30.4 Financial risk management objectives

A financial risk management framework is in place, where appropriate, to mitigate any negative impact that financial risks that may arise will have on the Company's reported results.

The Company's senior management oversees the management of risks to ensure that financial risks are identified, measured and managed in accordance with Company's policies for risk.

Risk management policies and systems are reviewed regularly to reflect the changes in market conditions and the company's activities. The Board of Directors reviews and agrees policies for managing each of these risks which are summarised below.

The company does not trade in financial instruments, nor does it take on speculative or open positions through the use of derivatives.

30.5 Foreign currency risk management

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The company undertakes transactions denominated in foreign currencies; consequently, exposures to exchange rate fluctuations arise. Exchange rate exposures are managed within approved policy parameters. The Company's exposure to the risk of changes in foreign exchange rates is hedged and minimised proactive application for forex.

NOTES TO THE MANAGEMENT FINANCIAL STATEMENTS

30.6 Credit risk management

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the company. The company's credit risk exposure is limited to the credit sales availed to few customers with great records of payment on time and without defaulting and loans availed to its members of staff. Both credit sales and staff loans are subject to management approval and are continuously monitored.

The carrying amount of financial assets represents the company's maximum exposure to credit risk, which at the reporting date, was as follows:

	31-Jul-2026	31-Jul-2025
	N'000	N'000
Receivables	<u>1,011,856</u>	<u>502,421</u>

30.7 Collateral held as security and other credit enhancements

The carrying amount of financial assets recorded in the Management financial statements represents the company's maximum exposure to credit risk as no collateral or other credit enhancements are held. The asset comprise of loans to staff members and due repayment is deducted from staff salary at source.

30.8 Liquidity risk management

Liquidity risk is the risk that the company is unable to meet its current and future cash flow obligations as and when they fall due, or can only do so at excessive cost. This includes the risk that the company is unable to meet settlement obligations to the acquiring banks due to failure of an issuing bank to pay.

Ultimate responsibility for liquidity risk management rests with the board of directors, which has established an appropriate liquidity risk management framework for the management of the company's short-, medium- and long-term funding and liquidity management requirements. The company manages liquidity risk by maintaining adequate reserves, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.
