THE NOTES FORM AN INTEGRAL PART OF THESE FINANCIAL STATEMENTS

OMATEK VENTURES PLC

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE PERIOD ENDED 30TH SEPTEMBER, 2026

1 REPORTING ENTITY

(A) LEGAL FORM

Omatek Ventures Plc is a public limited liability company incorporated in Nigeria under the Companies and Allied Matters Act of 2020.

(B) MAIN ACTIVITIES

Omatek is a holding company which holds shares in the manufacturing, distribution and sales and service of various types of computers and home entertainment products

(C) REGISTERED ADDRESS

The company is in the process of changing its registered office to Aiyetoro Village , in Ogun State., Nigeria.

2 BASIS OF PREPARATION

(A) STATEMENT OF COMPLIANCE WITH INTERNATIONAL FINANCIAL REPORTING STANDARDS

The consolidated and separate financial statements have been prepared in accordance with International Financial Reporting Standards (IFRSs).
The financial statements were authorised for issue by the Board of Directors on 28th July, 2026.

30TH (B) BASIS OF MEASUREMENT

The consolidated and separate financial statements have been prepared on the historical cost basis and all applicable standard issued by the Financial Reporting Council of Nigeria.

(C) FUNCTIONAL AND PRESENTATION CURRENCY

These consolidated and separate financial statements and are presented in Nigerian Naira, which is the group's functional currency. All financial information presented in naira has been rounded to nearest million.

(D) USE OF ESTIMATES AND JUDGEMENT

The preparation of the consolidated and separate financial statements in conformity with IFRSs requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and into any future periods affected.

(E) ADOPTION OF REVISED STANDARDS

i IFRS 15 Revenue from Contracts with Customers-effective on or after 1 January 2018

IFRS 15 establishes a comprehensive framework for determining whether, how much and when revenue is recognised. It replaces existing revenue recognition guidance, including IAS 18 Revenue, IAS 11 Construction Contracts and IFRIC 13 Customer Loyalty Programme.

ii IFRS 9 Financial Instrument-effective on or after 1 January 2018

The Group has initially applied IFRS 9 from 1 January 2018. A number of other new standards are also effective from 1 January 2018, but they do not have a material effect on the Group's financial statements.
The effect of initially applying this standard is mainly attributed to an increase in impairment losses recognised on financial assets.
IFRS 9 sets out requirements for recognising and measuring financial assets, financial liabilities and some contracts to buy or sell non-financial items. This standard replaces IAS 39 Financial Instruments: Recognition and Measurement.

IFRS 9 contains three principal classification categories for financial assets: measured at amortised cost, FVOCI and FVTPL.

a	**CLASSIFICATION AND MEASUREMENT OF FINANCIAL ASSETS AND FINANCIAL LIABILITIES**	The classification of financial assets under IFRS 9 is generally based on the business model in which a financial asset is managed and its contractual cash flow characteristics. IFRS 9 eliminates the previous IAS 39 categories of held to maturity, loans and receivables and available for sale. Under IFRS 9, derivatives embedded in contracts where the host is a financial asset in the scope of the standard are never separated. Instead, the hybrid financial instrument as a whole is assessed for classification. IFRS 9 largely retains the existing requirements in IAS 39 for the classification and measurement of financial liabilities. The adoption of IFRS 9 has not had a significant effect on the Group's accounting policies related to financial liabilities and derivative financial instruments.
b	**IMPAIRMENT OF FINANCIAL ASSETS**	IFRS 9 replaces the 'incurred loss' model in IAS 39 with an 'expected credit loss' (ECL) model. The new impairment model applies to financial assets measured at amortised cost, contract assets and debt investments at FVOCI, but not to investments in equity instruments. Under IFRS 9, credit losses are recognised earlier than under IAS 39.
(F)	**NEW STANDARDS**	New standards that were adopted in the consolidated and separate financial statements for the year but had no significant effect or impact on the Group are:
i.	**ONEROUS CONTRACTS**	Amendments to IAS 37 Onerous Contracts - Cost of fulfilling a Contract-The Group has adopted the amendments to IAS 37 for the first time in the current year. The amendments specify that the cost of fulfilling a contract comprises the costs that relate directly to the contract. Costs that relate directly to a contract consist of both the incremental costs of fulfilling that contract (examples would be direct labour or materials) and an allocation of other costs that relate directly to fulfilling contracts (an example would be the allocation of the depreciation charge for an item of property, plant and equipment used in fulfilling the contract).
ii.	**ANNUAL IMPROVEMENTS TO IFRS STANDARDS 2018-2025 (AMENDMENTS TO IFRS 1, IFRS 9, IFRS 16 AND IAS 4)**	Amendments to IAS 4. Critical accounting estimates and judgements a. Power to exercise significant influence b. Legal proceedings c. Income and deferred taxation The quality of these estimates is highly dependent upon management's ability to properly discern complex and apply same thereon based on a complex set of rules, to recognise changes in applicable rules and in the case of deferred tax assets, management's ability to project future earnings from activities that may apply loss carry forward positions against future income taxes. d. Impairment of property, plant and equipment and intangible assets The Group assesses assets or groups of assets for impairment regularly or whenever events or changes in circumstances indicate that carrying amounts of those assets may not be recoverable. d. Impairment of property, plant and equipment and intangible assets The Group assesses assets or groups of assets for impairment regularly or whenever events or changes in circumstances indicate that carrying amounts of those assets may not be recoverable. In assessing whether a write-down of the carrying amount of a potentially impaired asset is required, the asset's carrying amount is compared to the recoverable amount. Frequently, the recoverable amount of an asset proves to be the Group's estimated value in use.

The estimated future cash flows applied are based on reasonable and supportable assumptions and present management's best estimates of the range of economic conditions that will exist over the remaining useful life of the cash flow generating assets. The Group makes certain estimates and assumptions regarding the future. Estimates are based on factors including historical experience and expectations of future events that management believes to be reasonable. However, given the judgemental nature of such estimates, actual results could be different from assumptions used. The estimates and assumptions that can have significant risks of causing material adjustments to the carrying amounts of assets and liabilities are set out below:

and its subsidiary Companies annually incur significant amounts of income taxes payable and also recognises significant changes to deferred tax assets and liabilities, all of which are based on management's interpretations of applicable laws and regulations.

In accordance with IFRS, the Group recognises a provision where there is a present obligation from a past event, a transfer of economic benefits is probable and the amount of cost of the transfer can be estimated reliably. In instances where the criteria are not met, a contingent liability may be disclosed in the notes to the financial statements.

3 SIGNIFICANT ACCOUNTING POLICIES

The accounting policies set out below have been applied consistently to all periods presented in the financial statements, unless otherwise indicated.

(A) FOREIGN CURRENCY

Transactions in foreign currencies are translated to the respective functional currencies of Group entities at exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are retranslated to the functional currency at the exchange rate at that date. The foreign currency gain or loss on monetary items is the difference between amortised cost in the functional currency at the beginning of the period, adjusted for effective interest and payments during the period, and the amortised cost in foreign currency translated at the exchange rate at the end of the re- porting period.

Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are retranslated to the functional currency at the exchange rate at the date that the fair value was determined.

Foreign currency differences arising on retranslation are recognised in profit or loss, except for differences arising on the retranslation of available for-sale equity instruments, a financial liability designated as a hedge of the net investment in a foreign operation or qualifying cash flow hedges, which are recognised in other comprehensive income.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction.

(B) PROPERTY, PLANT & EQUIPMENT

(i) RECOGNITION AND MEASUREMENT

Items of property, plant and equipment are measured at cost less accumulated depreciation and accumulated impairment losses. The cost of certain items of property, plant and equipment was determined by reference to a previous GAAP revaluation.

(ii) DEPRECIATION

Depreciation is calculated over the depreciable amount, which is the cost of an asset, or other amount substituted for cost, less its residual value. Depreciation is recognised in profit or loss on a straight-line basis over the estimated useful lives of each part of an item of property, plant and equipment, since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset. Land is not depreciated.

The estimated useful lives for the current and comparative periods are as follows:
Leasehold Building 50 Years

Depreciation methods, useful lives and residual values are reviewed at each financial year-end and adjusted if appropriate.

(C) INVENTORIES

Inventories are measured at the lower of cost and net realisable value. The cost of inventories is based on the first-in first-out principle, and includes expenditure incurred in acquiring the inventories, production or conversion costs and other costs incurred in bringing them to their existing location and condition. In the case of manufactured inventories and work in progress, cost includes an appropriate share of production overheads based on normal operating capacity. Cost also may include transfers from other comprehensive income of any gain or loss on qualifying cash flow hedges of foreign currency purchases of inventories.
Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

(D) IMPAIRMENT

(i) FINANCIAL INSTRUMENTS AND CONTRACT ASSETS

The Group recognises loss allowances for Expected Credit Losses ("ECL") on:
i. financial assets measured at amortized cost.
ii. debt investments measured at FVOCI; and
iii. Contract assets.

The Group measures loss allowances at an amount equal to lifetime ECLs, except for the following, which are measured at 12- month ECLs:
i debt securities that are determined to have low credit risk at the reporting date; and
ii. other debt securities and bank balances for which credit risk (i.e. the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition.
iii. loss allowances for trade receivables and contract assets are always measured at an amount equal to lifetime ECLs.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Group considers reasonable and supportable information that is relevant and available without undue cost or effort.

This includes both quantitative and qualitative information and analysis, based on the Group's historical experience and informed credit assessment and including forward-looking information.

The Group assumes that the credit risk on a financial asset has increased significantly if it is more than 30 days past due.

The Group considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Group in full, without recourse by the Group to actions such as realising security (if any is held); or
- the financial asset is more than 90 days past due.

The Group considers a debt security to have low credit risk when its credit risk rating is equivalent to the globally understood definition of 'investment grade'. The Group considers this to be Baa3 or higher per [Moody's Rating Agency] or BBB-or higher per [Standard & Poor's Rating Agency].

Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument.

12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

The maximum period considered when estimating ECLs is the maximum contractual period over which the Group is exposed to credit risk.

MEASUREMENT OF ECLS

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Group expects to receive).

ECLs are discounted at the effective interest rate of the financial asset.

CREDIT-IMPAIRED FINANCIAL ASSETS

At each reporting date, the Group assesses whether financial assets carried at amortised cost and debt securities at FVOCI are credit impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer.
- a breach of contract such as a default or being more than 90 days past due.
- the restructuring of a loan or advance by the Group on terms that the Group would not consider otherwise.
- it is probable that the borrower will enter bankruptcy or other financial reorganisation; or
- the disappearance of an active market for a security because of financial difficulties.

PRESENTATION OF ALLOWANCE FOR ECL IN THE STATEMENT OF FINANCIAL POSITION

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

For debt securities at FVOCI, the loss allowance is charged to profit or loss and is recognised in OCI.

WRITE-OFF

The gross carrying amount of a financial asset is written off when the Group has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof.

The Company individually makes an assessment with respect to the timing and amount of write-off based on whether there is a reasonable expectation of recovery. The Group expects no significant recovery from the amount written off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Group's procedures for recovery of amounts due.

Financial assets not classified as at FVTPL were assessed at each reporting date to determine whether there was objective evidence of impairment.

Objective evidence that financial assets were impaired included:

i. default or delinquency by a debtor.

ii. restructuring of an amount due to the Group on terms that the Group would not consider otherwise.

iii. indications that a debtor or issuer would enter bankruptcy.

iv. adverse changes in the payment status of borrowers or issuers.

v. the disappearance of an active market for a security because of financial difficulties; or vi. observable data indicating that there was a measurable decrease in the expected cash flow from a group of financial assets

(E) EMPLOYEE BENEFITS

(i) DEFINED CONTRIBUTION PLANS

A defined contribution plan is a post-employment benefit plan under which an entity pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts. For defined contribution plans, the Company pays contributions to publicly or privately administered pension fund administrators (PFA) on a mandatory, contractual or voluntary basis. The Company has no further payment obligations once the contributions have been paid. The contributions are recognised as employee benefit expense in comprehensive income statement when they are due. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in the future payments is available.

(ii) TERMINATION BENEFITS

Termination benefits are recognised as an expense when the Group is demonstrably committed, without realistic possibility of withdrawal, to a formal detailed plan to terminate employment before the normal retirement date. Termination benefits for voluntary redundancies are recognised if the Group has made an offer encouraging voluntary redundancy, it is probable that the offer will be accepted, and the number of acceptances can be estimated reliably. If benefits are payable more than 12 months after the reporting date, then they are discounted to their present value.

(E) REVENUES

(i) GOODS SOLD

Revenue from the sale of goods in the course of ordinary activities is measured at the fair value of the consideration received or receivable, net of returns, trade discounts and volume rebates.

Revenue is recognised when persuasive evidence exists, usually in the form of an executed sales agreement, that the significant risks and rewards of ownership have been transferred to the buyer, recovery of the consideration is probable, the associated costs and possible return of goods can be estimated reliably, there is no continuing management involvement with the goods, and the amount of revenue can be measured reliably. If it is probable that discounts will be granted and the amount can be measured reliably, then the discount is recognised as a reduction of revenue as the sales are recognised.

(ii) RENTAL INCOME

Rental income from investment property is recognised in profit or loss on a straight-line basis over the term of the lease. Lease incentives granted are recognised as an integral part of the total rental income, over the term of the lease. Rental income from subleased property is recognised as other income.

(F) INCOME TAX

Income tax expense comprises current and deferred tax. Current tax and deferred tax are items recognised directly in equity or in other comprehensive income. Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognised for the following temporary differences: the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss, and differences relating to investments in subsidiaries and jointly controlled entities to the extent that it is probable that they will not reverse in the foreseeable future. In addition, deferred tax is not recognised for taxable temporary differences arising on the initial recognition of goodwill. Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date.

A deferred tax asset is recognised for unused tax losses, tax credits and deductible temporary differences, to the extent that it is probable that future taxable profits will be available against which they can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

4 FINANCIAL RISK MANAGEMENT

(A) OVERVIEW

The Group has exposure to the following risks from its use of financial instruments: Credit Risk, Liquidity Risk, Market Risk and Operational Risk

This note presents information about the Group's exposure to each of the above risks, the Group's objectives, policies and processes for measuring and managing risk, and the Group's management of capital. Further quantitative disclosures are included throughout these financial statements

(B) RISK MANAGEMENT FRAMEWORK

The Board of Directors has overall responsibility for the establishment and oversight of the Group's risk management framework.

The Group's risk management policies are established to identify and analyse the risks faced by the Group, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Group's activities. The Group, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

The Group Audit Committee oversees how management monitors compliance with the Group's risk management policies and procedures, and reviews the adequacy of the risk management framework in relation to the risks faced by the Group. The Group Audit Committee is assisted in its oversight role by Internal Audit. Internal Audit undertakes both regular and ad hoc reviews of risk management controls and procedures, the results of which are reported to the Audit Committee.

(C) CREDIT RISK

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Group's receivables from customers and investment securities.

The Group's exposure to credit risk is influenced mainly by the individual characteristics of each customer.

(D) LIQUIDITY RISK

Liquidity risk is the risk that the Group will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation.

(E) OPERATIONAL RISK

Operational risk is the risk of direct or indirect loss arising from a wide variety of causes associated with the Group's processes, personnel, technology and infrastructure, and from external factors other than credit, market and liquidity risks such as those arising from legal and regulatory requirements and generally accepted standards of corporate behaviour. Operational risks arise from all of the Group's operations.

The Group's objective is to manage operational risk so as to balance the avoidance of financial losses and damage to the Group's reputation with overall cost effectiveness and to avoid control procedures that restrict initiative and creativity.

The primary responsibility for the development and implementation of controls to address operational risk is assigned to senior management within each business unit. This responsibility is supported by the development of overall Group standards for the management of operational risk.

Compliance with Group standards is supported by a programme of periodic reviews undertaken by Internal Audit. The results of Internal Audit reviews are discussed with the management of the business unit to which they relate, with summaries submitted to the Audit Committee and senior management of the Group.

(F) MARKET RISK

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the Group's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

27 GOING CONCERN

The Company incurred a net loss of =N=31.43M for the period ended 30th June 2026 (30th June, 2025: net loss of =N=12.63M).

In this connection, the Board and management is intensifying effort at attracting fresh capital from willing investors, both national and international.

The financial statements are prepared on the basis of accounting policies applicable on a going concern basis.

28 Securities Trading Policy

In compliance with Rule 17.15 Disclosure of Dealings in Issuers' Shares, Rulebook of the Exchange 2015 (Issuers Rule) TotalEnergies Marketing Nigeria Plc maintains a Security Trading Policy which guides Directors, Audit Committee members, employees and all individuals categorized as insiders as to their dealing in the Company's securities. The Policy is periodically reviewed by the Board and updated. The Company has made specific inquiries of all its directors and other insiders and is not aware of any infringement of the policy during the period under review.
