

The macro-economic model regressed historical NPL% (the target variable) on a list of candidate macro-economic indicators. The Group's Economic Intelligence currently monitors and forecasts certain macro-economic indicators. These indicators are GDP growth rate, crude oil prices and the foreign exchange rate. The most predictive variables that were selected in the regression model (the most predictive indicators) were determined. The logic of the relationships between the indicators and the target variable was considered and assessed to ensure indicators are not highly correlated with one another.

The model produced best-estimate, optimistic and downturn forecasts of the selected macro-economic indicators, based on trends in the indicators and macro-economic commentary. This was done through stressing the indicator GDP, which in turn stressed the other indicators based on their assumed historical correlation with GDP. The regression formula obtained was applied to the forecasted macro-economic indicators in order to predict the target variable.

The best-estimate, optimistic and downturn scalars of predicted target variables were determined. In order to remove the impact of any historical trends included in the data, the scalar denominator was adjusted based on the estimation period used to derive the PDs. The scalars calculated were applied to the lifetime PDs. This process results in forward-looking best-estimate, optimistic and downturn lifetime PD curves, which are used in the ECL calculations.

**Collateral valuation**

To mitigate its credit risks on financial assets, the Group seeks to use collateral, where possible. The collateral comes in various forms, such as cash, securities, letters of credit/guarantees, real estate, receivables, inventories, other non-financial assets and credit enhancements such as netting agreements. Collateral, unless repossessed, is not recorded on the Group's statement of financial position. However, the fair value of collateral affects the calculation of ECLs. It is generally assessed, at a minimum, at inception and re-assessed on a periodic basis every 3 years.

To the extent possible, the Group uses active market data for valuing financial assets held as collateral. Other financial assets which do not have readily determinable market values are valued using models. Non-financial collateral, such as real estate, is valued based on data provided by third parties such as external valuers.

**Collateral repossessed**

The Group's policy is to determine whether a repossessed asset can be best used for its internal operations or should be sold. Assets determined to be useful for the internal operations are transferred to their relevant asset category at the lower of their repossessed value or the carrying value of the original secured asset. Assets for which selling is determined to be a better option are transferred to assets held for sale at their fair value (if financial assets) and fair value less cost to sell for non-financial assets at the repossession date in, line with the Group's policy.

Investment under management are funds entrusted to Asset management firms who acts as agents to the Group for safe keeping and management for investment purpose with returns on the underlying investments accruable to the Group, who is the principal.

The investment decision made by the Asset management within an agreed portfolio of high quality Nigerian fixed income and money market instruments which are usually short tenured. The investments are carried as fair value through OCI and accounting policy (3.9) (a) [iv] applies.

In assessing expected credit loss, the Group uses statistical modelling of historical trends of the probability of default, timing of recoveries and the amount of loss incurred, adjusted for management's judgment as to whether current and forecasted economic and credit conditions are such that the actual losses

## Notes to the Financial Statement continued

### 3 Basis of preparation continued

are likely to be greater or less than suggested by historical modelling. Default rates, loss rates and the expected timing of future recoveries are regularly benchmarked against actual outcomes to ensure that they remain appropriate. The ECL on restricted deposits and other assets is calculated using the simplified model approach.

Impairment losses on assets carried at amortised cost are measured as the difference between the carrying amount of the financial assets and the present value of estimated cash flows discounted at the assets' original effective interest rate. Losses are recognised in the income statement and reflected in an allowance account against loans and advances. Interest on the impaired asset continues to be recognised through the unwinding of the discount. When a subsequent event causes the amount of impairment loss to decrease, the impairment loss is reversed through profit or loss.

Impairment losses on fair value through other comprehensive income investment securities are recognised in profit or loss and the impairment provision is not used to reduce the carrying amount of the investment but recognised in other comprehensive income. For debt securities, the group uses the criteria referred above to assess impairment.

The Group writes off previously impaired loans and advances (and investment securities) when they are determined not to be recoverable. The Group writes off loans or investment debt securities that are impaired (either partially or in full and any related allowance for impairment losses) when the Group credit team determines that there is no realistic prospect of recovery.

### 3.10 Property and equipment

**(a) Recognition and measurement**

Items of property and equipment are measured at cost less accumulated depreciation and accumulated impairment losses. Cost includes expenditures that are directly attributable to the acquisition of the asset.

When significant parts of an item of property and equipment have different useful lives, they are accounted for as separate items (major components) of property and equipment.

The gain or loss on disposal of an item of property and equipment is determined by comparing the proceeds from disposal with the carrying amount of property and equipment, and are recognised net within other operating income in the Income statement.

**(b) Subsequent costs**

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that the future economic benefits associated with the item will flow to the Group and its cost can be measured reliably. The costs of the day-to-day repairs and maintenance of property and equipment are recognised in Income statement as incurred.

**(c) Depreciation**

Depreciation is recognised in the income statement on a straight-line basis to write down the cost of items of property and equipment, to their residual values over the estimated useful lives.

Depreciation begins when an asset is available for use and ceases at the earlier of the date that the asset is derecognised or classified as held for sale in accordance with IFRS 5. A non-current asset or disposal group is not depreciated while it is classified as held for sale.

The estimated useful lives for the current and comparative periods of significant items of property and equipment are as follows:

| | |
|---|---|
| Freehold Land | Not depreciated |
| Leasehold improvements and building | Over the shorter of the useful life of the item or lease term |
| Buildings | 60 years |
| Computer hardware | 4.5 years |
| Furniture and fittings | 6 years |
| Plant and Equipment | 5 years |
| Motor vehicles | 5 years |

The asset's residual values and useful lives are reviewed, and adjusted if appropriate, at each date of the statement of financial position. Assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount. The recoverable amount is the higher of the asset's fair value less costs to sell and value in use.

Capital work in progress is not depreciated. Upon completion it is transferred to the relevant asset category. Depreciation methods, useful lives and residual values are reassessed at each reporting date and adjusted if appropriate.

**(d) De-recognition**

An item of property and equipment is derecognised on disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included within other operating income in the income statement in the period the asset is derecognised.

### 3.11 Leases

**Group as the Lessee:**

The Group leases several assets including buildings and land.

## Notes to the Financial Statement continued

### 3 Basis of preparation continued

Lease terms are negotiated on an individual basis and contain different terms and conditions, including extension options as described in the "extension and termination options header" below. The lease period ranges from 1 year to 40 years. The lease agreements do not impose any covenants, however, leased assets may not be used as security for borrowing purposes.

Contracts may contain both lease and non-lease components. The Group has elected not to separate lease and non-lease components and instead accounts for these as a single lease component.

Leases are recognised as a right-of-use asset and a corresponding liability at the date at which the leased asset is available for use by the Group. Assets and liabilities arising from a lease are initially measured on a present value basis.

**Lease liabilities**

At commencement date of a lease, the Group recognises lease liabilities measured at the present value of lease payments to be made over the lease term. Lease liabilities include the net present value of the following lease payments:

- fixed payments (including in-substance fixed payments), less any lease incentives receivable
- variable lease payment that are based on an index or a rate
- amounts expected to be payable by the Group under residual value guarantees
- the exercise price of a purchase option if the lessee is reasonably certain to exercise that option, and
- payments of penalties for terminating the lease, if the lease term reflects the Group exercising that option.

Lease payments to be made under reasonably certain extension options are also included in the measurement of the liability. The variable lease payments that do not depend on an index or a rate are recognised as expense in the period in which the event or condition that triggers the payment occurs.

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be readily determined, the Group's incremental borrowing rate is used, being the rate that the Group would have to pay to borrow the funds necessary to obtain an asset of similar value to the right of use asset in a similar economic environment with similar terms, security and conditions. The weighted average incremental borrowing rate applied to the lease liabilities as at 31 December 2025 was 20%. Where the basis for determining future lease payments changes as required by interest rate benchmark reform, the Group remeasures the lease liability by discounting the revised lease payments using the revised discount rate that reflects the change to an alternative benchmark interest rate.

Lease payments are allocated between principal and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the in-substance fixed lease payments or a change in the assessment to purchase the underlying asset.

**Right of use assets**

Right-of-use assets are measured at cost comprising the following:

- the amount of the initial measurement of lease liability
- any lease payments made at or before the commencement date less any lease incentives received
- any initial direct costs, and
- restoration costs.

Right-of-use assets are generally depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis. If the Group is reasonably certain to exercise a purchase option, the right-of-use asset is depreciated over the underlying asset's useful life.

**Short-term leases and leases of low value**

The Group applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases that are considered of low value (i.e. low value assets). Low-value assets are assets with lease amount of less than $5,000 or its equivalent in Naira when new. Lease payments on short-term leases and leases of low-value assets are recognised as expense in profit or loss on a straight-line basis over the lease term.

**Extension and termination options**

Extension and termination options are included in a number of property leases. These are used to maximise operational flexibility in terms of managing the assets used in the Group's operations. The majority of extension and termination options held are exercisable only by the Group.

**A group company is the lessor;**

When assets are held subject to a finance lease, the present value of the lease payments is recognised as a receivable. The difference between the gross receivable and the present value of the receivable is recognised as unearned finance income. Lease income is recognised over the term of the lease using the net investment method (before tax), which reflects a constant periodic rate of return.

## Notes to the Financial Statement continued

## 3 Basis of preparation continued

### 3.12 Intangible assets

**(a) Goodwill**

Goodwill that arises upon the acquisition of subsidiaries is included in intangible assets. Subsequent to initial recognition, goodwill is measured at cost less accumulated impairment losses. Goodwill is tested annually for impairment.

Goodwill is allocated to cash-generating units or groups of cash-generating units for the purpose of impairment testing. The allocation is made to those cash-generating units or groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose identified in accordance with IFRS 3.

Goodwill has an indefinite useful life and is tested annually as well as whenever a trigger event has been observed for impairment by comparing the present value of the expected future cash flows from a cash generating unit with the carrying value of its net assets, including attributable goodwill and carried at cost less accumulated impairment losses. Impairment losses on goodwill are not reversed. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

Intangible assets are derecognised on disposal or when no economic benefits are expected from their use or disposal.

**Accounting Policy on Provisional Goodwill**

Provisional goodwill arises during a business combination when the initial accounting for the acquisition is incomplete at the reporting date. It is recognised as the difference between the fair value of the consideration transferred and the fair value of identifiable net assets acquired.

At the acquisition date, provisional goodwill is recorded based on provisional amounts. Adjustments to provisional goodwill are made within the measurement period (up to 12 months from the acquisition date) if new information about facts and circumstances existing at the acquisition date becomes available.

If adjustments are made to provisional amounts within the measurement period, these adjustments are retrospectively applied. Any changes to provisional goodwill are recognised in the financial statements when finalised.

Provisional goodwill should be tested for impairment annually or more frequently if there are indicators of impairment. Impairment losses are recognised in the profit or loss.

**Disclosure**

Disclose the nature of provisional goodwill, including the reasons for its provisional status, and any adjustments made to provisional amounts during the measurement period.

**(b) Software**

Software acquired by the Group is stated at cost less accumulated amortisation and accumulated impairment losses. Expenditure on internally developed software is recognised as an asset when the Group is able to demonstrate its intention and ability to complete the development and use the software in a manner that will generate future economic benefits, and can reliably measure the costs to complete the development. The capitalised costs of internally developed software include all costs directly attributable to developing the software, and are amortised over its useful life. Internally developed software is stated at capitalised cost less accumulated amortisation and impairment.

Subsequent expenditure on software assets is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure is expensed as incurred.

Amortisation is recognised in the income statement on a straight-line basis over the estimated useful life of the software, from the date that it is available for use since this most closely reflects the expected pattern of consumption of future economic benefits embodied in the asset. Software has a finite useful life, the estimated useful life of software is four and half years (4.5). Amortisation methods, useful lives and residual values are reviewed at each financial year-end and adjusted if appropriate.

**(c) Brand, Customer Relationships and Core Deposits**

These are intangible assets arising from the acquisition of subsidiaries. At the acquisition date, they are initially recognized at fair value.

Customer relationships and core deposits are identified at the acquirer's within the Group and subsequently measured at cost less accumulated amortisation and accumulated impairment losses. These assets have finite useful lives and are amortised on a straight-line basis over the period during which the Group expects to derive economic benefits from them, currently estimated at 10 to 15 years. Amortisation expense is recognized in "amortisation of intangible assets" in the consolidated statement of profit or loss. The useful lives and amortisation method are reviewed at each reporting date, and any change is accounted for prospectively as a change in accounting estimate.

Brands are subsequently measured at cost less accumulated impairment losses. Where a brand is assessed as having an indefinite useful life, it is not amortised. The AfrAsia brand has been assessed as having an indefinite useful life because the Group intends to retain and continue to use the brand indefinitely, and no foreseeable limit has been identified to the period over which it is expected to generate economic benefits for the Group.

The useful life assessment for each intangible asset, including the indefinite-life classification of the AfrAsia brand, is reviewed annually to determine whether events and circumstances continue to support that assessment. Where they no longer do, the change from an indefinite to a finite useful life is accounted for prospectively as a change in accounting estimate.

Intangible assets with finite useful lives are tested for impairment

## Notes to the Financial Statement continued

### 3 Basis of preparation continued

whenever there is an indication that the carrying amount may not be recoverable. Intangible assets with indefinite useful lives, including the AfrAsia brand, are tested for impairment annually, and whenever there is an indication that the asset may be impaired, by comparing their carrying amount to their recoverable amount.

Intangible assets with finite useful lives are tested for impairment whenever there is an indication that the carrying amount may not be recoverable. Intangible assets with indefinite useful lives, including the AfrAsia brand, are tested for impairment annually, and whenever there is an indication that the asset may be impaired, by comparing their carrying amount to their recoverable amount.

**Assessment of Intangible Asset (goodwill)**

**Valuation Guidelines**

| Overview | Explanation |
|---|---|
| Introduction | • Under the Standard, Access Holdings is required to apportion the purchase consideration between the tangible and intangible assets and liabilities (including contingent liabilities).<br>• The Standard provides general guidelines for assigning amounts to individual assets acquired and liabilities assumed.<br>• IFRS 3 requires the application of the acquisition method for each business combination. The acquisition method requires inter alia that the acquirer is identified, the acquisition date is determined, and that the identifiable assets acquired, and that the liabilities assumed and any non-controlling interest in the acquiree are recognised and measured. |
| Recognition principle (IFRS 3) | • IFRS 3 states that as of the acquisition date, the acquirer shall recognise, separately from goodwill, the identifiable assets acquired, the liabilities assumed and any non-controlling interest in the acquiree.<br>• Recognition of identifiable assets acquired and liabilities assumed is subject to . These paragraphs state, inter alia, that the identifiable assets acquired and liabilities assumed must meet the definitions of assets and liabilities in the Framework for the Preparation and Presentation of Financial Statements at the acquisition date, and that the identifiable assets acquired and liabilities assumed must be part of what the acquirer and the acquiree exchanged in the business combination transaction |
| Definition of identifiable asset (IFRS 3 | • IFRS 3 states that an asset is identifiable if it either:<br>a is separable, i.e. capable of being separated or divided from the entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable asset or liability, regardless of whether the entity intends to do so; or<br>b arises from contractual or other legal rights, regardless of whether those rights are transferable or separable from the entity or from other rights and obligations. |
| Measurement principle (IFRS 3) | • The acquirer shall measure the identifiable assets acquired and the liabilities assumed at their acquisition-date Fair Values. |

## Notes to the Financial Statement continued

### 3 Basis of preparation continued

| | |
|---|---|
| Fair Value (IFRS 13) | • The identifiable assets are required under IFRS 3 to be recognised at their "Fair Value". Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. |
| Definition Intangible asset (IAS 38) | • Intangible assets are all the elements of a business enterprise that exist in addition to working capital and tangible assets. They are the elements, after working capital and tangible assets, that make the business work and are often the primary contributors to the earning power of the enterprise. |
| | Their existence is dependent on the presence, or expectation of earnings.<br>• The definition of an intangible asset under IFRS is detailed in IAS 38 as 'an identifiable non-monetary asset without physical substance. |

| | |
|---|---|
| Definition of identifiable asset (IFRS 3) | • IAS 38 (Intangible asset) defines the useful life as "the period over which an asset is expected to be available for use by an entity; or the number of production or similar units expected to be obtained from the asset by an entity".<br>• Under IAS 38 the factors which should be considered in assessing the useful lives of intangible assets include:<br>i. The expected use and potential use by another management team;<br>ii. Typical life cycles for the product and any public information on useful lives;<br>iii. Technical, technological, commercial or other types of obsolescence;<br>iv. Stability of the industry in which the asset operates and changes in the market demand;<br>v. Expected actions by competitors;<br>vi. Level of maintenance expenditure required to obtain the future economic benefits; and<br>vii. The period of control over the asset and legal or similar limits on the use of the asset.<br>• The estimated useful life of each identifiable asset identified will be based on the factors outlined above |

### 3.13 Impairment of non-financial assets

The carrying amounts of the Group's non-financial assets other than goodwill and deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists then the asset's recoverable amount is estimated. For goodwill and intangible assets that have indefinite useful lives or that are not yet available for use, the recoverable amount is estimated each period at the same time.

The recoverable amount of goodwill is estimated at each reporting date. An impairment loss is recognised if the carrying amount of an asset or its cash-generating unit exceeds its recoverable

## Notes to the Financial Statement continued

### 3 Basis of preparation continued

amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

For the purpose of impairment testing, assets that cannot be tested individually are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of cash inflows of other assets or groups of assets (the "cash-generating unit" or CGU). Subject to an operating segment ceiling test, for the purposes of goodwill impairment testing, CGUs to which goodwill has been allocated are aggregated so that the level at which impairment is tested reflects the lowest level at which goodwill is monitored for internal reporting purposes. Goodwill acquired in a business combination is allocated to the groups of CGUs that are expected to benefit from the synergies of the combination.

An impairment loss in respect of goodwill is not reversed. In respect of other assets, impairment losses recognised in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

### 3.14 Discontinued operations

The Group presents discontinued operations in a separate line in the consolidated income statement if an entity or a component of an entity has been disposed of or is classified as held for sale and:

(a) Represents a separate major line of business or geographical area of operations;

(b) Is part of a single coordinated plan to dispose of a separate major line of business or geographical area of operations; or

(c) Is a subsidiary acquired exclusively with a view to resale (for example, certain private equity investments).

Net profit from discontinued operations includes the net total of operating profit and loss before tax from operations, including net gain or loss on sale before tax or measurement to fair value less costs to sell and discontinued operations tax expense. A component of an entity comprises operations and cash flows that can be clearly distinguished, operationally and for financial reporting purposes, from the rest of the Group´s operations and cash flows. If an entity or a component of an entity is classified as a discontinued operation, the Group restates prior periods in the consolidated income statement.

Non-current assets, or disposal groups comprising assets and liabilities, that are expected to be recovered primarily through sale or distribution rather than through continuing use, are classified as held for sale or distribution. Immediately before classification as held for sale or distribution, the assets, or components of a disposal group, are re-measured in accordance with the Group's accounting policies. Thereafter generally the assets, or disposal group, are measured at the lower of their carrying amount and fair value less costs to sell. Any impairment loss on a disposal group is allocated first to goodwill, and then to the remaining assets and liabilities on pro rata basis, except that no loss is allocated to inventories, financial assets, deferred tax assets, employee benefit assets, investment property or biological assets, which continue to be measured in accordance with the Group's accounting policies.

Impairment losses on initial classification as held for sale or distribution and subsequent gains and losses on re-measurement are recognised in the income statement. Gains are not recognised in excess of any cumulative impairment loss.

Once classified as held for sale or distribution, intangible assets and property, plant and equipment are no longer amortised or depreciated, and any equity-accounted investee is no longer equity accounted.

### 3.15 Non-current assets (or disposal groups) held for sale

Non-current assets (or disposal groups) are classified as assets held for sale when their carrying amount is to be recovered principally through a sale transaction and a sale is considered highly probable. They are stated at the lower of carrying amount and fair value less costs to sell. Investment property classified as non-current asset held for sale are measured at fair value, gain or loss arising from a change in the fair value of investment property is recognised in income statement for the period in which it arises.

### 3.16 Provisions

A provision is recognised if, as a result of a past event, the Group has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability. The increase in the provision due to passage of time is recognised as interest expenses.

#### (a) Restructuring

A provision for restructuring is recognised when the Group has approved a detailed and formal restructuring plan, and the restructuring either has commenced or has been announced publicly. Future operating costs are not provided for.

### 3.17 Financial guarantees

Financial guarantees which includes Letters of credit are contracts that require the Group to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the

## Notes to the Financial Statement continued

## 3 Basis of preparation continued

terms of a debt instrument. Financial guarantee liabilities are initially recognised at their fair value, and the initial fair value is amortised over the life of the financial guarantee. The guarantee liability is subsequently carried at the higher of this amortised amount and the present value of any expected payment (when a payment under the guarantee has become probable). Letters of credits which have been guaranteed by the Group but funded by the customer is included in other liabilities while those guaranteed and funded by the Group is included in deposit from financial institutions.

### 3.18 Employee benefits

#### (a) Defined contribution plans

A defined contribution plan is a post employment benefit plan under which an entity pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts. Obligations for contributions to defined contribution pension plans are recognised as an expense in the income statement when they are due in respect of service rendered before the end of the reporting period.

Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in future payments is available. Contributions to a defined contribution plan that are due more than 12 months after the end of the reporting period in which the employees render the service are discounted to their present value at the reporting date.

Access Holding Plc operates a funded, defined contribution pension scheme for employees. Employees and the Company contribute 8% and 10% respectively of the qualifying staff salary in line with the provisions of the Pension Reforms Act 2014.

#### (b) Termination benefits

Termination benefits are payable when employment is terminated by the group before the normal retirement date, or whenever an employee accepts voluntary redundancy in exchange for these benefits. The group recognises termination benefits at the earlier of the following dates: (a) when the group can no longer withdraw the offer of those benefits; and (b) when the entity recognises costs for a restructuring that is within the scope of IAS 37 and involves the payment of termination benefits. In the case of an offer made to encourage voluntary redundancy, the termination benefits are measured based on the number of employees expected to accept the offer. Benefits falling due more than 12 months after the end of the reporting period are discounted to their present value.

#### (c) Post employment defined benefit plan

The Group has a non-contributory, un-funded lump sum defined benefit plan for top executive management of the Group from General Manager and above based on the number of periods spent in these positions.

Depending on their grade, executive staff of the Group upon retirement are entitled to certain benefits based on their length of stay on that grade. The Group's net obligation in respect of the long term incentive scheme is calculated by estimating the amount of future benefits that eligible employees have earned in return for service in the current and prior periods. That benefit is discounted to determine its present value. The rate used to discount the post employment benefit obligation is determined by reference to the yield on Nigerian Government Bonds, that have maturity dates approximating the terms of the Group's obligations.

The calculation is performed annually by a qualified actuary using the projected unit credit method. When the benefits of a plan are improved, the portion of the increased benefit relating to past service by employees is immediately recognised in the income statement. The Group recognises all actuarial gains or losses and all expenses arising from defined benefit plan immediately in the balance sheet, with a charge or credit to other comprehensive income (OCI) in the periods in which they occur. They are not recycled subsequently in the income statement.

#### (d) Short-term employee benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided.

A liability is recognised for the amount expected to be paid under short-term cash bonus or profit-sharing plans if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

#### (e) Share-based payment remuneration scheme

The Group applies IFRS 2 Share-based Payment in accounting for employee remuneration arrangements under which employees receive shares of the company as part of their compensation package.

Employee incentives include awards in the form of shares. The cost of the employee services received in respect of the shares or options granted is recognised in the income statement over the period that employees provide services, generally the period between the date the award is granted or notified and the vesting date of the shares. The overall cost of the award is calculated using the number of shares and options expected to vest and the fair value of the shares or options at the date of grant.

The number of shares expected to vest takes into account the likelihood that non-market vesting and service conditions included in the terms of the awards will be met. Failure to meet the non-vesting condition is treated as a forfeiture, resulting in an acceleration of recognition of the cost of the employee services.

The fair value of shares is the market price ruling on the grant date, in some cases adjusted to reflect restrictions on transferability. The cost recognised as a result of shares granted in the period has been expensed within Personnel expenses, with a corresponding increase in the liability account as the scheme is cash-settled.

## Notes to the Financial Statement continued

## 3 Basis of preparation continued

### 3.19 Share capital and reserves

**(a) Share issue costs**

Incremental costs directly attributable to the issue of an equity instrument are deducted from the initial measurement of the equity instruments.

**(b) Additional Tier 1 Capital**

The Group classifies financial liabilities or equity instruments in accordance with the substance of the contractual terms of the instruments. The Additional tier 1 securities issued by the Bank are not redeemable by the subscribers and bear an entitlement to coupons at the sole discretion of the board of directors of the Bank. Accordingly, they are presented within equity. Distributions thereon are recognised in Equity. Based on the Group's assessment of the terms of the AT 1 securities, the coupon payments meet the definition of dividend. Therefore, the related tax impacts are recognised in profit or loss in accordance with IAS 12.(See note 38c ) for more details

**(c) Dividend on the Company's ordinary shares**

Dividends on ordinary shares are recognised in equity in the period when approved by the Group's shareholders. Dividends for the period that are declared after the end of the reporting period are disclosed in the subsequent events note.

**(d) Treasury shares**

Where the subsidiaries within the Group purchased the shares of the Company, the transaction is accounted for as cash settled, a liability is recognised in the statement of financial position and expensed as other staff benefit in the statement of comprehensive income over the course of the minimum vesting period. The liability is remeasured at each reporting date with gains and losses recognised in the statement of comprehensive income. Should any employee within the scheme leave the Group within the vesting period, the shares maybe forfeited depending on whether the staff was relieved of his/her duties by the Company or voluntarily resigned. Shares held in the staff share scheme by Holdco personnel are equity settled.

By the resolution of the Board and Shareholders, the Company sets aside an amount not exceeding twenty (20) percent of the aggregate emoluments of the Group's employees in each financial period to purchase shares of Access Holdings Plc's from the floor of the Nigerian Exchange Group(NGX) for the purpose of the plan. The group has also established a Structured Entity (SE) to hold shares of the Company purchased. Upon vesting, the SE transfers the shares to employees.

**(e) Earnings per share**

The Group presents basic and diluted earnings per share (EPS) for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the period. Diluted EPS is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding for the effects of all dilutive potential ordinary shares. Ordinary shares held as treasury shares, including shares held under employee share schemes, are excluded from the weighted average number of ordinary shares outstanding for both basic and diluted EPS as they are not considered outstanding ordinary shares in accordance with IAS 33 and IAS 32.

**(f) Regulatory risk reserve**

In compliance with the Prudential Guidelines for Licensed Banks, the Group assesses qualifying financial assets using the guidance under the Prudential Guidelines. The guidelines apply objective and subjective criteria towards providing losses in risk assets. Assets are classified as performing or non- performing. Non performing assets are further classed as substandard, doubtful or lost with attendant provisions. There are no restrictions to the distribution of these reserves.

| Classification | Percentage | Basis |
|---|---|---|
| Substandard | 10% | Interest and/or principal overdue by 90 days but less than 180 days |
| Doubtful | 50% | Interest and/or principal overdue by 180 days but less than 365 days |
| Lost | 100% | Interest and/or principal overdue by more than 365 days |

A more accelerated provision may be done using the subjective criteria. A 2% provision is taken on all risk assets that are not specifically provisioned.

The results of the application of Prudential Guidelines and the expected credit loss determined for these assets under IFRS 9 are compared. The IFRS 9 determined impairment charge is included in the income statement.

Where the Prudential Guidelines provision is greater, the difference is appropriated from retained earnings and included in a non - distributable 'Regulatory risk reserve'. Where the IFRS 9 expected credit loss is greater, no appropriation is made and the amount of IFRS 9 expected credit loss is recognised in the income statement.

Following an examination, the regulator may also require more amounts to be set aside on risk and other assets. Such additional amounts are recognised as an appropriation from retained earnings to regulatory risk reserve.

**(g) Capital reserve**

This balance represents the surplus nominal value of the reconstructed shares of the Company which was transferred from the share capital account to the capital reserve account after the share capital reconstruction in October 2006. The Shareholders

## Notes to the Financial Statement continued

## 3 Basis of preparation continued

approved the reconstruction of 13,956,321,723 ordinary shares of 50 kobo each of the Bank in issue to 6,978,160,860 ordinary shares of 50 kobo each by the creation of 1 ordinary shares previously held.

### (h) Fair value reserve

The fair value reserve comprises the net cumulative change in the fair value of investments measured through other comprehensive income until the investment is derecognised or impaired.

### (i) Foreign currency translation reserve

This balance appears only in the Group accounts and represents the foreign currency exchange difference arising from translating the results and financial position of all the group entities that have a functional currency different from the presentation currency.

### (j) Retained earnings

Retained earnings are the undistributable profit carried forward recognised income net of expenses plus current period profit attributable to shareholders.

### (k) Statutory Reserves Investment

- Statutory Reserves Investment – The Statutory Reserve in accordance with the provision of the Pension Reform Act (s.81 of PRA 2014) is used to recognise an annual transfer of 12.5% of profit after tax from retained earnings into Statutory Reserve Fund.
- Every Pensions Fund Administrator shall maintain a Statutory Reserve Fund as contingency fund to meet any claim for which the Pension Fund Administrator may be liable as may be determined by the Commission.

**Statutory Reserve – Banks (CBN Requirement)**

In accordance with the provisions of the Banks and Other Financial Institutions Act (BOFIA) 2020, Section 16(1), and as reinforced by the Central Bank of Nigeria (CBN) regulations, every bank in Nigeria is required to transfer a portion of its profit after tax (PAT) to a statutory reserve.

Where a bank's statutory reserve is less than its paid-up share capital, it must transfer 30% of its profit after tax to statutory reserve.

Where the statutory reserve is equal to or greater than its paid-up share capital, the Bank must transfer 15% of its profit after tax to statutory reserve.

The statutory reserve is a non-distributable reserve created to strengthen the financial position of the Bank and serve as a buffer against unexpected losses, in line with prudential regulation.

### (l) Pensions Protection Fund Investment

- The Pension Commission shall establish and maintain a fund to be known as the Pension Protection Fund for the benefits of eligible pensioners covered by any pension scheme established, approved or recognised under this Act.
- The Pension Protection Fund shall consist of –
- An annual subvention of 1% of the total monthly wage bill payable to employees in the public service of the Federation towards the funding of the minimum guaranteed pension;
- Annual pension protection levy paid by the Commission and all licensed pension operators at a rate to be determined by the Commission from time to time

### (m) Share Scheme Reserve

Share scheme reserve represents the cumulative equity-settled share-based payment expense recognised in respect of awards granted to employees under the Group's Restricted Share Performance Plan (RSPP), in accordance with IFRS 2. The reserve is built up over the vesting period of the awards and reflects the fair value of unvested shares granted to eligible employees. Upon vesting, the related balance is transferred within equity, while awards that lapse are reversed in accordance with the terms of the scheme.

### (n) Partial disposal of subsidiary

**Partial disposal of subsidiaries without loss of control**

Transactions with non-controlling interests that do not result in a loss of control are accounted for as equity transactions. The difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration received is recognised directly in equity and attributed to the equity holders of the parent. No gain or loss is recognised in profit or loss.

**Partial disposal of subsidiaries resulting in loss of control**

Where a partial disposal results in the Group losing control of a subsidiary, the Group derecognises the assets, liabilities and non-controlling interests of the subsidiary. Any retained investment is remeasured to fair value at the date control is lost, with the resulting gain or loss recognised in profit or loss. The fair value of any retained interest becomes the initial carrying amount for subsequent accounting as an associate, joint venture or financial asset, as applicable.

### (o) Other statutory reserves

Statutory reserveIn accordance with Section 16(1) of the Banks and Other Financial Institutions Act of Nigeria, the Group is required to make an annual appropriation to a statutory reserve. Where

## Notes to the Financial Statement continued

## 3 Basis of preparation continued

the statutory reserve is less than the Group's paid-up share capital, an appropriation of 30% of profit after tax is made; where the statutory reserve equals or exceeds paid-up share capital, the appropriation is reduced to 15% of profit after tax.Small and Medium Enterprises Equity Investment Scheme (SMEEIS) reserve.

reserveThe SMEEIS reserve is maintained in compliance with the requirement of the Central Bank of Nigeria (CBN) and the Bankers' Committee that all licensed deposit money banks in Nigeria set aside a portion of profit after tax to finance equity investment in qualifying small and medium-scale enterprises. Under the guideline, as amended by the CBN letter dated 11 July 2006, contributions were set at 10% of profit after tax for the first five years, reducing to 5% thereafter. This requirement is, however, no longer mandatory, and accordingly, no further appropriation has been made during the period. The SMEEIS reserve is non-distributable.

### 3.20 Levies

The Group recognises liability to pay levies progressively if the obligating event occurs over a period. However, if the obligation is triggered on reaching a minimum threshold, the liability is recognised when that minimum threshold is reached. The Group recognises an asset if it has paid a levy before the obligating event but does not yet have a present obligation to pay that levy. The obligating event that gives rise to a liability to pay a levy is the event identified by the legislation that triggers the obligation to pay the levy.

**Inventory**

Inventories are initially recognized at cost in accordance with IAS 2. Cost includes all costs of purchase, conversion, and other costs incurred in bringing the inventories to their present location and condition.Subsequent measurement is at the lower of cost and net realizable value (NRV). Repossessed assets intended for resale are classified as inventory upon repossession. They are measured at the lower of cost (typically the fair value at the date of repossession) and NRV. Gains or losses on the subsequent sale of such assets are recognized in profit or loss.The Group reviews its inventory periodically for obsolescence, damage, or decline in value. Where such indicators exist, an impairment loss is recognized.

### 3.21 Derivatives and hedging activities

Access Holdings ("The Group") Plc applies hedge accounting to manage its foreign exchange risk.

Derivatives are initially recognised at fair value on the date a derivative contract is entered into, and they are subsequently remeasured to their fair value at the end of each reporting period. The accounting for subsequent changes in fair value depends on whether the derivative is designated as a hedging instrument and, if so, the nature of the item being hedged. The Group designates certain derivatives as hedges of the fair value of recognised liabilities (fair value hedges).

At inception of the hedge relationship, the Group documents the economic relationship between hedging instruments and hedged items, including whether changes in the fair value of the hedging instruments are expected to offset changes in the fair value of hedged items. The Group documents its risk management objective and strategy for undertaking its hedge transactions. The Group uses the actual ratio between the hedged item and hedging instruments to determine its hedge ratio.

The fair values of derivative financial instruments designated in hedge relationships are disclosed in notes to the financial statements. The full fair value of a hedging derivative is presented as a non-current asset or liability when the remaining maturity is more than 12 months; it is classified as a current asset or liability when the remaining maturity is less than 12 months. Trading derivatives are classified as a current asset or liability.

Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recorded in profit or loss, together with any changes in the fair value of the hedged asset or liability that are attributable to the hedged risk. The Group uses swap and forward contracts to hedge the fair value changes attributable to foreign exchange risk on the hedged item. The Group generally designates only the change in fair value of the derivative contract related to the spot component as the hedging instrument. The change in the forward element of the derivative contract is not part of the hedging relationship and is recognised separately in the statement of profit or loss within fair value and foreign exchange gain/(loss). The unrealised gains or losses relating to the changes in the spot component of the hedge instrument, changes in the fair value of hedge items and the fair value changes of non-hedged items are recognised within Fair value and Foreign exchange gain/(loss). If the hedging derivative expires or sold, terminated or exercised, or the hedge no longer meets the criteria for fair value hedge accounting, or the hedge designation is revoked, then hedge accounting is discontinued prospectively.

**Hedge effectiveness**

The Group determines hedge effectiveness at the inception of the hedge relationship, and through periodic prospective effectiveness assessments, to ensure that an economic relationship exists between the hedged item and hedging instrument. The hedge effectiveness is assessed every reporting period.

**Derivatives that do not qualify for hedge accounting**

Certain derivative instruments are not designated for hedge accounting. Changes in the fair value of any derivative instrument that are not designated for hedge accounting are recognised immediately in profit or loss and are included in Net gain on financial instruments at fair value through profit or loss.

The Group may adjust the designated quantities of either the hedged item or the hedging instrument of an existing hedging relationship for the purpose of maintaining a hedge ratio that continues to comply with the hedge effectiveness requirements under IFRS 9. Rebalancing under IFRS 9 is a normal risk management activity and ensures that the hedge relationship remains aligned with the Group's documented risk management strategy. It does not trigger hedge discontinuation, nor does it

## Notes to the Financial Statement continued

### 3 Basis of preparation continued

require de-designation and re-designation of the hedge, unless the Group's hedging objective changes.

### 3.22 Fiduciary activities

The Group commonly engages in trust or other fiduciary activities that result in the holding or placing of assets on behalf of individuals, trusts, post-employment benefit plans and other institutions. These assets under management are disclosed in the financial statements of the Group. Also, fee income earned and fee expenses incurred by the Group relating to the Group's responsibilities from fiduciary activities are recognised in profit or loss.

### 3.23 Staff costs

The group recognition of staff costs, includes wages, salaries, bonuses, and other employee benefits, should be recognised as an expense in the period in which employees render the related services. Costs are typically accrued in the financial statements to match the expense with the period of benefit.

Staff costs are measured based on contractual agreements, including any statutory obligations and provisions for benefits such as pensions or healthcare.

### 3.24 Operating expenses (OPEX)

Operating expenses should be recognised in the income statement in the period in which they are incurred. These include costs associated with the day-to-day functioning of the business, such as rent, utilities, and office supplies.

OPEX is measured based on actual costs incurred and should be recorded in the period they are attributable to.

### 3.25 Prepayments

Prepayments represent payments made in advance for goods or services that will be received in future periods. These should be initially recognised as assets and then expensed over the period to which they relate.

Prepayments are measured at the amount paid. The expense is recognised in the income statement in the period when the benefits of the prepayment are consumed.

### 3.26 Other Assets

Other assets include items that do not fall into specific categories like cash, receivables, or inventory. They should be recognised based on their nature and the benefits they provide.

These assets are measured based on cost or fair value, depending on the nature of the asset and relevant accounting standards.

## Notes to the Financial Statement continued

## 4 Use of estimates and judgements

### Critical judgements

These disclosures supplement the commentary on financial risk management (see note 5). Estimates where management has applied judgements are:

**(i) ECL allowance on financial instrument:**

- determination of significant increase in credit risk on financial assets.
- determination of the methodology used for incorporating forward-looking information in the ECL measurement
- selection and approval of ECL models

**(ii) Assessment of impairment on goodwill on acquired subsidiaries**

**(iii) Defined benefit plan**

**(iv) Valuation of unquoted equities**

**(v) Valuation of derivatives**

**(vi) Depreciation of property and equipment**

**(vii) Amortisation of intangible assets**

**(viii) Impairment of property and equipment**

**(ix) Impairment of intangible assets**

**(x) Litigation claims provisions**

**(xi) Equity settled share-based payment**

**(xii) Determination of intangible assets arising on business combinations**

**(xiii) Determination of control over investees companies**

**(xiv) Determination of the business model within which assets are held**

**(xv) Partial disposal of subsidiary without loss of control**

**(xvi) Extension and termination options - Determining the lease term**

Management has assessed the first four estimates and the extension and termination options as having the key sources of estimation uncertainty, and are explained in further detail below. The other estimates have been assessed in their individual accounting policies.

### Extension and termination options - Determining the lease term

In determining the lease term, management considers all facts and circumstances that create an economic incentive to exercise an extension option, or not exercise a termination option. Extension options (or periods after termination options) are only included in the lease term if the lease is reasonably certain to be extended (or not terminated).

For leases of properties, the following factors are normally the most relevant:

- If there are significant penalties to terminate (or not extend), the Group is typically reasonably certain to extend (or not terminate).
- If any leasehold improvements are expected to have a significant remaining value, the Group is typically reasonably certain to extend (or not terminate).
- Otherwise, the Group considers other factors including historical lease durations and the costs and business disruption required to replace the leased asset.

The lease term is reassessed if an option is actually exercised (or not exercised) or the Group becomes obliged to exercise (or not exercise) it. The assessment of reasonable certainty is only revised if a significant event or a significant change in circumstances occurs, which affects this assessment, and that is within the control of the lessee. During the current financial period, the financial effect of revising lease terms to reflect the effect of exercising extension and termination options was an increase in recognised lease liabilities and right-of-use assets of N1.826 billion.

### Key sources of estimation uncertainty

**(i) Allowances for credit losses**

Loans and advances to banks and customers are accounted for at amortised cost and are evaluated for impairment on a basis described in accounting policy (see note 3.9)

The measurement of impairment losses both under IFRS 9 across all categories of financial assets requires judgement, in particular, the estimation of the amount and timing of future cash flows and collateral values when determining impairment losses and the assessment of a significant increase in credit risk. These estimates are driven by a number of factors, changes in which can result in different levels of allowances.

The Group's ECL calculations are outputs of complex models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. Elements of the ECL models that are considered accounting judgements and estimates include:

- The Group's internal credit grading model, which assigns PDs to the individual grades
- The Group's criteria for assessing if there has been a significant increase in credit risk and so allowances for financial assets should be measured on a Life Time Expected Credit Loss basis and the qualitative assessment
- The segmentation of financial assets when their ECL is assessed on a collective basis
- Determination of associations between macroeconomic scenarios and, economic inputs, such as unemployment levels, exchange rates, crude oil prices, GDP and collateral values, and the effect on PDs, EADs and LGDs

## Notes to the Financial Statement continued

## 4 Use of estimates and judgements continued

- Selection of forward-looking macroeconomic scenarios and their probability weightings, to derive the economic inputs into the ECL models.

It has been the Group's policy to regularly review its models in the context of actual loss experience and adjust when necessary.

**Measurement of Expected Credit Loss**

The standard requires recognition of an impairment allowance on financial instruments, based on 12 months or lifetime expected credit losses. The ECL calculations are based on the components discussed in the previous sections.

IFRS 9 requires the calculation of probability-weighted ECL impairments. Three ECL figures were therefore calculated for each scenario (optimistic, best-estimate and downturn ECLs) and probability-weighted to arrive at a single ECL impairment for each account.

The EIR, as provided by the Bank, is used to discount all ECLs to the reporting date. The method followed for accounts classified as Stage 1, Stage 2 or Stage 3 are set out below; For accounts with no EIR information, the contractual rate is used as a proxy

**Stage 1**

Account-level ECL figures are calculated projecting monthly expected losses for the next 12-months of each account. The forward, macro-adjusted monthly PDs are applied to the applicable LGD estimate and EAD or the collateral adjusted EAD (if secured) at the start of each month.

**Stage 2**

Account-level ECL figures are calculated projecting monthly expected losses for the remaining lifetime of each account. The forward, macro-adjusted monthly PDs are applied to the applicable LGD estimate and the EAD or collateral adjusted EAD (if secured) at the start of each month.

**Stage 3**

For the purposes of this model, account-level ECL figures are calculated by applying the applicable LGD estimate to the balance as at the reporting date

The final ECL impairment is calculated as the probability-weighted average of the ECLs produced for the three macro-economic scenarios.

The Group reviews its loan portfolios to assess impairment at least on a half periodly basis. In determining whether an impairment loss should be recorded in the income statement, the Group makes judgements as to whether there is any observable data indicating a significant increase in credit risk followed by measurable decrease in the estimated future cash flows from a portfolio of loans before the decrease can be identified with that portfolio. This evidence may include observable data indicating that there has been an adverse change in the payment status of borrowers in a bank, or national or local economic conditions that correlate with defaults on assets in the Group.

The Group makes use of estimates based on historical loss experience for assets with credit risk characteristics and objective evidence of impairment similar to those in the portfolio when scheduling future cash flows. The methodology and assumptions used for estimating both the amount and timing of future cash flows are reviewed regularly to reduce any differences between loss estimates and actual loss experience.

The specific component of the total allowances for impairment applies to financial assets evaluated individually for impairment and is based upon management's best estimate of the present value of the cash flows that are expected to be received. In estimating these cash flows, management makes judgements about a debtor's financial situation and the net realisable value of any underlying collateral. Each impaired asset is assessed on its merits, and the workout strategy and estimate of cash flows considered recoverable are independently reviewed by the Credit Risk Management Department (CRMD).

A collective component of the total allowance is established for:

- Groups of homogeneous loans that are not considered individually significant and
- Groups of assets that are individually significant but were not found to be individually impaired.

Collective allowance for groups of homogeneous loans is established using statistical modelling of historical trends of the probability of default, timing of recoveries and the amount of loss incurred, adjusted for management's judgement as to whether current economic and credit conditions are such that the actual losses are likely to be greater or less than suggested by historical modelling. Default rates, loss rates and the expected timing of future recoveries are regularly benchmarked against actual outcomes to ensure that they remain appropriate.

Collective allowance for group of assets that are individually significant but that were not found to be individually impaired cover credit losses inherent in portfolios of loans and advances and held to maturity investment securities with similar credit characteristics when there is objective evidence to suggest that they contain impaired loans and advances and held to maturity investment securities, but the individual impaired items cannot yet be identified. In assessing the need for collective loan loss allowances, management considers factors such as credit quality, portfolio size, concentrations, and economic factors. In order to estimate the required allowance, assumptions are made to define the way inherent losses are modelled and to determine the required input parameters, based on historical experience and current economic conditions. The accuracy of the allowances depends on estimates of future cash flows for specific counterparty allowances and the model assumptions and parameters used in determining collective allowances are estimated.

## Notes to the Financial Statement continued

## 4 Use of estimates and judgements continued

### (ia) Sensitivity of Exposure at default - Probability of Default (PD) & Loss Given Default (LGD)

**Loans and Advances To Customers**

In establishing sensitivity to ECL estimates for corporate loans, four variables (GDP growth rate, Crude Oil Price, Prime Lending Rate, inflation and US exchange rate were considered). Of these variables, the Bank's corporate loans reflects greater responsiveness to GDP growth rate and crude oil price.

**On balance Sheet Exposure**

Crude Oil Price : Oil price volatility significantly impacts economic activities which creates ripple effects on asset quality.

Maximum Lending Rate : Given its impact on lending rates on borrowing costs and potential increase in rate of default.

The table below outlines the total ECL for wholesale portfolios as at 30 June 2026, if each of the key assumptions used change by plus or minus 10%. The responsiveness of the ECL estimates to variation in macroeconomic variables have been presented below while putting in perspective, interdependencies between the various economic inputs.

| | -10% | +10% |
|---|---|---|
| **P & L Impact of change in Macro-economic variables** | (5,354) | 5,284 |

| | -10% | +10% |
|---|---|---|
| **Asset Quality Impact of change in Macroeconomic vari-ables** | (5,228) | 4,682 |

**Off balance Sheet Exposure**

Crude Oil Price : Oil price volatility significantly impact economic activities which creates ripple effects on asset quality.

Maximum Lending Rate : High lending rates could create an increased risk of default and Impact asset quality and Expected credit loss.

The table below outlines the total ECL for wholesale Off-Balance Sheet exposures as at 30 June 2026, if each of the key assumptions used change by plus or minus 10%.

| | -10% | +10% |
|---|---|---|
| **P & L Impact of change in Macroeconomic variables** | (337) | 336 |

**Statement of prudential adjustments**

Provisions under prudential guidelines are determined using the time based provisioning regime prescribed by the Revised Central Bank of Nigeria (CBN) Prudential Guidelines. This is at variance with the expected credit loss model required by IFRS 9. As a result of the differences in the methodology/provision regime, there will be variances in the impairments allowances required under the two methodologies.

Paragraph 12.4 of the revised Prudential Guidelines for Deposit Money Banks in Nigeria stipulates that Banks would be required to make provisions for loans as prescribed in the relevant IFRS Standards when IFRS is adopted. However, Banks would be required to comply with the following:

a) Provisions for loans recognised in the profit or loss account should be determined based on the requirements of IFRS. However, the IFRS provision should be compared with provisions determined under prudential guidelines and the expected impact/changes in general reserves should be treated as follows:

- Prudential Provisions is greater than IFRS provisions; the excess provision resulting should be transferred from the retained earnings account to a "regulatory risk reserve".
- Prudential Provisions is less than IFRS provisions; IFRS determined provision is charged to the statement of comprehensive income. The cumulative balance in the regulatory risk reserve is thereafter reversed to the retained earnings account.

b) The non-distributable reserve should be classified under Tier 1 as part of the core capital.

## Notes to the Financial Statement continued

## 4 Use of estimates and judgements continued

Access Bank Nigeria has complied with the requirements of the prudential guidelines as follows:

| *In millions of Naira* | Notes | 30 June 2026 | 31 December 2025 |
|---|---|---|---|
| **Access Bank** | | | |
| **Loans & advances:** | | | |
| Expected credit loss (ECL) on loans to customers and banks: | | | |
| - Loans to banks | 22 | 229 | 148 |
| - Loans to individuals | 23(b) | 7,681 | 12,568 |
| - Loans to corporate | 23(b) | 139,514 | 132,127 |
| - Placement | 18 | 9,506 | 7,376 |
| - Contingents | 34 (e) | 3,403 | 1,824 |
| - Investment Securities at Fair value through other comprehensive income (FVOCI) | 25 | 3,466 | 1,203 |
| - Investment Securities at Amortised cost (AMC) | 25 | 34,158 | 43,637 |
| - Pledged assets at Amortised cost (AMC) | 24 | 47 | 343 |
| - Pledged assets at Fair value through other comprehensive income (FVOCI) | 24 | - | 7 |
| - Other assets | 26 | 205,401 | 230,773 |
| Total impairment allowances on loans and other financial assets per IFRS | | **403,405** | **430,006** |
| **Total regulatory impairment based on prudential guidelines** | | **635,129** | **549,740** |
| | | | |
| Balance, beginning of the year | | 119,734 | 152,680 |
| Additional transfers to/(from) regulatory risk reserve | | 113,665 | (32,946) |
| | | | |
| **Balance, end of the period** | | **257,423** | **119,734** |

The Central Bank of Nigeria (CBN) via its circular BSD/DIR/GEN/LAB/08/052 issued on 11 November 2015, directed banks in Nigeria to increase the general provision on performing loans from 1 percent to 2 percent for prudential review of credit portfolios in order to ensure adequate buffer against unexpected loan losses.

### (ii) Assessment of impairment of goodwill on acquired subsidiaries

Goodwill on acquired subsidiaries are tested annually by comparing the value-in-use for the cash generating unit to the carrying amount of the goodwill based on cash flow projections. No assessment was done during the interim reporting period as no indication of impairment was identified. See note 29b for further details.

| | June 2026 | | December 2025 | |
|---|---|---|---|---|
| Entity | Discount Rate | Terminal Growth rate | Discount Rate | Terminal Growth rate |
| Access Diamond | 22.24% | 3.24% | 22.24% | 3.24% |
| Access Botswana | 19.31% | 1.76% | 19.31% | 1.76% |
| Access Kenya | 21.60% | 5.38% | 21.60% | 5.38% |
| Access Rwanda | 20.07% | 6.97% | 20.07% | 6.97% |
| Access Angola | 19.31% | 1.76% | 19.31% | 1.76% |
| Access ARM Pensions Limited | 27.50% | 3.93% | 27.50% | 3.93% |

### (iii) Defined benefit plan

The present value of the long term incentive plan depends on a number of factors that are determined in an actuarial basis using a number of assumptions. Any changes in these assumptions will impact the carrying amount of obligations. The assumptions used in determining the net cost (income) for pensions include the discount rate. The Group determines the appropriate discount rate at the end of the period. In determining the appropriate discount rate, reference is made to the yield on Nigerian Government Bonds that have maturity dates approximating the terms of the related pension liability. Other key assumptions for pension obligations are

## Notes to the Financial Statement continued

### 4 Use of estimates and judgements continued

based in part on current market conditions. See note 37 for the sensitivity analysis.

**(iv) Valuation technique unquoted equity:**

The Equity investment and valuation section of the financial reporting policy of the group provides the framework for accounting for the group's investment in unquoted equity securities while also providing the guideline for the valuation process and analysis of changes in fair value measurements from period to period.

In accordance with IFRS 13 fair value measurement, which outlines three approaches for valuing unquoted equity instruments; market approach, the income approach and the cost approach. The Group estimated the fair value of its investment in each of the unquoted equity securities at the end of the financial period using the market approach.

The adjusted fair value comparison approach of P/BV ratios was adopted in valuing each of these equity investments taken into cognizance the suitability of the model to each equity investment and the availability of financial information while minimising the use of unobservable data.

**Valuation methodology and inputs:**

The fair value of the other unquoted equity securities were derived using the Adjusted fair value comparison technique. Adjusted fair value comparison approach of P/BV ratios are used as input data .

The steps involved in estimating the fair value of the Group's investment in each of the investees (i.e. unquoted equity securities) are as follows:
**Step 1:** Identify quoted companies with similar line of business ,structure and size

**Step 2:** Obtain the EV/EBITDA or the P/B or P/E ratios of these quoted companies identified from Valutico, Reuters or Capital IQ

**Step 3:** Derive the average or median of EV/EBITDA or the P/B or P/E ratios of these identified quoted companies

**Step 4:** Apply the lower of average (mean) or median of the identified quoted companies ratios on the Book Value or Earnings of the investment company to get the value of the investment company

**Step 5:** Discount the derived value of the investment company by applying an Illiquidity discount and size adjustment/haircut to obtain the Adjusted Equity Value

**Step 6:** Multiply the adjusted equity value by the present exchange rate for foreign currency investment

**Step 7:** Compare the Adjusted Equity value with the carrying value of the equity investment to arrive at a fair value gain or loss

**Description of valuation methodology and inputs:**

**a. Enterprise Value (EV):**

Enterprise value measures the value of the ongoing operations of a company. It is calculated as the market capitalisation plus debt, minority interest and preferred shares, minus total cash and cash equivalents of the company.

**b. Earnings Before Interest ,Tax Depreciation and Amortisation (EBITDA ):**

EBITDA is earnings before interest, taxes, depreciation and amortisation. EBITDA is one of the indicator's of a company's financial performance and is used as a proxy for the earning potential of a business.

EBITDA = Operating Profit + Depreciation Expense + Amortisation Expense

**c. Price to Book (P/B Ratio):**

The price-to-book ratio (P/B Ratio) is used to compare a stock's market value to its book value. It is calculated by dividing the current closing price of the stock by the latest company book value per share or by dividing the company's market capitalization by the company's total book value from its balance sheet.

**d. Price to Earning (P/E Ratio):**

The price-earnings ratio (P/E Ratio) values a company using the current share price relative to its per-share earnings.

The sources of the observable inputs used for comparable technique were gotten from Valutico, and Reuters or Capital IQ.

**Valuation Assumptions:**

i. Illiquidity discount range of 12.2% to 18.8% is used to discount the value of the investments that are not tradable

ii. Haircut/size adjustment and country discount range from 8.7% to 10.06% to take care of size of interest held in investee entities and inflation and exchange rate impact being that the comparable companies are in foreign countries

**Basis of valuation:**

The assets are being valued on a fair open market value approach. This implies that the value is based on the conservative estimates of the reasonable price that can be obtained if and when the subject asset is offered for sale under the present market conditions.

**Method of Valuation**

The market approach has been applied in determining the fair value of the asset.

## Notes to the Financial Statement continued

## 4 Use of estimates and judgements continued

Under this approach, the valuation considers recent market transactions of comparable assets within the same asset class and also applies the Price-to-Book Value (P/BV) multiple derived from comparable entities.

Where necessary, adjustments are made to reflect differences in size, risk profile, financial performance, and other unique attributes of the asset being valued.

The key elements of the control framework for the valuation of financial instruments include model validation and independent price verification. These functions are carried out by an appropriately skilled Finance team, independent of the business area responsible for the products. The results of the valuation are reviewed quarterly by senior management.

### 4.1 Valuation of financial instruments

The table below analyses financial and non-financial instruments measured at fair value at the end of the financial period, by the level in the fair value hierarchy into which the fair value measurement is categorised:

#### 4.1.1 Recurring fair value measurements

**Financial instrument measured at fair value**

**(a) Financial instruments in level 1**

The fair value of financial instruments traded in active markets is based on quoted market prices at the balance sheet date. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. The quoted market price used for financial assets held by the group is the current bid price. These instruments are included in Level 1. Instruments included in Level 1 comprise primarily of government bonds, corporate bonds, treasury bills and equity investments classified as trading securities or fair value through other comprehensive income investments.

**(b) Financial instruments in level 2**

The fair value of financial instruments that are not traded in an active market are determined by using valuation techniques. These valuation techniques maximise the use of observable market data where it is available and rely as little as possible on entity specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

If one or more of the significant inputs is not based on observable market data, the instrument is included in Level 3. Specific valuation techniques used to value financial instruments include:

(i) Quoted market prices or dealer quotes for similar instruments;

(ii) The fair value of forwards and swaps foreign exchange contracts is determined using estimated foreign exchange rates at the balance sheet date;

(iii) Other techniques, such as discounted cash flow analysis, are used to determine fair value for the remaining financial instruments.

**(c) Financial instruments in level 3**

The Group uses widely recognised valuation models for determining the fair value of its financial assets.

Valuation techniques include net present value and discounted cash flow models, comparison with similar instruments for which market observable prices exist and other valuation models. Assumptions and inputs used in valu-

## Notes to the Financial Statement continued

## 4 Use of estimates and judgements continued

ation techniques include risk-free and benchmark interest rates, credit spreads and other premia used in estimating discount rates, bond and equity prices, foreign currency exchange rates, equity and equity index prices and expected price volatilities and correlations. The objective of valuation techniques is to arrive at a fair value measurement that reflects the price that would be received to sell the asset or paid to transfer the liability in an orderly transaction between market participants at the measurement date.

For more complex instruments, the Group uses proprietary valuation models, which are usually developed from recognised valuation models. Some or all of the significant inputs into these models may not be observable in the market, and are derived from market prices or rates or are estimated based on assumptions. Examples of instruments involving significant unobservable inputs include certain Investment securities for which there is no active market. Valuation models that employ significant unobservable inputs require a higher degree of management judgement and estimation in the determination of fair value. Management judgement and estimation are usually required for selection of the appropriate valuation model to be used, determination of expected future cash flows on the financial instrument being valued, determination of the probability of counterparty default and prepayments and selection of appropriate discount rates. Fair value estimates obtained from models are adjusted for any other factors, such as liquidity risk or model uncertainties, to the extent that the Group believes that a third party market participant would take them into account in pricing a transaction. Fair values reflect the credit risk of the instrument and include adjustments to take account of the credit risk of the Group entity and the counterparty where appropriate.

For level 2 assets, fair value was obtained using a recent market transaction during the period under review. Fair values of unquoted debt securities were derived by interpolating prices of quoted debt securities with similar maturity profile and characteristics.

**Transfers between fair value hierarchy**

The group's policy is to recognise transfers into and out of fair value hierarchy levels as at the end of the reporting period.

### 4.1.3 Valuation techniques used to derive Level 2 fair values

Level 2 fair values of investments have been generally derived using the market approach. Below is a table showing sensitivity analysis of material unquoted investments categorised as Level 2 fair values.

| Description | Fair value at 30 June 2026 N'000 | Valuation technique | Observable Inputs | "Fair value if inputs increased by 5% N'000 | "Fair value if inputs decreased by 5% N'000 | Relationship of observable inputs to fair value |
|---|---|---|---|---|---|---|
| Derivative financial assets | 2,020,774 | Forward and swap: Fair value through mark to model reference rate Futures: Fair value through the mark to market rate | "Spot rate at valuation date SOFR rate at valuation date NGN Interest rate " | 1,871,902 | 1,693,625 | The higher the market rate, the higher the fair value of the derivative financial instrument |
| Derivative financial liabilities | (238,010) | | | | | |
| Investment in CSCS | 33,000 | The market value is obtained from the National Association of Securities Dealers (NASD) as at the reporting year | Share price from NASD | 34,650 | 31,350 | The higher the share price, the higher the fair value |
| Nigerian Mortgage Refinance Company | 336 | The market value is obtained from the National Association Of Securities Dealers (NASD) as at the reporting year | Share price from NASD | 353 | 319 | The higher the share price, the higher the fair value |

## Notes to the Financial Statement continued

## 4 Use of estimates and judgements continued

### 4.1.4 Valuation techniques used to derive Level 3 fair values

Level 3 fair values of investments have been generally derived using the adjusted fair value comparison approach. Quoted price per earning or price per book value, enterprise value to EBITDA ratios of comparable entities in a similar industry were obtained and adjusted for key factors to reflect estimated ratios of the investment being valued. Adjusting factors used are the Illiquidity Discount which assumes a reduced earning on a private entity in comparison to a publicly quoted entity and the Haircut adjustment which assumes a reduced earning for an entity located in Nigeria contributed by lower transaction levels in comparison to an entity in a developed or emerging market.

| Description | Fair value at 30 June 2026 | Valuation technique | Unobservable Inputs | Fair value if unobservable inputs increased by 5% | Fair value if unobservable inputs decreased by 5% | Relationship of unobservable inputs to fair value | Relationship of unobservable inputs to fair value |
|---|---|---|---|---|---|---|---|
| Investment in Africa Finance Corporation | 725,753 | Adjusted fair value comparison approach | Average P/B multiples of comparable companies, country risk and illiquidity discount | 683,947 | 767,559 | The lower the size adjustment/ haircut, country risk and illiquidity discount, the higher the fair value. | The lower the size adjustment/haircut, country risk and illiquidity discount, the higher the fair value. |

| Balance, period end | **816,325** | **853,730** | **-** | **-** |

## 4.2 Fair value of financial assets and liabilities not carried at fair value

The fair value for financial assets and liabilities that are not carried at fair value were determined respectively as follows:

### (i) Cash

The carrying amount of cash and balances with banks is a reasonable approximation of fair value.

### (ii) Loans and advances to banks and customers

Loans and advances are net of charges for impairment. The estimated fair value of loans and advances represents the discounted amount of estimated future cash flows expected to be received. Expected cash flows are discounted at current market rates to determine fair value.

### (iii) Investment securities and pledged assets

The fair values are based on market prices from financial market dealer price quotations. Where this information is not available, fair value is estimated using quoted market prices for securities with similar credit, maturity and yield.

## Notes to the Financial Statement continued

### 4 Use of estimates and judgements continued

The fair value comprises equity securities and debt instruments. The fair value for these assets are based on estimations using market prices and earning multiples of quoted securities with similar characteristics.

#### (iv) Other assets

The bulk of these financial assets have short maturities and the amounts is a reasonable approximation of fair value.

#### (v) Deposits from banks and customers

The estimated fair value of deposits with no stated maturity, which includes non-interest bearing deposits, is the amount repayable on demand. The estimated fair value of fixed interest-bearing deposits not quoted in an active market is based on discounted cash flows using interest rates for new debts with similar remaining maturity.

#### (vi) Other liabilities

The carrying amount of financial liabilities in other liabilities is a reasonable approximation of fair value. They comprise of short term liabilities which are available on demand to creditors with no contractual rates attached to them.

#### (vii) Interest bearing borrowings

The estimated fair value of fixed interest-bearing borrowings not quoted in an active market is based on the market rates for similar instruments for these debts over their remaining maturity.

#### (viii) Debt securities issued

The estimated fair value of floating interest rate debt securities quoted in an active market is based on the quoted market rates as listed on the irish stock exchange for these debts over their remaining maturity.

### 4.3 Financial assets and liabilities

#### (a) Fair value measurement

Accounting classification measurement basis and fair values

The table below sets out the classification of each class of financial assets and liabilities, and their fair values.

## Notes to the Financial Statement continued

## 5 Financial Risk Management

### Credit Risk Management

Credit risk arises from the failure of an obligor of the Bank to repay principal or interest at the stipulated time or failure otherwise to perform as agreed. This risk is compounded if the assigned collateral only partly covers the claims made to the borrower, or if its valuation is exposed to frequent changes due to changing market conditions (i.e. market risk).

The Bank's Risk Management philosophy is that moderate and guarded risk attitude will ensure sustainable growth in shareholder value and reputation. Extension of credit in Access Bank is guided by its Credit Risk and Portfolio Management Plan, which sets out specific rules for risk origination and management of the loan portfolio. The Plan also sets out the roles and responsibilities of different individuals and committees involved in the credit process.

We recognise the fact that our main asset is our loan portfolio. Therefore, we actively safeguard and strive to continually improve the health of our loan portfolio. We scrutinize all applications and weed out potential problem loans during the loan application phase, as well as constantly monitor existing loan portfolio.

The goal of the Bank is to apply sophisticated but realistic credit models and systems to monitor and manage credit risk. Ultimately these credit models and systems are the foundation for the application of internal rating-based approach to calculation of capital requirements. The development, implementation and application of these models are guided by the Bank's Basel II strategy.

The pricing of each credit granted reflects the level of risks inherent in the credit. Subject to competitive forces, Access Bank implements a consistent pricing model for loans to its different target markets. The client's interest is guarded at all times, and collateral quality is never the sole reason for a positive credit decision.

Provisions for credit losses meet prudential guidelines set forth by the Central Bank of the countries where we operate, both for loans for which specific provisions exist as well as for the portfolio of performing loans. Access Bank's credit process requires rigorous proactive and periodic review of the quality of the loan portfolio. This helps us to identify and remediate credit issues proactively.

The Criticized Assets Committee performs a quarterly review of loans with emerging signs of weakness; the Management Credit Committee and the Board Credit Committee also perform reviews of the quality of our loan portfolio on a quarterly basis. These are in addition to daily reviews performed by our Credit Risk Management department.

### Principal Credit Policies

- **Credit Risk Management Policy:** The core objective is to enable maximisation of returns on a risk adjusted basis from banking book credit risk exposures that are brought under the ambit of Credit Risk Management Policy by putting in place robust credit risk management systems consisting of risk identification, risk measurement, setting of exposure & risk limits, risk monitoring & control and reporting of credit risk in the banking book.
- **Credit Risk Mitigant Management Policy:** The objective is to aid in effective credit portfolio management through mitigation of credit risks by using credit risk mitigation techniques.
- **Credit Risk Rating Policy:** The objective of this policy is to ensure reliable and consistent Obligor Risk Ratings (ORRs) and Facility Risk Ratings (FRRs) throughout Access Bank and to provide guidelines for risk rating for retail and non-retail exposures in the banking book covering credit and investment books of the Bank.
- **Country and Cross Border Risk Management Policy:** The objective of this policy is to establish a consistent framework for the identification, measurement and management of country risk across Access Bank.
- **Internal Capital Adequacy Assessment Process (ICAAP) Policy:** The objectives of the policy are identification of material risks, measurement of material risks, monitoring & control of material risks and reporting of material risks.
- **Enterprise-wide Risk Management Policy:** The core objective is to provide reasonable degree of assurance to the Board of Directors that the risks threatening the Bank's achievement of its vision are identified, measured, monitored and controlled through an effective integrated risk management system covering credit, market, operational, interest rate, liquidity and other material risks.

### Responsibilities of Business Units and Independent Credit Risk Management

In Access Bank, Business units and independent credit risk management have a joint responsibility for the overall accuracy of risk ratings assigned to obligors and facilities. Business Relationship Managers will be responsible for deriving the ORR and FRR using approved methodologies as set out in this policy, however independent credit risk management may also perform this function.

## Notes to the Financial Statement continued

## 5 Financial Risk Management

Notwithstanding who derives the risk rating, Independent Credit Risk Management is responsible for reviewing and ensuring the correctness of the ORR and FRR assigned to a borrower and facilities. This review includes ensuring the ongoing consistency of the business' Risk Rating Process with Access Bank Risk Rating Policy; ongoing appropriate application of the Risk Rating Process and tools; review of judgmental and qualitative inputs into the Risk Rating Process; ensuring the timeliness and thoroughness of risk rating reviews; and ensuring that the documentation of the Risk Rating Process is complete and current.

Independent Credit Risk Management has the final authority if there is a question about a specific rating.

**Credit process**

The Bank's credit process starts with portfolio planning and target market identification. Within identified target markets, credits are initiated by relationship managers. The proposed credits are subjected to review and approvals by applicable credit approval authorities. Further to appropriate approvals, loans are disbursed to beneficiaries.

On-going management of loans is undertaken by both relationship management teams and our Credit Risk Management Group. The process is applied at the Head Office and in the subsidiaries.

If a preliminary analysis of a loan request by the account manager indicates that it merits further scrutiny, it is then analysed in greater detail by the account manager, with further detailed review by Credit Risk Management. The concurrence of Credit Risk Management must be obtained for any credit extension. If the loan application passes the detailed analysis it is then submitted to the appropriate approval authority for the size of facilities

The standard credit evaluation process is based both on quantitative figures from the Financial Statements and on an array of qualitative factors. Factual information on the borrower is collected as well as pertinent macroeconomic data, such as an outlook for the relevant sector, etc. These subjective factors are assessed by the analyst and all individuals involved in the credit approval process, relying not only on quantitative factors but also on extensive knowledge of the company in question and its management.

**a) Credit risk measurement**

**Risk Rating Methodology**

The credit rating of the counterparty plays a fundamental role in final credit decisions as well as in the terms offered for successful loan applications. Access Bank employs a robust credit rating system based on international best practices (including Basel II recommendations) in the determination of the Obligor and Facility risks and thus allows the Bank to maintain its asset quality at a desired level.

In Access Bank, the objective of the Risk Rating Policy is to ensure reliable and consistent Obligor Risk Ratings ('ORRs') and Facility Risk Ratings ('FRRs') throughout the Bank and to provide guidelines for risk rating for retail and non – retail exposures in the Bank.

The Risk rating policy incorporates credit risk rating models which estimate risk of obligor default and facility risks (covering both recovery as well as Exposure risk). These models are currently based on expert judgment for Retail and Non-Retail Exposures. Our long-term goal is to adopt the Internal Rating Based ("IRB") approach. The data required to facilitate the IRB approach are being gathered.

All Access Bank businesses that extend credit are subject to the Risk rating policy.

**Credit Risk Rating Models in Access Bank Plc**

The following are the credit risk rating models deployed by Access Bank.

**(i) For Retail Exposures:**

Obligor Risk Rating (ORR) Models have been developed for:

1. Personal Loans
2. Credit Cards
3. Auto Loans
4. Mortgage Loans

Facility Risk Rating (FRR) Models have been developed for:

1. Loss Given Default (LGD)
2. Exposure at Default (EAD)

**(ii) For Non – Retail Exposures:**

Obligor Risk Rating (ORR) Models have been developed for:

1. Sovereign (Approach to rating Sovereign Exposures using External ratings)
2. Bank and Non Banking Financial Institutions
3. Corporate
   - Manufacturing Sector
   - Trading Sector
   - Services Sector
   - Real Estate Sector
4. Small and Medium Enterprises (SME) Without Financials

Facility Risk Rating (FRR) Models have been developed for

1. Loss Given Default (LGD)
2. Exposure at Default (EAD)

## Notes to the Financial Statement continued

## 5 Financial Risk Management continued

**Risk Rating Process**

In Access Bank, all businesses must have a documented and approved Risk Rating Process for deriving risk ratings for all obligors and facilities (including those covered under Credit Programs). The Risk Rating Process is the end-to-end process for deriving ORRs and FRRs and includes models, guidelines, support adjustments, collateral adjustments, process controls, as well as any other defined processes that a business undertakes in order to arrive at ORRs and FRRs. Risk rating process of each business must be in compliance with the Bank's Risk rating Policy and deviations must be explicitly approved.

Establishing the Risk Rating Process is the joint responsibility of the Business Manager and Independent Credit Risk Manager associated with each business. The process must be documented and must be approved by the Management Credit Committee.

The Risk Rating Process for each business must be reviewed and approved every three years, unless more frequent review is specified as a condition of the approvals. Interim material changes to the Risk Rating Process, as determined by the Independent Credit Risk Manager for the business, must be re-approved.

**Responsibilities of Business Units and Independent Credit Risk Management**

In Access Bank, Business units and independent credit risk management have a joint responsibility for the overall accuracy of risk ratings assigned to obligors and facilities. Business Relationship Managers will be responsible for deriving the ORR and FRR using approved methodologies as set out in this policy, however independent credit risk management may also perform this function.

Notwithstanding who derives the risk rating, Independent Credit Risk Management is responsible for reviewing and ensuring the correctness of the ORR and FRR assigned to a borrower and facilities. This review includes ensuring the ongoing consistency of the business' Risk Rating Process with Access Bank Risk Rating Policy; ongoing appropriate application of the Risk Rating Process and tools; review of judgmental and qualitative inputs into the Risk Rating Process; ensuring the timeliness and thoroughness of risk rating reviews; and ensuring that the documentation of the Risk Rating Process is complete and current

Credit Risk Management has the final authority if there is a question about a specific rating.

**Risk Rating Scale and external rating equivalent**

Access Bank operates a 12-grade numeric risk rating scale. The risk rating scale runs from 1 to 8. Rating 1 represents the best obligors and facilities and rating 8 represents the worst obligors and facilities. The risk rating scale incorporates sub-grades and full grades reflective of realistic credit migration patterns.

The credit quality with reference to the internal rating system adopted by the Bank.

| Risk Rating Range | Credit Quality |
|---|---|
| 1 - 3 | Neither past due nor impaired |
| 4 -5 | Past due but not impaired |
| 6 -8 | Past due and impaired |

The risk rating scale and the external rating equivalent is detailed below:

| Access Bank Risk Rating | S&P Long term equivalent | Grade |
|---|---|---|
| 1 | AAA | Investment Grade |
| 2+ | AA | |
| 2 | A | |
| 2- | BBB | |
| 3+ | BB+ | Standard Grade |
| 3 | BB | |
| 3- | BB- | |
| 4 | B | Non Investment Grade |
| 5 | B- | |
| 6 | CCC | |
| 7 | C | |
| 8 | D | |

**b) Credit Risk Control & Mitigation policy**

**Authority Limits on Credit**

The highest credit approval authority is the Board of Directors, supported by the Board Credit Committee and further by the Management Credit Committee. Individuals are also assigned credit approval authorities in line with the Bank's criteria for such delegation set out in its Credit Risk and Portfolio Management Plan. The principle of central management of risk and decision authority is maintained by the Bank. The maximum amount of credit that may be approved at each subsidiary is limited, with amounts above such limit being approved at the Head Office.

This structure gives Access Bank the possibility to incorporate much needed local expertise, but at the same time manage risk on a global level. Local Credit Committees of the Bank's subsidiaries are thus able to grant credits, but the sum total of the exposure of the applicant and financially related counterparties is limited, most commonly by the subsidiary's capital. All applications that would lead to exposures exceeding the set limit are referred to the appropriate approval authority in the Head Office.

The credit approval limits of the principal officers of the Group are shown in the table below:

## Notes to the Financial Statement continued

## 5 Financial Risk Management continued

| Authority | Approval Limit |
|---|---|
| Group Managing Director | N300,000,000 |
| Group Deputy Managing Director | N200,000,000 |
| Group Executive Director | N100,000,000 |
| Managing Directors of the Bank's subsidiaries | N65,000,000 |

Credit approval limits by risk rating is shown in the table below:

| Access Bank Risk Rating | Credit Rating by S&P | Board of Directors | Board Credit Committee Approval Limit | Management Credit Committee Approval Limit |
|---|---|---|---|---|
| 1 | AAA | Single Obligor | N30 Billion | N15 Billion |
| 2+ | AA | Single Obligor | N25 Billion | N12.5 Billion |
| 2 | A | Single Obligor | N10 Billion | N2 Billion |
| 2- | BBB | Single Obligor | N10 Billion | N1 Billion |
| 3+ | BB+ | Single Obligor | N10 Billion | N500 Million |
| 3 | BB | Single Obligor | N10 Billion | N500 Million |
| 3- | BB- | Single Obligor | | Above N200 Million |
| 4 | B | Single Obligor | | |
| 5 | B- | Single Obligor | | |

**Collateral Policies**

It is the Group's policy that all credit exposures are adequately collateralised. Credit risk mitigation is an activity of reducing credit risk in an exposure or transferring it to counterparty, at facility level, by a safety net of tangible and realisable securities including approved third-party guarantees/ insurance.

In Access Bank, strategies for risk reduction at the transaction level differ from that at the portfolio level. At transaction level, the most common technique used by the Bank is the collateralisation of the exposures, by first priority claims or obtaining a third party guarantee. Other techniques include buying a credit derivative to offset credit risk at transaction level. At portfolio level, asset securitisation, credit derivatives etc. are used to mitigate risks in the portfolio.

However primary consideration when approving credits is always the obligor's financial strength and debt-servicing capacity. The guidelines relating to risk mitigant as incorporated in the guidance note of BCBS on "Principles for the Management of Credit Risk" (September 2000, Paragraph 34) are be taken into consideration while using a credit risk mitigant to control credit risk.

*"Bank can utilise transaction structure, collateral and guarantees to help mitigate risks (both identified and inherent) in individual credits but transactions should be entered into primarily on the strength of the borrower's repayment capacity. Collateral cannot be a substitute for a comprehensive assessment of the borrower or the counterparty, nor it can compensate for the insufficient information. It should be recognised that any credit enforcement actions (e.g. foreclosure proceedings) can eliminate the profit margin on the transaction. In addition, Banks need to be mindful that the value of collateral may well be impaired by the same factors that have led to the diminished recoverability of the credit."*

The range of collaterals acceptable to the Bank include:

- Cash/deposit (domestic and foreign currency) with Bank including certificates of deposit or comparable instruments issued by the Bank.
- Certificates of Deposit from other banks.
- Commodities.
- Debt securities issued by sovereigns and public-sector enterprises.
- Debt securities issued by banks and corporations.
- Equities - Stocks/Share Certificates of quoted blue chip companies
- Mortgage on Landed Property
- Asset-backed securities.

## Notes to the Financial Statement continued

## 5 Financial Risk Management continued

- Charge on assets (Fixed and/or Floating) - premises/ inventory/ receivables/ merchandise/ plant/ machinery etc.
- Negative Pledges
- Lien on Asset being financed
- Stock Hypothecation
- Shipping Documents (for imports)
- Bankers Acceptance
- Life Assurance Policies

**Master Netting arrangements**

It is the Group's policy that all credit exposures are adequately collateralised. Notwithstanding, our account opening documentation allows the Bank to net off customers' deposits against their exposure to the Bank. Generally transactions are allowed to run on a gross basis, however, in cases of unfavorable credit migration, the Bank may elect to invoke the netting agreement.

**Credit related commitments**

It is the Group's policy that all credit exposures are adequately collateralised. Credit risk mitigation is an activity of reducing credit risk in an exposure.

**Provisioning policy**

A loan or loan portfolio is impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that occurred after initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the loan or loan portfolio that can be reliably estimated.

There have been no changes to the exposures to risk and how they arise, the objectives, policies and processes for managing the risk and the methods used to measure the risk from the previous year.

Balances included in other Assets above are those subject to credit risks. The table above shows a worst-case scenario of credit risk exposure to the Group as at 30 June 2026 and 31 December 2025, without taking account of any collateral held or other credit enhancements attached.

For on-balance-sheet assets, the exposures set out above are based on net amounts reported in the statements of financial position.

The Directors are confident in their ability to continue to control exposure to credit risk which can result from both its Loans and Advances portfolio and debt securities.

### Operational Risk Management

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people, or systems, or from external events. Our definition of opera tional risk excludes regulatory risks, strategic risks and potential losses related solely to judgments with regard to taking credit, market, interest rate, liquidity, or insurance risks.

It also includes the reputation and franchise risk associated with business practices or market conduct in which the Bank is involved. Operational risk is inherent in Access Bank's global business activities and, as with other risk types, is managed through an overall framework designed to balance strong corporate oversight with well-defined independent risk management.

This framework includes:

- recognseed ownership of the risk by the businesses;
- oversight by independent risk management; and
- independent review by Corporate Audit.

We seek to minimise exposure to operational risk, subject to cost trade-offs. Operational risk exposures are managed through a consistent set of management processes that drive risk identification, assessment, control and monitoring.

The goal is to keep operational risk at appropriate levels relative to the characteristics of our businesses and the markets in which we operate, our capital and liquidity, and the competitive, economic and regulatory environment. Notwithstanding these controls, Access Bank incurs operational losses.

Our operational risk strategy seeks to minimise the impact that operational risk can have on shareholders' value. The Bank's strategy is to:

- Reduce the likelihood of occurrence of expected events and related cost by managing the risk factors and implementing loss prevention or reduction techniques to reduce variation to earnings;
- Minimise the impact of unexpected and catastrophic events and related costs through risk financing strategies that will support the Bank's long term growth, cash flow management and balance sheet protection;
- Eliminate bureaucracy, improve productivity, reduce capital requirements and improve overall performance through the institution of well designed and implemented internal controls.

In order to create and promote a culture that emphasises effective operational management and adherence to operating controls, there are three distinct levels of operational risk governance structure in Access Bank Plc.

**Level 1** refers to the oversight function carried out by the Board of Directors, Board risk committee and the executive management. Responsibilities at this level include ensuring effective management of operational risk and adherence to the approved operational risk policies.

## Notes to the Financial Statement continued

## 5 Financial Risk Management continued

**Level 2** refers to the management function carried out by operational risk management group. It has direct responsibility for formulating and implementing the Bank's operational risk management framework including methodologies, policies and procedures approved by the Board.

**Level 3** refers to the operational function carried out by all business units and support functions in the Bank. These units/functions are fully responsible and accountable for the management of operational risk in their units. They work in liaison with operational risk management to define and review controls to mitigate identified risks. Internal audit provides independent assessment and evaluation of the Bank's operational risk management framework. This periodic confirmation of the existence and utilisation of controls in compliance with approved policies and procedures, provide assurance as to the effectiveness of the Bank's operational risk management framework. Some of the tools being used to assess, measure and monitor operational risks in the Bank include; a loss database of operational risk events; an effective risk and control self-assessment process that helps to analyse business activities and identify operational risks that could affect the achievement of business objectives; and key risk indicators which are used to monitor operational risks on an ongoing basis.

### The Group's operational risk framework

The Group's current operational risk framework was implemented in 2007 to meet internal and regulatory requirements. There has been significant investment in the implementation of improved measurement and management approaches for operational risk to strengthen control, improve customer service, improve process efficiencies and minimise operating losses. The Group recognises the fact that It is neither cost-effective nor possible to attempt to eliminate all operational risks. Events of small significance are thus expected to occur and are accepted as inevitable with relevant budgeting for these losses being exercised where appropriate. Events of material significance are limited and the Group seeks to reduce the risk from these extreme events in a framework consistent with its agreed risk appetite. Processes are in place to monitor management and future mitigation of such events.

The role of the Independent Operational Risk department is to establish, implement and maintain the operational risk framework for the modelling and managing of the Group's operational risk, while reinforcing and enabling operational risk management culture throughout the Group. The aim is to integrate, based on international norms and best practices, all operational risk activities and to compile a reliable operational risk profile contributing to the Group's risk- reward profile. The key advantage introduced by the current framework is the financial quantification and modelling of operational risks. This functionality has significantly improved the Group's operational risk measurement and management capabilities.

### Management and control responsibilities

The first line of governance for managing operational risk rests with business and operational risk management forms part of the day-to-day responsibilities of all business unit management. Business unit staff reports any identified breakdowns in control and any risk events that may result in financial loss and/or reputation damage. Amongst others, business management are responsible to ensure that processes for identifying and addressing ineffective controls and the mitigating of risk events are implemented and executed. Operational Risk teams form the secondary line of governance by ensuring that processes to identify weaknesses are effective and identified weaknesses are acted upon. The Group operational risk profile is presented to the Board quarterly. Control effectiveness is monitored at the ERMC and at the Board; and the multi-layered system of defences ensures pro-active operational risk management.

### Measuring and managing operational risk

The Group recognises the significance of operational risk and is committed to enhancing the measurement and management thereof. Within the Group's operational risk framework, qualitative and quantitative methodologies and tools are applied (Group-wide) to identify and assess operational risks and to provide management information for determining appropriate mitigating measures.

### Risk event data collection and reporting

A standard process is used Group-wide for the recognition, capture, assessment, analysis and reporting of risk events. This process is used to help identify where process and control requirements are needed to reduce the recurrence of risk events. Risk events are loaded onto a central database and reported monthly to the ERMC. The Group also uses a database of external public risk events and is part of a consortium of international banks that share loss data information anonymously to assist in risk identification, assessment, modelling and benchmarking.

### Risk and control self assessments (RCSA)

In order to pro-actively identify and actively mitigate risks, the operational risk framework utilises RCSAs. RCSA is used at a granular level to identify relevant material risks and key controls mitigating these risks. The risks and controls are assessed on a quarterly basis and relevant action plans are put in place to treat, tolerate, terminate or transfer the risks, taking into account the relevant business risk appetites. The RCSA programme is extensive and covers the entire Group. The Internal Audit further tests the effectiveness of the RCSAs within the normal course of auditing and relevant metrics are monitored and actioned where relevant.

### Key risk indicators (KRIs)

A comprehensive set of KRIIs are in place across the Group, with relevant and agreed thresholds set by the business. KRIs are monitored on a Group as well as business unit level, based on significance. Threshold breaches are managed in accordance with an agreed process across the Group.

## Notes to the Financial Statement continued

## 5 Financial Risk Management continued

### Reporting

Business units are required to report on both a regular and an event-driven basis. The reports include a profile of the key risks to their business objectives, RCSA and KRI results, and operational risk events. Risk reports are presented to executive management and risk committees.

### Allocating Capital to Business Units

An allocation methodology is applied for allocating capital to business units (for instance an allocation from, Access Bank to Commercial Banking Division, Retail Banking Division, Institutional Banking Group, e.t.c.). For each business unit, the allocation takes into consideration not only the ssee of the business unit, but also measures of the business unit's control environment, namely open audit findings, RCAs, KIs and losses. This translates to a risk-sensitive allocation with the opportunity afforded to business to identify actions to positively impact on their respective allocated operational risk capital.

### Expected loss (EL) budgeting mitigation

Basel II, under the AMA for operational risk makes provision for mitigation of operational risk RC due to appropriate budgeting and managing for EL. A significant portion of the Group business already budgets for expected losses and while the Group has developed a methodology for the modelling of EL budgeting, the Group will not apply risk mitigation in the calculation of its operational risk exposure until such time as policies and procedures are compliant to regulatory minimum requirements.

### Insurance mitigation

Insurance policies are used as a way to mitigate operational risks. These policies are current and remain applicable in the Group operating environment. Insurance coverage is purchased at Group or cluster level to discharge statutory and regulatory duties, or to meet counterparty commitments and stakeholder expectations. The primary insurance policies managed by the Group are:

- comprehensive crime and electronic crime;
- directors' and officers' liability; and
- professional indemnity.

In terms of the AMA, the Group may adjust its operational risk exposure result by no more than 20% to reflect the impact of operational risk mitigants. Globally, the use of insurance and other risk transfer mechanisms for operational risk is in a state of rapid development and pioneering work is being done across the industry. While the Group has developed a methodology for the modelling of insurance, the Group will not apply risk mitigation in the calculation of its operational risk exposure until such time as insurance policies are compliant to regulatory minimum requirements.

### Information Security and Continuity of Business

Information security and the protection of confidential and sensitive customer data are a priority of Access Bank. The Bank has developed and implemented an Information Security Risk Management framework that is in line with best practice. The framework is reviewed and enhanced regularly to address emerging threats to customers' information.

The Bank mitigates business continuity risks by reviewing and testing recovery procedures. The Bank's business continuity plan has been reviewed in view of recent enlarged operations. Regular bank wide awareness campaigns are also used to drive information security and business continuity culture in the Bank.

### Compliance Risk Management

Compliance Risk is the risk of loss resulting from failure (or perceived failure) to comply with relevant laws, regulations, internal policies and procedures or ethical standards. In addition to reputational damage, failure to effectively manage Compliance Risk can expose financial institutions to fines, civil/criminal penalties, and payment of damages, court orders and suspension or revocation of licenses. A failure (or perceived failure) can adversely impact customers, staff and shareholders of Access Bank.

The Bank believes that fully embedded Compliance Risk Management preserves the trust its customers, shareholders and staff have in the Bank and is important for the way Access Bank does business. Managing Compliance Risk is fundamental to driving value. The pursuit of long term business sustainability requires proper conduct of business activities in accordance with the high ethical standards of Access Bank's Business Principles. These principles not only reflect laws and regulations, but are also based on the Bank's core values of Leadership, Excellence and Professionalism.

Ongoing changes and the continuous introduction of new legislation have placed greater emphasis on the formal and structured monitoring of compliance with legal, regulatory, supervisory and internal requirements. Although legislative changes place an administrative burden on the Bank, the development of a framework provide the Bank with an opportunity to commit more openly to a culture of compliance within the Bank, its subsidiaries and divisions. In ensuring compliance with laws and regulations, the Bank hasput in place a robust Compliance Risk Management policy with set out guidelines to manage the Group's compliance risk in view of expansion of Access Bank activities in various jurisdictions, the evolving nature of the Global financial services industry, the introduction of new legislation, and the update of existing legislation; as well as the increasing complexities of the Bank's activities.

An efficient infrastructure has been put in place to enable management to track current and emerging Compliance Risk issues, to communicate these to internal and external stakeholders, and to drive continuous improvement. Access Bank understands that good Compliance Risk Management involves understanding and delivering on the expectations of customers and other stakeholders, thereby improving the quality of key relationships based on honesty, integrity and fairness.

Our Compliance framework provides the platform for the compliance programmes that are consistently applied across

## Notes to the Financial Statement continued

## 5 Financial Risk Management continued

the Bank to manage compliance risk. The framework has put in place a Group-wide reporting compliance framework encompassing both mandatory (regulatory) and non- mandatory (self regulatory) compliance. This framework includes a common approach to commitment and accountability, policies and procedures, controls and supervision, monitoring, regulatory change management, reporting, education and awareness.

We also mitigate compliance risk through a broad-based approach to process management and improvement. The lines of business are responsible for all the risks within the business line, including compliance risks. Compliance Risk Officers, working in conjunction with senior line of business executives, have developed key tools to address and measure compliance risks and to ensure compliance with laws and regulations in each line of business.

We approach Compliance Risk Management on an enterprise and line of business level. The Compliance and Internal Control function provides oversight of significant compliance risk issues. The function also develops and guides the strategies, policies and practices for assessing and managing compliance risks across the organisation. We re-established Compliance Resource Officers Meeting set up to develop, manage and integrate a compliance culture that meets global standards within the organisation. Through education and communication efforts, a culture of compliance is emphasseed across the organisation.

**Compliance Risk Management Framework**

**Strategic Risk Management**

Strategic risk is embedded in every line of business and is part of the other major risk categories (credit, market, liquidity, compliance and operational).

Strategic risk relates to the consequences that arise when the environment in which decisions that are hard to implement quickly and to reverse has an unattractive or adverse impact. Strategic risk ultimately has two elements: doing the right thing at the right time; and doing it well.

It is the risk that results from adverse business decisions, ineffective or inappropriate business plans, or failure to respond to changes in the competitive environment, business cycles, customer preferences, product obsolescence, regulatory environment, business strategy execution, and/or other inherent risks of the business including reputational risk.

The Bank's appetite for strategic risk is continually assessed within the context of the strategic plan, with strategic risks selectively and carefully taken to maintain relevance in the evolving marketplace.

Significant strategic actions, such as material acquisitions or capital actions, are reviewed and approved by the Board. Using a plan developed by management, executive management and the Board approve a strategic plan every three years. Annually, executive management develops a financial operating plan and the Board reviews and approves the plan. Executive management, with Board oversight, ensures that the plans are consistent with the Bank's strategic plan, core operating tenets and risk appetite.

The following are assessed in their reviews: forecasted earnings and returns on capital; the current risk profile and changes required to support the plan; current capital and liquidity requirements and changes required to support the plan; stress testing results; and other qualitative factors such as market growth rates and peer analysis. Executive management, with Board oversight, performs similar analyses throughout the year, and will define changes to the financial forecast or the risk, capital or liquidity positions as deemed appropriate to balance and optimsee between achieving the targeted risk appetite and shareholder returns and maintaining the targeted financial strength.

We use robust models to measure the capital requirements for credit, country, market, operational and strategic risks. The economic capital assigned to each line of business is based on its unique risk exposures. With oversight by the Board, executive management assesses the risk-adjusted returns of each business in approving strategic and financial operating plans. The businesses use economic capital to define business strategies, price products and transactions, and evaluate customer profitability.

**Reputational Risk Management**

Reputation risk management is essentially concerned with protecting an organisation from potential threats to its reputation. Most importantly, reputational threat should be dealt with proactively and effects of reputational events should be minimseed. The ultimate aim of reputation risk management is to avert the likelihood of any crisis and ultimately ensure the survival of the organisation. Nevertheless, managing reputational risk poses particular challenges for many organisations. Access Bank, in responding to the challenges posed by reputational risk, has put in place a framework to properly articulate, analyze and manage reputational risk factors.

The potential factors which affect the Bank's reputational risk profile include:

## Notes to the Financial Statement continued

## 5 Financial Risk Management continued

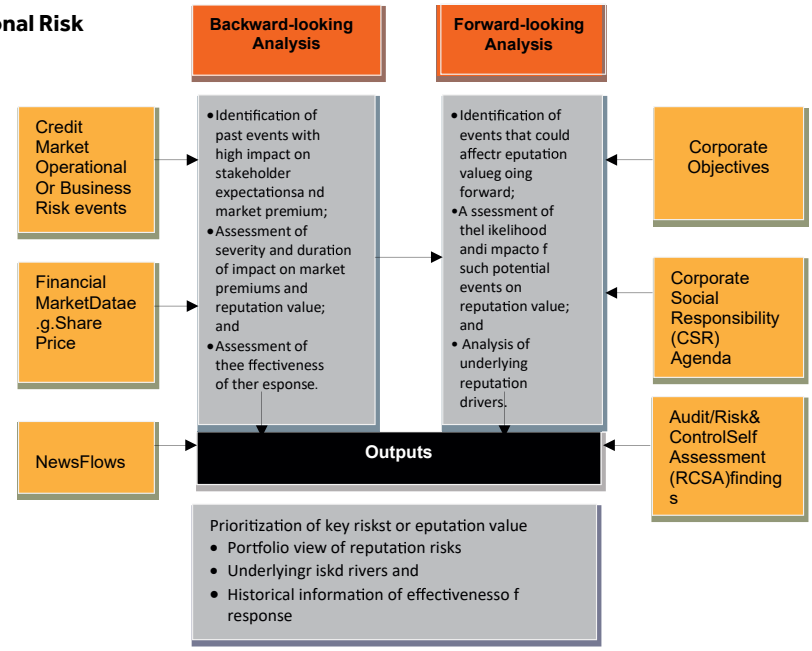

- A highly regulated financial services industry with high visibility and vulnerability to regulatory actions that may adversely impact its reputation. (e.g. corporate governance crises);
- Consolidation activities ignited resulting in a fusion of different cultures;
- Keen competition and largely homogeneous products and services have led customers not to perceive significant differences between financial service providers; and
- Given the financing nature of products and services they provide, Banks are not only exposed to their own reputation, but also to the reputation of their clients.

With banks operating and competing in a global environment, risks emerging from a host of different sources and locations is difficult to keep up with and to know how best to respond if they occur. The effects of the occurrence of a reputational risk event include but are not limited to the following:

- Loss of current or future customers;
- Loss of public confidence;
- Loss of employees leading to an increase in hiring costs, or staff downtime;
- Reduction in current or future business partners;
- Increased costs of capitalisation via credit or equity markets;
- Regulatory sanctions;
- Increased costs due to government regulations, fines, or other penalties; and
- Loss of banking license.

It is Group policy that, at all times, the protection of the Group's reputation should take priority over all other activities, including revenue generation. Reputational risk will arise from the failure to effectively mitigate one or more of country, credit, liquidity, market, regulatory and operational risk. It may also arise from the failure to comply with social, environmental and ethical standards. All employees are responsible for day-to-day identification and management of reputational risk.

**Key Drivers of Reputational Risk**

In identifying reputational risk factors, the Bank makes use of the output of the operational risk identification process. At the end of the operational risk identification sessions, risk profiles are derived and analyzed and risk events identified with possible negative reputational Impact on the Bank.

This analysis is performed against the background of the Bank's corporate objectives, its corporate social responsibility agenda and external factors. Access Bank seeks to leverage existing information from audit findings, risk and control self-assessments, environmental scanning and scenario planning processes in mitigating reputational risk issues.

## Notes to the Financial Statement continued

## 5 Financial Risk Management continued

### Compilation of Trigger Events

In order to assist in the identification of key reputational risk events, triggers that would set off the risk drivers should be compiled through workshops with participants from relevant business units. Following table illustrates few trigger events for relevant risk drivers.

| Risk Drivers | Trigger Events |
|---|---|
| Corporate governance and leadership | • Corporate frauds and scandal;<br>• Association with dishonest and disreputable characaters as directors, management;<br>• Association with politically exposed persons<br>• Incidence of shareholders conflict and Board Instability |
| Regulatory Compliance | • Non-compliance with laws and regulations;<br>• Non submission of Regulatory returns |
| Delivering customer promise | • Security Failure<br>• Shortfall in quality of service/fair treatment;<br>• Bad behaviour by employees |
| Workplace talent and culture | • Unfair employment practices<br>• Not addressing employee grievances<br>• Uncompetitive remuneration |
| Corporate social responsibility | • Lack of community development initiatives |
| Corporate culture | • Lack of appropriate culture to support the achievement of busines objective<br>• Ineffective risk management practices<br>• Unethical behaviours on the part of staff and management<br>• Lack of appropriate structure for employees to voice their concerns |
| Risk Management and Control Environment | • Inadequate Risk Management and Control environment<br>• Continuous violations of existing policies and Procedures |
| Financial Soundness and Business viability | • Consistent poor financial performance<br>• Substantial losses from unsuccessful Investment |
| Crisis Management | • Inadequate response to a crisis or even a minor incident |

### Events data analysis

Events data analysis is conducted to assess the gap between performance of the Bank and the expectation of stakeholders. The nature of the gap and the reasons for the gap is analyzed for ensuing corrective action. Sample of Events data analyzed is furnished below:

- Evaluating types of marketing efforts and implications for Reputational Risk;
- Analysis of number of accounts opened vs. closed;
- Calling effort analysis;
- Complaint log analysis; and
- Error resolution review.

### Approach to managing reputation events

The Bank's approach to managing reputation events, including any relevant strategy and policies, is approved by the Board or its delegated committee and subject to periodic review and update by senior management to ensure that it remains appropriate over time. In addition, the approach is well documented and communicated to all relevant personnel.

### Post reputation event reviews

After a reputation event, the post-event review will be conducted by Internal Audit and Risk Management Division to identify any lessons learnt, or problems and weaknesses revealed, from the event. Such reviews will be useful for providing feedback and recommendations for enhancing the Bank's reputation risk management process, and should at least be conducted on any major event affecting Access Bank. The Board and senior management will be promptly informed of the results of any such review conducted so that they can take appropriate actions to improve its approach to managing reputation risk.

Collateral types included in others are All Asset debentures, Domiciliation, Counter Indemnity, Authority to collect,Irrevocable standing payment order, Guarantees.

### Collateral held and other credit enhancements, and their financial effect

The general creditworthiness of a customer tends to be the most relevant indicator of credit quality of a loan extended to it. However, collateral provides additional consideration in the credit process and the Group generally requests that corporate borrowers provide collateral. The Group may take collateral in the form of a first charge over real estate, floating charges over all corporate assets and other liens and guarantees. The Group will sell or repossess a pledged collateral only in the event of a default and after exploring other means of repayment. In addition to the Group's focus on creditworthiness, the Group aligns with its Credit Policy Guide to periodically review the valuations of collaterals held against all loans to customers. This is done in line with the approved Framework for valuing various categories of collateral accepted by the Group.

The fair values of collaterals are based upon last annual valuation undertaken by independent valuers on behalf of the Bank. The valuation technique adopted for properties are based on fair values of similar properties in the neighborhood.

The fair values of non-property collaterals (such as equities, bond, treasury bills, etc.) are determined with reference to market quoted prices or market values of similar instruments.

There are no collaterals held against other financial assets. The Group obtained a property during the period by taking possession of collateral held as security against a loan. The Group's policy is to pursue timely realisation of the collateral in an orderly manner. The Group does not generally use the non-cash collateral for its own operations. Hence, the repossessed collateral has been included in assets classified as held for sale (Note 31).

### 5.1.5 (a) Credit concentration

The Group's risk profile is assessed through a 'bottom-up' analytical approach covering all of the Group's major businesses and products. The risk appetite is approved by the Board and forms the basis for establishing the risk parameters within which the businesses must operate, including policies, concentration limits and business mix.

The Group monitors concentrations of credit risk by sector and by geographic location. An analysis of concentrations of net credit risk at the reporting date is shown below:

## 5 Financial Risk Management continued

### 5.2 Market risk management

### 5.2.1 Interest rate gap position

Repricing gap measures the difference between the Company's interest sensitive assets and liabilities within certain maturity ranges. Differences between these assets and liabilities pose as potential losses from unexpected changes in interest rate. Negative Gaps represent situations when assets are less than liabilities and the Bank is exposed to an increase in interest rates. Where assets are more than liabilities this can be described as positive gap and the Bank is exposed to decline in interest rates.

The results below shows a negative gap of N5.88trillion, (December 2025 N5.37trillion) in the 'less than 3 months' time bucket, however this is as a result of the contractual nature of Non Maturity deposits. A significant portion of this gap is as a result of the contractual nature of Non Maturing Deposits.

**A summary of the Group's interest rate gap position on financial instruments is as follows:**

| **Group** | **Re-pricing period** | | | | | | |
|---|---|---|---|---|---|---|---|
| **30 June 2026**<br>In millions of Naira | **Less than 3** | **4 - 6 months** | **7 - 12 months** | **1 - 5 years** | **More than** | **Non-Interest** | **Total** |

The Group trades on bonds, treasury bills and foreign currency. Market risk in trading portfolios is monitored and controlled using tools such as position limits, value at risk and present value of an assumed basis points change in yields or exchange rates coupled with concentration limits. The major measurement technique used to measure and control market risk is outlined below.

The table below sets out information on the exposure to fixed and variable interest instruments.

The Group reclassified Cash reserve requirement, classified as restricted deposits with Central banks and special reserve intervention funds, from Cash and cash equivalents to Other assets for financial reporting purposes.

Derivative financial instruments include elements of interest rate differential between the applicable underlying currencies. Further details on the fair value of derivatives have been discussed in Note 21 of the financial statement.

### Interest rate risk

Cash flow interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Fair value interest rate risk is the risk that the value of a financial instrument will fluctuate because of changes in market interest rates. The Group takes on exposure to the effects of fluctuations in the prevailing levels of market interest rates on both its fair value and cash flow risks. Interest margins may increase as a result of such changes but may reduce losses in the event that unexpected movements arise. The Board sets limits on the level of mismatch of interest rate repricing (note 5.2.1) that may be undertaken, which is monitored daily by Group Treasury.

### Cash flow and fair value interest rate risk

The group's interest rate risk arises from risk assets, long-term borrowings, deposits from banks and customers. Borrowings issued at variable rates expose the group to cash flow interest rate risk.

The management of interest rate risk against interest rate gap limits is supplemented with monitoring the sensitivity of the Group's financial assets and liabilities to various scenarios.

Interest rate movement have both cash flow and fair value effect depending on whether interest rate is fixed or floating. The impact resulting from adverse or favourable movement flows from either retained earnings or OCI and ultimately ends in equity in the following manner:

(i) Retained earnings arising from increase or decrease in net interest income and the fair value changes reported in profit or loss.

(ii) Fair value reserves arising from increases or decreases in fair value through other comprehensive income financial instruments report directly in other comprehensive income.

The table above sets out the impact on net interest income of a 100 basis points parallel fall or rise in all yields. A parallel increase in yields by 100 basis points would lead to an increase in net interest income while a parallel fall in yields by 100 basis points would lead to a decline in net interest income. The interest rate sensitivities are based on simplified scenarios and assumptions, including that all positions will be retained and rolled over upon maturity. The figures represent the effect of movements in net interest income based on the 100 basis point shift in interest rate and subject to the current interest rate exposures. However, the effect has not taken into account the possible risk management measures undertaken by the Bank to mitigate interest rate risk. In practice, the Assets and Liability Committee, ALCO seeks proactively to change the interest rate risk profile to minimize losses and optimise net revenues. The projections also assume that interest rates on various maturities will move within similar ranges, and therefore do not reflect any potential effect on net interest income in the event that some interest rates may change and others remain un-changed.

**Price sensitivity analysis on bonds, promissory notes and treasury bills**

The table below shows the impact of likely movement in yields on the value of bonds and treasury bills. This relates to the positions held for fair value through profit or loss and fair value through other comprehensive income. Since an increase in yields would lead to decline in market values of bonds and treasury bills, the analysis was carried out to show the likely impact of 50 and 100 basis points increase in market yields. The impact of fair value through profit or loss investments is on the income statement while the impact of fair value through other comprehensive income instruments is on the statement of other comprehensive income.

The Company did not have any Investment securities measured through Profit or loss and OCI during the period to be disclosed herein. as defined by the relevant accounting standards.

**Foreign currency sensitivity analysis**

The Group's principal foreign currency exposure is to US Dollars, as it constitutes a significant portion of the Group's foreign currency exposure as at 31 December 2025. The table below illustrates the hypothetical sensitivity of the Group and Company's reported profit to a 5% increase in the US Dollar/Naira exchange rates at the year end (FY 2024: 20% increase), assuming all other variables remain unchanged. The sensitivity rate of 5% increase represents the directors' assessment of a reasonable possible change based on historic volatility.

The analysis assumes that exchange rate fluctuations on currency derivatives that form part of an effective fair value hedge affects the income statement and the fair value of the hedging derivatives. For foreign exchange derivatives which are not designated hedges, movements in exchange rates impact the income statement.

| Naira weakens by 5% | 356,408 |

The NGN/USD exchange rate applied in the conversion of balances as at period end was ₦1380.64/USD1 (2024: ₦1439.93/USD1). The strengthening or weakening of Naira may not produce symmetrical results depending on the proportion and nature of balance sheet and the impact of derivatives.

| Market Risk for Hedging instruments | 30 June 2026 | 31 December 2025 |
|---|---|---|
| Total exposure to foreign exchange risk | N'm | N'm |
| Derivative assets (fair value hedge) | (34,919) | 185,921 |
| Interest bearing loans and borrowings | (707,591) | (774,906) |
| Deposits from other financial institutions | (487,133) | (1,231,767) |

The Group uses foreign currency forwards to hedge its exposure to foreign currency risk on the US dollar denominated interest bearing loans and deposits for financial institutions. Under the Group's policy, the critical terms of the forward should align closely with the hedged items.

The Group only designates the spot component of foreign currency forwards in hedge relationships. The spot component is determined with reference to relevant spot market exchange rates. The differential between the contracted forward rate and the spot market exchange rate is defined as the forward points.

### 5.3 Liquidity risk management

The following table shows the undiscounted cash flows on the Group's financial assets and liabilities and on the basis of their earliest possible contractual maturity. The Gross nominal inflow/(outflow) disclosed in the table is the contractual, undiscounted cash flow on the financial liability or commitment.

The amounts in the table below have been compiled as follows:

| Type of financial instrument | Basis on which amounts are compiled |
|---|---|
| Non-derivative financial liabilities and financial assets | Undiscounted cash flows, which include estimated interest payments. |
| Issued financial guarantee contracts, and unrecognised loan commitments | Earliest possible contractual maturity. For issued financial guarantee contracts, the maximum amount of the guarantee is allocated to the earliest year in which the guarantee could be called. |
| Derivative financial liabilities and financial assets held for risk management purposes | Contractual undiscounted cash flows. The amounts shown are the gross nominal inflows and outflows for derivatives that have simultaneous gross settlement (e.g. forward exchange contracts and currency swaps) and the net amounts for derivatives that are net settled. |
| Trading derivative liabilities and assets forming part of the Group's proprietary trading operations that are expected to be closed out before contractual maturity | Fair values at the date of the statement of financial position. This is because contractual maturities are not reflective of the liquidity risk exposure arising from these positions. These fair values are disclosed in the 'less than three months' column. |
| Trading derivative liabilities and assets that are entered into by the Group with its customers | Contractual undiscounted cash flows. This is because these instruments are not usually closed out before contractual maturity and so the Group believes that contractual maturities are essential for understanding the timing of cash flows associated with these derivative positions. |

The Group's expected cash flows on some financial assets and financial liabilities vary significantly from the contractual cash flows. For example, demand deposits from customers are expected to remain stable or increase and unrecognised loan commitments are not all expected to be drawn down immediately. As part of the management of liquidity risk arising from financial liabilities, the Group holds liquid assets comprising Cash and balances with banks and debt securities issued by federal government, which can be readily sold to meet liquidity requirements. In addition, the Group maintains agreed lines of credit with other banks and holds unencumbered assets eligible for use as collateral.

The negative gaps in the short term maturity buckets below do indicate liquidity concerns as the behavioural analysis of the book is different from this. While the negative gaps in the short-term maturity buckets may suggest potential liquidity pressure from a contractual standpoint, behavioural analysis of the book indicates a more stable liquidity profile, as actual cash flow behaviour differs from the contractual maturities.

The negative short-term liquidity gaps of the Group and the Bank arise from the timing mismatch between contractual asset inflows and liability outflows, in particular customer deposits, which are allocated to their earliest contractual repayment dates. These contractual gaps do not represent forecast cash shortfalls.

**Contingency Funding Plan**

The Group maintains a contingency funding plan which sets out strategies for addressing liquidity. The Plan:

(a) outlines strategies, policies and plans to manage a range of stresses;
(b) establishes a clear allocation of roles and clear lines of management responsibility;
(c) is formally documented;
(d) includes clear invocation and escalation procedures;
(e) is regularly tested and the result shared with the ALCO and Board;
(f) outlines that Group's operational arrangements for managing a huge funding run;
(g) is sufficiently robust to withstand simultaneous disruptions in a range of payment and settlement;
(h) outlines how the Group will manage both internal communications and those with its external stakeholders; and

As part of the contingency funding plan process, the Group maintains committed credit lines that can be drawn in case of liquidity crises. These lines are renewed as at when due.

## Notes to the Financial Statement continued

## 5 Financial Risk Management continued

### Funding approach

Our sources of liquidity are regularly reviewed by both the ALCO and the Treasury Group in order to avoid undue reliance on large individual depositors and to ensure that a satisfactory overall funding mix is maintained at all times. The funding strategy is geared toward ensuring effective diversification in the sources and tenor of funding. The Group however places greater emphasis on demand and savings deposits as against purchased funds in order to minimise the cost of funding.

As part of the management of liquidity risk arising from financial liabilities, the Group holds liquid assets comprising cash and cash equivalents, and debt securities issued by sovereigns, which can be readily sold to meet liquidity requirements. In addition, the Group maintains agreed lines of credit with other banks.

## 6 Regulatory capital

The regulatory capital requirement for entities within the group are as follows:

| Name of Entity | Primary Regulator | Regulatory Requirement |
|---|---|---|
| Access Holdings Plc | Central Bank of Nigeria | (see note (i)below) |
| Access Bank Plc | Central Bank of Nigeria | (see not (ii) below) |
| The Hydrogen Payment Services Company Ltd | Central Bank of Nigeria | 2 billion Naira |
| Access ARM Pensions Ltd | National Pensions Commission | 5 billion Naira |
| Access Insurance Brokers | National Insurance Commission | 5 milllion Naira |
| Oxygen X Finance Company Ltd | Central Bank of Nigeria | 100 million Naira |

**(i) The analysis of the share capital of the Group and its subsidiaries as at 30 June 2026 is shown below:**

| Entity | Share capital N'm | Share premium N'm | Total N'm |
|---|---|---|---|
| Subsidiaries | | | |
| Access Bank Plc | 26,659 | 568,164 | 594,823 |
| Oxygen X Finance Company Ltd | 5,000 | - | 5,000 |
| Hydrogen Payment Co Ltd | 4,000 | - | 4,000 |
| Access ARM Pensions Ltd | 1,782 | 39 | 1,821 |
| Access Insurance Brokers Ltd | 5 | - | 5 |
| Access Golf Nigeria Ltd | 103 | 2,988 | 3,091 |
| **Aggregated share capital of Subsidiaries** | **37,549** | **571,191** | **608,740** |
| Access Holdings Plc | 27,188 | 588,833 | 616,021 |
| **Surplus capital** | | | **7,281** |

(ii) In the circular dated 14 November 2025, the Central Bank of Nigeria clarified that the minimum paid-up capital referenced under Section 7.1 of the Guidelines for Licensing and Regulation of Financial Holding Companies (2014) should be calculated strictly as the par value of issued shares plus any share premium arising from the issuance.

In line with this directive, the Group obtained approval for a N21.42 billion private placement from the Central Bank of Nigeria on 20 February 2026.

This brought the Group into full compliance with the revised minimum paid-up capital requirement under the CBN Guidelines, in accordance with Section 7.1 of the CBN Guidelines for Licensing and Regulation of Financial Holding Companies in Nigeria (2014).

**Capital Risk Management**

This represents the capital adequacy ratio under basel II guidelines.

The capital adequacy ratio (CAR) represents the Group's capital strength and its ability to absorb potential losses while meeting obligations to depositors and other creditors. The ratio is calculated in accordance with the Basel II regulatory framework. The objective of these requirements is to ensure that the Group maintains a sound capital base to support the risks inherent in its business and to protect depositors and investors.

Under Basel II guidelines, regulatory capital is broadly classified into the following tiers:

**Tier 1 Capital (Core Capital):**

Comprises the Group's most reliable and permanent capital resources, including paid-up share capital, share premium, retained earnings, and other reserves. These represent funds that are permanently and freely available to absorb losses without triggering liquidation.

**Tier 2 Capital (Supplementary Capital):**

Includes components such as subordinated debt, and revaluation reserves. Tier 2 capital enhances the Group's overall capital base but is considered less permanent compared to Tier 1 capital.

## Notes to the Financial Statement continued

## 6 Regulatory capital continued

**Deductions from Capital:**

Certain items, such as investments in subsidiaries, deferred tax assets, intangible assets, and regulatory risk reserve, are deducted from regulatory capital in line with Basel II requirements.

The Group monitors its capital adequacy in line with applicable regulatory requirements. Capital adequacy ratio represents the ratio of qualifying regulatory capital to risk-weighted assets and off-balance sheet exposures. The regulatory minimum capital adequacy ratio prescribed for the banking subsidiary is 10% for national banks and 15% for international banks. The Group's banking subsidiary maintained capital ratios above the applicable regulatory minimum throughout the reporting period.

As at the reporting date, the Group's CAR stood at 17.9%, which is above the minimum regulatory requirement of 15% prescribed by the CBN. Accordingly, the Group has complied with all externally imposed capital requirements to which it is subject throughout the period.

As at 30 June 2026, the Group's share capital was N616Bn, which exceeded the N500Bn minimum share capital requirement set by the Central Bank of Nigeria (CBN) for commercial banks with international authorisation

**Treasury shares are deducted in Other reserves and therefore not added back in Eligible Tier 1 capital.*

## Notes to the Financial Statement continued

### 7 Operating segments

The Group has seven reportable segments, as described below, which are the Group's strategic business units. The strategic business units offer different products and services, and are managed separately based on the Group's management and internal reporting structure. For each of the strategic business units, the Executive Management Committee reviews internal management reports on at least a quarterly basis. The Group presents segment information to its Executive Committee, which is the Group's Chief Operating Decision Maker, based on International Financial Reporting Standards.

Based on the market segment and extent of customer turnover, the group reformed the arrangement of segments from previous periods into seven operational segments as described below;

- **Corporate and Investment Banking -** The division provides bespoke comprehensive banking products and a full range of services to multinationals, large domestic corporates and other institutional clients. It also provides innovative finance solutions to meet the short, medium and long-term financing needs for the Group's clients as well as relationship banking services to the Group's financial institutions customers.
- **Commercial banking** - The commercial banking division has presence in cities in the countries in which the group operate. It provides commercial banking products and services to the non-institutional clients, medium and small corporate segments. The division also provides financial services to public sector, commercial institutions and oriental corporates.
- **Retail banking** – The retail banking division is the retail arm of the Group which provides financial products and services to individuals (personal and inclusive segments) and private banking segment. The private banking segment focuses on offering bespoke services to High Net worth Individuals (HNI) and Ultra High Net worth Individuals (UHNI) by handling their wealth portfolio needs both locally and abroad.
- **PFA segment:** Access Pensions Management Is a Pension Fund Administrator whose services includes the management and administration of pension funds such as Retirement Savings Accounts Fund I-VI and Transitional Contributions Fund (TCF); administration of retirement savings account; administration of voluntary savings schemes and the administration of approved existing schemes.
- **Payment Segement :** Hydrogen Payment Services Company Limited ("Hydrogen") is a FinTech company which has started breaking grounds in the industry with the seamless and reliable solutions it offers to businesses in Nigeria. Hydrogen's vision is to build Africa's most powerful business services network. Hydrogen offers a wide range of products and services, including InstantPay, Payment gateway, POS, Card, and Switch, which have been well-received by customers and the industry as a whole. Our clientele base cuts across from mid-size to large private and public sectors of the economy, targeting organisations/businesses that perform and receive payments on a day-to-day basis.
- **Insurance Segment:** Access Insurance Brokers Limited Is an inurance broker firm providing professional insurance services for individuals, corporations, and government agencies, ensuring the arrangement of optimal coverage for all insurable risks. Our commitment is to act in the best interest of clients, securing suitable risk placements with insurance companies at no additional cost. The range of services offered includes: Insurance Audits, Risk Management Evaluation, Specialised Claims and Uninsured Loss Recoveries, Research and Market Reviews and Risk Retention Fund.
- **Digital lending Segment:** Oxygen X Finance Company Ltd is a smart lending company that helps individuals and businesses access quick and reliable loans. From salary earners to small business owners, we provide the support they need to grow, solve problems, and take control of their finances.

All of the Segments reported at the end of the period had its,

- Reported revenue, from both external customers and intersegment sales or transfers, 10 per cent or more of the combined revenue, internal and external, of all operating segments, or
- the absolute measure of its reported profit or loss 10 per cent or more of the greater, in absolute amount, of
  - (i) the combined reported profit of all operating segments that did not report a loss and
  - (ii) the combined reported loss of all operating segments that reported a loss, or
- its assets are 10% or more of the combined assets of all operating segments.

### 7 Operating segments continued

Unallocated Segments represents all other transactions than are outside the normal course of business and can not be directly related to a specific segment financial information. Thus, in essence, unallocated segments reconcile segment balances to group balances. Material items comprising total assets and total liabilities of the unallocated segments have been outlined below;

Sales between segments are carried out at arm's length. The revenue from external parties reported to the executive committee is measured in a manner consistent with that in the income statement.

| **Unallocated total assets and liabilities**<br>***In millions of Naira*** | **Group**<br>**30 June 2026** |
|---|---|
| Other Assets | 7,521,320 |
| Deferred tax asset | 53,273 |
| Non Current Assets Held for Sale | 28,498 |
| Goodwill | 150,813 |
| | **7,753,904** |
| Other liabilities | 5,861,797 |
| Deferred tax liability | 49,776 |
| Retirement Benefit Obligation | 25,815 |
| Total liabilities | **5,937,388** |

## 10 Fee and commission income continued

Credit related fees and commissions are fees charged to customers other than fees included in determining the effective interest rates relating to loans and advances carried at amortised cost. These fees are accounted for in accordance with the Group's revenue accounting policy. The representation of all fees and commission recognised in the year and prior period at a point in time and over a period of time is as shown below.

| Fee and commission income<br>*In millions of Naira* | Group<br>30 Jun 2026 | Group<br>31 Dec 2025 | Company<br>30 Jun 2026 | Company<br>31 Dec 2025 |
|---|---|---|---|---|
| Point in Time | 394,261 | 284,652 | - | - |
| Over Time | 40,819 | 32,874 | - | - |
| | **435,080** | **317,526** | **-** | **-** |

Channels and other E-business income include income from electronic channels, card products and related services. E-banking receivables and payables are disclosed in Notes 26 and 34, respectively.

### 10 (b) Fee and commission expense

| *In millions of Naira* | Group<br>30 Jun 2026 | Group<br>31 Dec 2025 | Company<br>30 Jun 2026 | Company<br>31 Dec 2025 |
|---|---|---|---|---|
| Bank and electronic transfer charges | 11,543 | 9,472 | - | - |
| E-banking expense | 64,402 | 70,396 | - | - |
| | **75,945** | **79,868** | **-** | **-** |

Fees and commissions expenses are fees charged for the provision of services to customers transacting on alternate channels platform of the Group and on the various debit and credit cards issued for the purpose of these payments. They are charged to the Group on services rendered on internet banking, mobile banking and online purchasing platforms. The corresponding income lines for these expenses include the income on cards (both foreign and local cards), online purchases and bill payments included in fees and commissions. Fees and commissions expense includes the cost incurred to the group for providing alternate platforms for the purposes of internet banking, mobile banking and online purchases. It also includes expenses incurred by the Group on the various debit and credit cards issued.

The E-banking transactions have both receivables (See note 26 ) and payables (See note 34 ) representing settlements due from and to other Banks.

| **Total** | **40,713** | **(3,386)** | **-** | **-** |

## Notes to the Financial Statement continued

### 11 Net gains/(losses) on financial instruments at fair value continued

(a) Net gains on financial instruments includes the gains and losses arising both on the purchase and sale of trading instruments and from changes in fair value. Fair value gain on equity investments is from investments in which the Bank has interests. Based on IFRS 9, the Group measures changes in fair value of equity investments through profit or loss.

(b) Net gains on disposal of financial instruments classified as fair value through other comprehensive income (FVOCI) comprise gains and losses arising from both the purchase and sale of FVOCI instruments, as well as amounts reclassified from cumulative other comprehensive income upon disposal of FVOCI debt instruments.

### 12 (a) Net foreign exchange gain/(loss)

| *In millions of Naira* | Group 30 June 2026 | Group 31 Dec 2025 | Company 30 June 2026 | Company 31 Dec 2025 |
|---|---|---|---|---|

| Foreign exchange risk on foreign currency loan - Deposit from financial institution | - | 487,133 | - | (7,233) | Deposit from financial institution |

## Notes to the Financial Statement continued

### 12 Net foreign exchange gain/(loss) continued

| Jun-26<br>Fair value hedges | Hedge ratio | Change in the value of the hedging instrument recognised in profit or loss N'millions | Hedge ineffectiveness recognised in profit or loss N'millions | Change in fair value of hedge items attributable to hedge risk N'millions | Accumulated fair value hedge adjustments remaining on the balance sheet on ceased Hedged items N'millions |
|---|---|---|---|---|---|
| Fair value changes in hedge adjustments | 80% | (169,988) | (148,360) | 21,628 | - |

The following table shows the year in which the hedging contract ends:

| Jun-26<br>Fair value hedges | 3 months N'millions | 6 months N'millions | 12 months N'millions | 2 years N'millions | More than 2 years N'millions |
|---|---|---|---|---|---|
| Hedging assets | - | (30,271) | (4,648) | - | - |

**12 (b) Net loss on fair value hedge (Hedging ineffectiveness) - continued**

For hedges of foreign currency liabilities, the Group enters into hedge relationships where the critical terms of the hedging instrument are closely aligned with the terms of the hedged item. The Bank therefore performs a qualitative assessment of effectiveness. Sources of ineffectiveness include timing differences between the settlement dates of the hedged item and hedging instruments, quantity or notional amount differences between the hedged item and hedging instrument and credit risk of the Group and its counterparty to the forward contract.

The Group applies the actual ratio between the hedged item and the hedging instrument, which aligns with its risk management strategy and is considered appropriate for hedge accounting under IFRS 9.

However, during the year, there was a reduction in foreign currency-denominated liabilities (the hedged item), resulting in a deterioration of hedge effectiveness. In accordance with IFRS 9.6.5.5, the Group rebalanced its hedge ratio to maintain the economic relationship between the hedged item and the hedging instrument.

### 13 Other operating income

| *In millions of Naira* | Group 30 June 2026 | Group 31 Dec 2025 | Company 30 June 2026 | Company 31 Dec 2025 |
|---|---|---|---|---|
| Dividends from subsidiaries and equity securities | 14,740 | 10,367 | 4,172 | 121,120 |

### 14 Personnel expenses

| *In millions of Naira* | Group 30 June 2026 | Group 31 Dec 2025 | Company 30 June 2026 | Company 31 Dec 2025 |
|---|---|---|---|---|
| Wages and salaries | 254,390 | 216,277 | 5,856 | 2,293 |
| Increase in liability for long term incentive plan (see note 37 (a) (i))" | 8,131 | 2,176 | - | - |
| Contributions to defined contribution plans | 11,322 | 8,559 | - | - |
| Restricted share performance plan (See note (a) below) | 14,965 | 2,193 | 77 | 132 |
| | **288,808** | **229,205** | **5,933** | **2,425** |

(a) Under the Restricted Share Performance Plan (RSPP), shares of the Parent are awarded to employees of the Group based on their performance at no cost to them. Under the terms of the plan, the shares vest over a three-year period from the date of award. The scheme applies to employee that meet the stipulated performance criteria, irrespective of where they work within the Group.

As the RSPP scheme is equity-settled, the fair value of the shares granted is determined at the grant date and recognised as an expense in the statement of comprehensive income within staff costs over the vesting period, based on the Group's estimate of the number of shares expected to vest. The corresponding credit is recognised in equity

The estimate of the number of equity instruments expected to vest is reviewed at each reporting date to reflect actual and expected outcomes of service. Market-based conditions, if any, are incorporated into the fair value at grant date and are not subsequently adjusted. If the awards do not vest due to failure to satisfy service or non-market performance conditions, the cumulative expense recognised is reversed

No subsequent remeasurement of the fair value of equity instruments is made after the grant date.

(i) The shares allocated to staff have a contractual vesting period of three to seven periods commencing from the year of purchase/allocation to the staff. The Group have no legal or constructive obligation to repurchase or settle after the shares have vested.

(ii) The number and weighted-average exercise prices of shares have been detailed in table below;

| **Group** | **30 June 2026** | | **31 December 2025** | |

## Notes to the Financial Statement continued

## 17 Earnings per share

### (a) Basic from continuing operations

Basic Earnings Per Share(EPS) is calculated by dividing the profit attributable to equity holders of the company by the weighted average number of ordinary shares in issue during the year excluding ordinary shares purchased by the company and held as treasury shares.

| *In millions of Naira* | Group 30 June 2026 | Group 30 June 2025 | Company 30 June 2026 | Company 30 June 2025 |
|---|---|---|---|---|
| Profit for the period from continuing operations | 226,228 | 198,086 | 14,715 | 121,699 |
| Opening Number of ordinary shares in issue | 54,376 | 53,318 | 54,376 | 53,318 |
| Weighted average number of shares in issue | (760) | - | (760) | - |
| | 53,616 | 53,318 | 53,616 | 53,318 |
| In kobo per share | | | | |
| Basic earnings per share from continuing operations | 448 | 372 | 27 | 228 |

### Diluted EPS

Diluted earnings per share is calculated by considering the impact of the treasury shares in weighted average number of ordinary shares outstanding

| *In millions of Naira* | Group 30 June 2026 | Group 30 June 2025 | Company 30 June 2026 | Company 30 June 2025 |
|---|---|---|---|---|
| **Total profit attributable to owners:** | | | | |
| Continuing operations | 226,228 | 198,086 | 14,715 | 121,699 |
| Profit for the year | 226,228 | 198,086 | 14,715 | 121,699 |
| Opening Number of ordinary shares in issue | 54,376 | 53,318 | 54,376 | 53,318 |
| Weighted average number of treasury shares in issue | (760) | - | (760) | - |
| Weighted average number of ordinary shares in issue | 53,616 | 53,318 | 53,616 | 53,318 |
| In kobo per share | | | | |
| Basic earnings per share from continuing operations | 448 | 372 | 27 | 228 |

*The number of shares that would be issued in the event of conversion of the $300 million convertible additonal tier 1 bond has a dilutive effect on the ordinary shares of the Group. However, as the conversion has not occurred as of the reporting date, the potential dilution has no impact on the current period's Dividends Per Share (DPS).

## 18 Cash and balances with banks

| *In millions of Naira* | Group 30 June 2026 | Group 31 Dec 2025 | Company 30 June 2026 | Company 31 Dec 2025 |
|---|---|---|---|---|
| Cash on hand and balances with banks (see note (i)) | 2,757,468 | 2,681,016 | 3,827 | 34,657 |
| Unrestricted balances with central banks | 1,010,681 | 1,169,276 | - | - |
| Money market placements | 3,355,965 | 2,388,035 | 8,022 | - |
| | **7,124,114** | **6,238,327** | **11,849** | **34,657** |

| Current (Non-Hedging Instruments) | (210,521) | - | (415,616) | - |
| Non- Current (Hedging Instruments) | - | - | - | - |

Derivative financial instruments consist of forward, swap, and futures contracts. These instruments are primarily held for risk management and operational cash flow purposes. In accordance with IFRS 9, all derivatives are initially recognized at fair value and subsequently measured at fair value through profit or loss, unless they are designated in a qualifying hedge accounting relationship. The contracts have intended settlement dates of between 30 days and above 365 days. Derivative contracts are valued with reference to data that has been marked to model using interest rate parity methodology of valuation which has referenced data from US SOFR rates quotation, treasury bills yield and FGN bond yields, adjusted for spread computed as the differential between the NIBOR and NITTY rate and spot exchange rate as quoted on the financial market dealers quotation (FMDQ) site.

The movement in fair value is as a result of a depreciation of the reporting currency of the Group (Naira) within the year and volume of transactions.

## 22 Loans and advances to banks

| Translation difference | 5,814 | 5,252 | 19,781 | 30,847 |
| **At 31 December 2025** | **69,604** | **34,684** | **180,679** | **284,967** |

* Loans are written off, either partially or in their entirety, only when the Group has exhausted all practical recovery efforts and has concluded that there is no reasonable expectation of recovery. This is the case where the counterparty is unable to settle the obligation, or where the proceeds from the underlying collateral are insufficient to pay back the outstanding exposure. In line with the CBN guidelines on loan write-offs, Board approval is required before any write-off is effected.

**Modified loans:**

| *In millions of Naira* | Group 30 June 2026 | Group 31 Dec 2025 | Company 30 June 2026 | Company 31 Dec 2025 |
|---|---|---|---|---|

| **Balance as at 30 June 2026** | 209,914 | 583 |

(a) This represents the receivable from debtors to the Group that cuts across services rendered in different capacities.

account is fair value of deferred consideration receivable of N8.27 billion (ZAR93.14 million) in relation to the sale of 25% + 1 shares in Access Bank South Africa. See note 46 for more details.

(b) E-banking receivables represent settlements due from other banks use of electronic channels by their customers. The Group's payables to other banks is contained in Note 34.

(c) Deposit for investment in AGSMEIS represents the Access Bank Nigeria's deposit as equity investment in Agri-business/Small and Medium Enterprises Investment Scheme. As approved by the Bankers' Committee on 9th February 2017, all Deposit Money Banks are required to invest 5% of prior period Profit After Tax as equity investment in the scheme.

(d) Subscription for investment balance relates to deposits paid for the acquisition of equity investments for which shares have not been issued to the Bank.

(e) Restricted deposits with central banks comprise the cash reserve requirements of the Central Bank of Nigeria and other central banks of jurisdictions that the Group operates in as well as the special intervention fund with the Central Bank of Nigeria introduced in January 2016 as a reduction in the cash reserve ratio with a view of channeling the reduction to financing the real sector. These balances are not available for day to day operations of the Group.

(f) Inventory consists of blank debit cards, cheque leaves, computer consumables and other stationery held by the Group.

## Notes to the Financial Statement continued

### 26 Restricted deposits and other assets continued

In determining the ECL for other assets, the Group applies the simplified model in estimating the ECLs, adopting a provision matrix, where the receviables are grouped based on the nature of the transactions, aging of the balances and different historical loss patterns to determine the lifetime ECLs. Receivables relate to amount due for the provision of services to the Bank's customers. The provision matrix estimates ECLs on the basis of historical default rates adjusted for current and forward looking macroeconomic factors without undue cost and effort.

(g) The NIL balance (Dec 2025: N58.91Bn) represents the transaction value of matured forward contracts with the Central Bank of Nigeria at the end of the period.

### 27b Investment subsidiaries

**(with continuing operations)**

**(i) Group entities**

Set out below are the group's subsidiaries as at 30 June 2026. Unless otherwise stated, the subsidiaries listed below have share capital consisting solely of ordinary shares, which are held directly by the group and the proportion of ownership interests held equals to the voting rights held by the group. The country of incorporation is also their principal place of business.

There are no significant restrictions on the Group's ability to access or use the assets and settle the liabilities of any member of the Group to the extent that regulation does not inhibit the group from having access, and in liquidation scenario, this restriction is limited to its level of investment in the entity. There are no significant restrictions on the ability of subsidiaries to transfer funds to the Group in the form of cash dividends or repayment of loans and advances.

Investment in subsidiaries comprises:

| | Ownership interest | |
|---|---|---|

**27c(ii)** Based on the contractual arrangements between the Bank and the shareholders in each of the entities, the Bank has the power to appoint and remove the majority of the board of Directors of each entity.

- The relevant activities of each of the listed subsidiaries are determined by the Board of Directors of each entity based on simple majority shares. Therefore, the directors of the Bank concluded that the Bank has control over each of the above listed entities and were consolidated in the Bank financial statements.

- There was a partial disposal of the parent's stake in Access Ghana during the period. This is disclosed in Note 46 under partial disposal of subsisdiaries without loss of control.

  During the period, Access Bank UK also acquired a 100% controlling interest in Zempler Bank Limited (Zempler), United Kingdom on 27 February 2026. See note 44 for more details.

## Notes to the Financial Statement continued

### 28 (a) Property and equipment continued

(a) Estimates of useful life and residual value, and the method of depreciation, are reviewed at a minimum at each reporting period. Any changes are accounted for prospectively as a change in estimate.
(b) The leasehold improvements do not represent lessor's asset
(c) There were no capitalised borrowing costs related to the acquisition of property and equipment during the period ended 30 June 2026.
(d) There were no restrictions on title of any property and equipment during the period ended 30 June 2026.
(e) There were no property and equipment pledged as security for liabilities during the period.
(f) There were no contractual commitments for the acquisition of property and equipment during the period.
(g) There were no impairment losses on any class of property and equipment during the period.
(h) All items in the property and equipment are non-current.

**(a) Diamond Bank:**

The recoverable amount of Goodwill as at 30 June 2026 was greater than its carrying amount and is thus not impaired. The recoverable amount was determined using a value-in-use computation as N27,72Bn.

Goodwill is reviewed annually for impairment, or more frequently when there are indications that impairment may have occurred. Impairment assessment has been performed for the year and no losses on goodwill were recognised as at 30 June 2026 (31 December 2025: Nil)

Goodwill is monitored by the Group on an entity by entity basis

Goodwill impairment test was done by comparing the value-in-use for the CGU to the carrying amount of the goodwill based on cash flow projections. The approach is based on estimating the free cash flow to equity to determine the value in use. Cash flows were projected for the first 5 years based on operating results, expected future financial performance and past experience. Beyond 5 years, cash flows were assumed to grow at terminal growth rate of of 3.24%. A discount rate of 22.24% was applied based on estimate of cost of capital. This was estimated using the Capital Asset Pricing Model. There were no write-downs of goodwill due to impairment during the year. All assumptions are subject to market and economic conditions. However, we do not see possible changes in these assumptions adversely causing the recoverable amounts of the CGU's declining below their carrying amounts.

The key assumption used in computing the value-in-use for goodwill in during the period are as follows:

Terminal growth rate (i) 3.24%

Discount rate (ii) 22.24%

(i) Weighted average growth rate used to extrapolate cash flows beyond the budget year.

(ii) Pre-tax discount rate applied to the cash flow projections.

**Cash Flow Forecast**

Cash flows were projected based on past experience and actual operating results. These cashflows are based on the expected revenue growth for the entity over this 5-year period.

**Discount Rate**

Pre-tax discount rate of 22.24% was applied in determining the recoverable amounts for Diamond Bank Plc. This discount rate was estimated using the a proxy of the average of the beta for similar companies, the risk-free rate and the equity risk premium of the sovereign of the reporting entity.

## Notes to the Financial Statement continued

### 29 Intangible assets continued

**Terminal growth rate**

The terminal growth rate applied was based on the long term growth rate in GDP of Nigeria.

The key assumptions described above may change as economic and market conditions change. The Group estimates that reasonably possible changes in these assumptions are not expected to cause the recoverable amount of the entity (from which the goodwill arose) to decline below their carrying amount.

| Sensitivity analysis of key assumptions used | 10% increase | 10% decrease |
|---|---|---|
| Impact of change in discount rate on value-in-use computation (increase/(decrease) | (741) | 952 |
| Impact of change in revenue growth on value-in-use computation (increase/(decrease) | 68 | (66) |

There were no write-downs of goodwill due to impairment during the period

**(b) Access Bank Rwanda:**

The recoverable amount of Goodwill as at 30 June 2026 is greater than its carrying amount and is thus not impaired. The recoverable amount was determined using a value-in-use computation as N173.94bn.

Goodwill is reviewed annually for impairment, or more frequently when there are indications that impairment may have occurred. Impairment assessment has been performed for the period and no losses on goodwill were recognised as at 30 June 2026 (31 December 2025: Nil)

Goodwill is monitored by the Group on cash generating units (CGU) basis. For the purpose of impairment testing, the goodwill has been allocated to Access Bank Rwanda.

Goodwill impairment test was done by comparing the value-in-use for the CGU to the carrying amount of the goodwill based on cash flow projections. The approach is based on estimating the free cash flow to equity to determine the value in use. Cash flows were projected for the first 5 years based on operating results, expected future financial performance and past experience. Beyond 5 years, cash flows were assumed to grow at terminal growth rate of of 6.97%. A discount rate of 20.07% was applied based on estimate of cost of capital. This was estimated using the Capital Asset Pricing Model. There were no write-downs of goodwill due to impairment during the year. All assumptions are subject to market and economic conditions. However, we do not see possible changes in these assumptions adversely causing the recoverable amounts of the CGU's declining below their carrying amounts.

The key assumption used in computing the value-in-use for goodwill in during the period are as follows:

| | 30 June 2026 |
|---|---|
| Terminal growth rate (i) | 6.97% |
| Discount rate (ii) | 20.07% |

(i) Terminal growth rate used to extrapolate cash flows beyond the budget period.

(ii) Pre-tax discount rate applied to the cash flow projections.

**Cash Flow Forecast**

Cash flows were projected based on past experience and actual operating results. These cashflows are based on the expected revenue growth for the entity over this 5-year period.

**Discount Rate**

Pre-tax discount rate of 20.07% was applied in determining the recoverable amounts for the goodwill of Access Bank Rwanda. This discount rate was estimated using beta, risk-free rate and the equity risk premium for Rwanda.

**Terminal Growth Rate**

Terminal growth rate applied was based on the long term growth rate in GDP of Rwanda.

The key assumptions described above may change as economic and market conditions change. The Group estimates that reasonably possible changes in these assumptions are not expected to cause the recoverable amount of the subsidiaries (from which the goodwill arose) to decline below their carrying amount.

| Sensitivity analysis of key assumptions used | 10% increase | 10% decrease |
|---|---|---|
| Impact of change in discount rate on value-in-use computation (increase/(decrease) | (11) | 14 |
| Impact of change in growth rate on value-in-use computation (increase/(decrease) | 2 | (2) |

**(c) Access Bank Kenya:**

The recoverable amount of Goodwill as at 30 June 2026 is greater than its carrying amount and is thus not impaired. The recoverable amount was determined using a value-in-use computation as N462.93bn.

Goodwill is reviewed annually for impairment, or more frequently when there are indications that impairment may have occurred.

Goodwill is monitored by the Group on cash generating units (CGU) basis. For the purpose of impairment testing, the goodwill has been allocated to Access Bank Kenya.

Goodwill impairment test was done by comparing the value-in-use for the CGU to the carrying amount of the goodwill based on cash flow projections. Cash flows were projected for the first 5 years based on operating results, expected future financial performance and past experience. Beyond 5 years, cash flows were assumed to grow at terminal growth rate of of 5.38%. A discount rate of 21.6% was applied based on estimate of cost of capital. This was estimated using the Capital Asset Pricing Model. There were no write-downs of goodwill due to impairment during the period. All assumptions are subject to market and economic conditions. However, we do not see possible changes in these assumptions adversely causing the recoverable amounts of the

## Notes to the Financial Statement continued

CGU's declining below their carrying amounts.

The key assumption used in computing the value-in-use for goodwill in during the period are as follows:

| | |
|---|---|
| Terminal growth rate (i) | 5.38% |
| Discount rate (ii) | 21.60% |

(i) Terminal growth rate used to extrapolate cash flows beyond the budget period.

(ii) Pre-tax discount rate applied to the cash flow projections.

**Cash Flow Forecast**

Cash flows were projected based on past experience and actual operating results. These cashflows are based on the expected revenue growth for the entity over this 5-year period.

**Discount Rate**

Pre-tax discount rate of 21.6% was applied in determining the recoverable amounts for the goodwill of Access Bank Kenya. This discount rate was estimated using the Bank's beta, the risk-free rate and the equity risk premium for Kenya.

**Terminal Growth Rate**

The terminal growth rate applied was based on the long term growth rate in GDP of Kenya.

The key assumptions described above may change as economic and market conditions change. The Group estimates that reasonably possible changes in these assumptions are not expected to cause the recoverable amount of the entity (from which the goodwill arose) to decline below their carrying amount.

Sensitivity analysis of key assumptions used

| ***In millions of Naira*** | **10% increase** | **10% decrease** |
|---|---|---|
| Impact of change in discount rate on value-in-use computation (increase/ (decrease) | (48) | 64 |
| Impact of change in growth rate on value-in-use computation (increase/ (decrease) | 9 | (9) |

There were no write-downs of goodwill due to impairment during the period.

**(d) Access Bank Botswana:**

The recoverable amount of Goodwill as at 30 June 2026 is greater than its carrying amount and is thus not impaired. The recoverable amount was determined using a value-in-use computation as N411.42bn.

Goodwill is reviewed annually for impairment, or more frequently when there are indications that impairment may have occurred.

Goodwill is monitored by the Group on cash generating units (CGU) basis. For the purpose of impairment testing, the goodwill has been allocated to Access Bank Botswana.

Goodwill impairment test was done by comparing the value-in-use for the CGU to the carrying amount of the goodwill based on cash flow projections. Cash flows were projected for the first 5 years based on operating results, expected future financial performance and past experience. Beyond 5 years, cash flows were assumed to grow at terminal growth rate of 3.69%. A discount rate of 11.55% was applied based on estimate of cost of capital. This was estimated using the Capital Asset Pricing Model. There were no write-downs of goodwill due to impairment during the year. All assumptions are subject to market and economic conditions. However, we do not see possible changes in these assumptions adversely causing the recoverable amounts of the CGU's declining below their carrying amounts.

The key assumption used in computing the value-in-use for goodwill in during the year are as follows:

| | |
|---|---|
| Terminal growth rate (i) | 3.69% |
| Discount rate (ii) | 11.55% |

(i) Terminal growth rate used to extrapolate cash flows beyond the budget period.

(ii) Pre-tax discount rate applied to the cash flow projections.

**Cash Flow Forecast**

Cash flows were projected based on past experience and actual operating results. These cashflows are based on the expected revenue growth for the entity over this 5-year period.

**Discount Rate**

Pre-tax discount rate of 11.55% was applied in determining the recoverable amounts for the goodwill of Access Bank Botswana. This discount rate was estimated using the Bank's beta, the risk-free rate and the country risk premium for Botswana.

**Terminal Growth Rate**

The terminal growth rate applied was based on the long term growth rate in GDP of Botswana.

Sensitivity analysis of key assumptions used

| **In millions of Naira** | **10% increase** | **10% decrease** |

| Impact of change in discount rate on value-in-use computation (increase/ (decrease) | (35) | 47 |
| Impact of change in growth rate on value-in-use computation (increase/ (decrease) | 5 | (4) |

There were no write-downs of goodwill due to impairment during the period.

## Notes to the Financial Statement continued

## 29 Intangible assets continued

**(e) Access Bank Angola (Former Finibanco):**

The recoverable amount of Goodwill as at 30 June 2026 is greater than its carrying amount and is thus not impaired. The recoverable amount was determined using a value-in-use computation as N123.18bn.

Goodwill is reviewed annually for impairment, or more frequently when there are indications that impairment may have occurred.

Goodwill is monitored by the Group on cash generating units (CGU) basis. For the purpose of impairment testing, the goodwill has been allocated to Access Bank Angola.

Goodwill impairment test was done by comparing the value-in-use for the CGU to the carrying amount of the goodwill based on cash flow projections. Cash flows were projected for the first 5 years based on operating results, expected future financial performance and past experience. Beyond 5 years, cash flows were assumed to grow at terminal growth rate of 1.76%. A discount rate of 19.31% was applied based on estimate of cost of capital. This was estimated using the Capital Asset Pricing Model. There were no write-downs of goodwill due to impairment during the year. All assumptions are subject to market and economic conditions. However, we do not see possible changes in these assumptions adversely causing the recoverable amounts of the CGU's declining below their carrying amounts.

The key assumption used in computing the value-in-use for goodwill in during the period are as follows:

| | |
|---|---|
| Terminal growth rate (i) | 1.76% |
| Discount rate (ii) | 19.31% |

(i) Terminal growth rate used to extrapolate cash flows beyond the budget period. and

(ii) Pre-tax discount rate applied to the cash flow projections.

**Cash Flow Forecast**

Cash flows were projected based on past experience and actual operating results. These cashflows are based on the expected revenue growth for the entity over this 5-year period.

**Discount Rate**

Pre-tax discount rate of 19.31% was applied in determining the recoverable amounts for the goodwill of Access Bank Angola. This discount rate was estimated using the Bank's beta, the risk-free rate and the country risk premium for Angola.

**Terminal Growth Rate**

The terminal growth rate applied was based on the long term growth rate in GDP of Angola.

The key assumptions described above may change as economic and market conditions change. The Group estimates that reasonably possible changes in these assumptions are not expected to cause the recoverable amount of the entity (from which the goodwill arose) to decline below their carrying amount.

Sensitivity analysis of key assumptions used

| *In millions of Naira* | 10% increase | 10% decrease |
|---|---|---|
| Impact of change in discount rate on value-in-use computation (increase/(decrease) | (1,849) | 2,232 |
| Impact of change in growth rate on value-in-use computation (increase/(decrease) | 425 | (417) |

There were no write-down of goodwill due to impairment during the period.

**(f) Access Bank Angola (Standard Chartered Bank):**

The recoverable amount of Goodwill as at 30 June 2026 is greater than its carrying amount and is thus not impaired. The recoverable amount was determined using a value-in-use computation as N183.28bn.

Goodwill is reviewed annually for impairment, or more frequently when there are indications that impairment may have occurred.

Goodwill is monitored by the Group on cash generating units (CGU) basis. For the purpose of impairment testing, the goodwill has been allocated to Access Bank Angola.

Goodwill impairment test was done by comparing the value-in-use for the CGU to the carrying amount of the goodwill based on cash flow projections. Cash flows were projected for the first 5 years based on operating results, expected future financial performance and past experience. Beyond 5 years, cash flows were assumed to grow at terminal growth rate of 1.76%. A discount rate of 19.31% was applied based on estimate of cost of capital. This was estimated using the Capital Asset Pricing Model. There were no write-downs of goodwill due to impairment during the year. All assumptions are subject to market and economic conditions. However, we do not see possible changes in these assumptions adversely causing the recoverable amounts of the CGU's declining below their carrying amounts.

The key assumption used in computing the value-in-use for goodwill in during the year are as follows:

| | |
|---|---|
| Terminal growth rate (i) | 1.76% |
| Discount rate (ii) | 19.31% |

(i) Compound annual volume growth rate in the initial five-year year.

(i) Terminal growth rate used to extrapolate cash flows beyond the budget period.

(ii) Pre-tax discount rate applied to the cash flow projections.

**Cash Flow Forecast**

Cash flows were projected based on past experience and actual operating results. These cashflows are based on the expected revenue growth for the entity over this 5-year period.

**Discount Rate**

Pre-tax discount rate of 19.31% was applied in determining the recoverable amounts for the goodwill of Access Bank Angola. This discount rate was

## Notes to the Financial Statement continued

### 29 Intangible assets continued

estimated using the Bank's beta, the risk-free rate and the country risk premium for Angola.

**Terminal Growth Rate**

The terminal growth rate applied was based on the long term growth rate in GDP of Angola.

The key assumptions described above may change as economic and market conditions change. The Group estimates that reasonably possible changes in these assumptions are not expected to cause the recoverable amount of the entity (from which the goodwill arose) to decline below their carrying amount.

| **Sensitivity analysis of key assumptions used** ***In millions of Naira*** | **10% increase** | **10% decrease** |
|---|---|---|
| Impact of change in discount rate on value-in-use computation (increase/ (decrease) | (6) | 7 |
| Impact of change in growth rate on value-in-use computation (increase/ (decrease) | 1 | (1) |

There were no write-downs of goodwill due to impairment during the period.

**(g) Access Bank Tanzania (Standard Chartered Bank):**

The recoverable amount of Goodwill as at 30 June 2026 is greater than its carrying amount and is thus not impaired. The recoverable amount was determined using a value-in-use computation as N175.66bn.

Goodwill is reviewed annually for impairment, or more frequently when there are indications that impairment may have occurred.

Goodwill is monitored by the Group on cash generating units (CGU) basis. For the purpose of impairment testing, the goodwill has been allocated to Access Bank Tanzania.

Goodwill impairment test was done by comparing the value-in-use for the CGU to the carrying amount of the goodwill based on cash flow projections. Cash flows were projected for the first 5 years based on operating results, expected future financial performance and past experience. Beyond 5 years, cash flows were assumed to grow at terminal growth rate of 3.86%. A discount rate of 20.58% was applied based on estimate of cost of capital. This was estimated using the Capital Asset Pricing Model. There were no write-downs of goodwill due to impairment during the year. All assumptions are subject to market and economic conditions. However, we do not see possible changes in these assumptions adversely causing the recoverable amounts of the CGU's declining below their carrying amounts.

The key assumption used in computing the value-in-use for goodwill in during the period are as follows:

| | |
|---|---|
| Terminal growth rate (i) | 3.86% |
| Discount rate (ii) | 20.58% |

(i) Compound annual volume growth rate in the initial five-year year.

(i) Terminal growth rate used to extrapolate cash flows beyond the budget period.

(ii) Pre-tax discount rate applied to the cash flow projections.

**Cash Flow Forecast**

Cash flows were projected based on past experience and actual operating results. These cashflows are based on the expected revenue growth for the entity over this 5-year period.

**Discount Rate**

Pre-tax discount rate of 20.58% was applied in determining the recoverable amounts for the goodwill of Access Bank Tanzania. This discount rate was estimated using the Bank's beta, the risk-free rate and the country risk premium for Tanzania.

**Terminal Growth Rate**

The terminal growth rate applied was based on the long term growth rate in GDP of Tanzania.

The key assumptions described above may change as economic and market conditions change. The Group estimates that reasonably possible changes in these assumptions are not expected to cause the recoverable amount of the entity (from which the goodwill arose) to decline below their carrying amount.

| **Sensitivity analysis of key assumptions used** ***In millions of Naira*** | **10% increase** | **10% decrease** |
|---|---|---|
| Impact of change in discount rate on value-in-use computation (increase/(decrease) | (25) | 33 |
| Impact of change in growth rate on value-in-use computation (increase/(decrease) | 3 | (2) |

**(h) Access Bank Sierra Leone (Standard Chartered Bank):**

The recoverable amount of Goodwill as at 30 June 2026 is greater than its carrying amount and is thus not impaired. The recoverable amount was determined using a value-in-use computation as N1,19bn.

Goodwill is reviewed annually for impairment, or more frequently when there are indications that impairment may have occurred.

Goodwill is monitored by the Group on cash generating units (CGU) basis. For the purpose of impairment testing, the goodwill has been allocated to Access Bank Sierra Leone.

Goodwill impairment test was done by comparing the value-in-use for the CGU to the carrying amount of the goodwill based on cash flow projections. Cash flows were projected for the first 5 years based on operating results, expected future financial performance and past experience. Beyond 5 years, cash flows were assumed to grow at terminal growth rate of 2.65%. A discount rate of 20.7% was applied based on estimate of cost of capital. This was estimated using the Capital Asset Pricing Model. There were no write-downs of goodwill due

## Notes to the Financial Statement continued

to impairment during the year. All assumptions are subject to market and economic conditions. However, we do not see possible changes in these assumptions adversely causing the recoverable amounts of the CGU's declining below their carrying amounts.

The key assumption used in computing the value-in-use for goodwill in during the period are as follows:

| | |
|---|---|
| Terminal growth rate (i) | 2.65% |
| Discount rate (ii) | 20.70% |

(i) Compound annual volume growth rate in the initial five-year period.

(i) Terminal growth rate used to extrapolate cash flows beyond the budget period.

(ii) Pre-tax discount rate applied to the cash flow projections.

**Cash Flow Forecast**

Cash flows were projected based on past experience and actual operating results. These cashflows are based on the expected revenue growth for the entity over this 5-year period.

**Discount Rate**

Pre-tax discount rate of 20.7% was applied in determining the recoverable amounts for the goodwill of Access Bank Sierra Leone. This discount rate was estimated using the Bank's beta, the risk-free rate and the country risk premium for Sierra Leone.

**Terminal Growth Rate**

The terminal growth rate applied was based on the long term growth rate in GDP of Sierra Leone.

The key assumptions described above may change as economic and market conditions change. The Group estimates that reasonably possible changes in these assumptions are not expected to cause the recoverable amount of the entity (from which the goodwill arose) to decline below their carrying amount.

| **Sensitivity analysis of key assumptions used**<br>***In millions of Naira*** | **10% increase** | **10% decrease** |
|---|---|---|
| Impact of change in discount rate on value-in-use computation (increase/ (decrease) | (167) | 215 |
| Impact of change in growth rate on value-in-use computation (increase/(decrease) | 14 | (14) |

There were no write-downs of goodwill due to impairment during the year.

**i) Access ARM Pensions Limited (SIGMA/FGPL ):**

In 2022, the Group acquired 80.23% interest in First Guarantee Pensions Ltd (FGPL) and interest of 51.5% (direct and indirect) in Sigma Pensions Ltd. A Goodwill of N34.9 billion was recognised in that period, during the period, this Goodwill was reassessed based on the updated financial information of the investee companies at the date of the execution of the Purchase Price Allocation (PPA) for the acquisition and elected to record the acquisition related entries as provisional as at 31 December 2022 as permitted under IFRS 3 Business Combinations.

The Company's PPA for the acquisition of First Guarantee Pensions Ltd and Sigma Pensions Ltd was concluded and executed. The Goodwill of N34.94 billion previously recognised was revised to N27.07 billion as a result of the final financial information available as at the date of execution of the PPA. The previously Recognised Goodwill of N34.9bn was separated into customer relationship of N11.29bn, Deferred Tax Impact of (N3.3bn) and Goodwill of N27.09bn.

Under the Standard, Access Holdings is required to apportion the purchase consideration between the tangible and intangible assets and liabilities (including contingent liabilities) of FGPL and Sigma Pensions.

- The Standard provides general guidelines for assigning amounts to individual assets acquired and liabilities assumed.
- IFRS 3 requires the application of the acquisition method for each business combination. The acquisition method requires inter alia that the acquirer is identified, the acquisition date is determined, and that the identifiable assets acquired, and that the liabilities assumed and any non-controlling interest in the acquiree are recognised and measured.
- IFRS 3 states that as of the acquisition date, the acquirer shall recognise, separately from goodwill, the identifiable assets acquired, the liabilities assumed and any non-controlling interest in the acquiree.
- Recognition of identifiable assets acquired and liabilities assumed is subject to the conditions specified in paragraphs 11 and 12. These paragraphs state, inter alia, that the identifiable assets acquired and liabilities assumed must meet the definitions of assets and liabilities in the Framework for the Preparation and Presentation of Financial Statements at the acquisition date, and that the identifiable assets acquired and liabilities assumed must be part of what the acquirer and the acquiree exchanged in the business combination transaction.

IFRS 3 states that an asset is identifiable if it either:

a) is separable, i.e., capable of being separated or divided from the entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable asset or liability, regardless of whether the entity intends to do so; or

b) arises from contractual or other legal rights, regardless of whether those rights are transferable or separable from the entity or from other rights and obligations.

The acquirer shall measure the identifiable assets acquired and the liabilities assumed at their acquisition-date Fair Values. The identifiable assets are required under IFRS 3 to be recognised at their "Fair Value". Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Revenue in the pension industry is mainly driven by management fees earned from AuM (Assets Under Management) which are contributions from customers.

Customer related intangibles will be valued as Access pension is expected to earn fees income from existing and future contributions made by Retirement Saving Account (RSA) I-VI holders, Defined benefit schemes

## Notes to the Financial Statement continued

### 29 Intangible assets continued

holders and the informal sector/unfunded customers.

According to IAS 38 customers related intangibles can be recognised if future economic benefits are expected to flow to the entity from the use of that asset, and the cost can be reliably measured. FGPL and Sigma Pensions customers list which consist of the RSA I-VI account PIN, defined benefit scheme PIN, informal sector and unfunded PIN will be valued using the Income approach model which is one of the identifiable model for valuing intangible asset according to IAS 38.

**(j) Access ARM Pensions Limited (ARM):**

On May 17, 2024, Access Golf Nigeria Limited ("the Purchaser") entered into a Share Sale and Purchase Agreement with ARM Traditional Asset Management Limited ("the Seller") to acquire an 81.82% stake in ARM Pension Managers (PFA) Limited. On the same date, Access Golf also acquired an additional 4.02% equity interest from other shareholders.

Following this, Access Pension Limited merged with ARM Pension Managers (PFA) Limited, with the surviving entity renamed AccessARM Pension Limited (AccessARM). ARM Pension Managers (PFA) Limited was dissolved without winding up.

Based on the final goodwill allocation, total goodwill was valued at N118.1 billion, of which N60.9 billion is attributable to Access Holdings Plc, reflecting its 51.6% ownership in Access Golf Nigeria Limited.

**(k) Access Bank Gambia (Standard Chartered Bank):**

The recoverable amount of Goodwill as at 30 June 2026 is greater than its carrying amount and is thus not impaired. The recoverable amount was determined using a value-in-use computation as N133.63bn.

Goodwill is reviewed annually for impairment, or more frequently when there are indications that impairment may have occurred.

Goodwill is monitored by the Group on cash generating units (CGU) basis. For the purpose of impairment testing, the goodwill has been allocated to Access Bank Gambia.

Goodwill impairment test was done by comparing the value-in-use for the CGU to the carrying amount of the goodwill based on cash flow projections. Cash flows were projected for the first 5 years based on operating results, expected future financial performance and past experience. Beyond 5 years, cash flows were assumed to grow at terminal growth rate of 3.72%. A discount rate of 21.72% was applied based on estimate of cost of capital. This was estimated using the Capital Asset Pricing Model. There were no write-downs of goodwill due to impairment during the year. All assumptions are subject to market and economic conditions. However, we do not see possible changes in these assumptions adversely causing the recoverable amounts of the CGU's declining below their carrying amounts.
The key assumption used in computing the value-in-use for goodwill in during the period are as follows:

| | |
|---|---|
| Terminal growth rate (i) | 3.72% |
| Discount rate (ii) | 21.72% |

(i) Compound annual volume growth rate in the initial five-year year.

(i) Terminal growth rate used to extrapolate cash flows beyond the budget period.

(ii) Pre-tax discount rate applied to the cash flow projections.

**Cash Flow Forecast**

Cash flows were projected based on past experience and actual operating results. These cashflows are based on the expected revenue growth for the entity over this 5-year period.

**Discount Rate**

Pre-tax discount rate of 21.72% was applied in determining the recoverable amounts for the goodwill of Access Bank Gambia. This discount rate was estimated using the Bank's beta, the risk-free rate and the country risk premium for Gambia.

**Terminal Growth Rate**

The terminal growth rate applied was based on the long term growth rate in GDP of Gambia.

The key assumptions described above may change as economic and market conditions change. The Group estimates that reasonably possible changes in these assumptions are not expected to cause the recoverable amount of the entity (from which the goodwill arose) to decline below their carrying amount.

| **Sensitivity analysis of key assumptions used** ***In millions of Naira*** | **10% increase** | **10% decrease** |
|---|---|---|
| Impact of change in discount rate on value-in-use computation (increase/ (decrease) | (13) | 17 |
| Impact of change in growth rate on value-in-use computation (increase/ (decrease) | 1 | (1) |

There were no write-downs of goodwill due to impairment during the period.

### 30 Deferred tax assets and liabilities

#### (a) Group

The following items gave rise to temporary differences during the year. Deferred tax assets and liabilities are attributable to the following items below:

| | 30 June 2026 | | | 31 December 2025 | | |
|---|---|---|---|---|---|---|
| *In millions of Naira* | Assets | Liabilities | Net | Assets | Liabilities | Net |
| Property and equipment, and software | 38,837 | (120,187) | (81,350) | 38,837 | (20,523) | 18,314 |
| Allowances/(reversal) for loan losses | 146,155 | - | 146,155 | 146,155 | - | 146,155 |
| Tax loss carry forward | 203,852 | - | 203,852 | 503,852 | - | 503,852 |
| Exchange gain/(loss) unrealised | - | (300,203) | (300,203) | - | (634,552) | (634,552) |
| Tax losses | - | - | - | - | - | - |
| Deferred tax assets (net) | 388,844 | (420,390) | (31,546) | 688,844 | (655,075) | 33,769 |

#### (b) Company

Deferred tax assets and liabilities are attributable to the following:

| | 30 June 2026 | | | 31 December 2025 | | |
|---|---|---|---|---|---|---|
| *In millions of Naira* | Assets | Liabilities | Net | Assets | Liabilities | Net |
| Property and equipment, and software | - | (109) | (109) | - | (123) | (123) |
| Allowances/(Reversal) for loan losses | 198 | - | 198 | - | - | - |
| Tax loss carry forward | 1,207 | - | 1,207 | - | - | - |
| Exchange gain unrealised | - | (7,241) | (7,241) | - | - | - |
| Deferred tax assets/(liabilities) | 1,405 | (7,350) | (5,945) | - | (123) | (123) |

Deferred tax assets are recognised for deductible temporary differences and tax losses carried forward only to the extent that it is probable that future taxable profits will be available against which these can be utilised. Based on a review of medium-term profit forecasts, the Group has concluded that it is not probable that sufficient taxable profits will be generated in the foreseeable future to fully recover the deferred tax asset.

In line with the Group's accounting policy, deferred tax assets or liabilities arising from OCI-related temporary differences are not recognised until the timing and manner of their reversal become probable and reasonably estimable. This policy has been applied consistently across reporting periods.

| *In millions of Naira* | Group 30 June 2026 | Group 31 Dec 2025 | Company 30 June 2026 | Company 31 Dec 2025 |

### 31 Investment properties

| *In millions of Naira* | Group 30 June 2026 | Group 31 Dec 2025 | Company 30 June 2026 | Company 31 Dec 2025 |
|---|---|---|---|---|
| Balance at 1 January | - | 437 | - | - |
| Disposals during the period | - | (437) | - | - |
| Balance, end of period | **-** | **-** | **-** | **-** |

Investment property for the Group, represents the value of landed properties which are carried and measured at fair value. There was no rental income from such properties during the period and no restrictions on the realisability of the property.

**Valuation technique used for fair valuation of investment properties**

Investment properties are stated at fair value, which has been determined based on valuations performed by various Estate Surveyors and Valuers . The valuers are industry specialists in valuing these types of investment properties. The fair value is supported by market evidence and represents the amount that would be received to sell the properties in an orderly transaction between market participants at the measurement date in the principal market to which the Group has access at the date of valuation, in accordance with standard issued by the International Valuation Standards Committee. Valuations are performed on an annual basis and the fair value gains and losses are reported in valuation gain on investment properties under other operating income (see note 13) . The profits or losses on disposal are also reported in the profit or loss as they occur.

The professional valuers engaged for the preparation of the valuation reports is Ifebunandu and associates. The Fair value of investment property was determined by external, independent property valuers, having appropriate recognised professional qualifications and recent experience in the location and category of the property being valued.

The fair value measurement for the investment property have been categorised as a Level 3 fair value based on the inputs to the valuation technique used. The technique employed for this valuation is the direct market method of valuation where the estimated amount for which the asset would be exchanged between a willing buyer and a willing seller in an arm's length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion is determined.

All investment properties held by the Group and Bank were disposed off during the 2025 financial period.

These assets largely comprise of Land and buildings. The items in non-current assets held for sale are repossessed collateral and this is seen in Note 5.1.3 (g). During the period, management committed to sell part of the repossessed collateral within the commercial Banking segment.

## Notes to the Financial Statement continued

### 31 Investment properties continued

Accordingly, part of that collateral is presented as an asset held for sale. Efforts to sell the asset held for sale have started and a sale is expected within the time frame prescribed by IFRS 5. The fair value measurement for the non-current asset held for sale has been categorised as a Level 3 fair value based on the inputs to the valuation technique used. The technique employed for this valuation is the comparable method of valuation where an assessment of the fair value was obtained on the basis of collation and analysis of appropriate comparable transactions, together with evidence of demand within the vicinity of the subject property. The key unobservable input used in the valuation technique is the adjusted market price of comparable properties (e.g., price per square meter), including subjective adjustments for location, condition, and marketability.

In addition, a total of N122.58bn (Dec 2025: N11.5bn) was sold from the repossessed collaterals for a total value of N145.95bn and the gain on disposal N23.37bn (Dec 2025: N7.04bn) was recognised through profit or loss (see Note 13a).

(a) E-banking payables represent settlements due to other banks for the use of their electronic channels by the Group's customers. The Group's Receivables from other banks is contained in Note 26.

(b) Collections are balances held on behalf of customers for various transactions. These include escrows, collection for remittances, payments, etc.

(c) The contribution to the Industrial training fund scheme is being shown as a separate line under other liabilities. This has been stripped out of the accrual line where it was previously warehoused. The amount here represents 1% of the personnel cost of the employer according to the ITF amendment ACT 2011 , Act No 19 section 6, subsection 1

(d) Customer deposits for foreign exchange represents deposits that customers have made to fulfil foreign currency obligations. The Group's process requires that customers with foreign currency obligations deposit foreign currency to back the transactions. The corresponding balance is in Other deposits with central banks - Cash and balances with banks.

The principal amount will be paid in 10 equal installments from November 2022, while interest is paid semi-annually at 4.5% above 6 months SOFR.There has been a transition from SOFR to SOFR effective May 2023 for the interest payable. From this creditor, the Bank has nil undrawn balance as at 30 June 2026. This facility is unsecured.

(d) The amount of ₦251,797,506,866 (USD 182,377,381) represents the outstanding balance on the on-lending facility of USD 200mn granted to Access Bank by the US Development Finance Corporation in November 2022 for 10 years. The principal amount will be repayable quarterly from January 2025 while interest is paid quarterly at 3.90% above 3 months SOFR. From this creditor, the Bank has nil undrawn balance as at 30 June 2026. This facility is unsecured.

(e) The amount of ₦52,314,017,395 (USD 37,891,136) represents the outstanding balance on the on-lending facility of BWP 150mn granted to Access Bank Botswana by the Botswana Development Corporation Ltd (BDC) in 2018. The loan has a 10 year tenure (maturing 3 August 2028) at an interest rate of bank rate (currently 4.75%) and a margin of 4%. From this creditor, the Bank has nil undrawn balance as at 30 June 2026. This facility is unsecured.

(f) The amount of ₦9,345,755,345 (USD 6,769,147) represents the outstanding balance on the on-lending facility granted to Access Bank Ghana by Norfund in November 2022. The loan has a 5 year tenure (maturing November 2027) at an interest rate of 8.94%. Interest is to be paid semi-annually beginning in June 2023. Principal repayment is semi-annually for the next 4 years. From this creditor, the Bank has nil undrawn balance as at 30 June 2026. This facility is unsecured.

(g) The amount of ₦21,794,964,059 (USD 15,786,131) represents the outstanding balance on the on-lending facility granted to Access Bank Rwanda by the Central Bank of Rwanda in 2021 for a year. The principal amount will be repaid as a bullet at maturity in 2023 while interest is paid at maturity at 8%. However, in the year 2023, the arrangement has been reset to mature in 30th June 2027. From this creditor, the Bank has nil undrawn balance as at 30 June 2026. This facility is unsecured.

(h) The amount of ₦201,787,318 represents the outstanding balance on the on-lending facility granted to the Bank by Central Bank of Nigeria in collaboration with the Federal Government of Nigeria (FGN) in respect of Commercial Agriculture Credit Scheme (CACS) established by both CBN and the FGN for promoting commercial agricultural enterprises in Nigeria. The facility is for a maximum tenor of 7 years at a zero percent interest rate to the Bank maturing December 2027. The Bank did not provide security for this facility. From this creditor, the Bank has nil undrawn balance as at 30 June 2026.

(i) The ₦584,292,186 on-lending facility granted to the Bank by Central Bank of Nigeria, to facilitate the rapid rollout of agent networks across Nigeria supporting the expansion of a shared Agent Network to deepen financial inclusion in Nigeria. The total facility has a tenor of 10 years at a 5% interest rate maturing June 2028 and the facility is meant for CBN Licensed Mobile Money Operators and Super Agents. From this creditor, the Bank has nil undrawn balance as at 30 June 2026. This facility is secured.

(j) The facility of ₦1,683,875,944 on intervention under the Special refinancing and Restructuring intervention fund, with a 10 year tenor which is due on the 31 July 2028. The Bank has a 36 months moratorium on the facility after which principal repayment will be charged quarterly. Though the facility is meant for on-lending to borrowers in specified sectors, the Bank remains the primary obligor to the BOI and therefore assumes the risk of default of customers. From this creditor, the Bank has nil undrawn balance as at 30 June 2026. This facility is secured.

(k) The amount of ₦47,635,599,014 represents the outstanding balance on the state salary bailout facilities granted to the Bank by the Central Bank of Nigeria for onward disbursements to state governments for payments of state workers' salaries. The facility has a tenor of 20 years with a 2% interest payable to the CBN maturing December 2036. The Bank is under obligation to on-lend to the states at an all-in interest rate of 9% per annum. From this creditor, the Bank has nil undrawn balance as at 30 June 2026. This facility is secured.

(l) The amount of ₦79,592,983,016 represents the outstanding balance on the excess crude account loans granted to the Bank by the Central Bank of Nigeria for onward disbursements to state governments. The facility has a tenor of 20 years with a 2% interest payable to the CBN maturing February 2049. The Bank is under obligation to on-lend to the states at an all-in interest rate of 9% per annum. From this creditor, the Bank has nil undrawn balance as at 30 June 2026. This facility is secured.

(m) The amount of ₦1,599,585,442 represents the outstanding balance on the on-lending facility granted to the Bank by Central Bank of Nigeria in respect of the Real Sector

## Notes to the Financial Statement continued

### 36. Interest bearing loans and borrowings continued

Support Facility (RSSF) established by CBN. The facility tenor is for a range of 7 to 10 years inclusive of 24 months moratorium at a 3% interest rate to the Bank maturing July 2028. An additional facility of NGN2bn was disbursed under the scheme for a period of 7 years inclusive of 1 year moratorium at a 3% interest rate to the Bank. From this creditor, the Bank has nil undrawn balance as at 30 June 2026. This facility is secured.

(n) The amount of ₦72,612,577,445 represents the outstanding balance on four on-lending facilities granted to the Bank by the Development Bank of Nigeria in two series in respect of the Micro, Small and Medium Scale Enterprises (MSMEs) and Small Corporates. The facilities are for a maximum of 3 years at a 9.6% interest rate to the Bank. A third series of about 1.68bn was disbursed for a period of 10 years. The fourth facility of about 70bn was disbursed for a period of 10 years at an interest rate of 10% maturing August 2030. It also includes the 20bn disbursed in August 2022, for a maximum of 3 years. Principal repayment will begin in February 2024 while interest is at a rate of 12%. From this creditor, the Bank has nil undrawn balance as at 30 June 2026. This facility is secured.

(o) The amount of ₦163,891,333,655 represents the outstanding balance on the on-lending facility granted to the Bank by Central Bank of Nigeria in respect of the Real Sector Support Facility (RSSF) Differentiated Cash Reserve Requirement scheme (DCCR) established by CBN supporting Reddington Multi-specialist Hospital, Dana Motors, Lafarge Africa PLC. The facility is for a maximum period of 7 years inclusive of 12 months moratorium for Reddington and Dana and a 24 months moratorium for Lafarge at a 0% interest rate to the Bank maturing March 2032. Additional amounts were disbursed between July 2019 and November 2019 in favor of 5 other beneficiaries amounting to 34.58bn for a period of 7 years with 2 years moratorium at 2% interest rate on a quarterly basis for the first 4 counterparties and 10 years with no moratorium at 1% interest rate on a quarterly basis for the last counterparty. There were additional facilities disbursed in 2020 in favor of 16 other beneficiaries amounting to about N59bn for a period of 4 to 10 years inclusive of 6 months to 2 years moratorium at 2% interest rate on a quarterly basis. Additionally, facility worth 149bn was disbursed in 2022 to for mangal, BUA, retail supermarket etc for a period of 7.5 to 10 years at 2% interest rate on a quarterly basis. From this creditor, the Bank has nil undrawn balance as at 30 June 2026. This facility is secured.

(p) The amount of ₦4,393,473,156 represents the outstanding balance on the on-lending facility granted to the Bank by Nigeria Mortgage Refinance Company. The facility is for a maximum period of 15 years commencing from the date of execution of this agreement at a 14.5% interest rate to the Bank maturing July 2033. From this creditor, the Bank has nil undrawn balance as at 30 June 2026. This facility is unsecured.

(q) The amount of ₦5,801,457,300 (USD 4,202,006) represents the outstanding balance on the on-lending facility granted to Access Bank Ghana by Ghana International Bank in October 2022 was obtained at an average rate of 17.36% to support lending to SME customers maturing May 2030. From this creditor, the Bank has nil undrawn balance as at 30 June 2026. This facility is unsecured.

(r) The amount of ₦179,168,280 represents the outstanding balance on the on-lending facility granted to the Bank by the Central Bank of Nigeria under the Creative Industry Financing Initiative established by the CBN. The initiative is on a request by request basis. The tenor of the facilities granted ranges from 3 to 10 years inclusive of a maximum of 24 months moratorium maturing March 2030. There are currently 14 beneficiaries under the initiative. The Bank is under obligation to on-lend to customers at an all-in interest rate of 9% with 2% remitted to CBN. The Bank remains the primary obligor to CBN and therefore assumes the risk of default of customers. From this creditor, the Bank has nil undrawn balance as at 30 June 2026. This facility is secured.

(s) The amount of ₦3,755,959 represents the outstanding balance on the on-lending facility granted to the Bank by Central Bank of Nigeria in respect of the Accelerated Agricultural Development Scheme (AADS) on behalf of Bayelsa State Government. The facility is for a period of 3 years inclusive of 24 months moratorium at a 4% interest rate repayable on a monthly basis maturing July 2026. From this creditor, the Bank has nil undrawn balance as at 30 June 2026. This facility is secured.

(t) The amount of ₦3,470,093,420 represents the outstanding balance on the on-lending facility granted to the Bank by Central Bank of Nigeria in respect of the Non-Oil Export Stimulation Facility (NESF) supporting Leaf Tobacco and Commodities Nigeria Limited in acquiring additional machinery for expansion of their facilities. The facility is for a period of 6 years inclusive of 12 months moratorium at a 1% interest rate repayable on a quarterly basis which will increase to 2% effective March 1, 2022. It also includes an additional N5bn disbursed in September 2022 for a period of 7 years at 2% interest repayable on a quarterly basis and mature September 2029. Principal repayment will start in October 2024, payable on a quarterly basis. From this creditor, the Bank has nil undrawn balance as at 30 June 2026. This facility is secured.

(u) The amount of ₦10,289,680,354 represents the outstanding balance on the on-lending facility granted to the Bank by Central Bank of Nigeria through the Health Sector Intervention Facility (HSIF) window of the Real Sector Support Facility (RSSF) Differentiated Cash Reserve Requirement scheme (DCCR) supporting 8 beneficiaries (N7.6bn). The tenor of the facility ranges from 4 to 10 years inclusive of maximum moratorium of 12 months maturing January 2032. The interest is set at 1% repayable on a quarterly basis which will increase to 2% effective March 2022. From this creditor, the Bank has nil undrawn balance as at 30 June 2026. This facility is secured.

(v) There is no outstanding balance on the on-lending facility granted to the Bank by Lagos State Employment Trust Fund (LESTF) to support financial inclusion of women in Lagos state. The tenor of the facility is 2 years. The interest is set at 5% repayable on a monthly basis. From this creditor, the Bank has nil undrawn balance as at 30 June 2026.

The valuer responsible for the valuation of the Retirement benefit Obligation is Wayne van Jaarsveld (FRC/2021/PRO/DIR/003/00000024507)

**(i) Post employment benefit plan**

The Bank operates a non-contributory, lump sum defined benefit post employment benefit plan for top executive management of the Bank from General Manager and above based on the number of periods spent in these positions. The scheme is also aimed at rewarding executive directors and other senior executives for the contributions to achieving the Bank's long-term growth objectives.

There is no funding arrangement with a trustee for the Post employment benefit plan as the Bank pays for all obligations from its current period profit as such obligations fall due. Depending on their grade, executive staff of the Bank upon retirement are entitled to certain benefits based on their length of stay on that grade.

| Total expense recognised in profit and loss (see Note 14) | **8,131** | **4,514** | **-** | **-** |

All retired benefit obligations have been classified as non current with a closing amount of N20.2 billion (December 2025: N13.9b) for both Group

The weighted average duration of the defined benefit obligation is 3 years. The information on the maturity profile of the defined benefit plan includes the maturity analysis and the distribution of the timing of payment.

**Risk exposure**

Through its defined benefit pension plan, the group is exposed to a number of risks, the most significant of which are detailed below:

i) Changes in bond yields - A decrease in government bond yields will increase plan liabilities, although this will be partially offset by an increase in the value of the plans' bond holdings.

ii) Inflation risks - Some of the group's pension obligations are linked to salary inflation, and higher inflation will lead to higher liabilities.

iii) Life expectancy - The majority of the plans' obligations are to provide benefits for the life of the member, so increases in life expectancy will result in an increase in the plans' liabilities

The sensitivities below relates to Group.

| **30 June 2026** | **Impact on defined benefit obligation** | | |
|---|---|---|---|
| ***In millions of Naira*** | **Decrease in assumption by 1%** | **Liability changes to** | **Total comprehensive income** |
| Effect of changes in the assumption to the discount rate | Increase in liability by 3.7% | 20,892 | (741) |
| Effect of changes in assumption to the salary growth | Decrease in the liability by 2.4% | 19,672 | 480 |
| Effect of changes in assumption to the mortality rate | Decrease in liability by 0.04% | 20,063 | 89 |
| Effect of changes in assumption to the withdrawal rate | Decrease in liability by 0.2% | 20,110 | 42 |

## Notes to the Financial Statement continued

### 37 Retirement benefit obligation continued

| *In millions of Naira* | Impact on defined benefit obligation<br>Decrease in assumption by 1% | Liability changes to | Total comprehensive income |
|---|---|---|---|
| Effect of changes in the assumption to the discount rate | Decrease in liability by 3.5% | 19,452 | 699 |
| Effect of changes in assumption to the salary growth | Increase in the liability by 2.5% | 20,655 | (503) |
| Effect of changes in assumption to the mortality rate | Increase in the liability by 0.0% | 20,142 | 10 |
| Effect of changes in assumption to the withdrawal rate | Increase in the liability by 0.2% | 20,193 | (41) |

| 31 December 2024<br>*In millions of Naira* | Impact on defined benefit obligation<br>Decrease in assumption by 1% | Liability changes to | Total comprehensive income |
|---|---|---|---|
| Effect of changes in the assumption to the discount rate | Increase in liability by 2.9% | 14,401 | (490) |
| Effect of changes in assumption to the salary growth | Decrease in the liability by 2.6% | 13,452 | 458 |
| Effect of changes in assumption to the mortality rate | Decrease in liability by 0.1% | 13,906 | 5 |

| *In millions of Naira* | Impact on defined benefit obligation<br>Decrease in assumption by 1% | Liability changes to | Total comprehensive income |
|---|---|---|---|
| Effect of changes in the assumption to the discount rate | Decrease in liability by 3.3% | 13,448 | 463 |
| Effect of changes in assumption to the salary growth | Increase in the liability by 3.1% | 14,393 | (482) |
| Effect of changes in assumption to the mortality rate | Increase in the liability by 0.06% | 13,916 | (6) |

The above sensitivity analysis are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the year) has been applied as when calculating the pension liability recognised within the statement of financial position. The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the previous year.

**Actuarial assumptions:**

Principal actuarial assumptions at the reporting date (expressed as weighted averages):

The most recent valuation was performed by Alexander Forbes as at 30 June 2026.

| *In millions of Naira* | 30 June 2026 | 31 December 2025 |
|---|---|---|
| Discount rate | 18.70% | 21.10% |
| Future salary increases | 5.00% | 5.00% |
| Retirement age for both male and female | 60 years | 60 years |
| Retirement rate: 50 – 59 (average rate) | 1.89% | 1.89% |
| Withdrawal rate: 18 – 29 | 4.50% | 4.50% |
| Withdrawal rate: 30 – 44 | 6.00% | 6.00% |
| Withdrawal rate: 45 – 50 | 5.00% | 5.00% |
| Withdrawal rate: 51 – 59 (average rate) | 1.67% | 1.67% |

Assumptions regarding future mortality before retirement are based on A1967/70 ultimate table published by the Institute of Actuaries of United Kingdom. The rate used to discount post employment benefit obligations has been determined by reference to the yield on Nigerian Government bonds of medium duration. This converts into an effective yield of 18.7% as at 30 June 2026. For members in active service as at the valuation date, the projected unit credit method of valuation as required under the IFRS has been adopted.

### C Additional tier 1 capital

#### (i) Mandatory Convertible Notes

The Bank issued a U.S.$500,000,000 Perpetual Fixed Rate Resettable Non callable prior to 5.25 years Additional Tier 1 (AT1) Subordinated Notes under its U.S.$1,500,000,000 Global Medium Term Note Programme listed on the London Stock Exchange.

The principal terms of the issue are described below:

1) The AT1 security will rank in claim behind all present and future Senior Obligation; pari passu without any preference among themselves with all present and future parity obligations and in priority to all payments in respect of all present and future Junior Obligations.

2) The AT1 security is undated and is redeemable, at the option of Access Bank PLC in whole at (i)any time from 7 October 2026 up to and including the First Reset Date of January 7, 2027 and (ii)every Interest Payment Date thereafter (Issuer Call Date). In addition,the AT1 security is redeemable, at the option of the Bank, in whole in the event of certain changes in the tax or regulatory treatment of the securities

3) AT1 security will bear a fixed rate of interest of 9.125 percent until the initial call date or the initial reset date, as the case may be. After the initial call date or the initial reset date, as the case may be, in the event that they are not redeemed, the AT1 security will bear interest at a rate per annum equal to the aggregate of (i) the Reset Margin of 8.07 per cent. per annum and (ii) the then prevailing U.S. Treasury Rate

4) Interest on the AT1 security will be due and payable only at the sole discretion of the Bank, and it has sole and absolute discretion at all times and for any reason to cancel (in whole or in part) any interest payment that would otherwise be payable on any interest payment date. Interest on the Notes will be payable semi-annually in arrears commencing on 7 July 2022. The amount paid during the period is N69.53Bn (Dec 2025:N139.59Bn)

#### (ii) Mandatory Convertible Notes

On the 29 March 2023, the Bank issued a $300Mn Additional Tier 1 (AT1) capital through a mandatory convertible note to Access Holdings. The principal terms of the additional tier 1 security are as follows:

- The AT1 security will rank in claim behind all present and future Senior Obligation; pari passu without any preference among themselves with all present and future parity obligations and in priority to all payments in respect of all present and future Junior Obligations.
- The AT 1 security will bear a fixed interest rate of 15% per annum payable to the Subscriber in two equal semi-annual instalments, in US Dollars net of any fees and taxes. The Issuer (Access Bank Plc) shall have full discretion at all times to vary, cancel, or postpone the Interest payments.
- The AT 1 security is undated and convertible (i) on the date falling 8 (eight) years(29 March 2031) after the Closing Date being the Conversion Date but shall be converted at the discretion of the Issuer (Access Bank Plc), subject to the approval of the CBN, into ordinary shares of the Company. (ii) a trigger event where the tier 1 capital of the Bank (inclusive of the Notes), is below the requirements of the Central Bank of Nigeria.
- The subscriber shall mandatorily deliver a conversion notice to the issuer(Access Bank Plc) seeking to convert the Notes but the ultimate conversion right is retained with the issuer (Access Bank Plc).

### (i) Other reserves

**Other regulatory reserves**

**Statutory reserves**

Nigerian banking regulations require Access Bank Nigeria to make an annual appropriation to a statutory reserve. As stipulated by S.16(1) of the Banks and Other Financial Institution Act of Nigeria, an appropriation of 30% of profit after tax is made if the statutory reserve is less than paid-up share capital and 15% of profit after tax if the statutory reserve is greater than the paid up share capital.

**SMEEIS Reserves**

The Small and Medium Enterprises Equity Investment Scheme (SMEEIS) reserve is maintained to comply with the Central Bank of Nigeria (CBN)/ Banker's committee's requirement that all licensed deposit money banks in Nigeria set aside a portion of the profit after tax in a fund to be sued to finance equity investment in qualifying small and medium scale enterprises. Under the terms of the guideline (amended by a CBN letter dated 11 July 2006), the contributions will be 10% of profit after tax and shall continue after the first 5 years but banks' contribution shall thereafter reduce to 5% of profit after tax.

However, this is no longer mandatory. Therefore, no additional appropriation has been done during the year.

The small and medium scale industries equity investment scheme reserves are non-distributable.

**i(a)**

| Group | Statutory reserves | | SMEEIS Reserves | | Total | |
|---|---|---|---|---|---|---|
| *In millions of Naira* | 30 June 2026 | 31 December 2025 | 30 June 2026 | 31 December 2025 | 30 June 2026 | 31 December 2025 |
| Opening | 650,472 | 500,428 | 827 | 827 | 651,299 | 501,254 |
| Transfers during the year | (137,525) | 150,045 | - | - | (137,525) | 150,045 |
| Closing | 512,947 | 650,472 | 827 | 827 | 513,774 | 651,299 |

### (ii) Share scheme reserve

This represents the total expenses incurred in providing the Company's shares to its qualifying staff members under the RSPP scheme.

### (iii) Treasury shares

This represents the shares held by the new RSPP scheme which have not yet been allocated to staff based on the pre-determined vesting conditions.

### (iv) Capital reserve

This balance represents the surplus nominal value of the reconstructed shares of the Company which was transferred from the share capital account to the capital reserve account after the share capital reconstruction in October 2006. The Shareholders approved the reconstruction of 13,956,321,723 ordinary shares of 50 kobo each of the company in issue to 6,978,160,860 ordinary shares of 50 kobo each by the creation of 1 ordinary shares previously held.

### (v) Fair value reserve

The fair value reserve comprises the net cumulative change in the fair value of investments measured through other comprehensive income until the investment is derecognised or impaired.

### (vi) Foreign currency translation reserve

This balance appears only in the Group accounts and represents the foreign currency exchange difference arising from translating the results and financial position of all the group entities that have a functional currency different from the presentation currency.

## Notes to the Financial Statement continued

## 38 Capital and reserves continued

### (vii) Regulatory risk reserve

The regulatory risk reserves warehouses the difference between the allowance for impairment losses on balance on loans and advances based on Central Bank of Nigeria prudential guidelines and Central Bank of the foreign subsidiaries regulations, compared with the loss incurred model used in calculating the impairment under IFRS.

### (viii) Retained earnings

Retained earnings are the carried forward recognised income net of expenses plus current period profit attributable to shareholders.

### (ix) Partial Disposal of Subsidiary

Disposal of an interest in a subsidiary without loss of control is accounted for as a transaction with equity holders. The difference between the consideration received and the adjustment to NCI is recognised directly in equity attributable to the owners of the parent. No gain or loss is recognised in profit or loss, and goodwill is not remeasured. Any gain or loss recognised in the Bank's separate financial statements is eliminated on consolidation.

### G Non-controlling interest

This represents the Non-controlling interest's (NCI) portion of the net assets of the Group. During the period, the Bank disposed of a portion of its interest holding in Access Bank Ghana. Following the disposal of 5.1% ordinary shares in Access Bank Ghana, the Group recognised a non-controlling interest (NCI) representing the Purchasers' proportionate share in Access Bank Ghana's net assets. Initial recognition of NCI is measured at Purchasers' proportionate share of Access Bank Ghana's net assets, in line with IFRS 10.23.

### 39 Contingencies

**Claims and litigation**

Access Holdings Plc is involved in two legal actions, a 2022 trademark and copyright infringement claim against which the Company is actively defending itself, and a 2025 action instituted by the Company concerning alleged corporate governance breaches and conflicts of interest.

The total claim against the defendants is estimated at ₦1.05 trillion, with an ₦8.75 billion provision recognised as at 30 June 2026. Based on legal advice, Management considers the likelihood of an adverse outcome to be low and believes the proceedings will not materially adversely affect the Company. However, the timing and amount of any potential financial outflow cannot be reliably estimated.Management has assessed the potential financial impact of these claims and based on professional legal advise that it is not possible to reliably estimate the timing or amount of any potential outflow of resources that may arise from these legal proceedings. Consequently, no provision has been recognised in the financial statements as of the reporting date.

**Contingent liability and commitments**

In common with other banks, Group conducts business involving acceptances, performance bonds and indemnities. The majority of these facilities are offset by corresponding obligations of third parties. Contingent liabilities and commitments comprise acceptances, endorsements, guarantees and letters of credit.

## Notes to the Financial Statement continued

## 39 Contingencies continued

**Nature of instruments**

An acceptance is undertaken by a bank to pay a bill of exchange drawn on a customer. The Group expects most acceptances to be presented, but reimbursement by the customer is normally immediate. Endorsements are residual liabilities of the Group in respect of bills of exchange, which have been paid and subsequently rediscounted.

Guarantees and letters of credit are given as security to support the performance of a customer to third parties. As the Group will only be required to meet these obligations in the event of the customer's default, the cash requirements of these instruments are expected to be considerably below their nominal amounts.

Other contingent liabilities include transaction related custom and performance bonds and are generally short term commitments to third parties which are not directly dependent on the customer's credit worthiness. Commitments to lend are agreements to lend to a customer in the future, subject to certain conditions. Such commitments are either made for a fixed period, or have no specific maturity dates but are cancellable by the lender subject to notice requirements. Documentary credits commit the Group to make payments to third parties, on production of documents, which are usually reimbursed immediately by customers.

The table below summarises the fair value amount of contingent liabilities and commitments off-financial position risk:

Acceptances, bonds, guarantees and other obligations for the account of customers:

**a. These comprise:**

| *In millions of Naira* | Group 30 June 2026 | Group 31 Dec 2025 | Company 30 June 2026 | Company 31 Dec 2025 |
|---|---|---|---|---|
| **Contingent liabilities:** | | | | |
| Transaction related bonds and guarantees | 2,639,186 | 2,588,552 | - | - |
| Commitments: | | | | |
| Clean line facilities for letters of credit, unconfirmed letters of credit and other commitments | 4,203,701 | 2,262,534 | - | - |
| | **6,842,887** | **4,851,086** | **-** | **-** |

The Bank granted clean line facilities for letters of credit during the year to guarantee the performance of customers to third parties.

**b. Capital Commitment**

As at 30 June 2026, the Group had the following significant capital commitments:

**1. Acquisition of National Bank of Kenya ("NBK")**

On 30 May 2025, the Group announced the acquisition of the entire issued share capital of National Bank of Kenya ('NBK') from KCB Group Plc following the regulatory approvals by Central Bank of Kenya by Gazette notice No.4667. However, the transaction remains subject to the receipt of unconditional regulatory approvals from the Group's primary regulator as at 30 June 2026 hence the Bank has not accounted for the acquisition. Consequently, the financial results of National Bank of Kenya have not been consolidated in these financial statements.To secure the Seller's right to receive payment pending satisfaction of the regulatory conditions, the Group entered into a bill avalisation facility arrangement, effective 19 November 2025, with a maximum amount of (USD 106.7 million; ₦47.3 billion).

(a) Cash and cash equivalents include the following for the purposes of the statement of cash flows:

| *In millions of Naira* | | Group 30 June 2026 | Group 31 Dec 2025 | Company 30 June 2026 | Company 31 Dec 2025 |
|---|---|---|---|---|---|
| Cash on hand and balances with banks | 18 | 2,757,468 | 2,681,016 | 3,827 | 34,657 |
| Unrestricted balances with central banks | 18 | 1,010,681 | 1,169,276 | - | - |
| Money market placements | 18 | 3,355,965 | 2,388,035 | 8,022 | - |

### (C) Non-cash investing activities and financing activities:

The following activities as listed below are the items that have been identified as non cash investing and financing activities

The Group entered into certain investing and financing transaction that did not involve the movement of cash.

The non-cash investing activities primarily relate to:

Consideration receivable arising from the partial disposal of interests in subsidiaries (refer to Note 46 for further details). These have been excluded from the statement of cash flows, as they do not give rise to cash inflows or outflows.

| | **Total** | | | **557** |

## Notes to the Financial Statement continued

### 42 Events after reporting date

There were no significant events after the reporting date that could affect the reported amount of assets and liabilities as of the reporting date which have not been adjusted for, or disclosed in the financial statements.

### 43 Related Party Transactions

Parties are considered to be related if one party has the ability to control the other party or exercise influence over the other party in making financial and operational decisions, or one other party controls both. The definition includes subsidiaries, associates, joint ventures and the Group's pension schemes, as well as key management personnel.

**Transactions with key management personnel**

The Group's key management personnel, and persons connected with them, are also considered to be related parties. The key management personnel have been identified as the executive and non-executive directors of the Group. Close members of family are those family members who may be expected to influence, or be influenced by that individual in their dealings with Access Holdings PLC and its subsidiaries.

Parent

The parent company, which is also the ultimate parent company, is Access Holdings PLC.

**(a) Loans and advances to related parties**

The Group granted various credit facilities to its subsidiary companies and key management personnel. Key Management Personnel is defined as members of the Board of Directors of the Bank, including their close members of family and any entity over which they exercise control. Close member of family are those who may be expected to influence or be influenced by that individual in dealings with the Bank.

The rates and terms agreed are comparable to other facilities being held in the Bank's portfolio. Details of these are described below:

| **Period ended 30 June 2026** *In millions of Naira* | **Directors and other key management personnel (and close family members)** | **Subsidiaries** | **Associate** | **Total** |
|---|---|---|---|---|
| Balance, beginning of year | 1,740 | 1,029,678 | 182 | 1,031,599 |
| Net movement during the year | (482) | (474,343) | (182) | (475,007) |
| Balance, end of year | 1,258 | 555,335 | - | 556,593 |
| Interest income earned | 41 | 18 | - | 59 |
| Other Income | | 39,123 | - | 39,123 |
| ECL due from related parties expense | - | - | - | - |

The loans issued to directors and other key management personnel (and close family members) as at 30 June 2026 are mortgages, overdrafts, credit card and term loans amounting to N1,258 million and they are repayable in various cycles ranging from monthly to several years for the long-tenored obligations. The transactions were carried out at arms length and have an average interest rate of 23.75% and average tenor of 4.5 years. The loans are collateralised by a combination of lien on shares of quoted companies, fixed and floating debentures, corporate guarantee, negative pledge, domiciliation of proceeds of company's receivables, legal mortgages and cash.

The loan to subsidiaries relates to a foreign interbank placements of N1.164 tn granted during the period. It is a non-collateralised placement advanced at an average interest rate of 4.31% and an average tenor of 5 months. This loan has been eliminated on consolidation and does not form part of the reported Group loans and advances balance.

No impairment losses have been recorded against balances outstanding during the period with key management personnel, and no specific allowance has been made for impairment losses on balances with key management personnel and their immediate relatives at period end.

### 44 Business Combination

**(a) (i) Business Combination with AfrAsia Bank Limited, Mauritius**

The Access Bank UK Limited acquired a 76% shareholding in AfrAsia Bank Limited (ABL) on 22 July 2025. ABL is a banking group incorporated in Mauritius, with financial statements presented in Mauritian Rupees (MUR). The acquisition was effected for a consideration of N611.14 billion ($397.55 million) in respect of the 76% interest. Upon completion, the Group obtained control of ABL, and the results of ABL have been consolidated from the acquisition date, being 22 July 2025.

Initial details of the acquisition of ABL were set out in the Group's consolidated financial statements for the year ended 31 December 2025. During the period, the Group completed the purchase price allocation within the measurement period. The completed valuations reflect additional information about facts and circumstances that existed at the acquisition date. No change was made to the acquisition date, the percentage interest acquired or the consideration transferred.

At 31 December 2025, the purchase price allocation was provisional. It included a provisional goodwill of N16.28 billion ($10.6 million). Completion of the valuation work included the recognition of core deposit intangible of N120.57 billion ($78.43 million), customer relationships of N33.80 billion ($21.99 million) and the AfrAsia brand of N31.71 billion ($20.63 million). Accordingly, the fair value of identifiable net assets increased by N180.94 billion (US$120.92 million) and the completed gain on bargain purchase is N164.66 billion (US$107.11 million). This gain arose because the fair value of the identifiable net assets, including the fair value adjustments for core deposit intangible, customer relationships, and the AfrAsia brand, exceeded the consideration transferred at the acquisition date. Strategically, this acquisition supports the Group's objective to establish Mauritius as a key hub within its international operating model (See note 47).

Mauritius is a well-regulated international financial centre, and the Group intends to leverage this positioning to support trade finance flows and regional connectivity, facilitating cross-border transactions between Africa, Asia, and Europe. The transaction further reinforces the Group's Pan-African expansion strategy, adding Mauritius to an established international footprint that already includes the UK, UAE, France, Hong Kong, and Malta.

The bargain purchase has been computed based on the fair value of the net assets of ABL, compared to the sum of the consideration paid for the acquisition and the fair value of the non-controlling interest. The acquisition involved no contingent consideration or previously held equity interests. Acquisition-related costs were expensed as incurred within the consolidated statement of profit or loss. Furthermore, the business combination

## Notes to the Financial Statement continued

recognised no separate transactions, indemnification assets, or contingent liabilities. Before recognising the bargain purchase gain, management reassessed whether all identifiable assets acquired and liabilities assumed had been identified and appropriately measured. As part of this process, management involved an external valuation advisor to review the purchase price allocation and the underlying valuation workings, and concluded that the bargain purchase gain accounting remained appropriately aligned at the reporting date. See note 49.

## Notes to the Financial Statement continued

## 44 Business Combination continued

### (b) (i) Business Combination with Zempler Bank Limited, United Kingdom

On 27 February 2026, The Access Bank UK Limited acquired 100% of the issued share capital and voting rights of Zempler Bank Limited (Zempler). Zempler is a United Kingdom-based digital bank that provides current accounts and credit products, principally to microbusinesses and small and medium-sized enterprises. The acquisition was for cash, no non-controlling interest arose, and Zempler has been consolidated in the Group's financial statements from the acquisition date.

The transaction was assessed as the acquisition of a business and has been accounted for using the acquisition method under IFRS 3 Business Combinations. The acquisition supports the Group's presence in the United Kingdom and its digital banking capabilities. Control was obtained on 27 February 2026, being the date on which completion occurred and The Access Bank UK Limited obtained the power to direct Zempler's relevant activities and exposure to variable returns.

A cash consideration of £36.748 million was paid at completion. Using the GBP to US dollar acquisition-date exchange rate of 1.350, the consideration transferred was N67.695 billion ($49.610 million). No contingent consideration, deferred consideration or previously held equity interest was identified. Acquisition-related costs were expensed as incurred within the consolidated statement of profit or loss.

A provisional gain arose because the cash consideration was lower than the provisional acquisition-date fair value of the identifiable net assets acquired, including the separately identified core deposit intangible, software and technology, brand, and the fair value adjustment to investment securities. Before recognising the gain, management reassessed whether all identifiable assets acquired and liabilities assumed had been identified and whether the consideration transferred and acquisition-date measurements had been determined appropriately. As part of this process, management involved an external valuation advisor to review the purchase price allocation and underlying valuation workings, and concluded that the provisional accounting remained appropriately aligned at the reporting date.

The initial accounting for the acquisition remains provisional at 30 June 2026. This is because the Group is continuing to finalise certain elements of the purchase price allocation and acquisition-date fair value exercise, including customer deposits, acquired receivables, other intangibles, and the related deferred tax effects. Accordingly, the amounts recognised for these items, and the resulting bargain purchase gain, are subject to change until the measurement period is complete. No measurement period adjustments in accordance with IFRS 3.49 were recognised in the period ended 30 June 2026.

### 45 Director-related exposures

The Group has some exposures that are related to its Directors. It however follows a strict process before granting such credits to its Directors. The requirements for creating and managing this category of risk assets include the following amongst others:

a. Complete adherence to the requirements for granting insider-related exposure as stated in the group's Credit Policy Guidelines, the Insider-related Policy as well as the Bank's duly approved Standard Operating Procedure for managing insider-related exposures.

b. Full compliance with the relevant CBN policies on insider-related lending.

c. All affected Directors are precluded from taking part in the approval process of credit request wherein they have interest.

d. The related Director is required to execute a document authorizing the Group to use their accruable dividends to defray any related-obligor's delinquent exposures.

e. The Directors are required to execute documents for the transfer of their shares to the Group's nominated broker to ensure effective control as required by the CBN policy to enhance the group's Corporate Governance structure.

f. Section 89 of the Group's Article of Association also reiterated that "a related Director shall vacate office or cease to be a Director, if the Director directly or indirectly enjoys a facility from the Group that remains non-performing for a period of more than 12months.

The Group's principal exposure to all its directors as at 30 June 2026 is N90.1million. However, the relevant obligors under this category also have credit balances and deposits maintained in their bank accounts which mitigate the risks to the Group.

Below is a schedule showing the details of the Holding's director-related lending:

**June 2026**

| S/N | Name of borrower | Relationship to reporting institution | Name of related Directors | Facility type | Limit N'millions | Unimpaired N'millions | Impaired N'millions | Outstanding Principal N'millions | Total N'millions | Status | Nature of security |

## 46 Partial Disposal of a subsidiary without the loss of control

### (a)(i) Partial Disposal of 5.1% of Access Bank Plc's stake in Access Bank Ghana's Ordinary Shares and Recognition of Non-Controlling Interest

In June 2026, Access Bank Plc ("the Bank" or "the Seller") completed the sale of 4.8% (8,349,485) of its ordinary shares in Access Bank Ghana to purchasers (the "Purchasers"), who are unrelated third parties, which was consummated on the Ghana Stock Exchange.

The Group retains control over Access Bank Ghana and continues to consolidate its financial results. Purchasers' shareholding represents a transfer of ownership and is recognised as non-controlling interest (NCI). The increase in the non-controlling interests amounted to N9.22 billion, and the N9.22 billion difference between the Sales proceeds (N23.61bn) and the adjustment to non-controlling interests was recognised directly in equity, attributable to the owners of the parent. No gain or loss was recognised in the consolidated statement of comprehensive income arising from this transaction.

In the separate financial statements, the Bank continues to carry the remaining investment in the subsidiary at cost. The Bank recognised the difference between the Sales proceeds (N23.61 billion) and the carrying amount of the portion of investment disposed (N1.65 billion) as a gain (N21.96 billion) in the statement of comprehensive income for the period.

The effect of the changes on the equity attributable to the parent/group is set out below:

### (a)(ii) Assets and liabilities of partially disposed subsidiary comprise the assets and liabilities of Ghana as at 30 June 2026.

### 49 Retrospective restatement from business combination and Revision of Comparative Information

During the current period, the Group finalised the purchase price allocation (""PPA"") relating to its acquisition of AfrAsia Bank Limited. As a result of the completion of the valuation exercise, certain identifiable assets acquired and liabilities assumed were remeasured, including adjustments to the identifiable intangible assets.

In accordance with IFRS 3.49–50, the Group retrospectively adjusted the provisional amounts recognised in the business combination for measurement-period information about facts and circumstances that existed at the acquisition date. Comparative information for prior periods presented has been revised accordingly. The effects of the retrospective adjustments on the Group's consolidated statement of financial position are presented below. The restatement primarily relates to adjustments to identifiable intangible assets and the resulting impact on retained earnings and other equity components, where applicable.

Consistent with IFRS 3.50, the Group has disclosed the nature and amount of the measurement-period adjustments recognised for each affected financial statement line item.

As the acquisition occurred after 30 June 2025, the adjustments had no impact on the consolidated statement of comprehensive income and no impact on the consolidated statement of cash flows for the period.
