The notes are an integral part of these consolidated and separate financial statements.

1 General information

Access Holdings Plc ("the company") is domiciled in Nigeria. The address of the company's registered office is No 14/15, Prince Alaba Oniru Road, Oniru, Lagos (formerly Plot 999c, Danmole Street, off Adeola Odeku/Idejo Street, Victoria Island, Lagos). The consolidated and separate interim financial statements of the Company for the period ended 30 September 2026 comprises the Holding Company and its subsidiaries (together referred to as "the Group" and separately referred to as "Group entities"). The Company's business segments include banking, consumer lending, payment services, insurance brokerage and pension funds administration. The Company is listed on Nigerian Exchange Group.

These financial statements were approved and authorised for issue by the Board of Directors on 29 October, 2026.

2 Statement of compliance with International Financial Reporting Standards

The consolidated and separate interim financial statements of the Group and Company respectively, have been prepared in accordance with IFRS Accounting Standards issued by the International Accounting Standards Board (IASB). Additional information required by national regulations are included where appropriate.

3 Basis of preparation

This financial statement has been prepared in accordance with the guidelines set by International Financial Reporting Standards (IFRS Accounting Standards) and interpretations issued by the IFRS Interpretations Committee (IFRIC) applicable to companies reporting under IFRS. This consolidated and separate interim financial statement comprise the consolidated and separate statement of comprehensive income, the consolidated and separate statement of financial position, the consolidated and separate statements of changes in equity, the consolidated and separate cash flow statement and the accompanying notes.

The financial statements have also been prepared in the manner required by the Companies and Allied Matters Act (CAMA), 2020, the Financial Reporting Council of Nigeria Act, 2011 (as amended), the Banks and Other Financial Institutions Act (BOFIA), 2020 and relevant Central Bank of Nigeria (CBN) Guidelines and Circulars.

The financial statements have been prepared in accordance with the going concern principle under the historical cost convention, modified to include fair valuation of particular financial instruments, non current assets held for sale and investment properties to the extent required or permitted under IFRS as set out in the relevant accounting policies. ,as management is satisfied that the Group has adequate resources to continue as a going concern for the foreseeable future. In making this assessment, management has considered a wide range of information including projections of profitability, regulatory capital requirements and funding needs.

(a) Functional and presentation currency

Items included in the financial interim statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The consolidated and separate interim financial statements are presented in naira, which is Access Holdings Plc's functional and presentation currency; except where indicated, financial information presented in Naira has been rounded to the nearest millions.

(b) Basis of measurement

These consolidated and separate interim financial statements have been prepared on the historical cost basis except for the following:

- derivative financial instruments are measured at fair value.
- non-derivative financial instruments at fair value through profit or loss are measured at fair value.
- financial instruments at fair value through OCI are measured at fair value.
- the liability for defined benefit obligations is recognised as the present value of the defined benefit obligation and related current service cost.
- non-current assets held for sale measured at lower of carrying amount and fair value less costs to sell.
- share based payment at fair value or an approximation of fair value allowed by the relevant standard.
- Investment properties are measured at fair value.
- Deferred consideration payable and receivable is recognised as the present value of the future payment or receipt.

3 Basis of preparation - continued

(c) Use of estimates and judgments

The preparation of the consolidated and separate interim financial statements in conformity with IFRS Accounting standards requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised, if the revision affects only that period, or in the period of the revision and future periods, if the revision affects both current and future periods.

Information about significant areas of estimation uncertainties and critical judgments in applying accounting policies that have the most significant effect on the amounts recognised in the consolidated and separate interim financial statements are described in note 4.

3.1 IFRS Accounting standards

The material principal accounting policies adopted in the preparation of these financial statements are set out below. These policies have been consistently applied to all periods presented, unless otherwise stated.

Amendments to the following standard(s) became effective in the annual period starting from 1 January, 2026. The new reporting requirements as a result of the amendments and/or clarifications have been evaluated and their impact or otherwise are noted below:

(a) Changes in material accounting policies and disclosures

Amendments to the following standard(s) became effective in the annual period starting from 1 January 2026. The new reporting requirements as a result of the amendments and/or clarifications have been evaluated and their impact or otherwise are noted below:

Annual Improvements to IFRS Accounting Standards (Amendments to IFRS 1, IFRS 7, IFRS 9, IFRS 10 and IAS 7)
IFRS 1, IFRS 7, IFRS 9, IFRS 10, and IAS 7 Amendment – Annual improvements to IFRS Accounting Standards
IFRS 1 First-time Adoption of International Financial Reporting Standards:
IFRS 1 First-time Adoption of International Financial Reporting Standards was amended to improve its consistency in wording with the requirements in IFRS 9 Financial Instruments; and add cross-references to improve the understandability of IFRS 1.

IFRS 7 Financial Instruments:
Gain or loss on derecognition: The amendment addresses a potential confusion in IFRS 7 arising from an obsolete reference to a paragraph that was deleted from the standard when IFRS 13 Fair Value Measurement was issued.

Disclosure of deferred difference between fair value and transaction price: The amendment addresses an inconsistency between paragraph 28 of IFRS 7 and its accompanying implementation guidance that arose when a consequential amendment resulting from the issuance of IFRS 13 was made to paragraph 28, but not to the corresponding paragraph in the implementation guidance.

Introduction and credit risk disclosures: The amendment addresses a potential confusion by clarifying in paragraph IG1 that the guidance does not necessarily illustrate all the requirements in the referenced paragraphs of IFRS 7 and by simplifying some explanations. These amendments were effective on 1 January 2026. These amendments did not have any material impact on the Group as at the reporting period.

3.1 IFRS Accounting standards - continued
(a) Changes in material accounting policies and disclosures -continued

IFRS 9 Financial Instruments:

Initial measurement of trade receivables: The amendments remove the conflict between IFRS 9 and IFRS 15 over the amount at which a trade receivable is initially measured. Under IFRS 15, a trade receivable may be recognised at an amount that differs from the transaction price – e.g. when the transaction price is variable. Conversely, IFRS 9 requires that companies initially measure trade receivables without a significant financing component at the transaction price.

The IASB has amended IFRS 9 to require companies to initially measure a trade receivable without a significant financing component at the amount determined by applying IFRS 15. Amendment on trade receivables could prompt accounting policy change.

Derecognition of a lease liability: If a lease liability is derecognised, the derecognition is accounted for under IFRS 9. However, when a lease liability is modified, the modification is accounted for under IFRS 16 Leases. The IASB's amendment states that when lease liabilities are derecognised under IFRS 9, the difference between the carrying amount and the consideration paid is recognised in profit or loss. These amendments are effective for annual periods beginning on or after 1 January 2026. Earlier application is permitted. The Group is currently evaluating the impact of the standards and interpretations issued/amended not yet effective.

IFRS 10 Consolidated Financial Statements:
The amendment addresses a potential confusion arising from an inconsistency between paragraphs B73 and B74 of IFRS 10 related to an investor determining whether another party is acting on its behalf by aligning the language in both paragraphs.

These amendments were effective on 1 January 2026. These amendments did not have any material impact on the Group as at the reporting period

IAS 7 Statement of Cash Flows:

This amendment replaces the term 'cost method' in paragraph 37 of IAS 7 with 'at cost'. This amendment are effective for annual periods beginning on or after 1 January 2026. Earlier application is permitted. The Group is currently evaluating the impact of the standards and interpretations issued

Amendments to the Classification and Measurement of Financial Instruments (Amendment to IFRS 9 and IFRS 7)

The International Accounting Standards Board (IASB) issued amendments to the classification and measurement requirements in IFRS 9 Financial Instruments. The key amendments include the following:

Settlement of financial liabilities through electronic payment systems: The amendments clarify that a financial liability is derecognised on the 'settlement date'. However, the amendments provide an exception for the derecognition of financial liabilities. This exception allows the company to derecognise its trade payable before the settlement date when it uses an electronic payment system, provided that specified criteria are met.

3 Basis of preparation - continued
(a) Changes in material accounting policies and disclosures -continued

Additional SPPI Test for Contingent Features: The amendments introduce an additional SPPI test for financial assets with contingent features that are not directly related to a change in basic lending risks or costs – for example, where the cash flows change depending on whether the borrower meets an ESG target specified in the loan contract. Under the amendments, certain financial assets, including those with ESG-linked features, could now meet the SPPI criterion, provided that their cash flows are not significantly different from an identical financial asset without such a feature.
Clarification on Contractually Linked Instruments (CLIs): The amendments clarify the key characteristics of CLIs and how they differ from financial assets with non-recourse features. They also include factors that a company needs to consider when assessing the cash flows underlying a financial asset with non-recourse features (the 'look through' test).
Additional Disclosure Requirements: The amendments require additional disclosures for investments in equity instruments designated at fair value through other comprehensive income and financial instruments with contingent features that are not directly related to a change in basic lending risks or costs and are not measured at fair value through profit or loss. These amendments were effective on 1 January 2026. These amendments did not have any material impact on the Group as at the reporting period.

3.2 Standards and interpretations issued/amended but not yet effective
The following standards have been issued or amended by the IASB but are yet to become effective for annual periods beginning on 1 January 2026:

IFRS 18 – Presentation and Disclosure in Financial Statements

In April 2024, the Board issued IFRS 18 Presentation and Disclosure in Financial Statements which replaces IAS 1 Presentation in Financial Statements.

IFRS 18 introduces new categories and subtotals in the statement of profit or loss. It also requires disclosure of management-defined performance measures (as defined) and includes new requirements for the location, aggregation and disaggregation of financial information. The objective of the Standard is to set out requirements for the presentation and disclosure of information in general purpose financial statements to help ensure they provide relevant information that faithfully represents an entity's assets, liabilities, equity, income and expenses.

For the purposes of classifying its income and expenses into the categories required by IFRS 18, an entity will need to assess whether it has a 'main business activity' of investing in assets or providing financing to customers, as specific classification requirements will apply to such entities. Determining whether an entity has such a specified main business activity is a matter of fact and circumstances which requires judgement. An entity may have more than one main business activity.

IFRS 18 introduces the concept of a management-defined performance measure (MPM) which it defines as a subtotal of income and expenses that an entity uses in public communications outside financial statements, to communicate management's view of an aspect of the financial performance of the entity as a whole to users. IFRS 18 is effective for reporting periods beginning on or after 1 January 2027 and will apply retrospectively. Early adoption is permitted and must be disclosed. The Group is currently evaluating the impact of the standards and interpretations issued/amended not yet effective.

IFRS 18, and the amendments to the other accounting standards, is effective for reporting periods beginning on or after 1 January 2027 and will apply retrospectively. Early adoption is permitted and must disclose the expected impact of adoption.

Subsidiaries without Public Accountability Disclosures: IFRS 19 Effective for annual periods beginning on or after 1 January 2027.

IFRS 19 is effective for reporting periods beginning on or after 1 January 2027 and earlier adoption is permitted.
If an eligible entity chooses to apply the standard earlier, it is required to disclose that fact. An entity is required, during the first period (annual and) in which it applies the standard, to align the disclosures in the comparative period with the disclosures included in the current period under IFRS 19, unless IFRS 19 or another IFRS accounting standard permits or requires otherwise. The entity need to disclose the expected impact of adoption.

Material accounting policies

3.3 Basis of consolidation

(a) Subsidiaries

Subsidiaries are entities over which the Group exercises control.

Control is achieved when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the activities of the entity:

[i] power over the investee;
[ii] exposure, or rights, to variable returns from its involvement with the investee; and
[iii] the ability to use its power over the investee to affect the amount of the investor's returns

The Group reassess periodically whether it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed. The existence and effect of potential voting rights are considered when assessing whether the group controls another entity.

The Group assesses existence of control where it does not have more than 50% of the voting power i.e. when it holds less than a majority of the voting rights of an investee. The group considers all relevant facts and circumstances in assessing whether or not it's voting rights are sufficient to give it power, including:

[i] a contractual arrangement between the group and other vote holders
[ii] rights arising from other contractual arrangements
[iii] the group's voting rights (including voting patterns at previous shareholders' meetings)
[iv] potential voting rights

The subsidiaries are included in the consolidated financial statements from the date on which control commences until the date on which control ceases.
Subsidiaries are measured at cost less impairment in the separate financial statement.

(b) Business combinations

The Group applies IFRS 3 *Business Combinations (revised)* in accounting for business combinations.

Business combinations are accounted for using the acquisition method as at the acquisition date, which is the date on which control is transferred to the Group. Control is the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. In assessing control, the Group takes into consideration potential voting rights and requirements for regulatory approvals where considered substantive.

The Group measures goodwill at the acquisition date as:

- the fair value of the consideration transferred; plus
- the recognised amount of any non-controlling interests in the acquiree; plus if the business combination is achieved in stages, the fair value of the pre-existing equity interest in the acquiree; less
- the net recognised amount (generally fair value) of the identifiable assets acquired and liabilities assumed.

Goodwill from business acquisition are tested annually for impairment. When this total is negative, a gain from bargain purchase is recognised immediately in statement of profit or loss.

The consideration transferred in the acquisition is generally measured at fair value, as are the identifiable net assets acquired and does not include amounts related to the settlement of pre-existing relationships. Such amounts are generally recognised in the statement of profit or loss.

Transactions costs related to the acquisition, other than those associated with the issue of debt or equity securities, that the Group incurs in connection with a business combination are expensed as incurred.

Material accounting policies - continued

3.3 Basis of consolidation - continued

(b) Business combinations - continued

Any contingent consideration payable is measured at fair value at the acquisition date. If the contingent consideration is classified as equity, then it is not re-measured and settlement is accounted for within equity. Otherwise, subsequent changes in the fair value of the contingent consideration are recognised in the income statement.

When share-based payment awards (replacement awards) are required to be exchanged for awards held by the acquiree's employees (acquiree's awards) and relate to past services, then all or a portion of the amount of the acquirer's replacement awards is included in measuring the consideration transferred in the business combination. This determination is based on the market-based value of the replacement awards compared with the market-based value of the acquiree's awards and the extent to which the replacement awards relate to past and/or future service.

The Group elects on a transaction-by-transaction basis whether to measure non-controlling interest at its fair value, or at its proportionate share of the recognised amount of the identifiable net assets, at the acquisition date.

Measurement Period Adjustments

Where the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports provisional amounts for the items for which the accounting is incomplete. During the measurement period, which shall not exceed one year from the acquisition date, the Group retrospectively adjusts the provisional amounts recognised at the acquisition date to reflect new information obtained about facts and circumstances that existed as of the acquisition date and, if known, would have affected the measurement of the amounts recognised.

Measurement period adjustments may result in changes to the fair values of identifiable assets acquired and liabilities assumed, including identifiable intangible assets, with a corresponding adjustment to goodwill. Comparative information for prior periods presented is revised retrospectively as if the accounting for the business combination had been completed at the acquisition date.

After the measurement period ends, revisions to estimates are recognised only to correct an error in accordance with IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors and are not

(c) Loss of control

Upon loss of control, the Group derecognises the assets and liabilities of the subsidiary, any non-controlling interests and the other components of equity related to the subsidiary. Any surplus or deficit arising on the loss of control is recognised in the statement of profit or loss. If the Group retains any interest in the previous subsidiary, then such interest is measured at fair value at the date that control is lost. Subsequently it is accounted for as an equity-accounted investee or in accordance with the Group's accounting policy for financial instruments.

(d) Disposal of subsidiaries

When the Group ceases to have control, any retained interest in the entity is remeasured to its fair value at the date when control is lost, with the change in carrying amount recognised in income statement. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to the income statement.

The gain/loss arising from disposal of subsidiaries is included in the profit/loss of discontinued operations in the statement of comprehensive income, if the disposed subsidiary meets the criteria specified in IFRS 5.

Foreign currency translation differences become realised when the related subsidiary is disposed.

when a parent company disposes of a partial interest in a subsidiary but retains control, this transaction is treated as an equity transaction. In such cases, no gain or loss is recognised in profit or loss; instead, the transaction affects the equity of the parent company. The difference between the proceeds from the disposal and the carrying amount of the interest sold is recorded as an adjustment to equity, reflecting the nature of the transaction as one between owner.

Material accounting policies - continued

3.3 Basis of consolidation - continued

(e) Changes in ownership interests in subsidiaries without change of control

Consolidated financial statements

Transactions with non-controlling interests that do not result in a loss of control are accounted for as equity transactions, being transactions with owners in their capacity as owners. The carrying amounts of the controlling and non-controlling interests are adjusted to reflect changes in their relative interests in the subsidiary. Any difference between the consideration paid or received and the adjustment to the non-controlling interest is recognised directly in equity and attributed to the owners of the Bank. No gain or loss is recognised in profit or loss.

Separate financial statements

In the separate financial statements, investments in subsidiaries are carried at cost. Where the Bank disposes of or acquires an additional interest in a subsidiary without losing control, the carrying amount of the investment is adjusted to reflect the proportion of the interest disposed of or acquired. Any difference between the consideration paid or received and the carrying amount of the portion of the investment acquired or disposed of is recognised in statement of comprehensive income.

(f) Transactions eliminated on consolidation

Inter-company transactions, balances, income and expenses on transactions between group companies are eliminated. Profits and losses resulting from intercompany transactions that are recognised in assets are also eliminated unless the transaction provides evidence of an impairment of the transferred asset. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the group.

(g) Non controlling interest

The group recognises non-controlling interests in an acquired entity either at fair value or at the noncontrolling interest's proportionate share of the acquired entity's net identifiable assets. This decision is made on an acquisition-by-acquisition basis.

3.4 Segment reporting

An operating segment is a component of the Group that engages in business activities from which it can earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the Group's other components, whose operating results are reviewed regularly by the Executive Committee (being the chief operating decision maker) to make decisions about resources allocated to each segment and assess its performance, and for which discrete financial information is available.

Segment results that are reported to the Executive Committee include items that are directly attributable to a segment as well as those that can be allocated on a reasonable basis. Unallocated Segments represents all other transactions than are outside the normal course of business and can not be directly related to a specific segment financial information

3.5 Foreign currency translation

(a) Functional and presentation currency

Items included in the financial statements of each of the group's entities are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The consolidated financial statements are presented in Naira', which is the Company's presentation currency.

The Group in the normal course of business sets up Structured Entries (SEs) for the sole purpose of raising finance in foreign jurisdictions. The SEs raises finance in the currency of their jurisdictions and pass the proceeds to the group entity that set them up. All costs and interest on the borrowing are borne by the sponsoring group entity. These SEs are deemed to be extensions of the sponsoring entity, and hence, their functional currency is the same as that of the sponsoring entity.

Material accounting policies - continued

3.5 Foreign currency translation - continued

(b) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are re-measured. Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the exchange rate at the reporting date. The foreign currency gain or loss on monetary items is the difference between the amortised cost in the functional currency at the beginning of the period, adjusted for effective interest, impairment and payments during the period, and the amortised cost in the foreign currency translated at the spot exchange rate at the end of the period. Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated into the functional currency at the exchange rate when the fair value is determined. Non-monetary items that are measured based on historical cost in a foreign currency are translated at the exchange rate at the date of the transaction.

Foreign currency differences arising on translation are generally recognised in profit or loss. However, foreign currency differences arising from the translation of the following items are recognised in OCI:

- equity investments in respect of which an election has been made to present subsequent changes in fair value in OCI;
- a financial liability designated as a hedge of the net investment in a foreign operation to the extent that the hedge is effective; and
- qualifying cash flow hedges to the extent that the hedges are effective.

(c) Group Entities

The results and financial position of all the group entities that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

[i] assets and liabilities for each balance sheet presented are translated at the closing rate at the reporting date of that balance sheet;

[ii] income and expenses for each income statement are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the rate on the dates of the transactions); and

[iii] all foreign currency differences are recognised in OCI and accumulated in the translation reserve, except to the extent that the translation difference is allocated to NCI.

When a partial or full disposal of a foreign operations resulted in lost of control, the cumulative amount in the translation reserve related to that foreign operation is reclassified to profit or loss as as part of the gain or loss on disposal. If the group disposes of only part of its interest in a subsidiary that includes a foreign operation while retaining control, then the relevant proportion of the cumulative amount is re-attributed to NCI.

Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate. Exchange differences arising are recognised in other comprehensive income.

(d) Hyperinflationary Accounting

Discontinuation of Hyperinflation

The Group discontinues the application of IAS 29 Financial Reporting in Hyperinflationary Economies once the relevant economy is assessed to have ceased being hyperinflationary, in line with IAS 29 requirements.
When hyperinflationary accounting ceases, the amounts expressed in the measuring unit current at the end of the last reporting period in which IAS 29 was applied are used as the basis for the carrying amounts in subsequent financial statements. These restated balances are treated as the opening balances for future periods and are not subsequently re indexed.
Judgement is required in determining when an economy ceases to be hyperinflationary, taking into consideration indicators such as improvements in macroeconomic stability, sustained decreases in inflation, and other qualitative economic factors, in accordance with IAS 29.38. For the Group's operations in Ghana, the application of IAS 29 was discontinued in December 2025, as the Ghanaian economy was assessed to have ceased hyperinflation. Consequently, restated figures as at December 2025, being the last period in which IAS 29 was applied, have been used as the basis for carrying amounts in subsequent reporting periods.

3.6 Operating income

It is the Group's policy to recognise revenue from a contract when it has been approved by both parties, rights have been clearly identified, payment terms have been defined, the contract has commercial substance, and collectability has been ascertained as probable.

Revenue is recognised when control of goods or services have been transferred. Control of an asset refers to the ability to direct the use of and obtain substantially all of the remaining benefits (potential cash inflows or savings in cash outflows) associated with the asset.

Principal versus Agency considerations

The Group is the principal in an arrangement where it obtains control of the goods or services of another party in advance of transferring control of those goods or services to a customer. The Group is the principal in its card services.
The Group is an agent where its performance obligation is to arrange for another party to provide the goods and services. The Group is the agent in its arrangement with mobile network providers, card vendors and insurance companies.

Where the group is acting as an agent, it recognises as revenue only the commission retained by the group (in other words, revenue is recognised net of the amounts paid to the principal). Where the group is the principal, it will recognise as revenue the gross amount paid and allocated to the performance obligation. It will also recognise an expense for the direct costs of satisfying the performance obligation.

(a) Interest income and expense

Interest income and expense for all interest-bearing financial instruments are recognised within "interest income" and "interest expense" in the consolidated and separate income statement using the effective interest method.

The Group calculates interest income by applying the Effective interest rate (EIR) to the gross carrying amount of financial assets other than credit-impaired assets.

When a financial asset becomes credit-impaired and is, therefore, regarded as 'Stage 3', the Group calculates interest income by applying the effective interest rate to the net amortised cost of the financial asset. If the financial assets is no longer credit-impaired, the Group reverts to calculating interest income on a gross basis.

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts the estimated future cash payments and receipts through the expected life of the financial asset or liability (or, where appropriate, a shorter period) to the net carrying amount of the financial asset or liability. When calculating the effective interest rate, the Group estimates future cash flows considering all contractual terms of the financial instruments but not future credit losses.

Material accounting policies - continued

3.6 Operating income - continued

The calculation of the effective interest rate includes contractual fees paid or received, transaction costs, and discounts or premiums that are an integral part of the effective interest rate. Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or liability.

Interest income and expense presented in the statement of comprehensive income include:

- interest on financial assets and financial liabilities measured at amortised cost calculated on an effective interest rate basis.
- interest on fair value through other comprehensive income investment securities calculated on an effective interest basis.

Interest income on fair value through profit or loss instruments is recognised using the contractual interest rate on investment securities.

(b) Modification gain or loss

A modification gain or loss arises when the terms of a financial instrument are modified or changed, leading to a difference between the present value of the revised cash flows and the present value of the original cash flows, discounted at the original effective interest rate.

IFRS 9: Financial Instruments provide guidance on the accounting treatment for modifications of financial instruments.

When the terms of a financial instrument (such as a loan) are modified, the entity must assess whether the modification is considered a substantial modification or a non-substantial modification.

a) Substantial Modification
b) Non-Substantial Modification

If the modification is not substantial, the carrying amount of the original financial instrument is adjusted to reflect the new cash flows, discounted at the original effective interest rate.

The difference between the original carrying amount and the revised carrying amount is recognised immediately in the income statement as a modification gain or loss.

(c) Fees and commission income and expense

Fees and commission income and expenses that are integral to the effective interest rate on a financial asset or liability are included in the measurement of the effective interest rate.

Fee and commission presented in the income statement includes:

- Credit related fees: This includes advisory, penal and commitment fees. These are fees charged for administration and advisory services to the customer up to the customer's acceptance of the offer letter. The advisory and commitment fees are earned at the point in time where the customer accepts the offer letter which is when the Group recognises its income. These fees are not integral to the loan, therefore, they are not considered in determining the effective interest rate. The penal fee on default also forms part of the items warehoused in this line. When a loan commitment is not expected to result in the draw-down of a loan, loan commitment fees are recognised on a straight-line basis over the commitment period.

- Account maintenance fees: These are fees charged to current accounts. N1 on every N1,000 in respect of all customer induced debit transactions is charged on these accounts. These fees are earned by the Group at the time of each transaction and the Group recognises its income accordingly.
- Card maintenance fees: The Group charges these fees to customers for maintaining their cards. The fees are earned and recognised by the Group over the validity period of the card. The Group charges the customers for this service on a monthly basis.
- Other fees and commission income, includes commission on bills and letters of credit, account handling charge, commissions on other financial services, commission on foreign currency denominated transactions, channel and other e-business income, and retail account charges. These fees and commissions are recognised as the related services are performed.

Material accounting policies - continued

3.6 Operating income - continued

Fees and commissions expenses are fees charged for the provision of services to customers transacting on alternate channels platform of the Group and on the various debit and credit cards issued for the purpose of these payments. They are charged to the Group on services rendered on internet Grouping, mobile Grouping and online purchasing platforms. The corresponding income lines for these expenses include the income on cards (both foreign and local cards), online purchases and bill payments included in fees and commissions.

(d) Net loss/gains on financial instruments at fair value

Net loss/gains on financial instruments comprise of the following:

- Net gains/losses on financial instruments classified as fair value through profit or loss: This includes the gains and losses arising both on sale of trading instruments and from changes in fair value of derivatives and non-derivative instruments measured at fair value through profit or loss.

- Net gains on financial instruments held as Fair value through other comprehensive income: This relates to gains arising from the disposal of financial instruments held as Fair value through other comprehensive income as well as fair value changes reclassified from other comprehensive income upon disposal of debt instruments carried at fair value through other comprehensive income.

(e) Net Foreign exchange gain and losses

Net foreign exchange gain and losses include realised and unrealised foreign exchange gains or losses on revaluation of the foreign currency denominated transactions

(f) Other operating income

Other operating income includes items such as dividends, gains on disposal of properties, rental income, income from asset management, brokerage and agency as well as income from other investments.

Dividend on Fair value through profit or loss equity securities: This is recognised net of withholding tax when the right to receive payment is established. Dividends are reflected as a component of other operating income in the income statement.

3.7 Income tax

The tax expense for the period comprises current and deferred tax. Tax is recognised in the income statement, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

(a) Current tax

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Bank and its subsidiaries operate and generate taxable income. Following the enactment of the Nigeria Tax Act, 2025 (NTA), which repealed and consolidated the Companies Income Tax Act (CITA) and other extant tax laws with effect from 1 January 2026, the Bank calculates its income tax expense in accordance with the provisions of the NTA and the Nigeria Tax Administration Act, 2025 (NTAA), which governs the administration and assessment of taxes payable thereunder. Management periodically evaluates positions taken in tax returns with respect to situations in which the applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities. This is recognised in the current tax liabilities caption in the statement of financial position and considers whether it is probable that a taxation authority will accept an uncertain tax treatment. The Group measures its tax balances either based on the most likely amount or the expected value, depending on which method provides a better prediction of the resolution of the uncertainty.

Current tax assets and liabilities are offset only if certain criteria are met.

Material accounting policies - continued

3.7 Income tax - continued

(b) Minimum tax

Following the enactment of the Nigeria Tax Act, 2025 (NTA), which took effect from 1 January 2026 and repealed the minimum tax provisions previously applicable under the Finance Act, 2019, the Group is now subject to a minimum effective tax rate (ETR) of 15% of Net Income. This applies to Nigerian companies that are members of a multinational group that have an annual turnover of N50 billion or above. Net Income for this purpose is defined as profit before tax, excluding franked investment income and unrealised gains or losses. Where the Group's effective tax rate on this basis falls below 15%, a top-up tax is payable to bring the effective rate to the statutory minimum. This is shown in note 16.

(c) Deferred tax

Deferred income tax is recognised, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated statement of financial position. However, deferred tax liabilities are not recognised if they arise from the initial recognition of goodwill; deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred tax assets are recognised for unused tax losses, unused tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be used. Future taxable profits are determined based on the reversal of relevant taxable temporary differences. If the amount of taxable temporary differences is insufficient to recognise a deferred tax asset in full, then future taxable profits, adjusted for reversals of existing temporary differences, are considered, based on business plans for individual subsidiaries in the Group. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised; such reductions are reversed when the probability of future taxable profits improves. Unrecognised deferred tax assets are reassessed at each reporting date and recognised to the extent that it has become probable that future taxable profits will be available against which they can be used.

The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Group expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities. For this purpose, the carrying amount of investment property measured at fair value is presumed to be recovered through sale, and the Group has not rebutted this presumption.

(d) Tax windfall

The Nigerian government, through the Finance (Amendment) Bill 2024, imposed a 70% windfall tax on realised profits from foreign exchange transactions by banks in the 2023, 2024 and 2025 financial years, to be assessed and collected by the Federal Inland Revenue Service (FIRS) now The Nigeria Revenue Service (NRS). This has been treated by making a provision for this in the company income tax computation for 2025 for the 2025 financial year. There is no provision for the windfall levy for the period ended 30 September 2026, as the assessment period concluded in December 31, 2025 in line with Finance (Amendment) Bill 2024.

3.8 Financial assets and liabilities

Investments and other financial assets

Recognition and derecognition

The Group initially recognises financial instruments (including regular-way purchases and sales of financial assets) on the settlement date, which is the date that the instrument is delivered to or by the Group.

Material accounting policies - continued

3.8 Financial assets and liabilities - continued

(a) Financial assets

i ***Classification***

The group classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through OCI or through profit or loss), and
- those to be measured subsequently at amortised cost.

The classification for debt financial assets depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will either be recorded in profit or loss or OCI. For investments in equity instruments that are not held for trading, this will depend on whether the group has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income (FVOCI). The group reclassifies debt investments when and only when its business model for managing those assets changes. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the group has transferred substantially all the risks and rewards of ownership.

Measurement

At initial recognition, the group measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss (FVPL), transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVPL are expensed in profit or loss. Where the fair value is different from the transaction price, the resulting gain or loss is recognised in trading gains or losses on financial instruments only when the fair value is evidenced by a quoted price in an active market for an identical asset (i.e. level 1 input) or based on a valuation technique that uses only data from observable markets."

ii ***Debt instruments***

Subsequent measurement of debt instruments depends on the group's business model for managing the asset and the contractual cash flow characteristics of the asset. There are three measurement categories into which the group classifies its debt instruments:

- Amortised cost: Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. Interest income from these financial assets is included in interest income using the effective interest rate method. Any gain or loss arising on derecognition is recognised directly in profit or loss and presented in Net (loss)/gain on financial instruments at fair value together with foreign exchange gains and losses. Impairment losses are presented as separate line item in the statement of profit or loss.

- FVOCI: Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVOCI. Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest income and foreign exchange gains and losses which are recognised in profit or loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss and recognised in other operating income. Interest income from these financial assets is included in interest income using the effective interest rate method. Foreign exchange gains and losses are presented in net gains/(loss) on financial instruments at fair value and impairment expenses are presented as separate line item in net impairment charge on financial assets.

- FVPL: Assets that do not meet the criteria for amortised cost or FVOCI are measured at FVPL. A gain or loss on a debt investment that is subsequently measured at FVPL is recognised in profit or loss and presented net within net gains/(loss) on financial instruments at fair value in the period in which it arises.

Material accounting policies - continued

3.8 Financial assets and liabilities - continued

If in a subsequent period, the fair value of an impaired fair value through other comprehensive income debt security increases and the increase can be related objectively to an event occurring after the impairment loss was recognised, then the impairment loss is reversed through the income statement; otherwise, any increase in fair value is recognised through OCI.

The Group only measures cash and balances with Groups, Loans and advances to Groups and customers and other financial investments at amortised cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

The details of these conditions are outlined below.

iii Business model assessment

The Group determines its business model at the level that best reflects how it manages groups of financial assets to achieve its business objective.

The Group's business model is not assessed on an instrument-by-instrument basis, but at a higher level of aggregated portfolios and is based on observable factors such as:

- How the performance of the business model and the financial assets held within that business model are evaluated and reported to the entity's key management personnel.
- The risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way those risks are managed.
- How managers of the business are compensated (for example, whether the compensation is based on the fair value of the assets managed or on the contractual cash flows collected).
- The expected frequency, value and timing of sales are also important aspects of the Group's assessment.

The business model assessment is based on reasonably expected scenarios without taking 'worst case' or 'stress case' scenarios into account. If cash flows after initial recognition are realised in a way that is different from the Group's original expectations, the Group does not change the classification of the remaining financial assets held in that business model, but incorporates such information when assessing newly originated or newly purchased financial assets going forward.

iv The SPPI test

As a second step of its classification process, the Group assesses the contractual terms of financial instruments to identify whether they meet the SPPI test.

'Principal' for the purpose of this test is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset (for example, if there are repayments of principal or amortisation of the premium/discount).

The most significant elements of interest within a lending arrangement are typically the consideration for the time value of money and credit risk. To make the SPPI assessment, the Group applies judgement and considers relevant factors such as the currency in which the financial asset is denominated, and the period for which the interest rate is set.

In contrast, contractual terms that introduce a more than de minimis exposure to risks or volatility in the contractual cash flows that are unrelated to a basic lending arrangement do not give rise to contractual cash flows that are solely payments of principal and interest on the amount outstanding. In such cases, the financial asset is required to be measured at FVPL.

v *Equity instruments*

The group initially measures all equity investments at fair value through profit or loss. Where the group's management has elected to present fair value gains and losses on equity investments in OCI, there is no subsequent reclassification of fair value gains and losses to profit or loss following the derecognition of the investment. Dividends from such investments continue to be recognised in profit or loss as other income when the group's right to receive payments is established.

Changes in the fair value of financial assets at FVPL are recognised in net gains/(loss) on financial instrument at fair value in the statement of profit or loss as applicable.

Material accounting policies - continued

(b) Financial Liabilities

Financial liabilities that are not classified at fair value through profit or loss are measured at amortised cost using the effective interest method. Amortised cost is calculated by taking into account any discount or premium on issue funds, and costs that are an integral part of the EIR. A compound financial instrument which contains both a liability and an equity component is separated at the issue date. Interest expense is included in 'Interest expense' in the Statement of comprehensive income.

Financial liabilities that are classified at fair value through profit or loss include derivatives, financial liabilities held for trading and other financial liabilities designated as such at initial recognition. Gains and losses attributable to changes in Group's credit risk are recognised in other comprehensive income and the fair value of the liability are recognised in profit or loss.

If recognition of own credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss, all fair value gains/losses are recognised in profit or loss.

The table below reconciles classification of financial instruments to the respective IFRS 9 category.

Financial assets	Financial assets at fair value through profit or loss
	Financial assets at amortised cost
	Fair value through other comprehensive income
Financial liabilities	Financial liabilities at fair value through profit or loss
	Financial liabilities at amortised cost

(c) Classification of financial assets

[i] Fair value through profit or loss

This category comprises financial assets classified as hold to sell upon initial recognition.

A financial asset is classified as fair value through profit or loss if it is acquired or incurred principally for the purpose of selling or repurchasing it in the near term or if it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking. Derivatives are also categorised measured at fair value through profit or loss unless they are designated and effective as hedging instruments. Financial assets held for trading consist of debt instruments, including money-market instruments, as well as financial assets with embedded derivatives. They are recognised in the consolidated statement of financial position as ‘non-pledged trading assets’.

Financial assets included in this category are recognised initially at fair value; transaction costs are taken directly to the consolidated income statement. Gains and losses arising from changes in fair value are included directly in the consolidated income statement and are reported as " Net (loss)/gain on financial instruments at fair value". Interest income and expense and dividend income on financial assets held for trading are included in ‘Interest income’, "Interest expense' or ‘Other operating income’, respectively. The instruments are derecognised when the rights to receive cash flows have expired or the Group has transferred substantially all the risks and rewards of ownership and the transfer qualifies for derecognising.

The Group is mandated to classify certain financial assets upon initial recognition as at fair value through profit or loss (fair value option) when the following conditions are met:

- The asset does not meet the solely principal and interest on the principal amount outstanding (SPPI) test
- The financial asset is held within a business model whose objective is achieved by selling financial assets.

The Group may designate certain financial assets upon initial recognition as at fair value through profit or loss (fair value option). This designation cannot subsequently be changed. The fair value option is only applied when the designation eliminates or significantly reduces an accounting mismatch which would otherwise arise.

Material accounting policies - continued

(c) Classification of financial assets - continued

[ii] Amortised cost

Amortised cost financial assets are assets that are held for collection of contractual cashflows, where those cashflows represent solely payments of principal and interest.

These are initially recognised at fair value including direct and incremental transaction costs and measured subsequently at amortised cost, using the effective interest method. Any sale or reclassification of a significant amount of amortised cost investments not close to their maturity would result in a reassessment of the Group's business model for managing the assets. However, sales and reclassifications in any of the following circumstances would not trigger a reclassification:

- Sales or reclassification that are so close to maturity that changes on the market rate of interest would not have a significant effect on the financial asset's fair value.
- Sales or reclassification after the Group has collected substantially all the asset's original principal.
- Sales or reclassification attributable to non-recurring isolated events beyond the Group's control that could not have been reasonably anticipated.

Interest on amortised cost investments is included in the consolidated income statement and reported as 'Interest income'. In the case of an impairment, the impairment loss is been reported as a deduction from the carrying value of the investment and recognised in the consolidated income statement as 'net impairment loss on financial assets'. Amortised cost investments include treasury bills and bonds.

[iii] Fair value through other comprehensive income

Financial assets at fair value through other comprehensive income are assets that are held for the collection of contractual cashflows and selling of the financial assets where the asset's cashflow represents solely payments of principal and interest.

Unquoted equity securities that have been elected as fair value through other comprehensive and other fair value through other comprehensive income investments are carried at fair value.

Interest income is recognised in the income statement using the effective interest method. Dividend income is recognised in the income statement when the rights to receive the dividend are established and the Group becomes entitled to the dividend. Foreign exchange gains or losses on such investments are recognised in the income statement.

Other fair value changes are recognised directly in other comprehensive income until the debt investment is sold or impaired whereupon the cumulative gains and loses previously recognised in other comprehensive income are recognised to the income statement as a reclassification adjustment.

Fair value through other comprehensive income instruments include investment securities and equity investments that are so elected.

(d) Classification of financial liabilities

The Group classifies its financial liabilities, other than financial guarantees and loan commitments, as measured at amortised cost or fair value through profit or loss.

Material accounting policies - continued

(d) Classification of financial liabilities - continued

(i) Financial liabilities at amortised cost

Financial liabilities that are not classified as at fair value through profit or loss are measured at amortised cost using the effective interest method. Interest expense is included in 'Interest expense' in the Statement of comprehensive income.

Deposits and debt securities issued are the Group's sources of debt funding. When the Group sells a financial asset and simultaneously enters into a "repo" or "stock lending" agreement to repurchase the asset (or a similar asset) at a fixed price on a future date, the arrangement is accounted for as a deposit, and the underlying asset continues to be recognised in the Group's financial statements as pledged assets.

The Group classifies debt instruments as financial liabilities in accordance with the contractual terms of the instrument.

Deposits and debt securities issued are initially measured at fair value minus incremental direct transaction costs, and subsequently measured at their amortised cost using the effective interest method, except where the Group designates liabilities at fair value through profit or loss.

On this statement of financial position, other financial liabilities carried at amortised cost include deposit from Groups, deposit from customers, interest bearing borrowings, debt securities issued and other liabilities.

(ii) Financial liabilities at fair value

The Group may enter into a variety of derivative financial instruments to manage its exposure to interest rate and foreign exchange rate risk, including foreign exchange forward contracts, interest rate swaps and foreign currency options. Further details of derivative financial instruments are disclosed in Note 21 to the financial statements.

Derivatives are initially recognised at fair value at the date a derivative contract is entered into and are subsequently remeasured to their fair value at each balance sheet date. A derivative with a positive fair value is recognised as a financial asset whereas a derivative with a negative fair value is recognised as a financial liability. The resulting gain or loss is recognised in profit or loss immediately unless the derivative is designated and effective as a hedging instrument, in which event the timing of the recognition in profit or loss depends on the nature of the hedge relationship. Derivatives are presented as financial assets or financial liabilities.

Derivative assets and liabilities are only offset if the transactions are with the same counterparty, a legal right of offset exists and the parties intend to settle on a net basis.

(e) Measurement of financial asset and liabilities

[i] Amortised cost measurement and carrying amount

The amortised cost of a financial asset or liability is the amount at which the financial asset or liability is measured at initial recognition, minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between the initial amount recognised and the maturity amount, minus any reduction for impairment.

The "gross carrying amount of a financial asset" is the amortised cost of a financial asset before adjusting for any expected credit loss allowance.

Material accounting policies - continued

(e) Measurement of financial asset and liabilities - continued

[ii] Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

When available, the Group measures the fair value of an instrument using quoted prices in an active market for that instrument. A market is regarded as active if quoted prices are readily available and represent actual and regularly occurring market transactions on an arm's length basis.

If a market for a financial instrument is not active, the Group establishes fair value using valuation techniques. Valuation techniques include using recent arm's length transactions between knowledgeable, willing parties (if available), reference to the current fair value of other instruments that are substantially the same, and discounted cash flow analysis. The chosen valuation technique makes maximum use of market inputs, relies as little as possible on estimates specific to the Group, incorporates all factors that market participants would consider in setting a price, and is consistent with accepted economic methodologies for pricing financial instruments. Inputs to valuation techniques reasonably represent market expectations and measures of the risk-return factors inherent in the financial instrument. The Group calibrates valuation techniques and tests them for validity using prices from observable current market transactions in the same instrument or based on other available observable market data.

The best evidence of the fair value of a financial instrument at initial recognition is the transaction price – i.e. the fair value of the consideration given or received. However, in some cases, the fair value of a financial instrument on initial recognition may be different to its transaction price. If such fair value is evidenced by comparison with other observable current market transactions in the same instrument (without modification or repackaging) or based on a valuation technique whose variables include only data from observable markets, then the difference is recognised in the income statement on initial recognition of the instrument.

In other cases the difference is not recognised in the income statement immediately but is recognised over the life of the instrument on an appropriate basis or when the instrument is redeemed, transferred or sold, or the fair value becomes observable.

Assets and long positions are measured at a bid price; liabilities and short positions are measured at an asking price. Where the Group has positions with offsetting risks, mid-market prices are used to measure the offsetting risk positions and a bid or asking price adjustment is applied only to the net open position as appropriate. Fair values reflect the credit risk of the instrument and include adjustments to take account of the credit risk of the Group entity and the counterparty where appropriate. Fair value estimates obtained from models are adjusted for any other factors, such as liquidity risk or model uncertainties, to the extent that the Group believes a third-party market participant would take them into account in pricing a transaction.

Reclassification of financial assets and liabilities

(f) Reclassification of financial assets

The Group does not reclassify its financial assets subsequent to their initial recognition, apart from the exceptional circumstances in which the Group changes its business model for managing a financial asset; the Group acquires, disposes of, or terminates a business line. Financial liabilities are never reclassified.

Financial assets other than loans and receivables are permitted to be reclassified out of the fair value through profit or loss category only in rare circumstances arising from a single event that is unusual and highly unlikely to recur in the near-term. In addition, the Group may choose to reclassify financial assets that would meet the definition of loans and receivables out of the fair value through profit or loss or fair value through other comprehensive income categories if the Group has the intention and ability to hold these financial assets for the foreseeable future or until maturity at the date of reclassification.

Reclassifications are made at fair value as of the reclassification date. Fair value becomes the new cost or amortised cost as applicable, and no reversals of fair value gains or losses recorded before reclassification date are subsequently made. Effective interest rates for financial assets reclassified to amortised cost categories are determined at the reclassification date. Further increases in estimates of cash flows adjust effective interest rates prospectively.

Material accounting policies - continued

Reclassification date

The first day of the first reporting period following the change in business model that results in an entity reclassifying financial assets.

A change in the objective of the Group's business model must be effected before the reclassification date. For example, if Group decides on 15 February to shut down its Corporate & investment Grouping business and hence must reclassify all affected financial assets on 1 April (i.e. the first day of the Group's next reporting period), the Group must not accept new Corporate & investment Grouping business or otherwise engage in activities consistent with its former business model after 15 February.

All reclassifications are applied prospectively from the reclassification date.

(g) Derecognition of financial assets and liabilities

Derecognition due to substantial modification of terms and conditions

The Group derecognises a financial asset or liability, such as a loan to a customer, when the terms and conditions have been renegotiated to the extent that, substantially, it becomes a new loan, with the difference recognised as a derecognition in the statement of comprehensive income, to the extent that an impairment loss has not already been recorded. The terms and conditions have been renegotiated substantially if the discounted cash flows under the new terms are at least 10 per cent different from the discounted remaining cash flows of the original terms. The newly recognised loans are classified as Stage 1 for ECL measurement purposes, unless the new loan is deemed to be Purchased or Originated Credit Impaired (POCI).

When assessing whether or not to derecognise a loan to a customer, amongst others, the Group considers the following factors:

- Change in currency of the loan
- Introduction of an equity feature
- Change in counterparty
- If the modification is such that the instrument would no longer meet the SPPI criterion

If the modification does not result in cash flows that are substantially different, the modification does not result in derecognition. Based on the change in cash flows discounted at the original EIR, the Group records a modification gain or loss, to the extent that an impairment loss has not already been recorded. This is recognised in the statement of comprehensive income as part of interest income

(i) Derecognition other than for substantial modification - Financial assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised when the rights to receive cash flows from the financial asset have expired. The Group also derecognises the financial asset if it has both transferred the financial asset and the transfer qualifies for derecognition.

The Group has transferred the financial asset if, and only if, either:

- The Group has transferred its contractual rights to receive cash flows from the financial asset or
- It retains the rights to the cash flows, but has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass–through' arrangement.

Pass-through arrangements are transactions whereby the Group retains the contractual rights to receive the cash flows of a financial asset (the 'original asset'), but assumes a contractual obligation to pay those cash flows to one or more entities (the 'eventual recipients'), when all of the following three conditions are met:

- The Group has no obligation to pay amounts to the eventual recipients unless it has collected equivalent amounts from the original asset, excluding short-term advances with the right to full recovery of the amount lent plus accrued interest at market rates
- The Group cannot sell or pledge the original asset other than as security to the eventual recipients
- The Group has to remit any cash flows it collects on behalf of the eventual recipients without material delay.

In addition, the Group is not entitled to reinvest such cash flows, except for investments in cash or cash equivalents including interest earned, during the period between the collection date and the date of required remittance to the eventual recipients.

For floating-rate financial assets, the original effective interest rate used to calculate the modification gain or loss is adjusted to reflect current market terms at the time of the modification. Any costs or fees incurred and modification fees received adjust the gross carrying amount of the modified financial assets and are amortised over the remaining term of the modified financial asset.

A transfer only qualifies for derecognition if either:

- The Group has transferred substantially all the risks and rewards of the asset or
- The Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset

The Group considers control to be transferred if and only if, the transferee has the practical ability to sell the asset in its entirety to an unrelated third party and is able to exercise that ability unilaterally and without imposing additional restrictions on the transfer.

When the Group has neither transferred nor retained substantially all the risks and rewards and has retained control of the asset, the asset continues to be recognised only to the extent of the Group's continuing involvement, in which case, the Group also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration the Group could be required to pay.

If continuing involvement takes the form of a written or purchased option (or both) on the transferred asset, the continuing involvement is measured at the value the Bank would be required to pay upon repurchase. In the case of a written put option on an asset that is measured at fair value, the extent of the entity's continuing involvement is limited to the lower of the fair value of the transferred asset and the option exercise price.

Material accounting policies - continued

(g) Derecognition of financial assets and liabilities - continued

(ii) Derecognition other than for substantial modification - Financial Liabilities

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expires. Where an existing financial liability is replaced by another from the same lender on substantially different terms such as the beneficiary, tenor, principal amount or the interest rate, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability. The difference between the carrying value of the original financial liability and the consideration paid is recognised in profit or loss.

For floating-rate financial liabilities, the original effective interest rate used to calculate the modification gain or loss is adjusted to reflect current market terms at the time of the modification. Any costs and fees incurred are recognised as an adjustment to the carrying amount of the liability and amortised over the remaining term of the modified financial liability by re-computing the effective interest rate on the instrument.

The Group originates interest and principal strips by separating cash flows from underlying investment portfolios. Upon stripping, the carrying amount of the original debt instrument is allocated between the principal and interest components based on their relative fair values at the date of separation.

As the stripped instrument does not give rise to cash flows that represent solely payments of principal and interest, it is classified and measured at fair value through profit or loss.

Transfers of interest or principal strips are assessed for derecognition on the basis of whether the Group has transferred substantially all the risks and rewards or control of the assets. Transfers that do not meet derecognition criteria are accounted for as secured borrowings and proceeds are recognised as liabilities.

For transfers that meet derecognition criteria, the asset is derecognised and any difference between the carrying amount and the consideration received is recognised in profit or loss within the net (loss)/gains on financial instruments at fair value. The remaining principal or interest component continues to be recognised and subsequently measured at fair value through profit or loss.

(h) Offsetting

Financial assets and liabilities are set off and the net amount presented in the statement of financial position when, and only when, the Group has a legal enforceable right to set off the amounts and intends either to settle on a net basis or to realise the asset and settle the liability simultaneously.

Income and expenses are presented on a net basis only when permitted under IFRSs, or for gains and losses arising from a group of similar transactions such as in the Group's trading activity.

Sale and repurchase agreements

Securities sold subject to repurchase agreements ('repos') remain on the statement of financial position; the counterparty liability is included in amounts due to other Groups, deposits from Groups, other deposits or deposits due to customers, as appropriate. Securities purchased under agreements to resell (reverse repos') are recorded as investment securities. The difference between sale and repurchase price is treated as interest and accrued over the life of the agreements using the effective interest method.

Securities lent to counterparties are also retained in the financial statements. Securities borrowed are not recognised in the financial statements, unless these are sold to third parties, in which case the purchase and sale are recorded with the gain or loss included in Net (loss)/gain on financial instruments at fair value.

Material accounting policies - continued

(i) Measurement of specific financial assets

(i) Measurement of specific financial assets - continued

(i) Cash and balances with Groups

Cash and balances with Groups include notes and coins on hand, balances held with central Groups and highly liquid financial assets with original maturities of less than three months, which are subject to insignificant risk of changes in their fair value, and are used by the Group in the management of its short-term commitments.

In the consolidated statement of cash flows, cash and cash equivalents includes cash in hand, unrestricted balances with foreign and central Groups, money market placements and other short-term highly liquid investments with original maturities of three months or less.

(ii) Repossessed collateral

Repossessed collateral are equities, investment properties or other investments repossessed from a customer and used to settle the outstanding obligation. Such investments are classified in accordance with the intention of the Group in the asset class which they belong and are also separately disclosed in the financial statement.

When collaterals are repossessed in satisfaction of a loan, the receivable is written down against the allowance for losses. Repossessed collaterals are included in the financial statement based on how the Group intends to realise benefit from such collateral such as "Non current assets held for sale" and carried at the lower of cost or estimated fair value less costs to sell, if the Group intends to sell or cost less accumulated depreciation, if for use in the normal course of business.

(iii) Derivative financial instruments

Derivative financial instruments are initially recognised at fair value on the date the derivative contract is entered into and are subsequently measured at fair value through profit or loss (FVTPL). The Group uses derivative instruments, including forward foreign exchange contracts and swaps, to manage exposures to currency risk arising from operational and financing activities.

Fair value is determined using a valuation technique (mark-to-model) that maximises the use of observable market inputs and minimises unobservable inputs. The valuation is based on the interest rate parity (IRP) model, which considers:

- The spot exchange rate at valuation date,
- Relevant currency-specific interest rates over the term of the derivative contract; inclusive of spread for the local currency-specific interest rates
- The time to maturity of the instrument.

This approach reflects the theoretical forward rate derived from the relationship between spot exchange rates and interest rates in each currency, in accordance with economic principles and IFRS 13 requirements.

For derivatives not designated in a hedge accounting relationship, changes in fair value are recognised in profit or loss as they arise.

Where a derivative is designated and qualifies as a hedging instrument in a fair value hedge under IFRS 9, changes in the fair value of both the hedging instrument and the hedged item (attributable to the hedged risk) are recognised in profit or loss.

Derivatives are presented as financial assets when their fair values are positive and as financial liabilities when their fair values are negative.

Material accounting policies - continued

(i) Measurement of specific financial assets - continued

Derivative Modification

The Bank assesses all modifications to derivative contracts to determine whether the amendment represents a continuation of the existing derivative or the extinguishment of the existing derivative and recognition of a new derivative. In making this assessment, the Bank considers the nature and significance of changes to key contractual terms, including maturity, notional amount, underlying currencies, interest rates, cash flow profile and the overall economic characteristics of the instrument.

Where a modification is not considered significant, the derivative continues to be recognised and remeasured at fair value using the amended terms, with resulting fair value changes recognised in profit or loss. Where a modification is considered significant and results in substantial changes to the contractual rights and obligations of the parties, the existing derivative is derecognised and a new derivative is recognised at fair value on the modification date. Any resulting gain or loss is recognised in profit or loss.

(iv) Pledged assets

Financial assets transferred to external parties that do not qualify for de-recognition are reclassified in the statement of financial position from financial assets carried at fair value through profit or loss or investment securities to assets pledged as collateral, if the transferee has received the right to sell or re-pledge them in the event of default from agreed terms.

Initial recognition of assets pledged as collateral is at fair value, whilst subsequent measurement is based on the classification of the financial asset. Assets pledged as collateral are either classified as fair value through profit or loss, Fair value through other comprehensive income or Amortised cost. Where the assets pledged as collateral are classified as fair value through profit or loss, subsequent measurement is at fair value through profit and loss, whilst assets pledged as collateral classified as Fair value through other comprehensive income are measured at fair-value through OCI. Assets pledged as collateral are classified as Amortised cost.

[v] Investment under management

Investment under management are funds entrusted to Asset management firms who acts as agents to the Company for safe keeping and management for investment purpose with returns on the underlying investments accruable to the Company, who is the principal.

The investment decision made by the Asset management is within an agreed portfolio of high quality Nigerian fixed income and money market instruments which are usually short tenured.

The investments are carried at fair value based on the valuation report provided by the asset manager.

3.9 Impairment of financial assets

Overview of the ECL principles

The Group assesses on a forward-looking basis the expected credit losses ('ECL') associated with its debt instrument assets carried at amortised cost and FVOCI and with the exposure arising from loan commitments and financial guarantee contracts. The Group recognises a loss allowance for such losses at each reporting date. The measurement of ECL reflects:

- An unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- The time value of money; and
- Reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

Staging Assessment

The Group has established a policy to perform an assessment, at the end of each reporting period, of whether a financial instrument's credit risk has increased significantly since initial recognition, by considering the change in the risk of default occurring over the remaining life of the financial instrument.

Material accounting policies - continued

3.9 Impairment of financial assets - continued

Overview of the ECL principles - continued

Based on the above process, the Group categorises its financial instruments into Stage 1, Stage 2,Stage 3, as described below. All POCI (Purchased or originated credit impaired) financial instruments are categorised under stage 3.

• Stage 1: When a financial instrument is first recognised, the Group recognises an allowance based on 12m Expected credit Loss. Stage 1 also includes financial instruments where the credit risk has improved (after review over a period of 90 days) and the financial instruments has been reclassified from Stage 2.

• Stage 2: When a financial instrument has shown a significant increase in credit risk since origination, the Group records an allowance for the Lifetime ECLs. Stage 2 financial instruments also include instances, where the credit risk has improved (after review over a period of 90 days) and the financial instrument has been reclassified from Stage 3.

• Stage 3: Financial instruments considered credit-impaired. The Group records an allowance for the Lifetime ECLs.

POCI: Purchased or originated credit impaired (POCI) assets are financial assets that are credit impaired on initial recognition. POCI assets are recorded at fair value at original recognition and interest income is subsequently recognised based on a credit-adjusted EIR. ECLs are only recognised or released to the extent that there is a subsequent change in the expected credit losses.

	Change in credit quality since initial	
Stage 1	Stage 2	Stage 3
(Initial Recognition)	(Initial Recognition)	(Credit-impaired assets)
12-months expected credit losses	Lifetime expected credit losses	Lifetime expected credit losses

Measuring the Expected Credit Loss

The Expected Credit Loss (ECL) is measured on either a 12-month (12M) or Lifetime basis depending on whether a significant increase in credit risk has occurred since initial recognition or whether an asset is considered to be credit-impaired. Expected credit losses are the discounted product of the Probability of Default (PD), Exposure at Default (EAD), and Loss Given Default (LGD), defined as follows:

• The PD represents the likelihood of a borrower defaulting on its financial obligation (as per Definition of default and credit-impaired above), either over the next 12 months (12M PD), or over the remaining lifetime (Lifetime PD) of the obligation.

• EAD is based on the amounts the Group expects to be owed at the time of default, over the next 12 months (12M EAD) or over the remaining lifetime (Lifetime EAD). For example, for a revolving commitment, the Group includes the current drawn balance plus any further amount that is expected to be drawn up to the current contractual limit by the time of default, should it occur.

• Loss Given Default represents the Group's expectation of the extent of loss on a defaulted exposure. LGD varies by type of counterparty, type and seniority of claim and availability of collateral or other credit support. LGD is expressed as a percentage loss per unit of exposure at the time of default (EAD). LGD is calculated on a 12-month or lifetime basis, where 12-month LGD is the percentage of loss expected to be made if the default occurs in the next 12 months and Lifetime LGD is the percentage of loss expected to be made if the default occurs over the remaining expected lifetime of the loan.

The Lifetime PD is developed by applying a maturity profile to the current 12M PD. The maturity profile looks at how defaults develop on a portfolio from the point of initial recognition throughout the lifetime of the loans. The maturity profile is based on historical observed data and is assumed to be the same across all assets within a portfolio and credit grade band. This is supported by historical analysis.

The 12-month and lifetime EADs are determined based on the expected payment profile, which varies by product type.

Material accounting policies - continued

3.9 Impairment of financial assets - continued

Measuring the Expected Credit Loss - continued

• For amortising products and bullet repayment loans, this is based on the contractual repayments owed by the borrower over a 12month or lifetime basis. This will also be adjusted for any expected overpayments made by a borrower. Early repayment/refinance assumptions are also incorporated into the calculation.

• For revolving products, the exposure at default is predicted by taking current drawn balance and adding a credit conversion factor which allows for the expected drawdown of the remaining limit by the time of default. These assumptions vary by product type and current limit utilisation band, based on analysis of the Group's recent default data.

When estimating the ECLs, the Group considers three scenarios (optimistic, best-estimate and downturn) and each of these is associated with different PDs and LGDs. When relevant, the assessment of multiple scenarios also incorporates how defaulted loans are expected to be recovered, including the probability that the loans will cure (i.e. be paid in full or no longer credit-impaired) and the value of collateral or the amount that might be received for selling the asset.

The 12-month and lifetime LGDs are determined based on the factors which impact the recoveries made post default. These vary by product type.

• For secured products, this is primarily based on collateral type and projected collateral values, historical discounts to market/book values due to forced sales, time to repossession and recovery costs observed.

• For unsecured products, LGDs are typically set at product level due to the limitation in recoveries achieved across different borrower. These LGDs are influenced by collection strategies, including contracted debt sales and price.

The mechanics of the ECL method are summarised below:

• Stage 1: The 12 month ECL is calculated as the portion of Lifetime ECLs that represent the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date. The Group calculates the 12 month ECL allowance based on the expectation of a default occurring in the 12 months following the reporting date.

These expected 12-month default probabilities are applied to a forecast 12 month EAD and multiplied by the expected 12 month LGD and discounted by an approximation to the original EIR. This calculation is made for each of the three scenarios, as explained above.

• Stage 2: When a loan has shown a significant increase in credit risk since origination, the Group records an allowance for the Lifetime ECLs. The mechanics are similar to those explained above, including the use of multiple scenarios, but PDs and LGDs are estimated over the lifetime of the instrument. The expected cash shortfalls are discounted by an approximation to the original EIR.

• Stage 3: For loans considered credit-impaired, the Group recognises the lifetime expected credit losses for these loans. The method is similar to that for Stage 2 assets, with the PD set at 100%.

• POCI: Purchase or Originated Credit Impaired (POCI) assets are financial assets that are credit impaired on initial recognition. The Group only recognises the cumulative changes in lifetime ECLs since initial recognition, based on a probability-weighting of the three scenarios, discounted by the credit adjusted EIR.

• Loan commitments and letters of credit: When estimating Lifetime ECLs for undrawn loan commitments, the Group estimates the expected portion of the loan commitment that will be drawn down over its expected life. The ECL is then based on the present value of the expected shortfalls in cash flows if the loan is drawn down, based on a probability-weighting of the three scenarios. The expected cash shortfalls are discounted at an approximation to the expected EIR on the loan.

For credit cards and revolving facilities that include both a loan and an undrawn commitment, ECLs are calculated and presented together with the loan. For loan commitments and letters of credit, the ECL is recognised within net impairment charge on financial assets.

Material accounting policies - continued

3.9 Impairment of financial assets - continued

Measuring the Expected Credit Loss - continued

• Financial guarantee contracts: The Group's liability under each guarantee is measured at the higher of the amount initially recognised less cumulative amortisation recognised in the income statement, and the ECL provision. For this purpose, the Group estimates ECLs based on the present value of the expected payments to reimburse the holder for a credit loss that it incurs The shortfalls are discounted by the risk-adjusted interest rate relevant to the exposure. The calculation is made using a probability-weighting of the three scenarios. The ECLs related to financial guarantee contracts are recognised within net impairment charge on financial assets.

• Sovereign Debt investments at amortised cost and FVOCI are considered to have low credit risk, and the loss allowance recognised during the period was therefore limited to 12 months' expected losses. Management considers 'low credit risk' for such instruments to be an investment grade credit rating with at least one major rating agency. Other instruments are considered to be low credit risk where they have a low risk of default and the issuer has a strong capacity to meet its contractual cash flow obligations in the near term.

Significant increase in credit risk (SICR)

The Group considers a financial instrument to have experienced a significant increase in credit risk when one or more of the following quantitative, qualitative or backstop criteria have been met:

Quantitative criteria:

The remaining Lifetime PD at the reporting date has increased, compared to the residual Lifetime PD expected at the reporting date when the exposure was first recognised.

Deterioration in the credit rating of an obligor either based on the Group's internal rating system or an international credit rating. However, the downgrade considers movement from a grade band to another e.g. Investment grade to Standard.

The group also considers accounts that meet the criteria to be put on the watchlist bucket in line with CBN prudential guidelines since they have significantly increased in credit risk.

The group continuously monitors all assets subject to ECL. In order to determine whether an instrument or a portfolio of instruments is subject to 12mECL or LTECL, the Group assesses whether there has been a significant increase in credit risk since initial recognition.

When determining whether the risk of default on a financial instrument has increased significantly since initial recognition, the Group considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Group's historical experience and expert credit assessment and including forward-looking information. The objective of the assessment is to identify whether a significant increase in credit risk has occurred for an exposure by comparing:

- The remaining lifetime PD as at the reporting date, with
- The remaining lifetime PD for this point in time that was estimated at the time of initial recognition of the exposure

The Group uses three criteria for determining whether there has been a significant increase in credit risk:

- A quantitative test based on movement in PD
- Qualitative indicators; and
- A backstop of 30 days past due for all financial assets (regardless of the change in internal credit grades

Material accounting policies - continued

3.9 Impairment of financial assets - continued

Measuring the Expected Credit Loss - continued

Qualitative criteria:

For Retail loans, if the borrower meets one or more of the following criteria:

- In short-term forbearance
- Direct debit cancellation
- Extension to the terms granted
- Previous arrears within the last [12] months

For Corporate portfolio, if the borrower is on the watchlist and/or the instrument meets one or more of the following criteria:

- Significant increase in credit spread
- Significant adverse changes in business, financial and/or economic conditions in which the borrower operates
- Actual or expected forbearance or restructuring
- Actual or expected significant adverse change in operating results of the borrower
- Significant change in collateral value (secured facilities only) which is expected to increase risk of default
- Early signs of cash flow/liquidity problems such as delay in servicing of trade creditors/loans

The assessment of SICR incorporates forward-looking information and is performed on a quarterly basis at a portfolio level for all Retail financial instruments held by the Group. In relation to Wholesale and Treasury financial instruments, where a Watchlist is used to monitor credit risk, this assessment is performed at the counterparty level and on a periodic basis. The criteria used to identify SICR are monitored and reviewed periodically for appropriateness by the independent Credit Risk team.

For modified financial assets the Group assesses whether there has been a significant increase in credit risk of the financial instrument by comparing the risk of default occurring at the reporting date (based on the modified contractual terms) and the risk of default occurring at initial recognition (based on the original unmodified contractual terms).

Backstop

A backstop indicator is applied and the financial instrument is considered to have experienced a significant increase in credit risk if the borrower is more than 30 days past due and 90 days past due on its contractual payments for both stage 2 and stage 3 respectively.

Definition of default and credit-impaired assets

The Group defines a financial instrument as in default, which is fully aligned with the definition of credit-impaired, when it meets one or more of the following criteria:

Quantitative criteria

The borrower is more than 90 days past due on its contractual payments.

Qualitative criteria

The borrower meets unlikeliness to pay criteria, which indicates the borrower is in significant financial difficulty. These are instances where:

- The borrower is in long-term forbearance
- The borrower is deceased
- The borrower is insolvent
- The borrower is in breach of financial covenant(s)
- An active market for that financial asset has disappeared because of financial difficulties
- It is becoming probable that the borrower will enter bankruptcy
- Financial assets are purchased or originated at a deep discount that reflects the incurred credit losses

The criteria above have been applied to all financial instruments held by the Group and are consistent with the definition of default used for internal credit risk management purposes. The default definition has been applied consistently to model the Probability of Default (PD), Exposure at Default (EAD) and Loss given Default (LGD) throughout the Group's expected loss calculations.

Material accounting policies - continued

3.9 Impairment of financial assets - continued

Incorporation of forward looking information and macroeconomic factors

In its ECL models, the Group relies on a broad range of forward looking information as economic inputs. The macroeconomic variables considered for the adjustment of the probabilities of default are listed below:

- Crude oil prices,
- Prime lending rate

The inputs and models used for calculating ECLs may not always capture all characteristics of the market at the date of the financial statements. To reflect this, qualitative adjustments or overlays are occasionally made as temporary adjustments when such differences are significantly material.

The ECLs include forward-looking information which translates into an allowance for changes in macro-economic conditions and forecasts when estimating lifetime ECLs. It is important to understand the effect of forecasted changes in the macro-economic environment on ECLs, so that an appropriate level of provisions can be raised.

A regression model was built to explain and predict the impact of macro-economic indicators on default rates. Such regression models are usually built on a history of default rates and macro-economic variables covering at least one economic cycle, but preferable more.

Historical data on macro-economic indicators from a host of reliable sources, including the International Monetary Fund was gathered. As a proxy for default rates, the Group provided their non-performing loans as a percentage of gross loans ("NPL%") metric.

The macro-economic model regressed historical NPL% (the target variable) on a list of candidate macro-economic indicators. The Group's Economic Intelligence currently monitors and forecasts certain macro-economic indicators. These indicators are GDP growth rate, crude oil prices and the foreign exchange rate. The most predictive variables that were selected in the regression model (the most predictive indicators) were determined. The logic of the relationships between the indicators and the target variable was considered and assessed to ensure indicators are not highly correlated with one another.

The model produced best-estimate, optimistic and downturn forecasts of the selected macro-economic indicators, based on trends in the indicators and macro-economic commentary. This was done through stressing the indicator GDP, which in turn stressed the other indicators based on their assumed historical correlation with GDP. The regression formula obtained was applied to the forecasted macro-economic indicators in order to predict the target variable.

The best-estimate, optimistic and downturn scalars of predicted target variables were determined. In order to remove the impact of any historical trends included in the data, the scalar denominator was adjusted based on the estimation period used to derive the PDs. The scalars calculated were applied to the lifetime PDs. This process results in forward-looking best-estimate, optimistic and downturn lifetime PD curves, which are used in the ECL calculations.

Collateral valuation

To mitigate its credit risks on financial assets, the Group seeks to use collateral, where possible. The collateral comes in various forms, such as cash, securities, letters of credit/guarantees, real estate, receivables, inventories, other non-financial assets and credit enhancements such as netting agreements. Collateral, unless repossessed, is not recorded on the Group's statement of financial position. However, the fair value of collateral affects the calculation of ECLs. It is generally assessed, at a minimum, at inception and re-assessed on a periodic basis every 3 years.

To the extent possible, the Group uses active market data for valuing financial assets held as collateral. Other financial assets which do not have readily determinable market values are valued using models. Non-financial collateral, such as real estate, is valued based on data provided by third parties such as external valuers.

Material accounting policies - continued

3.9 Impairment of financial assets - continued

Collateral repossessed

The Group's policy is to determine whether a repossessed asset can be best used for its internal operations or should be sold. Assets determined to be useful for the internal operations are transferred to their relevant asset category at the lower of their repossessed value or the carrying value of the original secured asset. Assets for which selling is determined to be a better option are transferred to assets held for sale at their fair value (if financial assets) and fair value less cost to sell for non-financial assets at the repossession date in, line with the Group's policy.

Investment under management are funds entrusted to Asset management firms who acts as agents to the Group for safe keeping and management for investment purpose with returns on the underlying investments accruable to the Group, who is the principal.

The investment decision made by the Asset management within an agreed portfolio of high quality Nigerian fixed income and money market instruments which are usually short tenured.
The investments are carried as fair value through OCI and accounting policy (3.9) (a) [iv] applies.

In assessing expected credit loss, the Group uses statistical modelling of historical trends of the probability of default, timing of recoveries and the amount of loss incurred, adjusted for management's judgment as to whether current and forecasted economic and credit conditions are such that the actual losses are likely to be greater or less than suggested by historical modelling. Default rates, loss rates and the expected timing of future recoveries are regularly benchmarked against actual outcomes to ensure that they remain appropriate. The ECL on restricted deposits and other assets is calculated using the simplified model approach.

Impairment losses on assets carried at amortised cost are measured as the difference between the carrying amount of the financial assets and the present value of estimated cash flows discounted at the assets' original effective interest rate. Losses are recognised in the income statement and reflected in an allowance account against loans and advances. Interest on the impaired asset continues to be recognised through the unwinding of the discount. When a subsequent event causes the amount of impairment loss to decrease, the impairment loss is reversed through profit or loss.

Impairment losses on fair value through other comprehensive income investment securities are recognised in profit or loss and the impairment provision is not used to reduce the carrying amount of the investment but recognised in other comprehensive income.
For debt securities, the group uses the criteria referred above to assess impairment.

The Group writes off previously impaired loans and advances (and investment securities) when they are determined not to be recoverable. The Group writes off loans or investment debt securities that are impaired (either partially or in full and any related allowance for impairment losses) when the Group credit team determines that there is no realistic prospect of recovery.

Material accounting policies - continued

3.10 Property and equipment

(a) Recognition and measurement

Items of property and equipment are measured at cost less accumulated depreciation and accumulated impairment losses. Cost includes expenditures that are directly attributable to the acquisition of the asset.

When significant parts of an item of property and equipment have different useful lives, they are accounted for as separate items (major components) of property and equipment.

The gain or loss on disposal of an item of property and equipment is determined by comparing the proceeds from disposal with the carrying amount of property and equipment, and are recognised net within other operating income in the Income statement.

(b) Subsequent costs

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that the future economic benefits associated with the item will flow to the Group and its cost can be measured reliably. The costs of the day-to-day repairs and maintenance of property and equipment are recognised in Income statement as incurred.

(c) Depreciation

Depreciation is recognised in the income statement on a straight-line basis to write down the cost of items of property and equipment, to their residual values over the estimated useful lives.

Depreciation begins when an asset is available for use and ceases at the earlier of the date that the asset is derecognised or classified as held for sale in accordance with IFRS 5. A non-current asset or disposal group is not depreciated while it is classified as held for sale.

The estimated useful lives for the current and comparative periods of significant items of property and equipment are as follows:

Freehold Land	Not depreciated
Leasehold improvements and building	Over the shorter of the useful life of the item or lease term
Buildings	60 years
Computer hardware	4.5 years
Furniture and fittings	6 years
Plant and Equipment	5 years
Motor vehicles	5 years

The asset's residual values and useful lives are reviewed, and adjusted if appropriate, at each date of the statement of financial position. Assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An asset’s carrying amount is written down immediately to its recoverable amount if the asset’s carrying amount is greater than its estimated recoverable amount. The recoverable amount is the higher of the asset’s fair value less costs to sell and value in use.

Capital work in progress is not depreciated. Upon completion it is transferred to the relevant asset category. Depreciation methods, useful lives and residual values are reassessed at each reporting date and adjusted if appropriate.

(d) De-recognition

An item of property and equipment is derecognised on disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included within other operating income in the income statement in the period the asset is derecognised.

Material accounting policies - continued

3.11 Leases

Group as the Lessee:

The Group leases several assets including buildings and land. Lease terms are negotiated on an individual basis and contain different terms and conditions, including extension options as described in the "extension and termination options header" below. The lease period ranges from 1 year to 40 years. The lease agreements do not impose any covenants, however, leased assets may not be used as security for borrowing purposes.

Contracts may contain both lease and non-lease components. The Group has elected not to separate lease and non-lease components and instead accounts for these as a single lease component.

Leases are recognised as a right-of-use asset and a corresponding liability at the date at which the leased asset is available for use by the Group. Assets and liabilities arising from a lease are initially measured on a present value basis.

Lease liabilities

At commencement date of a lease, the Group recognises lease liabilities measured at the present value of lease payments to be made over the lease term. Lease liabilities include the net present value of the following lease payments:

- fixed payments (including in-substance fixed payments), less any lease incentives receivable
- variable lease payment that are based on an index or a rate
- amounts expected to be payable by the Group under residual value guarantees
- the exercise price of a purchase option if the lessee is reasonably certain to exercise that option, and
- payments of penalties for terminating the lease, if the lease term reflects the Group exercising that option.

Lease payments to be made under reasonably certain extension options are also included in the measurement of the liability. The variable lease payments that do not depend on an index or a rate are recognised as expense in the period in which the event or condition that triggers the payment occurs.

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be readily determined, the Group's incremental borrowing rate is used, being the rate that the Group would have to pay to borrow the funds necessary to obtain an asset of similar value to the right of use asset in a similar economic environment with similar terms, security and conditions. The weighted average incremental borrowing rate applied to the lease liabilities as at 31 December 2025 was 20%. Where the basis for determining future lease payments changes as required by interest rate benchmark reform, the Group remeasures the lease liability by discounting the revised lease payments using the revised discount rate that reflects the change to an alternative benchmark interest rate.

Lease payments are allocated between principal and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the in-substance fixed lease payments or a change in the assessment to purchase the underlying asset.

Right of use assets

Right-of-use assets are measured at cost comprising the following:

- the amount of the initial measurement of lease liability
- any lease payments made at or before the commencement date less any lease incentives received
- any initial direct costs, and
- restoration costs.

Right-of-use assets are generally depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis. If the Group is reasonably certain to exercise a purchase option, the right-of-use asset is depreciated over the underlying asset's useful life.

Material accounting policies - continued

3.11 Leases - continued

Short-term leases and leases of low value

The Group applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases that are considered of low value (i.e. low value assets). Low-value assets are assets with lease amount of less than $5,000 or its equivalent in Naira when new. Lease payments on short-term leases and leases of low-value assets are recognised as expense in profit or loss on a straight-line basis over the lease term.

Extension and termination options

Extension and termination options are included in a number of property leases. These are used to maximise operational flexibility in terms of managing the assets used in the Group's operations. The majority of extension and termination options held are exercisable only by the Group.

A group company is the lessor;

When assets are held subject to a finance lease, the present value of the lease payments is recognised as a receivable. The difference between the gross receivable and the present value of the receivable is recognised as unearned finance income. Lease income is recognised over the term of the lease using the net investment method (before tax), which reflects a constant periodic rate of return.

3.12 Intangible assets

(a) Goodwill

Goodwill that arises upon the acquisition of subsidiaries is included in intangible assets. Subsequent to initial recognition, goodwill is measured at cost less accumulated impairment losses. Goodwill is tested annually for impairment.

Goodwill is allocated to cash-generating units or groups of cash-generating units for the purpose of impairment testing. The allocation is made to those cash-generating units or groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose identified in accordance with IFRS 3.

Goodwill has an indefinite useful life and is tested annually as well as whenever a trigger event has been observed for impairment by comparing the present value of the expected future cash flows from a cash generating unit with the carrying value of its net assets, including attributable goodwill and carried at cost less accumulated impairment losses. Impairment losses on goodwill are not reversed. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

Intangible assets are derecognised on disposal or when no economic benefits are expected from their use or disposal.

Accounting Policy on Provisional Goodwill

Provisional goodwill arises during a business combination when the initial accounting for the acquisition is incomplete at the reporting date. It is recognised as the difference between the fair value of the consideration transferred and the fair value of identifiable net assets acquired.

At the acquisition date, provisional goodwill is recorded based on provisional amounts. Adjustments to provisional goodwill are made within the measurement period (up to 12 months from the acquisition date) if new information about facts and circumstances existing at the acquisition date becomes available.

If adjustments are made to provisional amounts within the measurement period, these adjustments are retrospectively applied. Any changes to provisional goodwill are recognised in the financial statements when finalised.

Provisional goodwill should be tested for impairment annually or more frequently if there are indicators of impairment. Impairment losses are recognised in the profit or loss.

Disclosure

Disclose the nature of provisional goodwill, including the reasons for its provisional status, and any adjustments made to provisional amounts during the measurement period.

Material accounting policies - continued

3.12 Intangible assets - continued

(b) Software

Software acquired by the Group is stated at cost less accumulated amortisation and accumulated impairment losses. Expenditure on internally developed software is recognised as an asset when the Group is able to demonstrate its intention and ability to complete the development and use the software in a manner that will generate future economic benefits, and can reliably measure the costs to complete the development. The capitalised costs of internally developed software include all costs directly attributable to developing the software, and are amortised over its useful life. Internally developed software is stated at capitalised cost less accumulated amortisation and impairment.

Subsequent expenditure on software assets is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure is expensed as incurred.

Amortisation is recognised in the income statement on a straight-line basis over the estimated useful life of the software, from the date that it is available for use since this most closely reflects the expected pattern of consumption of future economic benefits embodied in the asset. Software has a finite useful life, the estimated useful life of software is four and half years (4.5). Amortisation methods, useful lives and residual values are reviewed at each financial year-end and adjusted if appropriate.

(c) Brand, Customer Relationships and Core Deposits

These are intangible assets arising from the acquisition of subsidiaries. At the acquisition date, they are initially recognized at fair value.

Customer relationships and core deposits are identified at the acquirer's within the Group and subsequently measured at cost less accumulated amortisation and accumulated impairment losses. These assets have finite useful lives and are amortised on a straight-line basis over the period during which the Group expects to derive economic benefits from them, currently estimated at 10 to 15 years. Amortisation expense is recognized in "amortisation of intangible assets" in the consolidated statement of profit or loss. The useful lives and amortisation method are reviewed at each reporting date, and any change is accounted for prospectively as a change in accounting estimate.

Brands are subsequently measured at cost less accumulated impairment losses. Where a brand is assessed as having an indefinite useful life, it is not amortised. The AfrAsia brand has been assessed as having an indefinite useful life because the Group intends to retain and continue to use the brand indefinitely, and no foreseeable limit has been identified to the period over which it is expected to generate economic benefits for the Group.

The useful life assessment for each intangible asset, including the indefinite-life classification of the AfrAsia brand, is reviewed annually to determine whether events and circumstances continue to support that assessment. Where they no longer do, the change from an indefinite to a finite useful life is accounted for prospectively as a change in accounting estimate.

Intangible assets with finite useful lives are tested for impairment whenever there is an indication that the carrying amount may not be recoverable. Intangible assets with indefinite useful lives, including the AfrAsia brand, are tested for impairment annually, and whenever there is an indication that the asset may be impaired, by comparing their carrying amount to their recoverable amount.

Intangible assets with finite useful lives are tested for impairment whenever there is an indication that the carrying amount may not be recoverable. Intangible assets with indefinite useful lives, including the AfrAsia brand, are tested for impairment annually, and whenever there is an indication that the asset may be impaired, by comparing their carrying amount to their recoverable amount.

3.12 Intangible assets - continued

Assessment of Intangible Asset (goodwill)

Valuation Guidelines

Overview	Explanation
Introduction	• Under the Standard, Access Holdings is required to apportion the purchase consideration between the tangible and intangible assets and liabilities (including contingent liabilities). • The Standard provides general guidelines for assigning amounts to individual assets acquired and liabilities assumed. • IFRS 3 requires the application of the acquisition method for each business combination. The acquisition method requires inter alia that the acquirer is identified, the acquisition date is determined, and that the identifiable assets acquired, and that the liabilities assumed and any non-controlling interest in the acquiree are recognised and measured.
Recognition principle (IFRS 3)	• IFRS 3 states that as of the acquisition date, the acquirer shall recognise, separately from goodwill, the identifiable assets acquired, the liabilities assumed and any non-controlling interest in the acquiree. • Recognition of identifiable assets acquired and liabilities assumed is subject to . These paragraphs state, inter alia, that the identifiable assets acquired and liabilities assumed must meet the definitions of assets and liabilities in the Framework for the Preparation and Presentation of Financial Statements at the acquisition date, and that the identifiable assets acquired and liabilities assumed must be part of what the acquirer and the acquiree exchanged in the business combination transaction

Overview	Explanation
Definition of identifiable asset (IFRS 3	• IFRS 3 states that an asset is identifiable if it either: a) is separable, i.e. capable of being separated or divided from the entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable asset or liability, regardless of whether the entity intends to do so; or b) arises from contractual or other legal rights, regardless of whether those rights are transferable or separable from the entity or from other rights and obligations.
Measurement principle (IFRS 3)	• The acquirer shall measure the identifiable assets acquired and the liabilities assumed at their acquisition-date Fair Values.
Fair Value (IFRS 13)	• The identifiable assets are required under IFRS 3 to be recognised at their “Fair Value". Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.
Definition Intangible asset (IAS 38)	• Intangible assets are all the elements of a business enterprise that exist in addition to working capital and tangible assets. They are the elements, after working capital and tangible assets, that make the business work and are often the primary contributors to the earning power of the enterprise. Their existence is dependent on the presence, or expectation of earnings. • The definition of an intangible asset under IFRS is detailed in IAS 38 as ‘an identifiable non-monetary asset without physical substance.

Material accounting policies - continued

3.12 Intangible assets - continued

Definition of identifiable asset (IFRS 3)	• IAS 38 (Intangible asset) defines the useful life as "the period over which an asset is expected to be available for use by an entity; or the number of production or similar units expected to be obtained from the asset by an entity". • Under IAS 38 the factors which should be considered in assessing the useful lives of intangible assets include: i. The expected use and potential use by another management team; ii. Typical life cycles for the product and any public information on useful lives; iii. Technical, technological, commercial or other types of obsolescence; iv. Stability of the industry in which the asset operates and changes in the market demand; v. Expected actions by competitors; vi. Level of maintenance expenditure required to obtain the future economic benefits; and vii. The period of control over the asset and legal or similar limits on the use of the asset. • The estimated useful life of each identifiable asset identified will be based on the factors outlined above.

3.13 Impairment of non-financial assets

The carrying amounts of the Group's non-financial assets other than goodwill and deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists then the asset's recoverable amount is estimated. For goodwill and intangible assets that have indefinite useful lives or that are not yet available for use, the recoverable amount is estimated each period at the same time.

The recoverable amount of goodwill is estimated at each reporting date. An impairment loss is recognised if the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

For the purpose of impairment testing, assets that cannot be tested individually are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of cash inflows of other assets or groups of assets (the "cash-generating unit" or CGU). Subject to an operating segment ceiling test, for the purposes of goodwill impairment testing, CGUs to which goodwill has been allocated are aggregated so that the level at which impairment is tested reflects the lowest level at which goodwill is monitored for internal reporting purposes. Goodwill acquired in a business combination is allocated to the groups of CGUs that are expected to benefit from the synergies of the combination.

An impairment loss in respect of goodwill is not reversed. In respect of other assets, impairment losses recognised in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

Material accounting policies - continued

3.14 Discontinued operations

The Group presents discontinued operations in a separate line in the consolidated income statement if an entity or a component of an entity has been disposed of or is classified as held for sale and:

(a) Represents a separate major line of business or geographical area of operations;
(b) Is part of a single coordinated plan to dispose of a separate major line of business or geographical area of operations; or

(c) Is a subsidiary acquired exclusively with a view to resale (for example, certain private equity investments).

Net profit from discontinued operations includes the net total of operating profit and loss before tax from operations, including net gain or loss on sale before tax or measurement to fair value less costs to sell and discontinued operations tax expense. A component of an entity comprises operations and cash flows that can be clearly distinguished, operationally and for financial reporting purposes, from the rest of the Group´s operations and cash flows. If an entity or a component of an entity is classified as a discontinued operation, the Group restates prior periods in the consolidated income statement.

Non-current assets, or disposal groups comprising assets and liabilities, that are expected to be recovered primarily through sale or distribution rather than through continuing use, are classified as held for sale or distribution. Immediately before classification as held for sale or distribution, the assets, or components of a disposal group, are re-measured in accordance with the Group's accounting policies. Thereafter generally the assets, or disposal group, are measured at the lower of their carrying amount and fair value less costs to sell. Any impairment loss on a disposal group is allocated first to goodwill, and then to the remaining assets and liabilities on pro rata basis, except that no loss is allocated to inventories, financial assets, deferred tax assets, employee benefit assets, investment property or biological assets, which continue to be measured in accordance with the Group's accounting policies.

Impairment losses on initial classification as held for sale or distribution and subsequent gains and losses on re-measurement are recognised in the income statement. Gains are not recognised in excess of any cumulative impairment loss.

Once classified as held for sale or distribution, intangible assets and property, plant and equipment are no longer amortised or depreciated, and any equity-accounted investee is no longer equity accounted.

3.15 Non-current assets (or disposal groups) held for sale

Non-current assets (or disposal groups) are classified as assets held for sale when their carrying amount is to be recovered principally through a sale transaction and a sale is considered highly probable. They are stated at the lower of carrying amount and fair value less costs to sell.
Investment property classified as non-current asset held for sale are measured at fair value, gain or loss arising from a change in the fair value of investment property is recognised in income statement for the period in which it arise.

3.16 Provisions

A provision is recognised if, as a result of a past event, the Group has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability. The increase in the provision due to passage of time is recognised as interest expenses.

(a) Restructuring

A provision for restructuring is recognised when the Group has approved a detailed and formal restructuring plan, and the restructuring either has commenced or has been announced publicly. Future operating costs are not provided for.

Material accounting policies - continued

3.17 Financial guarantees

Financial guarantees which includes Letters of credit are contracts that require the Group to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the terms of a debt instrument. Financial guarantee liabilities are initially recognised at their fair value, and the initial fair value is amortised over the life of the financial guarantee. The guarantee liability is subsequently carried at the higher of this amortised amount and the present value of any expected payment (when a payment under the guarantee has become probable).
Letters of credits which have been guaranteed by the Group but funded by the customer is included in other liabilities while those guaranteed and funded by the Group is included in deposit from financial institutions.

3.18 Employee benefits

(a) Defined contribution plans

A defined contribution plan is a post employment benefit plan under which an entity pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts. Obligations for contributions to defined contribution pension plans are recognised as an expense in the income statement when they are due in respect of service rendered before the end of the reporting period.

Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in future payments is available. Contributions to a defined contribution plan that are due more than 12 months after the end of the reporting period in which the employees render the service are discounted to their present value at the reporting date.

Access Holding Plc operates a funded, defined contribution pension scheme for employees. Employees and the Company contribute 8% and 10% respectively of the qualifying staff salary in line with the provisions of the Pension Reforms Act 2014.

(b) Termination benefits

Termination benefits are payable when employment is terminated by the group before the normal retirement date, or whenever an employee accepts voluntary redundancy in exchange for these benefits. The group recognises termination benefits at the earlier of the following dates: (a) when the group can no longer withdraw the offer of those benefits; and (b) when the entity recognises costs for a restructuring that is within the scope of IAS 37 and involves the payment of termination benefits. In the case of an offer made to encourage voluntary redundancy, the termination benefits are measured based on the number of employees expected to accept the offer. Benefits falling due more than 12 months after the end of the reporting period are discounted to their present value.

(c) Post employment defined benefit plan

The Group has a non-contributory, un-funded lump sum defined benefit plan for top executive management of the Group from General Manager and above based on the number of periods spent in these positions.

Depending on their grade, executive staff of the Group upon retirement are entitled to certain benefits based on their length of stay on that grade. The Group's net obligation in respect of the long term incentive scheme is calculated by estimating the amount of future benefits that eligible employees have earned in return for service in the current and prior periods. That benefit is discounted to determine its present value. The rate used to discount the post employment benefit obligation is determined by reference to the yield on Nigerian Government Bonds, that have maturity dates approximating the terms of the Group's obligations.

The calculation is performed annually by a qualified actuary using the projected unit credit method. When the benefits of a plan are improved, the portion of the increased benefit relating to past service by employees is immediately recognised in the income statement. The Group recognises all actuarial gains or losses and all expenses arising from defined benefit plan immediately in the balance sheet, with a charge or credit to other comprehensive income (OCI) in the periods in which they occur. They are not recycled subsequently in the income statement.

Material accounting policies - continued

3.18 Employee benefits - continued

(d) Short-term employee benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided.

A liability is recognised for the amount expected to be paid under short-term cash bonus or profit-sharing plans if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

(e) Share-based payment remuneration scheme

The Group grants equity-settled share-based payment awards to certain employees as part of its long-term incentive plans.

The grant-date fair value of these equity instruments is determined by reference to the market price of the Group's shares at the grant date. This fair value is recognised as a personnel expense on a straight-line basis over the vesting period, with a corresponding increase in equity. The amount recognised as an expense is adjusted to reflect the number of awards for which the related services and non-market performance conditions are expected to be met, such that the amount ultimately recognised is based on the number of awards that meet the related service and non-market performance conditions at the vesting date.

This approach ensures that the cost recognised in the financial statements appropriately reflects the fair value of employee services received in exchange for equity instruments granted.

3.19 Share capital and reserves

(a) Share issue costs

Incremental costs directly attributable to the issue of an equity instrument are deducted from the initial measurement of the equity instruments.

(b) Additional Tier 1 Capital

The Group classifies financial liabilities or equity instruments in accordance with the substance of the contractual terms of the instruments. The Additional tier 1 securities issued by the Bank are not redeemable by the subscribers and bear an entitlement to coupons at the sole discretion of the board of directors of the Bank. Accordingly, they are presented within equity. Distributions thereon are recognised in Equity. Based on the Group's assessment of the terms of the AT 1 securities, the coupon payments meet the definition of dividend. Therefore, the related tax impacts are recognised in profit or loss in accordance with IAS 12.

(c) Dividend on the Company's ordinary shares

Dividends on ordinary shares are recognised in equity in the period when approved by the Group's shareholders. Dividends for the period that are declared after the end of the reporting period are disclosed in the subsequent events note.

(d) Treasury shares

Where the subsidiaries within the Group purchased the shares of the Company, the transaction is accounted for as cash settled, a liability is recognised in the statement of financial position and expensed as other staff benefit in the statement of comprehensive income over the course of the minimum vesting period. The liability is remeasured at each reporting date with gains and loss recognised in the statement of comprehensive income. Should any employee within the scheme leave the Group within the vesting period, the shares maybe forfeited depending on whether the staff was relieved of his/her duties by the Company or voluntarily resigned. Shares held in the staff share scheme by Holdco personnel are equity settled.

By the resolution of the Board and Shareholders, the Company sets aside an amount not exceeding twenty (20) percent of the aggregate emoluments of the Group's employees in each financial period to purchase shares of Access Holdings Plc's from the floor of the Nigerian Exchange Group(NGX) for the purpose of the plan. The group has also established a Structured Entity (SE) to hold shares of the Company purchased. Upon vesting, the SE transfers the shares to employees.

Material accounting policies - continued

3.19 Share capital and reserves - continued

(e) Earnings per share

The Group presents basic and diluted earnings per share (EPS) for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the period. Diluted EPS is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding for the effects of all dilutive potential ordinary shares. Ordinary shares held as treasury shares, including shares held under employee share schemes, are excluded from the weighted average number of ordinary shares outstanding for both basic and diluted EPS as they are not considered outstanding ordinary shares in accordance with IAS 33 and IAS 32.

(f) Regulatory risk reserve

In compliance with the Prudential Guidelines for Licensed Banks, the Group assesses qualifying financial assets using the guidance under the Prudential Guidelines. The guidelines apply objective and subjective criteria towards providing losses in risk assets. Assets are classified as performing or non- performing. Non performing assets are further classed as substandard, doubtful or lost with attendant provisions. There are no restrictions to the distribution of these reserves.

Classification	Percentage	Basis
Substandard	10%	Interest and/or principal overdue by 90 days but less than 180 days
Doubtful	50%	Interest and/or principal overdue by 180 days but less than 365 days
Lost	100%	Interest and/or principal overdue by more than 365 days

A more accelerated provision may be done using the subjective criteria. A 2% provision is taken on all risk assets that are not specifically provisioned.

The results of the application of Prudential Guidelines and the expected credit loss determined for these assets under IFRS 9 are compared. The IFRS 9 determined impairment charge is included in the income statement.

Where the Prudential Guidelines provision is greater, the difference is appropriated from retained earnings and included in a non - distributable 'Regulatory risk reserve'. Where the IFRS 9 expected credit loss is greater, no appropriation is made and the amount of IFRS 9 expected credit loss is recognised in the income statement.

Following an examination, the regulator may also require more amounts to be set aside on risk and other assets. Such additional amounts are recognised as an appropriation from retained earnings to regulatory risk reserve.

(g) Capital reserve

This balance represents the surplus nominal value of the reconstructed shares of the Company which was transferred from the share capital account to the capital reserve account after the share capital reconstruction in October 2006. The Shareholders approved the reconstruction of 13,956,321,723 ordinary shares of 50 kobo each of the Bank in issue to 6,978,160,860 ordinary shares of 50 kobo each by the creation of 1 ordinary shares previously held.

(h) Fair value reserve

The fair value reserve comprises the net cumulative change in the fair value of investments measured through other comprehensive income until the investment is derecognised or impaired.

(i) Foreign currency translation reserve

This balance appears only in the Group accounts and represents the foreign currency exchange difference arising from translating the results and financial position of all the group entities that have a functional currency different from the presentation currency.

Material accounting policies - continued

3.19 Share capital and reserves - continued

(j) Retained earnings

Retained earnings are the undistributable profit carried forward recognised income net of expenses plus current period profit attributable to shareholders.

(k) Statutory Reserves Investment

* Statutory Reserves Investment – The Statutory Reserve in accordance with the provision of the Pension Reform Act (s.81 of PRA 2014) is used to recognise an annual transfer of 12.5% of profit after tax from retained earnings into Statutory Reserve Fund.
* Every Pensions Fund Administrator shall maintain a Statutory Reserve Fund as contingency fund to meet any claim for which the Pension Fund Administrator may be liable as may be determined by the Commission.

Statutory Reserve – Banks (CBN Requirement)

In accordance with the provisions of the Banks and Other Financial Institutions Act (BOFIA) 2020, Section 16(1), and as reinforced by the Central Bank of Nigeria (CBN) regulations, every bank in Nigeria is required to transfer a portion of its profit after tax (PAT) to a statutory reserve.

Where a bank's statutory reserve is less than its paid-up share capital, it must transfer 30% of its profit after tax to statutory reserve.

Where the statutory reserve is equal to or greater than its paid-up share capital, the bank must transfer 15% of its profit after tax to statutory reserve.

The statutory reserve is a non-distributable reserve created to strengthen the financial position of the bank and serve as a buffer against unexpected losses, in line with prudential regulation.

(l) Pensions Protection Fund Investment

* The Pension Commission shall establish and maintain a fund to be known as the Pension Protection Fund for the benefits of eligible pensioners covered by any pension scheme established , approved or recognised under this Act.
* The Pension Protection Fund shall consist of –
* An annual subvention of 1% of the total monthly wage bill payable to employees in the public service of the Federation towards the funding of the minimum guaranteed pension;
* Annual pension protection levy paid by the Commission and all licensed pension operators at a rate to be determined by the Commission from time to time

(m) Share Scheme Reserve

Share scheme reserve represents the cumulative equity-settled share-based payment expense recognised in respect of awards granted to employees under the Group's Restricted Share Performance Plan (RSPP), in accordance with IFRS 2. The reserve is built up over the vesting period of the awards and reflects the fair value of unvested shares granted to eligible employees. Upon vesting, the related balance is

(n) Partial disposal of subsidiary

Partial disposal of subsidiaries without loss of control

Transactions with non-controlling interests that do not result in a loss of control are accounted for as equity transactions. The difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration received is recognised directly in equity and attributed to the equity holders of the parent. No gain or loss is recognised in profit or loss.

Partial disposal of subsidiaries resulting in loss of control

Where a partial disposal results in the Group losing control of a subsidiary, the Group derecognises the assets, liabilities and non-controlling interests of the subsidiary. Any retained investment is remeasured to fair value at the date control is lost, with the resulting gain or loss recognised in profit or loss. The fair value of any retained interest becomes the initial carrying amount for subsequent accounting as an associate, joint venture or financial asset, as applicable.

Material accounting policies - continued

3.2 Levies

The Group recognises liability to pay levies progressively if the obligating event occurs over a period. However, if the obligation is triggered on reaching a minimum threshold, the liability is recognised when that minimum threshold is reached. The Group recognises an asset if it has paid a levy before the obligating event but does not yet have a present obligation to pay that levy. The obligating event that gives rise to a liability to pay a levy is the event identified by the legislation that triggers the obligation to pay the levy.

3.21 Derivatives and hedging activities

Access Holdings ("The Group") Plc applies hedge accounting to manage its foreign exchange risk.

Derivatives are initially recognised at fair value on the date a derivative contract is entered into, and they are subsequently remeasured to their fair value at the end of each reporting period. The accounting for subsequent changes in fair value depends on whether the derivative is designated as a hedging instrument and, if so, the nature of the item being hedged. The Group designates certain derivatives as hedges of the fair value of recognised liabilities (fair value hedges).

At inception of the hedge relationship, the Group documents the economic relationship between hedging instruments and hedged items, including whether changes in the fair value of the hedging instruments are expected to offset changes in the fair value of hedged items. The Group documents its risk management objective and strategy for undertaking its hedge transactions. The Group uses the actual ratio between the hedged item and hedging instruments to determine its hedge ratio.

The fair values of derivative financial instruments designated in hedge relationships are disclosed in notes to the financial statements. The full fair value of a hedging derivative is presented as a non-current asset or liability when the remaining maturity is more than 12 months; it is classified as a current asset or liability when the remaining maturity is less than 12 months. Trading derivatives are classified as a current asset or liability.

Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recorded in profit or loss, together with any changes in the fair value of the hedged asset or liability that are attributable to the hedged risk. The Group uses swap and forward contracts to hedge the fair value changes attributable to foreign exchange risk on the hedged item. The Group generally designates only the change in fair value of the derivative contract related to the spot component as the hedging instrument. The change in the forward element of the derivative contract is not part of the hedging relationship and is recognised separately in the statement of profit or loss within fair value and foreign exchange gain/(loss). The unrealised gains or losses relating to the changes in the spot component of the hedge instrument, changes in the fair value of hedge items and the fair value changes of non-hedged items are recognised within Fair value and Foreign exchange gain/(loss). If the hedging derivative expires or sold, terminated or exercised, or the hedge no longer meets the criteria for fair value hedge accounting, or the hedge designation is revoked, then hedge accounting is discontinued prospectively.

Hedge effectiveness

The Group determines hedge effectiveness at the inception of the hedge relationship, and through periodic prospective effectiveness assessments, to ensure that an economic relationship exists between the hedged item and hedging instrument. The hedge effectiveness is assessed every reporting period.

Derivatives that do not qualify for hedge accounting

Certain derivative instruments are not designated for hedge accounting. Changes in the fair value of any derivative instrument that are not designated for hedge accounting are recognised immediately in profit or loss and are included in Net gain on financial instruments at fair value through profit or loss.

The Group may adjust the designated quantities of either the hedged item or the hedging instrument of an existing hedging relationship for the purpose of maintaining a hedge ratio that continues to comply with the hedge effectiveness requirements under IFRS 9. Rebalancing under IFRS 9 is a normal risk management activity and ensures that the hedge relationship remains aligned with the Group's documented risk management strategy. It does not trigger hedge discontinuation, nor does it require de-designation and re-designation of the hedge, unless the Group's hedging objective changes.

Material accounting policies - continued

3.22 Fiduciary activities

The Group commonly engages in trust or other fiduciary activities that result in the holding or placing of assets on behalf of individuals, trusts, post-employment benefit plans and other institutions. These assets under management are disclosed in the financial statements of the Group. Also, fee income earned and fee expenses incurred by the Group relating to the Group's responsibilities from fiduciary activities are recognised in profit or loss.

3.23 Staff costs

The group recognition of staff costs, includes wages, salaries, bonuses, and other employee benefits, should be recognised as an expense in the period in which employees render the related services. Costs are typically accrued in the financial statements to match the expense with the period of benefit.

Staff costs are measured based on contractual agreements, including any statutory obligations and provisions for benefits such as pensions or healthcare.

3.24 Operating expenses (OPEX)

Operating expenses should be recognised in the income statement in the period in which they are incurred. These include costs associated with the day-to-day functioning of the business, such as rent, utilities, and office supplies.

OPEX is measured based on actual costs incurred and should be recorded in the period they are attributable to.

3.25 Prepayments

Prepayments represent payments made in advance for goods or services that will be received in future periods. These should be initially recognised as assets and then expensed over the period to which they relate.

Prepayments are measured at the amount paid. The expense is recognised in the income statement in the period when the benefits of the prepayment are consumed.

3.26 Other Assets

Other assets include items that do not fall into specific categories like cash, receivables, or inventory. They should be recognised based on their nature and the benefits they provide.

These assets are measured based on cost or fair value, depending on the nature of the asset and relevant accounting standards.

Material accounting policies - continued

4 Use of estimates and judgements

- **Critical judgements**

These disclosures supplement the commentary on financial risk management (see note 5). Estimates where management has applied judgements are:

(i) ECL allowance on financial instrument:

- determination of significant increase in credit risk on financial assets.
- determination of the methodology used for incorporating forward-looking information in the ECL measurement

- selection and approval of ECL models

ii) Assessment of impairment on goodwill on acquired subsidiaries
iii) Defined benefit plan
iv) Valuation of unquoted equities
v) Valuation of derivatives
vi) Depreciation of property and equipment
vii) Amortisation of intangible assets
viii) Impairment of property and equipment
ix) Impairment of intangible assets
x) Litigations claims provisions
xi) Equity settled share-based payment
vii) Determination of intangible assets arising on business combinations
(xiii) Determination of control over investees companies
(xiv) Determination of the business model within which assets are held
xv) Partial disposal of subsidiary without loss of control
xvi) Extension and termination options - Determining the lease term

Management has assessed the first four estimates and the extension and termination options as having the key sources of estimation uncertainty, and are explained in further detail below. The other estimates have been assessed in their individual accounting policies.

Extension and termination options - Determining the lease term

In determining the lease term, management considers all facts and circumstances that create an economic incentive to exercise an extension option, or not exercise a termination option. Extension options (or periods after termination options) are only included in the lease term if the lease is reasonably certain to be extended (or not terminated).

For leases of properties, the following factors are normally the most relevant:

- If there are significant penalties to terminate (or not extend), the Group is typically reasonably certain to extend (or not terminate).

- If any leasehold improvements are expected to have a significant remaining value, the Group is typically reasonably certain to extend (or not terminate).

- Otherwise, the Group considers other factors including historical lease durations and the costs and business disruption required to replace the leased asset.

The lease term is reassessed if an option is actually exercised (or not exercised) or the Group becomes obliged to exercise (or not exercise) it. The assessment of reasonable certainty is only revised if a significant event or a significant change in circumstances occurs, which affects this assessment, and that is within the control of the lessee. During the current financial period, the financial effect of revising lease terms to reflect the effect of exercising extension and termination options was a increase in recognised lease liabilities and right-of-use assets of N1.826 billion.

Material accounting policies - continued

4 Use of estimates and judgements - continued
Key sources of estimation uncertainty

(i) ***Allowances for credit losses***

Loans and advances to banks and customers are accounted for at amortised cost and are evaluated for impairment on a basis described in accounting policy (see note 3.9)

The measurement of impairment losses both under IFRS 9 across all categories of financial assets requires judgement, in particular, the estimation of the amount and timing of future cash flows and collateral values when determining impairment losses and the assessment of a significant increase in credit risk. These estimates are driven by a number of factors, changes in which can result in different levels of allowances.

The Group's ECL calculations are outputs of complex models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. Elements of the ECL models that are considered accounting judgements and estimates include:

• The Group's internal credit grading model, which assigns PDs to the individual grades

• The Group's criteria for assessing if there has been a significant increase in credit risk and so allowances for financial assets should be measured on a Life Time Expected Credit Loss basis and the qualitative assessment

• The segmentation of financial assets when their ECL is assessed on a collective basis

• Determination of associations between macroeconomic scenarios and, economic inputs, such as unemployment levels, exchange rates, crude oil prices, GDP and collateral values, and the effect on PDs, EADs and LGDs

• Selection of forward-looking macroeconomic scenarios and their probability weightings, to derive the economic inputs into the ECL models.

It has been the Group's policy to regularly review its models in the context of actual loss experience and adjust when necessary.

Measurement of Expected Credit Loss

The standard requires recognition of an impairment allowance on financial instruments, based on 12 months or lifetime expected credit losses. The ECL calculations are based on the components discussed in the previous sections.

IFRS 9 requires the calculation of probability-weighted ECL impairments. Three ECL figures were therefore calculated for each scenario (optimistic, best-estimate and downturn ECLs) and probability-weighted to arrive at a single ECL impairment for each account.

The EIR, as provided by the Bank, is used to discount all ECLs to the reporting date. The method followed for accounts classified as Stage 1, Stage 2 or Stage 3 are set out below; For accounts with no EIR information, the contractual rate is used as a proxy

Stage 1

Account-level ECL figures are calculated projecting monthly expected losses for the next 12-months of each account. The forward, macro-adjusted monthly PDs are applied to the applicable LGD estimate and EAD or the collateral adjusted EAD (if secured) at the start of each month.

Stage 2

Account-level ECL figures are calculated projecting monthly expected losses for the remaining lifetime of each account. The forward, macro-adjusted monthly PDs are applied to the applicable LGD estimate and the EAD or collateral adjusted EAD (if secured) at the start of each month.

Stage 3

For the purposes of this model, account-level ECL figures are calculated by applying the applicable LGD estimate to the balance as at the reporting date

The final ECL impairment is calculated as the probability-weighted average of the ECLs produced for the three macro-economic scenarios.

Material accounting policies - continued

4 Use of estimates and judgements - continued
Measurement of Expected Credit Loss - continued

The Group reviews its loan portfolios to assess impairment at least on a half periodly basis. In determining whether an impairment loss should be recorded in the income statement, the Group makes judgements as to whether there is any observable data indicating a significant increase in credit risk followed by measurable decrease in the estimated future cash flows from a portfolio of loans before the decrease can be identified with that portfolio. This evidence may include observable data indicating that there has been an adverse change in the payment status of borrowers in a bank, or national or local economic conditions that correlate with defaults on assets in the Group.

The Group makes use of estimates based on historical loss experience for assets with credit risk characteristics and objective evidence of impairment similar to those in the portfolio when scheduling future cash flows. The methodology and assumptions used for estimating both the amount and timing of future cash flows are reviewed regularly to reduce any differences between loss estimates and actual loss experience.

The specific component of the total allowances for impairment applies to financial assets evaluated individually for impairment and is based upon management's best estimate of the present value of the cash flows that are expected to be received. In estimating these cash flows, management makes judgements about a debtor's financial situation and the net realisable value of any underlying collateral. Each impaired asset is assessed on its merits, and the workout strategy and estimate of cash flows considered recoverable are independently reviewed by the Credit Risk Management Department (CRMD).

A collective component of the total allowance is established for:
- Groups of homogeneous loans that are not considered individually significant and
- Groups of assets that are individually significant but were not found to be individually impaired.

Collective allowance for groups of homogeneous loans is established using statistical modelling of historical trends of the probability of default, timing of recoveries and the amount of loss incurred, adjusted for management's judgement as to whether current economic and credit conditions are such that the actual losses are likely to be greater or less than suggested by historical modelling. Default rates, loss rates and the expected timing of future recoveries are regularly benchmarked against actual outcomes to ensure that they remain appropriate.

Collective allowance for group of assets that are individually significant but that were not found to be individually impaired cover credit losses inherent in portfolios of loans and advances and held to maturity investment securities with similar credit characteristics when there is objective evidence to suggest that they contain impaired loans and advances and held to maturity investment securities, but the individual impaired items cannot yet be identified. In assessing the need for collective loan loss allowances, management considers factors such as credit quality, portfolio size, concentrations, and economic factors. In order to estimate the required allowance, assumptions are made to define the way inherent losses are modelled and to determine the required input parameters, based on historical experience and current economic conditions. The accuracy of the allowances depends on estimates of future cash flows for specific counterparty allowances and the model assumptions and parameters used in determining collective allowances are estimated.

(ia) ***Sensitivity of Exposure at default - Probability of Default (PD) & Loss Given Default (LGD)***

Loans and Advances To Customers

In establishing sensitivity to ECL estimates for corporate loans, four variables (GDP growth rate, Crude Oil Price, Prime Lending Rate, inflation and US exchange rate were considered). Of these variables, the bank's corporate loans reflects greater responsiveness to GDP growth rate and crude oil price.

Material accounting policies - continued

4 Use of estimates and judgements - continued

On balance Sheet Exposure

Crude Oil Price : Oil price volatility significantly impact economic activities which creates ripple effects on asset quality.

Maximum Lending Rate : Given its impact on lending rates on borrowing costs and potential increase in rate of default.

The table below outlines the total ECL for wholesale portfolios as at 30 September 2026, if each of the key assumptions used change by plus or minus 10%. The responsiveness of the ECL estimates to variation in macroeconomic variables have been presented below while putting in perspective, interdependencies between the various economic inputs.

	-10%	+10%
P & L Impact of change in Macroeconomic variables	(5,354)	5,284

	-10%	+10%
Asset Quality Impact of change in Macroeconomic variables	(5,228)	4,682

Off balance Sheet Exposure

Crude Oil Price : Oil price volatility significantly impact economic activities which creates ripple effects on asset quality.

Maximum Lending Rate : High lending rates could create an increased risk of default and Impact asset quality and Expected credit loss.

The table below outlines the total ECL for wholesale Off-Balance Sheet exposures as at 30 June 2026, if each of the key assumptions used change by plus or minus 10%.

	-10%	+10%
P & L Impact of change in Macroeconomic variables	(337)	336

Statement of prudential adjustments

Provisions under prudential guidelines are determined using the time based provisioning regime prescribed by the Revised Central Bank of Nigeria (CBN) Prudential Guidelines. This is at variance with the expected credit loss model required by IFRS 9. As a result of the differences in the methodology/provision regime, there will be variances in the impairments allowances required under the two methodologies.

Paragraph 12.4 of the revised Prudential Guidelines for Deposit Money Banks in Nigeria stipulates that Banks would be required to make provisions for loans as prescribed in the relevant IFRS Standards when IFRS is adopted. However, Banks would be required to comply with the following:

a) Provisions for loans recognised in the profit or loss account should be determined based on the requirements of IFRS. However, the IFRS provision should be compared with provisions determined under prudential guidelines and the expected impact/changes in general reserves should be treated as follows:

- Prudential Provisions is greater than IFRS provisions; the excess provision resulting should be transferred from the retained earnings account to a "regulatory risk reserve".
- Prudential Provisions is less than IFRS provisions; IFRS determined provision is charged to the statement of comprehensive income. The cumulative balance in the regulatory risk reserve is thereafter reversed to the retained earnings account.

b) The non-distributable reserve should be classified under Tier 1 as part of the core capital.

(iii) Defined benefit plan

The present value of the long term incentive plan depends on a number of factors that are determined in an actuarial basis using a number of assumptions. Any changes in these assumptions will impact the carrying amount of obligations. The assumptions used in determining the net cost (income) for pensions include the discount rate. The Group determines the appropriate discount rate at the end of the period. In determining the appropriate discount rate, reference is made to the yield on Nigerian Government Bonds that have maturity dates approximating the terms of the related pension liability. Other key assumptions for pension obligations are based in part on current market conditions.

(iv) Valuation technique unquoted equity:

The Equity investment and valuation section of the financial reporting policy of the group provides the framework for accounting for the group's investment in unquoted equity securities while also providing the guideline for the valuation process and analysis of changes in fair value measurements from period to period.

In accordance with IFRS 13 fair value measurement, which outlines three approaches for valuing unquoted equity instruments; market approach, the income approach and the cost approach. The Group estimated the fair value of its investment in each of the unquoted equity securities at the end of the financial period using the market approach.

The adjusted fair value comparison approach of P/BV ratios was adopted in valuing each of these equity investments taken into cognizance the suitability of the model to each equity investment and the availability of financial information while minimising the use of unobservable data.

Valuation methodology and inputs:

The fair value of the other unquoted equity securities were derived using the Adjusted fair value comparison technique. Adjusted fair value comparison approach of P/BV ratios are used as input data .

The steps involved in estimating the fair value of the Group's investment in each of the investees (i.e. unquoted equity securities) are as follows:

Step 1: Identify quoted companies with similar line of business ,structure and size

Step 2: Obtain the EV/EBITDA or the P/B or P/E ratios of these quoted companies identified from Valutico, Reuters or Capital IQ

Step 3: Derive the average or median of EV/EBITDA or the P/B or P/E ratios of these identified quoted companies

Step 4: Apply the lower of average (mean) or median of the identified quoted companies ratios on the Book Value or Earnings of the investment company to get the value of the investment company

Step 5: Discount the derived value of the investment company by applying an Illiquidity discount and size adjustment/haircut to obtain the Adjusted Equity Value

Step 6: Multiply the adjusted equity value by the present exchange rate for foreign currency investment

Step 7: Compare the Adjusted Equity value with the carrying value of the equity investment to arrive at a fair value gain or loss

Material accounting policies - continued

4 Use of estimates and judgements - continued

Description of valuation methodology and inputs:

a. Enterprise Value (EV):

Enterprise value measures the value of the ongoing operations of a company. It is calculated as the market capitalisation plus debt, minority interest and preferred shares, minus total cash and cash equivalents of the company.

b. Earnings Before Interest ,Tax Depreciation and Amortisation (EBITDA):

EBITDA is earnings before interest, taxes, depreciation and amortisation. EBITDA is one of the indicator's of a company's financial performance and is used as a proxy for the earning potential of a business.

EBITDA = Operating Profit + Depreciation Expense + Amortisation Expense

c. Price to Book (P/B Ratio):

The price-to-book ratio (P/B Ratio) is used to compare a stock's market value to its book value. It is calculated by dividing the current closing price of the stock by the latest company book value per share or by dividing the company's market capitalization by the company's total book value from its balance sheet.

b. Price to Earning (P/E Ratio):

The price-earnings ratio (P/E Ratio) values a company using the current share price relative to its per-share earnings.

The sources of the observable inputs used for comparable technique were gotten from Valutico, and Reuters or Capital IQ

Valuation Assumptions :

i. Illiquidity discount range of 12.2% to 18.8% is used to discount the value of the investments that are not tradable

ii.Haircut/size adjustment and country discount range from 8.7% to 10.06% to take care of size of interest held in investee entities and inflation and exchange rate impact being that the comparable companies are in foreign countries

Basis of valuation:

The assets are being valued on a fair open market value approach. This implies that the value is based on the conservative estimates of the reasonable price that can be obtained if and when the subject asset is offered for sale under the present market conditions.

Method of Valuation

The market approach has been applied in determining the fair value of the asset.

Under this approach, the valuation considers recent market transactions of comparable assets within the same asset class and also applies the Price-to-Book Value (P/BV) multiple derived from comparable entities.

Where necessary, adjustments are made to reflect differences in size, risk profile, financial performance, and other unique attributes of the asset being valued.

The key elements of the control framework for the valuation of financial instruments include model validation and independent price verification. These functions are carried out by an appropriately skilled Finance team, independent of the business area responsible for the products. The result of the valuation are reviewed quarterly by senior management.

Financial instrument measured at fair value
(a) Financial instruments in level 1

The fair value of financial instruments traded in active markets is based on quoted market prices at the balance sheet date. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. The quoted market price used for financial assets held by the group is the current bid price. These instruments are included in Level 1. Instruments included in Level 1 comprise primarily of government bonds, corporate bonds, treasury bills and equity investments classified as trading securities or fair value through other comprehensive income investments.

(b) Financial instruments in level 2

The fair value of financial instruments that are not traded in an active market are determined by using valuation techniques. These valuation techniques maximise the use of observable market data where it is available and rely as little as possible on entity specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

If one or more of the significant inputs is not based on observable market data, the instrument is included in Level 3. Specific valuation techniques used to value financial instruments include:

(i) Quoted market prices or dealer quotes for similar instruments;
(ii) The fair value of forwards and swaps foreign exchange contracts is determined using estimated foreign exchange rates at the balance sheet date;

(iii) Other techniques, such as discounted cash flow analysis, are used to determine fair value for the remaining financial instruments.

4 Use of estimates and judgements - continued

Financial instrument measured at fair value - continued

(c) Financial instruments in level 3

The Group uses widely recognised valuation models for determining the fair value of its financial assets.

Valuation techniques include net present value and discounted cash flow models, comparison with similar instruments for which market observable prices exist and other valuation models. Assumptions and inputs used in valuation techniques include risk-free and benchmark interest rates, credit spreads and other premia used in estimating discount rates, bond and equity prices, foreign currency exchange rates, equity and equity index prices and expected price volatilities and correlations. The objective of valuation techniques is to arrive at a fair value measurement that reflects the price that would be received to sell the asset or paid to transfer the liability in an orderly transaction between market participants at the measurement date.

For more complex instruments, the Group uses proprietary valuation models, which are usually developed from recognised valuation models. Some or all of the significant inputs into these models may not be observable in the market, and are derived from market prices or rates or are estimated based on assumptions. Examples of instruments involving significant unobservable inputs include certain Investment securities for which there is no active market. Valuation models that employ significant unobservable inputs require a higher degree of management judgement and estimation in the determination of fair value. Management judgement and estimation are usually required for selection of the appropriate valuation model to be used, determination of expected future cash flows on the financial instrument being valued, determination of the probability of counterparty default and prepayments and selection of appropriate discount rates. Fair value estimates obtained from models are adjusted for any other factors, such as liquidity risk or model uncertainties, to the extent that the Group believes that a third party market participant would take them into account in pricing a transaction. Fair values reflect the credit risk of the instrument and include adjustments to take account of the credit risk of the Group entity and the counterparty where appropriate.

For level 2 assets, fair value was obtained using a recent market transaction during the period under review. Fair values of unquoted debt securities were derived by interpolating prices of quoted debt securities with similar maturity profile and characteristics.

Transfers between fair value hierarchy

The group’s policy is to recognise transfers into and out of fair value hierarchy levels as at the end of the reporting period.

Material accounting policies - continued

4 Use of estimates and judgements - continued

4.1.3 Valuation techniques used to derive Level 2 fair values

Level 2 fair values of investments have been generally derived using the market approach. Below is a table showing sensitivity analysis of material unquoted investments categorised as Level 2 fair values.

Description	30 September 2026 N'000	Valuation technique	Observable Inputs	Fair value if inputs increased by 5% N'000	Fair value if inputs decreased by 5% N'000	Relationship of observable inputs to fair value
Derivative financial assets	2,020,774	Forward and swap: Fair value through mark to model reference rate Futures: Fair value through the mark to market rate	Spot rate at valuation date SOFR rate at valuation date NGN Interest rate	2,020,206	1,827,805	The higher the market rate, the higher the fair value of the derivative financial instrument
Derivative financial liabilities	(238,010)					
Investment in CSCS	33,000	The market value is obtained from the National Assosciation of Securities Dealers (NASD) as at the reporting year	Share price from NASD	34,650	31,350	The higher the share price, the higher the fair value
Nigerian Mortgage Refinance Company	336	The market value is obtained from the National Assosciation Of Securities Dealers (NASD) as at the reporting year	Share price from NASD	353	319	The higher the share price, the higher the fair value

4.1.4 Valuation techniques used to derive Level 3 fair values

Level 3 fair values of investments have been generally derived using the adjusted fair value comparison approach. Quoted price per earning or price per book value, enterprise value to EBITDA ratios of comparable entities in a similar industry were obtained and adjusted for key factors to reflect estimated ratios of the investment being valued. Adjusting factors used are the Illiquidity Discount which assumes a reduced earning on a private entity in comparison to a publicly quoted entity and the Haircut adjustment which assumes a reduced earning for an entity located in Nigeria contributed by lower transaction levels in comparison to an entity in a developed or emerging market.

Description	Fair value at 30 September 2026	Valuation technique	Unobservable Inputs	Fair value if unobservable inputs increased by 5%	Fair value if unobservable inputs decreased by 5%	Relationship of unobservable inputs to fair value
Investment in Africa Finance Corporation	725,753	Adjusted fair value comparison approach	Average P/B multiples of comparable companies, country risk and illiquidity discount	683,947	767,559	The lower the size adjustment/haircut, country risk and illiquidity discount, the higher the fair value.
Investment in Unified Payment System Limited	12,441	Adjusted fair value comparison approach	Average P/B multiples of comparable companies, country risk and illiquidity discount	11,724	13,158	The lower the size adjustment/haircut, country risk and illiquidity discount, the higher the fair value.
Investment in NIBSS	42,224	Adjusted fair value comparison approach	Average P/B multiples of comparable companies, country risk and illiquidity discount	39,792	44,656	The lower the size adjustment/haircut, country risk and illiquidity discount, the higher the fair value.
Investment in Afrexim	2,604	Adjusted fair value comparison approach	Average P/B multiples of comparable companies, country risk and illiquidity discount	2,454	2,754	The lower the size adjustment/haircut, country risk and illiquidity discount, the higher the fair value.

4.2 Fair value of financial assets and liabilities not carried at fair value

The fair value for financial assets and liabilities that are not carried at fair value were determined respectively as follows:

(i) Cash

The carrying amount of cash and balances with banks is a reasonable approximation of fair value.

(ii) Loans and advances to banks and customers

Loans and advances are net of charges for impairment. The estimated fair value of loans and advances represents the discounted amount of estimated future cash flows expected to be received. Expected cash flows are discounted at current market rates to determine fair value.

(iii) Investment securities and pledged assets

The fair values are based on market prices from financial market dealer price quotations. Where this information is not available, fair value is estimated using quoted market prices for securities with similar credit, maturity and yield.

The fair value comprises equity securities and debt instruments. The fair value for these assets are based on estimations using market prices and earning multiples of quoted securities with similar characteristics.

(iv) Other assets

The bulk of these financial assets have short maturities and the amounts is a reasonable approximation of fair value.

(v) Deposits from banks and customers

The estimated fair value of deposits with no stated maturity, which includes non-interest bearing deposits, is the amount repayable on demand. The estimated fair value of fixed interest-bearing deposits not quoted in an active market is based on discounted cash flows using interest rates for new debts with similar remaining maturity.

(vi) Other liabilities

The carrying amount of financial liabilities in other liabilities is a reasonable approximation of fair value. They comprise of short term liabilities which are available on demand to creditors with no contractual rates attached to them.

(vii) Interest bearing borrowings

The estimated fair value of fixed interest-bearing borrowings not quoted in an active market is based on the market rates for similar instruments for these debts over their remaining maturity.

(viii) Debt securities issued

The estimated fair value of floating interest rate debt securities quoted in an active market is based on the quoted market rates as listed on the irish stock exchange for these debts over their remaining maturity.

The Group reclassified cash reserve requirement, classified as restricted deposits with Central Banks and special reserve intervention funds, from cash and cash equivalents to Other assets for financial reporting purposes.

5 Financial Risk Management - continued

5.2 Market risk management - continued

The Group trades on bonds, treasury bills and foreign currency. Market risk in trading portfolios is monitored and controlled using tools such as position limits, value at risk and present value of an assumed basis points change in yields or exchange rates coupled with concentration limits. The major measurement technique used to measure and control market risk is outlined below.

The table below sets out information on the exposure to fixed and variable interest instruments.

5.2.2 Exposure to fixed and variable interest rate risk

The Group reclassified Cash reserve requirement, classified as restricted deposits with Central banks and special reserve intervention funds, from Cash and cash equivalents to Other assets for financial reporting purposes.

Derivative financial instruments include elements of interest rate differential between the applicable underlying currencies. Further details on the fair value of derivatives have been discussed in Note 21 of the financial statement.

6 Regulatory capital

The regulatory capital requirement for entities within the group are as follows:

Name of Entity	Primary Regulator	Regulatory Requirement
Access Holdings Plc	Central Bank of Nigeria	(see note (i)below)
Access Bank Plc	Central Bank of Nigeria	(see not (ii) below)
The Hydrogen Payment Services Company Ltd	Central Bank of Nigeria	2 billion Naira
Access ARM Pensions Ltd	National Pensions Commission	5 billion Naira
Access Insurance Brokers	National Insurance Commission	5 milllion Naira
Oxygen X Finance Company Ltd	Central Bank of Nigeria	100 million Naira

(i) **The analysis of the share capital of the Group and its subsidiaries as at 30 September 2026 is shown below:**

Entity	Share capital N'm	Share premium N'm	Total N'm
Subsidiaries			
Access Bank Plc	26,659	568,164	594,823
Oxygen X Finance Ltd	5,000	-	5,000
Hydrogen Payment Co Ltd	4,000	-	4,000
Access ARM Pensions Ltd	1,782	78	3,593
Access Insurance Brokers Ltd	5	-	5
Access Golf Nigeria Ltd	103	5,790	5,990
Aggregated share capital of Subsidiaries	**39,379**	**574,032**	**613,410**
Access Holdings Plc	27,188	588,833	616,021
Surplus capital			**(2,611)**

(ii) In the circular dated 14 November 2025, the Central Bank of Nigeria clarified that the minimum paid-up capital referenced under Section 7.1 of the Guidelines for Licensing and Regulation of Financial Holding Companies (2014) should be calculated strictly as the par value of issued shares plus any share premium arising from the issuance.

In line with this directive, the Group obtained approval for a ₦21.42 billion private placement from the Central Bank of Nigeria on 20 February 2026.

This brought the Group into full compliance with the revised minimum paid-up capital requirement under the CBN Guidelines, in accordance with Section 7.1 of the CBN Guidelines for Licensing and Regulation of Financial Holding Companies in Nigeria (2014).

6.1 Capital Risk Management

This represents the capital adequacy ratio under basel II guidelines.

The capital adequacy ratio (CAR) represents the Group's capital strength and its ability to absorb potential losses while meeting obligations to depositors and other creditors. The ratio is calculated in accordance with the Basel II regulatory framework. The objective of these requirements is to ensure that the Group maintains a sound capital base to support the risks inherent in its business and to protect depositors and investors.

6 Regulatory capital - continued

6.1 Capital Risk Management - continued

Under Basel II guidelines, regulatory capital is broadly classified into the following tiers:

Tier 1 Capital (Core Capital):

Comprises the Group's most reliable and permanent capital resources, including paid-up share capital, share premium, retained earnings, and other reserves. These represent funds that are permanently and freely available to absorb losses without triggering liquidation.

Tier 2 Capital (Supplementary Capital):

Includes components such as subordinated debt, and revaluation reserves. Tier 2 capital enhances the Group's overall capital base but is considered less permanent compared to Tier 1 capital.

Deductions from Capital:

Certain items, such as investments in subsidiaries, deferred tax assets, intangible assets, and regulatory risk reserve, are deducted from regulatory capital in line with Basel II requirements.

The Group monitors its capital adequacy in line with applicable regulatory requirements. Capital adequacy ratio represents the ratio of qualifying regulatory capital to risk-weighted assets and off-balance sheet exposures. The regulatory minimum capital adequacy ratio prescribed for the banking subsidiary is 10% for national banks and 15% for international banks. The Group's banking subsidiary maintained capital ratios above the applicable regulatory minimum throughout the reporting period.

7 Operating segments

The Group has seven reportable segments, as described below, which are the Group's strategic business units. The strategic business units offer different products and services, and are managed separately based on the Group's management and internal reporting structure. For each of the strategic business units, the Executive Management Committee reviews internal management reports on at least a quarterly basis. The Group presents segment information to its Executive Committee, which is the Group's Chief Operating Decision Maker, based on International Financial Reporting Standards.

Based on the market segment and extent of customer turnover, the group reformed the arrangement of segments from previous periods into seven operational segments as described below;

- **Corporate and Investment Banking -** The division provides bespoke comprehensive banking products and a full range of services to multinationals, large domestic corporates and other institutional clients. It also provides innovative finance solutions to meet the short, medium and long-term financing needs for the Group's clients as well as relationship banking services to the Group's financial institutions customers.

- **Commercial banking -** The commercial banking division has presence in cities in the countries in which the group operate. It provides commercial banking products and services to the non-institutional clients, medium and small corporate segments. The division also provides financial services to public sector, commercial institutions and oriental corporates.

- **Retail banking** – The retail banking division is the retail arm of the Group which provides financial products and services to individuals (personal and inclusive segments) and private banking segment. The private banking segment focuses on offering bespoke services to High Net worth Individuals (HNI) and Ultra High Net worth Individuals (UHNI) by handling their wealth portfolio needs both locally and abroad.

- **PFA segment**:Access Pensions Management Is a Pension Fund Administrator whose services includes the management and administration of pension funds such as Retirement Savings Accounts Fund I-VI and Transitional Contributions Fund (TCF); administration of retirement savings account; administration of voluntary savings schemes and the administration of approved existing schemes.

- **Payment Segment :**Hydrogen Payment Services Company Limited ("Hydrogen") is a FinTech company which has started breaking grounds in the industry with the seamless and reliable solutions it offers to businesses in Nigeria. Hydrogen's vision is to build Africa's most powerful business services network. Hydrogen offers a wide range of products and services, including InstantPay, Payment gateway, POS, Card, and Switch, which have been well-received by customers and the industry as a whole. Our clientele base cuts across from mid-size to large private and public sectors of the economy, targeting organizations/businesses that perform and receive payments on a day-to-day basis.

- **Insurance Segment:**Access Insurance Brokers Limited Is an inurance broker firm providing professional insurance services for individuals, corporations, and government agencies, ensuring the arrangement of optimal coverage for all insurable risks. Our commitment is to act in the best interest of clients, securing suitable risk placements with insurance companies at no additional cost. The range of services offered includes: Insurance Audits, Risk Management Evaluation, Specialized Claims and Uninsured Loss Recoveries, Research and Market Reviews and Risk Retention Fund.

- **Digital lending Segment:**Oxygen X Finance Company Ltd is a smart lending company that helps individuals and businesses access quick and reliable loans. From salary earners to small business owners, we provide the support they need to grow, solve problems, and take control of their finances.

All of the Segments reported at the end of the period had its,

- Reported revenue, from both external customers and intersegment sales or transfers, 10 per cent or more of the combined revenue, internal and external, of all operating segments, or

- the absolute measure of its reported profit or loss 10 per cent or more of the greater, in absolute amount, of

(i) the combined reported profit of all operating segments that did not report a loss and
(ii) the combined reported loss of all operating segments that reported a loss, or
-its assets are 10% or more of the combined assets of all operating segments.

The line "Derived from external customers" comprises interest income, fees and commission income, net gain on investment securities and net foreign exchange income. The basis of accounting of transactions among reportable operating segments is on accrual basis.

Unallocated Segments represents all other transactions than are outside the normal course of business and can not be directly related to a specific segment financial information. Thus, in essence, unallocated segments reconcile segment balances to group balances. Material items comprising total assets and total liabilities of the unallocated segments have been outlined below;

Sales between segments are carried out at arm's length. The revenue from external parties reported to the executive committee is measured in a manner consistent with that in the income statement.

Unallocated total assets and liabilities	**Group**
In millions of Naira	**30 September 2026**

	650,867	**600,404**	**-**	**-**

10 (a) Fee and commission income - continued

Credit related fees and commissions are fees charged to customers other than fees included in determining the effective interest rates relating to loans and advances carried at amortised cost. These fees are accounted for in accordance with the Group's revenue accounting policy. The representation of all fees and commission recognised in the year and prior period at a point in time and over a period of time is as shown below.

Fee and commission income	Group 30 September 2026	Group 30 September 2025	Company 30 September 2026	Company 30 September 2025
Point in Time	582,347	567,530	-	-
Over Time	68,520	32,874	-	-
	650,867	**600,404**	**-**	**-**

Channels and other E-business income include income from electronic channels, card products and related services. E-banking receivables and payables are disclosed in Notes 26 and 34, respectively.

10 (b) Fee and commission expense

In millions of Naira	Group 30 September 2026	Group 30 September 2025	Company 30 September 2026	Company 30 September 2025
Bank and electronic transfer charges	17,444	13,921	-	-
E-banking expense	98,485	110,565	-	-
	115,929	**124,486**	**-**	**-**

Fees and commissions expenses are fees charged for the provision of services to customers transacting on alternate channels platform of the Group and on the various debit and credit cards issued for the purpose of these payments. They are charged to the Group on services rendered on internet banking, mobile banking and online purchasing platforms. The corresponding income lines for these expenses include the income on cards (both foreign and local cards), online purchases and bill payments included in fees and commissions. Fees and commissions expense includes the cost incurred to the group for providing alternate platforms for the purposes of internet banking, mobile banking and online purchases. It also includes expenses incurred by the Group on the various debit and credit cards issued.

The E-banking transactions have both receivables (See note 26) and payables (See note 34) representing settlements due from and to other Banks.

11 Net gains/(losses) on financial instruments at fair value

a Net gains/(losses) on financial instruments at fair value through profit or loss

In millions of Naira	Group 30 September 2026	Group 30 September 2025	Company 30 September 2026	Company 30 September 2025

Debt instruments at FVOCI				
Fixed income securities	(15,387)	311,131	-	-
Fair value loss on derecognised FVOCI debt securities reclassified to profit or loss	(26,001)	-	-	-
	(41,388)	**311,131**	**-**	**-**
Total	**(19,911)**	**146,894**	**-**	**-**

(a) Net gains on financial instruments includes the gains and losses arising both on the purchase and sale of trading instruments and from changes in fair value. Fair value gain on equity investments is from investments in which the Bank has interests. Based on IFRS 9, the Group measures changes in fair value of equity investments through profit or loss.

(b) Net gains on disposal of financial instruments classified as fair value through other comprehensive income (FVOCI) comprise gains and losses arising from both the purchase and sale of FVOCI instruments, as well as amounts reclassified from cumulative other comprehensive income upon disposal of FVOCI debt instruments.

12 (a) Net foreign exchange gain/(loss)

In millions of Naira	Group 30 September 2026	Group 30 September 2025	Company 30 September 2026	Company 30 September 2025

Hedging instrument	1,602	1,201,168	(144,179)	(206,153)

12 (b) Net loss on fair value hedge (Hedging ineffectiveness) - continued

*The liabilities are interest bearing loans and deposits from financial institutions denominated in USD.
The hedging instrument is recognised within derivative financial assets on the statement of financial position.

	Carrying amount of hedged item		Accumulated amount of fair value hedge adjustments on the hedged item included in the carrying amount of the hedged item		Line item in the statement of financial position where the hedging item is located
	Assets	Liabilities	Assets	Liabilities	
Fair value hedging	**₦'millions**	**₦'millions**	**₦'millions**	**₦'millions**	
Fair value hedges					
Foreign exchange risk on foreign currency loan - Interest bearing loan	-	674,665	-	56,342	Interest bearing borrowings
Foreign exchange risk on foreign currency loan - Deposit from financial institution	-	481,962	-	11,001	Deposit from financial institution

Sep-26	Hedge ratio	Change in the value of the hedging instrument recognised in profit or loss	Hedge ineffectiveness recognised in profit or loss	Change in fair value of hedge items attributable to hedge risk	Accumulated fair value hedge adjustments remaining on the balance sheet on ceased Hedged items
Fair value hedge		**₦'millions**	**₦'millions**		
Fair value changes in hedging adjustments	80%	(206,153)	(138,809)	67,343	-

The following table shows the year in which the hedging contract ends:

Sep-26	**3 months**	**6 months**	**12 months**	**2 years**	**More than 2 years**
Fair value hedging	**₦'millions**	**₦'millions**	**₦'millions**	**₦'millions**	**₦'millions**
Hedging assets	(62,975)	(81,204)	-	-	-

For hedges of foreign currency liabilities, the Bank enters into hedge relationships where the critical terms of the hedging instrument are closely aligned with the terms of the hedged item. The Bank therefore performs a qualitative assessment of effectiveness. Sources of ineffectiveness include timing differences between the settlement dates of the hedged item and hedging instruments, quantity or notional amount differences between the hedged item and hedging instrument and credit risk of the Bank and its counterparty to the forward contract.

The Bank applies the actual ratio between the hedged item and the hedging instrument, which aligns with its risk management strategy and is considered appropriate for hedge accounting under IFRS 9.

However, during the year, there was a reduction in foreign currency-denominated liabilities (the hedged item), resulting in a deterioration of hedge effectiveness. In accordance with IFRS 9.6.5.5, the Bank rebalanced its hedge ratio to maintain the economic relationship between the hedged item and the hedging instrument.

13 Other operating income

In millions of Naira	Group 30 September 2026	Group 30 September 2025	Company 30 September 2026	Company 30 September 2025

17 Earnings per share

(a) Basic from continuing operations

Basic Earnings Per Share(EPS) is calculated by dividing the profit attributable to equity holders of the company by the weighted average number of ordinary shares in issue during the year excluding ordinary shares purchased by the company and held as treasury shares.

In millions of Naira	Group 30 September 2026	Group 30 September 2025	Company 30 September 2026	Company 30 September 2025
Profit for the period from continuing operations	429,931	426,702	9,189	140,055
Opening Number of ordinary shares in issue	54,376	53,318	54,376	53,318
Weighted average number of shares in issue	(760)	-	(760)	-
	53,616	53,318	53,616	53,318
In kobo per share				
Basic earnings per share from continuing operations	802	800	17	263

Diluted EPS

Diluted earnings per share is calculated by considering the impact of the treasury shares in weighted average number of ordinary shares outstanding

In millions of Naira	Group 30 September 2026	Group 30 September 2025	Company 30 September 2026	Company 30 September 2025
Total profit attributable to owners:				
Continuing operations	429,931	426,702	9,189	140,055
Profit for the year	429,931	426,702	9,189	140,055
Opening Number of ordinary shares in issue	54,376	35,545	54,376	35,545
Weighted average number of treasury shares in issue	(760)	-	(760)	-
Weighted average number of ordinary shares in issue	53,616	35,545	53,616	35,545
In kobo per share				
Basic earnings per share from continuing operations	802	800	17	263

*The number of shares that would be issued in the event of conversion of the $300 million convertible additonal tier 1 bond has a dilutive effect on the ordinary shares of the Group. However, as the conversion has not occurred as of the reporting date, the potential dilution has no impact on the current period's Dividends Per Share (DPS).

18 Cash and balances with banks

In millions of Naira	Group 30 September 2026	Group 31 December 2025	Company 30 September 2026	Company 31 December 2025
Cash on hand and balances with banks (see note (i))	3,288,601	2,681,016	20,788	34,657

21 Derivative financial instruments - continued

Derivative financial instruments consist of forward, swap, and futures contracts. These instruments are primarily held for risk management and operational cash flow purposes. In accordance with IFRS 9, all derivatives are initially recognized at fair value and subsequently measured at fair value through profit or loss, unless they are designated in a qualifying hedge accounting relationship. The contracts have intended settlement dates of between 30 days and above 365 days. Derivative contracts are valued with reference to data that has been marked to model using interest rate parity methodology of valuation which has referenced data from US SOFR rates quotation, treasury bills yield and FGN bond yields, adjusted for spread computed as the differential between the NIBOR and NITTY rate and spot exchange rate as quoted on the financial market dealers quotation (FMDQ) site.

The movement in fair value is as a result of a depreciation of the reporting currency of the Group (Naira) within the year and volume of transactions.

(i) The assets pledged as collateral include assets pledged to third parties under secured borrowing with the related liability disclosed above(where borrowings can be seen in Note 36). The pledges have been made in the normal course of business. In the event of default, the pledgee has the right to realise the pledged assets. This disclosure in 24(i) is inclusive of only liabilities that actual cash has been received for.

(a) This represents the receivable from debtors to the Group that cuts across services rendered in different capacities.

Also included in account receivable is Restricted Share Performance Plan (RSPP) investment transferred from bank to the Parent (Access Holdings) to hold shares purchased on behalf of employees.

The shares previously held in the Structured Entity (SE) on behalf of the Bank are now recognized as a receivable from the parent. Upon vesting the shares are transferred to the employees.
Also Included in the receivables balance is fair value of deferred consideration receivable of N8.27 billion (ZAR93.14 million) in relation to the sale of 25% + 1 shares in Access Bank South Africa. See note 46 for more details.

(b) E-banking receivables represent settlements due from other banks use of electronic channels by their customers. The Group's payables to other banks is contained in Note 34.

(c) Deposit for investment in AGSMEIS represents the Access Bank Nigeria's deposit as equity investment in Agri-business/Small and Medium Enterprises Investment Scheme. As approved by the Bankers' Committee on 9th February 2017, all Deposit Money Banks are required to invest 5% of prior period Profit After Tax as equity investment in the scheme.

(d) Subscription for investment balance relates to deposits paid for the acquisition of equity investments for which shares have not been issued to the Bank.

(e) Restricted deposits with central banks comprise the cash reserve requirements of the Central Bank of Nigeria and other central banks of jurisdictions that the Group operates in as well as the special intervention fund with the Central Bank of Nigeria introduced in January 2016 as a reduction in the cash reserve ratio with a view of channeling the reduction to financing the real sector. These balances are not available for day to day operations of the Group.

(f) Inventory consists of blank debit cards, cheque leaves, computer consumables and other stationery held by the Group.

In determining the ECL for other assets, the Group applies the simplified model in estimating the ECLs, adopting a provision matrix, where the receviables are grouped based on the nature of the transactions, aging of the balances and different historical loss patterns to determine the lifetime ECLs. Receivables relate to amount due for the provision of services to the Bank's customers. The provision matrix estimates ECLs on the basis of historical default rates adjusted for current and forward looking macroeconomic factors without undue cost and effort.

(g) The NIL balance (Dec 2025: N58.91Bn) represents the transaction value of matured forward contracts with the Central Bank of Nigeria at the end of the period.

27b Investment subsidiaries (with continuing operations)

(i) Group entities

Set out below are the group's subsidiaries as at 30 September 2026. Unless otherwise stated, the subsidiaries listed below have share capital consisting solely of ordinary shares, which are held directly by the group and the proportion of ownership interests held equals to the voting rights held by the group. The country of incorporation is also their principal place of business.

There are no significant restrictions on the Group's ability to access or use the assets and settle the liabilities of any member of the Group to the extent that regulation does not inhibit the group from having access, and in liquidation scenario, this restriction is limited to its level of investment in the entity.
There are no significant restrictions on the ability of subsidiaries to transfer funds to the Group in the form of cash dividends or repayment of loans and advances.

Investment in subsidiaries comprises:

	Ownership interest	
	Company 30 September 2026	**Company 31 December 2025**

Access Bank Tanzania- Deferred consideration (See Note 26d)	18,575	18,575

Based on the contractual arrangements between the Bank and the shareholders in each of the entities, the Bank has the power to appoint and remove the majority of the board of Directors of each entity.

- The relevant activities of each of the listed subsidiaries are determined by the Board of Directors of each entity based on simple majority shares. Therefore, the directors of the Bank concluded that the Bank has control over each of the above listed entities and were consolidated in the Bank financial statements.

- There was a partial disposal of the parent's stake in Access Ghana during the period. This is disclosed in Note 46 under partial disposal of subsisdiaries without loss of control.

During the period, Access Bank UK also acquired a 100% controlling interest in Zempler Bank Limited (Zempler), United Kingdom on 27 February 2026. See note 44 for more details.

(a) Diamond bank:

The recoverable amount of Goodwill as at 30 September 2026 was greater than its carrying amount and is thus not impaired. The recoverable amount was determined using a value-in-use computation of N27,72Bn.

Goodwill is reviewed annually for impairment, or more frequently when there are indications that impairment may have occurred. Impairment assessment has been performed for the year and no losses on goodwill were recognized as at 30 September 2026 (31 December 2025: Nil)

Goodwill is monitored by the Group on an entity by entity basis.

Goodwill impairment test was done by comparing the value-in-use for the CGU to the carrying amount of the goodwill based on cash flow projections. The approach is based on estimating the free cash flow to equity to determine the value in use. Cash flows were projected for the first 5 years based on operating results, expected future financial performance and past experience. Beyond 5 years, cash flows were assumed to grow at terminal growth rate of of 3.24%. A discount rate of 22.24% was applied based on a estimate of cost of capital. This was estimated using the Capital Asset Pricing Model. There were no write-downs of goodwill due to impairment during the year. All assumptions are subject to market and economic conditions. However, we do not see possible changes in these assumptions adversely causing the recoverable amounts of the CGUs declining below their carrying amounts.

The key assumption used in computing the value-in-use for goodwill in during the period are as follows:

Terminal growth rate (i)	3.24%
Discount rate (ii)	22.24%

(i) Weighted average growth rate used to extrapolate cash flows beyond the budget year.
(ii) Pre-tax discount rate applied to the cash flow projections.

29(b) Intangible assets

29(b) Intangible assets - continued

Cash Flow Forecast

Cash flows were projected based on past experience and actual operating results. These cashflows are based on the expected revenue growth for the entity over this 5-year period.

Discount Rate

Pre-tax discount rate of 22.24% was applied in determining the recoverable amounts for Diamond Bank Plc. This discount rate was estimated using the a proxy of the average of the beta for similar companies, the risk-free rate and the equity risk premium of the sovereign of the reporting entity.

Terminal growth rate

The terminal growth rate applied was based on the long term growth rate in GDP of Nigeria.
The key assumptions described above may change as economic and market conditions change. The Group estimates that reasonably possible changes in these assumptions are not expected to cause the recoverable amount of the entity (from which the goodwill arose) to decline below their carrying amount.

Sensitivity analysis of key assumptions used

	10% increase	10% decrease
Impact of change in discount rate on value-in-use computation (increase/(decrease)	(741)	952
Impact of change in revenue growth on value-in-use computation (increase/(decrease)	68	(66)

There were no write-downs of goodwill due to impairment during the period

(b) Access Bank Rwanda:

The recoverable amount of Goodwill as at 30 September 2026 is greater than its carrying amount and is thus not impaired. The recoverable amount was determined using a value-in-use computation of N173.94bn.

oodwill is reviewed annually for impairment, or more frequently when there are indications that impairment may have occurred. Impairment assessment has been performed for the period and no losses on goodwill were recognized as at 30 September 2026 (31 December 2025: Nil)

Goodwill is monitored by the Group on cash generating units (CGU) basis. For the purpose of impairment testing, the goodwill has been allocated to Access Bank Rwanda.

Goodwill impairment test was done by comparing the value-in-use for the CGU to the carrying amount of the goodwill based on cash flow projections. The approach is based on estimating the free cash flow to equity to determine the value in use. Cash flows were projected for the first 5 years based on operating results, expected future financial performance and past experience. Beyond 5 years, cash flows were assumed to grow at terminal growth rate of of 6.97%. A discount rate of 20.07% was applied based on a estimate of cost of capital. This was estimated using the Capital Asset Pricing Model. There were no write-downs of goodwill due to impairment during the year. All assumptions are subject to market and economic conditions. However, we do not see possible changes in these assumptions adversely causing the recoverable amounts of the CGUs declining below their carrying amounts.

(b) Access Bank Rwanda - continued

The key assumption used in computing the value-in-use for goodwill in during the perios are as follows:

	30 September 2026
Terminal growth rate (i)	6.97%
Discount rate (ii)	20.07%

(i) Terminal growth rate used to extrapolate cash flows beyond the budget period.
(ii) Pre-tax discount rate applied to the cash flow projections.

Cash Flow Forecast

Cash flows were projected based on past experience and actual operating results. These cashflows are based on the expected revenue growth for the entity over this 5-year period.

29(b) Intangible assets

Discount Rate

Pre-tax discount rate of 20.7% was applied in determining the recoverable amounts for the goodwill of Access Bank Rwanda. This discount rate was estimated using beta, risk-free rate and the equity risk premium for Rwanda.

Terminal growth rate

Terminal growth rate applied was based on the long term growth rate in GDP of Rwanda.
The key assumptions described above may change as economic and market conditions change. The Group estimates that reasonably possible changes in these assumptions are not expected to cause the recoverable amount of the subsidiaries (from which the goodwill arose) to decline below their carrying amount.

Sensitivity analysis of key assumptions used

	10% increase	**10% decrease**
Impact of change in discount rate on value-in-use computation (increase/(decrease)	(11)	14
Impact of change in growth rate on value-in-use computation (increase/(decrease	2	(2)

29(b) Intangible assets - continued

(c) Access bank Kenya:

The recoverable amount of Goodwill as at 30 September 2026 is greater than its carrying amount and is thus not impaired. The recoverable amount was determined using a value-in-use computation of N462.93bn.

Goodwill is reviewed annually for impairment, or more frequently when there are indications that impairment may have occurred.

Goodwill is monitored by the Group on cash generating units (CGU) basis. For the purpose of impairment testing, the goodwill has been allocated to Access Bank Kenya.

Goodwill impairment test was done by comparing the value-in-use for the CGU to the carrying amount of the goodwill based on cash flow projections. Cash flows were projected for the first 5 years based on operating results, expected future financial performance and past experience. Beyond 5 years, cash flows were assumed to grow at terminal growth rate of of 5.38%. A discount rate of 21.6% was applied based on estimate of cost of capital. This was estimated using the Capital Asset Pricing Model. There were no write-downs of goodwill due to impairment during the period. All assumptions are subject to market and economic conditions. However, we do not see possible changes in these assumptions adversely causing the recoverable amounts of the CGU's declining below their carrying amounts.

The key assumption used in computing the value-in-use for goodwill in during the period are as follows:

Terminal growth rate (i)	5.38%
Discount rate (ii)	21.60%

(i) Terminal growth rate used to extrapolate cash flows beyond the budget period.
(ii) Pre-tax discount rate applied to the cash flow projections.

Cash Flow Forecast

Cash flows were projected based on past experience and actual operating results. These cashflows are based on the expected revenue growth for the entity over this 5-year period.

Discount Rate

Pre-tax discount rate of 21.6% was applied in determining the recoverable amounts for the goodwill of Access Bank Kenya. This discount rate was estimated using the Bank's beta, the risk-free rate and the equity risk premium for Kenya.

29(b) Intangible assets

Terminal growth rate

The terminal growth rate applied was based on the long term growth rate in GDP of Kenya.

The key assumptions described above may change as economic and market conditions change. The Group estimates that reasonably possible changes in these assumptions are not expected to cause the recoverable amount of the entity (from which the goodwill arose) to decline below their carrying amount.

Sensitivity analysis of key assumptions used

In millions of Naira	10% increase	10% decrease
Impact of change in discount rate on value-in-use computation (increase/(decrease)	(48)	64
Impact of change in growth rate on value-in-use computation (increase/(decrease)	9	(9)

There were no write-downs of goodwill due to impairment during the period.

29(b) (d) Access bank Botswana:

The recoverable amount of Goodwill as at 30 September 2026 is greater than its carrying amount and is thus not impaired. The recoverable amount was determined using a value-in-use computation of N411.42bn.

Goodwill is reviewed annually for impairment, or more frequently when there are indications that impairment may have occurred.

Goodwill is monitored by the Group on cash generating units (CGU) basis. For the purpose of impairment testing, the goodwill has been allocated to Access Bank Botswana.

Goodwill impairment test was done by comparing the value-in-use for the CGU to the carrying amount of the goodwill based on cash flow projections. Cash flows were projected for the first 5 years based on operating results, expected future financial performance and past experience. Beyond 5 years, cash flows were assumed to grow at terminal growth rate of 3.69%. A discount rate of 11.55% was applied based on a estimate of cost of capital. This was estimated using the Capital Asset Pricing Model. There were no write-downs of goodwill due to impairment during the year. All assumptions are subject to market and economic conditions. However, we do not see possible changes in these assumptions adversely causing the recoverable amounts of the CGUs declining below their carrying amounts.

The key assumption used in computing the value-in-use for goodwill in during the year are as follows:

Terminal growth rate (i)	3.69%
Discount rate (ii)	11.55%

(i) Terminal growth rate used to extrapolate cash flows beyond the budget period.

(ii) Pre-tax discount rate applied to the cash flow projections.

Cash Flow Forecast

Cash flows were projected based on past experience and actual operating results. These cashflows are based on the expected revenue growth for the entity over this 5-year period.

Discount Rate

Pre-tax discount rate of 11.55% was applied in determining the recoverable amounts for the goodwill of Access Bank Botswana. This discount rate was estimated using the Bank's beta, the risk-free rate and the country risk premium for Botswana.

Terminal growth rate

The terminal growth rate applied was based on the long term growth rate in GDP of Botswana.

Sensitivity analysis of key assumptions used

In millions of Naira	10% increase	10% decrease
Impact of change in discount rate on value-in-use computation (increase/(decrease)	(35)	47
Impact of change in growth rate on value-in-use computation (increase/(decrease)	5	(4)

There were no write-downs of goodwill due to impairment during the period.

29(b) Intangible assets

29(b) (e) Access bank Angola (Former Finibanco):

The recoverable amount of Goodwill as at 30 September 2026 is greater than its carrying amount and is thus not impaired. The recoverable amount was determined using a value-in-use computation of N123.18bn.

Goodwill is reviewed annually for impairment, or more frequently when there are indications that impairment may have occurred.

Goodwill is monitored by the Group on cash generating units (CGU) basis. For the purpose of impairment testing, the goodwill has been allocated to Access Bank Angola.

Goodwill impairment test was done by comparing the value-in-use for the CGU to the carrying amount of the goodwill based on cash flow projections. Cash flows were projected for the first 5 years based on operating results, expected future financial performance and past experience. Beyond 5 years, cash flows were assumed to grow at terminal growth rate of 1.76%. A discount rate of 19.31% was applied based on a estimate of cost of capital. This was estimated using the Capital Asset Pricing Model. There were no write-downs of goodwill due to impairment during the year. All assumptions are subject to market and economic conditions. However, we do not see possible changes in these assumptions adversely causing the recoverable amounts of the CGUs declining below their carrying amounts.

The key assumption used in computing the value-in-use for goodwill in during the period are as follows:

Terminal growth rate (i)	1.76%
Discount rate (ii)	19.31%

(i) Terminal growth rate used to extrapolate cash flows beyond the budget period.
(ii) Pre-tax discount rate applied to the cash flow projections.

Cash Flow Forecast

Cash flows were projected based on past experience and actual operating results. These cashflows are based on the expected revenue growth for the entity over this 5-year period.

Discount Rate

Pre-tax discount rate of 19.31% was applied in determining the recoverable amounts for the goodwill of Access Bank Angola. This discount rate was estimated using the Bank's beta, the risk-free rate and the country risk premium for Angola.

Terminal growth rate

The terminal growth rate applied was based on the long term growth rate in GDP of Angola.

The key assumptions described above may change as economic and market conditions change. The Group estimates that reasonably possible changes in these assumptions are not expected to cause the recoverable amount of the entity (from which the goodwill arose) to decline below their carrying amount.

Sensitivity analysis of key assumptions used

In millions of Naira	10% increase	10% decrease
Impact of change in discount rate on value-in-use computation (increase/(decrease)	(1,849)	2,232
Impact of change in growth rate on value-in-use computation (increase/(decrease)	425	(417)

There were no write-downs of goodwill due to impairment during the period.

29(b) Intangible assets

(f) Access bank Angola (Standard Chartered Bank):

The recoverable amount of Goodwill as at 30 September 2026 is greater than its carrying amount and is thus not impaired. The recoverable amount was determined using a value-in-use computation of N183.28bn.

Goodwill is reviewed annually for impairment, or more frequently when there are indications that impairment may have occurred.

Goodwill is monitored by the Group on cash generating units (CGU) basis. For the purpose of impairment testing, the goodwill has been allocated to Access Bank Angola.

Goodwill impairment test was done by comparing the value-in-use for the CGU to the carrying amount of the goodwill based on cash flow projections. Cash flows were projected for the first 5 years based on operating results, expected future financial performance and past experience. Beyond 5 years, cash flows were assumed to grow at terminal growth rate of 1.76%. A discount rate of 19.31% was applied based on a estimate of cost of capital. This was estimated using the Capital Asset Pricing Model. There were no write-downs of goodwill due to impairment during the period. All assumptions are subject to market and economic conditions. However, we do not see possible changes in these assumptions adversely causing the recoverable amounts of the CGUs declining below their carrying amounts.

The key assumption used in computing the value-in-use for goodwill in during the year are as follows:

Terminal growth rate (i)	1.76%
Discount rate (ii)	19.31%

(i) Compound annual volume growth rate in the initial five-year year.
(i) Terminal growth rate used to extrapolate cash flows beyond the budget period.
(ii) Pre-tax discount rate applied to the cash flow projections.

Cash Flow Forecast

Cash flows were projected based on past experience and actual operating results. These cashflows are based on the expected revenue growth for the entity over this 5-year period.

Discount Rate

Pre-tax discount rate of 19.31% was applied in determining the recoverable amounts for the goodwill of Access Bank Angola. This discount rate was estimated using the Bank's beta, the risk-free rate and the country risk premium for Angola.

Terminal growth rate

The terminal growth rate applied was based on the long term growth rate in GDP of Angola.

The key assumptions described above may change as economic and market conditions change. The Group estimates that reasonably possible changes in these assumptions are not expected to cause the recoverable amount of the entity (from which the goodwill arose) to decline below their carrying amount.

Sensitivity analysis of key assumptions used

(g) Access bank Tanzania (Standard Chartered Bank):

The recoverable amount of Goodwill as at 30 September 2026 is greater than its carrying amount and is thus not impaired. The recoverable amount was determined using a value-in-use computation of N175.66bn.

Goodwill is reviewed annually for impairment, or more frequently when there are indications that impairment may have occurred.

Goodwill is monitored by the Group on cash generating units (CGU) basis. For the purpose of impairment testing, the goodwill has been allocated to Access Bank Tanzania.

Goodwill impairment test was done by comparing the value-in-use for the CGU to the carrying amount of the goodwill based on cash flow projections. Cash flows were projected for the first 5 years based on operating results, expected future financial performance and past experience. Beyond 5 years, cash flows were assumed to grow at terminal growth rate of 3.86%. A discount rate of 20.58% was applied based on an estimate of cost of capital. This was estimated using the Capital Asset Pricing Model. There were no write-downs of goodwill due to impairment during the year. All assumptions are subject to market and economic conditions. However, we do not see possible changes in these assumptions adversely causing the recoverable amounts of the CGUs declining below their carrying amounts.

The key assumption used in computing the value-in-use for goodwill in during the period are as follows:

Terminal growth rate (i)	3.86%
Discount rate (ii)	20.58%

(i) Compound annual volume growth rate in the initial five-year period.

(i) Terminal growth rate used to extrapolate cash flows beyond the budget period.

(ii) Pre-tax discount rate applied to the cash flow projections.

Cash Flow Forecast

Cash flows were projected based on past experience and actual operating results. These cashflows are based on the expected revenue growth for the entity over this 5-year period.

Discount Rate

Pre-tax discount rate of 20.58% was applied in determining the recoverable amounts for the goodwill of Access Bank Tanzania. This discount rate was estimated using the Bank's beta, the risk-free rate and the country risk premium for Tanzania.

Terminal growth rate

The terminal growth rate applied was based on the long term growth rate in GDP of Tanzania.

The key assumptions described above may change as economic and market conditions change. The Group estimates that reasonably possible changes in these assumptions are not expected to cause the recoverable amount of the entity (from which the goodwill arose) to decline below their carrying amount.

Sensitivity analysis of key assumptions used

In millions of Naira	10% increase	10% decrease
Impact of change in discount rate on value-in-use computation (increase/(decrease)	(25)	33
Impact of change in growth rate on value-in-use computation (increase/(decrease)	3	(2)

(h) Access bank Sierra Leone (Standard Chartered Bank):

The recoverable amount of Goodwill as at 30 September 2026 is greater than its carrying amount and is thus not impaired. The recoverable amount was determined using a value-in-use computation of N1,19bn.

Goodwill is reviewed annually for impairment, or more frequently when there are indications that impairment may have occurred.

Goodwill is monitored by the Group on cash generating units (CGU) basis. For the purpose of impairment testing, the goodwill has been allocated to Access Bank Sierra Leone.

Goodwill impairment test was done by comparing the value-in-use for the CGU to the carrying amount of the goodwill based on cash flow projections. Cash flows were projected for the first 5 years based on operating results, expected future financial performance and past experience. Beyond 5 years, cash flows were assumed to grow at terminal growth rate of 2.65%. A discount rate of 20.7% was applied based on an estimate of cost of capital. This was estimated using the Capital Asset Pricing Model. There were no write-downs of goodwill due to impairment during the year. All assumptions are subject to market and economic conditions. However, we do not see possible changes in these assumptions adversely causing the recoverable amounts of the CGUs declining below their carrying amounts.

The key assumption used in computing the value-in-use for goodwill in during the perios are as follows:

Terminal growth rate (i)	2.65%
Discount rate (ii)	20.70%

(i) Compound annual volume growth rate in the initial five-year period.
(i) Terminal growth rate used to extrapolate cash flows beyond the budget period.
(ii) Pre-tax discount rate applied to the cash flow projections.

Cash Flow Forecast

Cash flows were projected based on past experience and actual operating results. These cashflows are based on the expected revenue growth for the entity over this 5-year period.

Discount Rate

Pre-tax discount rate of 20.7% was applied in determining the recoverable amounts for the goodwill of Access Bank Sierra Leone. This discount rate was estimated using the Bank's beta, the risk-free rate and the country risk premium for Sierra Leone.

Terminal growth rate

The terminal growth rate applied was based on the long term growth rate in GDP of Sierra Leone.

The key assumptions described above may change as economic and market conditions change. The Group estimates that reasonably possible changes in these assumptions are not expected to cause the recoverable amount of the entity (from which the goodwill arose) to decline below their carrying amount.

Sensitivity analysis of key assumptions used

In millions of Naira	10% increase	10% decrease
Impact of change in discount rate on value-in-use computation (increase/(decrease)	(167)	215
Impact of change in growth rate on value-in-use computation (increase/(decrease)	14	(14)

There were no write-downs of goodwill due to impairment during the year.

(i) Access Pensions Limited (SIGMA/FGPL):

In 2022, the Group acquired 80.23% interest in First Guarantee Pensions Ltd (FGPL) and interest of 51.5% (direct and indirect) in Sigma Pensions Ltd. A Goodwill of N34.9 billion was recognised in that period, during the period, this Goodwill was reassessed based on the updated financial information of the investee companies at the date of the execution of the Purchase Price Allocation (PPA) for the acquisition and elected to record the acquisition related entries as provisional as at 31 December 2022 as permitted under IFRS 3 Business Combinations.

29(b) Intangible assets

The Company's PPA for the acquisition of First Guarantee Pensions Ltd and Sigma Pensions Ltd was concluded and executed. The Goodwill of N34.94 billion previously recognised was revised to N27.07 billion as a result of the final financial information available as at the date of execution of the PPA. The previously Recognised Goodwill of N34.9bn was separated into customer relationship of N11.29bn, Deferred Tax Impact of (N3.3bn) and Goodwill of N27.09bn.

Under the Standard, Access Holdings is required to apportion the purchase consideration between the tangible and intangible assets and liabilities (including contingent liabilities) of FGPL and Sigma Pensions.

• The Standard provides general guidelines for assigning amounts to individual assets acquired and liabilities assumed.

• IFRS 3 requires the application of the acquisition method for each business combination. The acquisition method requires inter alia that the acquirer is identified, the acquisition date is determined, and that the identifiable assets acquired, and that the liabilities assumed and any non-controlling interest in the acquiree are recognised and measured.

IFRS 3 states that as of the acquisition date, the acquirer shall recognise, separately from goodwill, the identifiable assets acquired, the liabilities assumed and any non-controlling interest in the acquiree.

• Recognition of identifiable assets acquired and liabilities assumed is subject to the conditions specified in paragraphs 11 and 12. These paragraphs state, inter alia, that the identifiable assets acquired and liabilities assumed must meet the definitions of assets and liabilities in the Framework for the Preparation and Presentation of Financial Statements at the acquisition date, and that the identifiable assets acquired and liabilities assumed must be part of what the acquirer and the acquiree exchanged in the business combination transaction.

IFRS 3 states that an asset is identifiable if it either:

a) is separable, i.e., capable of being separated or divided from the entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable asset or liability, regardless of whether the entity intends to do so; or

b) arises from contractual or other legal rights, regardless of whether those rights are transferable or separable from the entity or from other rights and obligations.

The acquirer shall measure the identifiable assets acquired and the liabilities assumed at their acquisition-date Fair Values. The identifiable assets are required under IFRS 3 to be recognised at their “Fair Value". Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Revenue in the pension industry is mainly driven by management fees earned from AuM (Assets Under Management) which are contributions from customers.

Customer related intangibles will be valued as Access pension is expected to earn fees income from existing and future contributions made by Retirement Saving Account (RSA) I-VI holders, Defined benefit schemes holders and the informal sector/unfunded customers.

According to IAS 38 customers related intangibles can be recognised if future economic benefits are expected to flow to the entity from the use of that asset, and the cost can be reliably measured. FGPL and Sigma Pensions customers list which consist of the RSA I-VI account PIN, defined benefit scheme PIN, informal sector and unfunded PIN will be valued using the Income approach model which is one of the identifiable model for valuing intangible asset according to IAS 38.

(j) Access ARM Pensions Limited (ARM):

On May 17, 2024, Access Golf Nigeria Limited (“the Purchaser”) entered into a Share Sale and Purchase Agreement with ARM Traditional Asset Management Limited (“the Seller”) to acquire an 81.82% stake in ARM Pension Managers (PFA) Limited. On the same date, Access Golf also acquired an additional 4.02% equity interest from other shareholders.

Following this, Access Pension Limited merged with ARM Pension Managers (PFA) Limited, with the surviving entity renamed AccessARM Pension Limited (AccessARM). ARM Pension Managers (PFA) Limited was dissolved without winding up.

Based on the final goodwill allocation, total goodwill was valued at ₦118.1 billion, of which ₦60.9 billion is attributable to Access Holdings Plc, reflecting its 51.6% ownership in Access Golf Nigeria Limited.

29(b) Intangible assets

29(b) Intangible assets - continued

The recoverable amount of Goodwill as at 30 September 2026 is greater than its carrying amount and is thus not impaired. The recoverable amount was determined using a value-in-use computation as N133.63bn.

Goodwill is reviewed annually for impairment, or more frequently when there are indications that impairment may have occurred.

Goodwill is monitored by the Group on cash generating units (CGU) basis. For the purpose of impairment testing, the goodwill has been allocated to Access Bank Gambia.

Goodwill impairment test was done by comparing the value-in-use for the CGU to the carrying amount of the goodwill based on cash flow projections. Cash flows were projected for the first 5 years based on operating results, expected future financial performance and past experience. Beyond 5 years, cash flows were assumed to grow at terminal growth rate of 3.72%. A discount rate of 21.72% was applied based on an estimate of cost of capital. This was estimated using the Capital Asset Pricing Model. There were no write-downs of goodwill due to impairment during the period. All assumptions are subject to market and economic conditions. However, we do not see possible changes in these assumptions adversely causing the recoverable amounts of the CGUs declining below their carrying amounts.

The key assumption used in computing the value-in-use for goodwill in during the period are as follows:

Terminal growth rate (i)	3.72%
Discount rate (ii)	21.72%

(i) Compound annual volume growth rate in the initial five-year year.

(i) Terminal growth rate used to extrapolate cash flows beyond the budget period.

(ii) Pre-tax discount rate applied to the cash flow projections.

Cash Flow Forecast

Cash flows were projected based on past experience and actual operating results. These cashflows are based on the expected revenue growth for the entity over this 5-year period.

Discount Rate

Pre-tax discount rate of 21.72% was applied in determining the recoverable amounts for the goodwill of Access Bank Gambia. This discount rate was estimated using the Bank's beta, the risk-free rate and the country risk premium for Gambia.

Terminal growth rate

The terminal growth rate applied was based on the long term growth rate in GDP of Gambia.

The key assumptions described above may change as economic and market conditions change. The Group estimates that reasonably possible changes in these assumptions are not expected to cause the recoverable amount of the entity (from which the goodwill arose) to decline below their carrying amount.

Sensitivity analysis of key assumptions used

Balance at 1 January	-	437	-	-
Disposals during the period	-	(437)	-	-
Balance, end of period	**-**	**-**	**-**	**-**

Investment property for the Group, represents the value of landed properties which are carried and measured at fair value. There was no rental income from such properties during the period and no restrictions on the realisability of the property.

Valuation technique used for fair valuation of investment properties
Investment properties are stated at fair value, which has been determined based on valuations performed by various Estate Surveyors and Valuers . The valuers are industry specialists in valuing these types of investment properties. The fair value is supported by market evidence and represents the amount that would be received to sell the properties in an orderly transaction between market participants at the measurement date in the principal market to which the Group has access at the date of valuation, in accordance with standard issued by the International Valuation Standards Committee. Valuations are performed on an annual basis and the fair value gains and losses are reported in valuation gain on investment properties under other operating income (see note 13) . The profits or losses on disposal are also reported in the profit or loss as they occur.

The professional valuers engaged for the preparation of the valuation reports is Ifebunandu and associates. The Fair value of investment property was determined by external, independent property valuers, having appropriate recognised professional qualifications and recent experience in the location and category of the property being valued.

The fair value measurement for the investment property have been categorised as a Level 3 fair value based on the inputs to the valuation technique used. The technique employed for this valuation is the direct market method of valuation where the estimated amount for which the asset would be exchanged between a willing buyer and a willing seller in an arm's length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion is determined.

All investment properties have been disposed during the period for the Bank and Nil for Company.

These assets largely comprise of Land and buildings. The items in non-current assets held for sale are repossessed collateral and this is seen in Note 5.1.3 (g). During the period, management committed to sell part of the repossessed collateral within the commercial Banking segment. Accordingly, part of that collateral is presented as an asset held for sale. Efforts to sell the asset held for sale have started and a sale is expected within the time frame prescribed by IFRS 5. The fair value measurement for the non-current asset held for sale has been categorised as a Level 3 fair value based on the inputs to the valuation technique used. The technique employed for this valuation is the comparable method of valuation where an assessment of the fair value was obtained on the basis of collation and analysis of appropriate comparable transactions, together with evidence of demand within the vicinity of the subject property. The key unobservable input used in the valuation technique is the adjusted market price of comparable properties (e.g., price per square meter), including subjective adjustments for location, condition, and marketability.

In addition, a total of N122.58bn (Dec 2025: N11.5bn) was sold from the repossessed collaterals for a total value of N145.95bn and the gain on disposal N23.37bn (Dec 2025: N7.04bn) was recognised through profit or loss (see Note 13a).

34 Other liabilities - continued

(a) E-banking payables represent settlements due to other banks for the use of their electronic channels by the Group's customers. The Group's Receivables from other banks is contained in Note 26.

(b) Collections are balances held on behalf of customers for various transactions. These include escrows, collection for remittances, payments, etc.

(c) The contribution to the Industrial training fund scheme is being shown as a separate line under other liabilities. This has been stripped out of the accrual line where it was previously warehoused. The amount here represents 1% of the personnel cost of the employer according to the ITF amendment ACT 2011 , Act No 19 section 6, subsection 1

(d) Customer deposits for foreign exchange represents deposits that customers have made to fulfil foreign currency obligations. The Group's process requires that customers with foreign currency obligations deposit foreign currency to back the transactions. The corresponding balance is in Other deposits with central banks - Cash and balances with banks.

C Additional tier 1 capital

C (i) Mandatory Convertible Notes

The Bank issued a U.S.$500,000,000 Perpetual Fixed Rate Resettable Non callable prior to 5.25 years Additional Tier 1 (AT1) Subordinated Notes under its U.S.$1,500,000,000 Global Medium Term Note Programme listed on the London Stock Exchange.

The principal terms of the issue are described below:

1) The AT1 security will rank in claim behind all present and future Senior Obligation; pari passu without any preference among themselves with all present and future parity obligations and in priority to all payments in respect of all present and future Junior Obligations

2) The AT1 security is undated and is redeemable, at the option of Access Bank PLC in whole at (i)any time from 7 October 2026 up to and including the First Reset Date of January 7, 2027 and (ii)every Interest Payment Date thereafter (Issuer Call Date). In addition, the AT1 security is redeemable, at the option of the Bank, in whole in the event of certain changes in the tax or regulatory treatment of the securities

3) AT1 security will bear a fixed rate of interest of 9.125 percent until the initial call date or the initial reset date, as the case may be. After the initial call date or the initial reset date, as the case may be, in the event that they are not redeemed, the AT1 security will bear interest at a rate per annum equal to the aggregate of (i) the Reset Margin of 8.07 per cent. per annum and (ii) the then prevailing U.S. Treasury Rate.

4) Interest on the AT1 security will be due and payable only at the sole discretion of the Bank, and it has sole and absolute discretion at all times and for any reason to cancel (in whole or in part) any interest payment that would otherwise be payable on any interest payment date. Interest on the Notes will be payable semi-annually in arrears commencing on 7 July 2022. The amount paid during the year is N69.53Bn (Dec 2025:N139.59Bn)

C (ii) Mandatory Convertible Notes

On the 29 March 2023, the Bank issued a $300Mn Additional Tier 1 (AT1) capital through a mandatory convertible note to Access Holdings.
The principal terms of the additional tier 1 security are as follows:

• The AT1 security will rank in claim behind all present and future Senior Obligation; pari passu without any preference among themselves with all present and future parity obligations and in priority to all payments in respect of all present and future Junior Obligations.

• The AT 1 security will bear a fixed interest rate of 15% per annum payable to the Subscriber in two equal semi-annual instalments, in US Dollars net of any fees and taxes. The Issuer (Access Bank Plc) shall have full discretion at all times to vary, cancel, or postpone the Interest payments.

• The AT 1 security is undated and convertible (i) on the date falling 8 (eight) years(29 March 2031) after the Closing Date being the Conversion Date but shall be converted at the discretion of the Issuer (Access Bank Plc), subject to the approval of the CBN, into ordinary shares of the Company. (ii) a trigger event where the tier 1 capital of the Bank (inclusive of the Notes), is below the requirements of the Central Bank of Nigeria.

• The subscriber shall mandatorily deliver a conversion notice to the issuer(Access Bank Plc) seeking to convert the Notes but the ultimate conversion right is retained with the issuer (Access Bank Plc).

(i) Other reserves

Other regulatory reserves

Statutory reserves

Nigerian banking regulations require Access Bank Nigeria to make an annual appropriation to a statutory reserve. As stipulated by S.16(1) of the Banks and Other Financial Institution Act of Nigeria, an appropriation of 30% of profit after tax is made if the statutory reserve is less than paid-up share capital and 15% of profit after tax if the statutory reserve is greater than the paid up share capital.

SMEEIS Reserves

The Small and Medium Enterprises Equity Investment Scheme (SMEEIS) reserve is maintained to comply with the Central Bank of Nigeria (CBN)/ Banker's committee's requirement that all licensed deposit money banks in Nigeria set aside a portion of the profit after tax in a fund to be sued to finance equity investment in qualifying small and medium scale enterprises. Under the terms of the guideline (amended by a CBN letter dated 11 July 2006), the contributions will be 10% of profit after tax and shall continue after the first 5 years but banks' contribution shall thereafter reduce to 5% of profit after tax.

However, this is no longer mandatory. Therefore, no additional appropriation has been done during the year.

The small and medium scale industries equity investment scheme reserves are non-distributable.

(ii) Share scheme reserve

This represents the total expenses incurred in providing the Company's shares to its qualifying staff members under the RSPP scheme.

(iii) Treasury shares

This represents the shares held by the new RSPP scheme which have not yet been allocated to staff based on the pre-determined vesting conditions.

(iv) Capital reserve

This balance represents the surplus nominal value of the reconstructed shares of the Company which was transferred from the share capital account to the capital reserve account after the share capital reconstruction in October 2006. The Shareholders approved the reconstruction of 13,956,321,723 ordinary shares of 50 kobo each of the company in issue to 6,978,160,860 ordinary shares of 50 kobo each by the creation of 1 ordinary shares previously held.

(v) Fair value reserve

The fair value reserve comprises the net cumulative change in the fair value of investments measured through other comprehensive income until the investment is derecognised or impaired.

(vi) Foreign currency translation reserve

This balance appears only in the Group accounts and represents the foreign currency exchange difference arising from translating the results and financial position of all the group entities that have a functional currency different from the presentation currency.

(vii) Regulatory risk reserve

The regulatory risk reserves warehouses the difference between the allowance for impairment losses on balance on loans and advances based on Central Bank of Nigeria prudential guidelines and Central Bank of the foreign subsidiaries regulations, compared with the loss incurred model used in calculating the impairment under IFRS.

(viii) Retained earnings

Retained earnings are the carried forward recognised income net of expenses plus current period profit attributable to shareholders.

G Non-controlling interest

This represents the Non-controlling interest's (NCI) portion of the net assets of the Group. During the period, the Bank disposed of a portion of its interest holding in Access Bank Ghana. Following the disposal of 5.1% ordinary shares in Access Bank Ghana, the Group recognised a non-controlling interest (NCI) representing the Purchasers' proportionate share in Access Bank Ghana's net assets. Initial recognition of NCI is measured at Purchasers' proportionate share of Access Bank Ghana's net assets, in line with IFRS 10.23.

39 Contingencies

Claims and litigation

Access Holdings Plc is involved in two legal actions, a 2022 trademark and copyright infringement claim against which the Company is actively defending itself, and a 2025 action instituted by the Company concerning alleged corporate governance breaches and conflicts of interest.

The total claim against the defendants is estimated at ₦1.05 trillion, with an ₦8.75 billion provision recognised as at 30 June 2026. Based on legal advice, Management considers the likelihood of an adverse outcome to be low and believes the proceedings will not materially adversely affect the Company. However, the timing and amount of any potential financial outflow cannot be reliably estimated.

Contingent liability and commitments

39 Contingencies - continued

Nature of instruments

An acceptance is undertaken by a bank to pay a bill of exchange drawn on a customer. The Group expects most acceptances to be presented, but reimbursement by the customer is normally immediate. Endorsements are residual liabilities of the Group in respect of bills of exchange, which have been paid and subsequently rediscounted.

Guarantees and letters of credit are given as security to support the performance of a customer to third parties. As the Group will only be required to meet these obligations in the event of the customer's default, the cash requirements of these instruments are expected to be considerably below their nominal amounts.

Other contingent liabilities include transaction related custom and performance bonds and are generally short term commitments to third parties which are not directly dependent on the customer's credit worthiness. Commitments to lend are agreements to lend to a customer in the future, subject to certain conditions. Such commitments are either made for a fixed period, or have no specific maturity dates but are cancellable by the lender subject to notice requirements. Documentary credits commit the Group to make payments to third parties, on production of documents, which are usually reimbursed immediately by customers.

The table below summarises the fair value amount of contingent liabilities and commitments off-financial position risk:

Acceptances, bonds, guarantees and other obligations for the account of customers:

a. These comprise:

In millions of Naira	Group 30 September 2026	Group 31 December 2025	Company 30 September 2026	Company 31 December 2025
Contingent liabilities:				
Transaction related bonds and guarante	2,630,974	2,588,552	-	-
Commitments:				
Clean line facilities for letters of credit, unconfirmed letters of credit and other commitments	4,514,045	2,262,534	-	-
	7,145,019	**4,851,086**	**-**	**-**

The Bank granted clean line facilities for letters of credit during the year to guarantee the performance of customers to third parties.

b. Capital Commitment

As at 30 September 2026, the Group had the following significant capital commitments:

1. Acquisition of National Bank of Kenya ("NBK")

On 30 May 2025, the Group announced the acquisition of the entire issued share capital of National Bank of Kenya ('NBK') from KCB Group Plc following the regulatory approvals by Central Bank of Kenya by Gazette notice No.4667. However, the transaction remains subject to the receipt of unconditional regulatory approvals from the Group's primary regulator as at 30 June 2026 hence the Bank has not accounted for the acquisition. Consequently, the financial results of National Bank of Kenya have not been consolidated in these financial statements.

To secure the Seller's right to receive payment pending satisfaction of the regulatory conditions, the Group entered into a bill analysation facility arrangement of a maximum amount of (USD 106.7 million; N47.3 billion) effective 19 Nov 2025.

44 Business Combination

(a) (i) Business Combination with AfrAsia Bank Limited, Mauritius

The Access Bank UK Limited acquired a 76% shareholding in AfrAsia Bank Limited (ABL) on 22 July 2025. ABL is a banking group incorporated in Mauritius, with financial statements presented in Mauritian Rupees (MUR) and prepared to a 30 June year-end. The acquisition was effected for a consideration of N611.14 billion ($397.55 million) in respect of the 76% interest. Upon completion, the Group obtained control of ABL and the results of ABL have been consolidated from the acquisition date, being 22 July 2025.

Initial details of the acquisition of ABL were set out in the Group's consolidated financial statements for the year ended 31 December 2025. During the period, the Group completed the purchase price allocation within the measurement period. The completed valuations reflect additional information about facts and circumstances that existed at the acquisition date. No change was made to the acquisition date, the percentage interest acquired or the consideration transferred.

At 31 December 2025, the purchase price allocation was provisional. It included a provisional goodwill of N16.28 billion ($10.6 million). Completion of the valuation work included the recognition of core deposit intangible of N120.57 billion ($78.43 million), customer relationships of N33.80 billion ($21.99 million) and the AfrAsia brand of N31.71 billion ($20.63 million). Accordingly, the fair value of identifiable net assets increased by N180.94 billion (US$120.92 million) and the completed gain on bargain purchase is N164.66 billion (US$107.11 million). This gain arose because the fair value of the identifiable net assets, including the fair value adjustments for core deposit intangible, customer relationships, and the AfrAsia brand, exceeded the consideration transferred at the acquisition date. Strategically, this acquisition supports the Group's objective to establish Mauritius as a key hub within its international operating model (See note 47).

Mauritius is a well-regulated international financial centre, and the Group intends to leverage this positioning to support trade finance flows and regional connectivity, facilitating cross-border transactions between Africa, Asia, and Europe. The transaction further reinforces the Group's Pan-African expansion strategy, adding Mauritius to an established international footprint that already includes the UK, UAE, France, Hong Kong, and Malta.

The bargain purchase has been computed based on the fair value of the net assets of ABL, compared to the sum of the consideration paid for the acquisition and the fair value of the non-controlling interest. The acquisition involved no contingent consideration or previously held equity interests. Acquisition-related costs were expensed as incurred within the consolidated statement of profit or loss. Furthermore, the business combination recognised no separate transactions, indemnification assets, or contingent liabilities. Before recognising the bargain purchase gain, management reassessed whether all identifiable assets acquired and liabilities assumed had been identified and appropriately measured. As part of this process, management involved an external valuation advisor to review the purchase price allocation and the underlying valuation workings, and concluded that the bargain purchase gain accounting remained appropriately aligned at the reporting date. See note 49

(b) (i Business Combination with Zempler Bank Limited, United Kingdom

On 27 February 2026, The Access Bank UK Limited acquired 100% of the issued share capital and voting rights of Zempler Bank Limited (Zempler). Zempler is a United Kingdom-based digital bank that provides current accounts and credit products, principally to microbusinesses and small and medium-sized enterprises. The acquisition was for cash, no non-controlling interest arose, and Zempler has been consolidated in the Group's financial statements from the acquisition date.

The transaction was assessed as the acquisition of a business and has been accounted for using the acquisition method under IFRS 3 Business Combinations. The acquisition supports the Group's presence in the United Kingdom and its digital banking capabilities. Control was obtained on 27 February 2026, being the date on which completion occurred and The Access Bank UK Limited obtained the power to direct Zempler's relevant activities and exposure to variable returns.

A cash consideration of £36.748 million was paid at completion. Using the GBP to US dollar acquisition-date exchange rate of 1.350, the consideration transferred was N67.695 billion ($49.610 million). No contingent consideration, deferred consideration or previously held equity interest was identified. Acquisition-related costs were expensed as incurred within the consolidated statement of profit or loss.

A provisional gain arose because the cash consideration was lower than the provisional acquisition-date fair value of the identifiable net assets acquired, including the separately identified core deposit intangible, software and technology, brand, and the fair value adjustment to investment securities. Before recognising the gain, management reassessed whether all identifiable assets acquired and liabilities assumed had been identified and whether the consideration transferred and acquisition-date measurements had been determined appropriately. As part of this process, management involved an external valuation advisor to review the purchase price allocation and underlying valuation workings, and concluded that the provisional accounting remained appropriately aligned at the reporting date.

The initial accounting for the acquisition remains provisional at 30 September 2026. This is because the Group is continuing to finalise certain elements of the purchase price allocation and acquisition-date fair value exercise, including customer deposits, acquired receivables, other intangibles, and the related deferred tax effects. Accordingly, the amounts recognised for these items, and the resulting bargain purchase gain, are subject to change until the measurement period is complete. No measurement period adjustments in accordance with IFRS 3.49 were recognised in the period ended 30 September 2026.

(C) *Non-cash investing activities and financing activities:*

The following activities as listed below are the items that have been identified as non cash investing and financing activities
The Group entered into certain investing and financing transaction that did not involve the movement of cash.

The non-cash investing activities primarily relate to:

Consideration receivable arising from the partial disposal of interests in subsidiaries (refer to Note 46 for further details). These have been excluded from the statement of cash flows, as they do not give rise to cash inflows or outflows.

45 Director-related exposures

The Group has some exposures that are related to its Directors. It however follows a strict process before granting such credits to its Directors. The requirements for creating and managing this category of risk assets include the following amongst others:

a. Complete adherence to the requirements for granting insider-related exposure as stated in the group's Credit Policy Guidelines, the Insider-related Policy as well as the Bank's duly approved Standard Operating Procedure for managing insider-related exposures.
b. Full compliance with the relevant CBN policies on insider-related lending.
c. All affected Directors are precluded from taking part in the approval process of credit request wherein they have interest.
d. The related Director is required to execute a document authorizing the Group to use their accruable dividends to defray any related-obligor's delinquent exposures.
e. The Directors are required to execute documents for the transfer of their shares to the Group's nominated broker to ensure effective control as required by the CBN policy to enhance the group's Corporate Governance structure.
f. Section 89 of the Group's Article of Association also reiterated that "a related Director shall vacate office or cease to be a Director, if the Director directly or indirectly enjoys a facility from the Group that remains non-performing for a period of more than 12months."
The Group's principal exposure to all its directors as at 30 September 2026 is N707.5million. However, the relevant obligors under this category also have credit balances and deposits maintained in their bank accounts which mitigate the risks to the Group.

Below is a schedule showing the details of the Holding's director-related lending:

September 2026

					Limit N'millions	Unimpaired N'millions	Impaired N'millions	Outstanding Principal N'millions	Total N'millions	Status	Nature of security

46 Partial Disposal of a subsidiary without the loss of control

(a)(i) Partial Disposal of 5.1% of Access Bank Plc's stake in Access Bank Ghana's Ordinary Shares and Recognition of Non-Controlling Interest

In September 2026, Access Bank Plc ("the Bank" or "the Seller") completed the sale of 4.8% (8,349,485) of its ordinary shares in Access Bank Ghana to purchasers (the "Purchasers"), who are unrelated third parties, which was consummated on the Ghana Stock Exchange.

The Group retains control over Access Bank Ghana and continues to consolidate its financial results. Purchasers' shareholding represents a transfer of ownership and is recognised as non-controlling interest (NCI). The increase in the non-controlling interests amounted to N9.22 billion, and the ₦9.22 billion difference between the Sales proceeds (N23.61bn) and the adjustment to non-controlling interests was recognised directly in equity, attributable to the owners of the parent. No gain or loss was recognised in the consolidated statement of comprehensive income arising from this transaction.

In the separate financial statements, the Bank continues to carry the remaining investment in the subsidiary at cost. The Bank recognised the difference between the Sales proceeds (N23.61 billion) and the carrying amount of the portion of investment disposed (N1.65 billion) as a gain (N21.96 billion) in the statement of comprehensive income for the period.

The effect of the changes on the equity attributable to the parent/group is set out below:

(a)(ii) Assets and liabilities of disposal group comprise the assets and liabilities of Ghana as at 30 June 2026.

	Group 30-Jun-26	Bank 30-Jun-26

49 Retrospective restatement from business combination and Revision of Comparative Information

During the current period, the Group finalised the purchase price allocation ("PPA") relating to its acquisition of AfrAsia Bank Limited. As a result of the completion of the valuation exercise, certain identifiable assets acquired and liabilities assumed were remeasured, including adjustments to the identifiable intangible assets.

In accordance with IFRS 3.49–50, the Group retrospectively adjusted the provisional amounts recognised in the business combination for measurement-period information about facts and circumstances that existed at the acquisition date. Comparative information for prior periods presented has been revised accordingly.
The effects of the retrospective adjustments on the Group's consolidated statement of financial position are presented below. The restatement primarily relates to adjustments to identifiable intangible assets and the resulting impact on retained earnings and other equity components, where applicable.

Consistent with IFRS 3.50, the Group has disclosed the nature and amount of the measurement-period adjustments recognised for each affected financial statement line item.

As the acquisition occurred after 30 June 2025, the adjustments had no impact on the consolidated statement of comprehensive income and no impact on the consolidated statement of cash flows for the period.
