Valuation techniques used for fair valuation of investment properties

This represents the Company's investment in building and landed property for the purpose of capital appreciation. The investment properties are stated at fair value, which has been determined based on valuations performed by a qualified estate surveyor. The investment properties were independently valued by Messrs Benson Omoruyi & Co (a registered estate surveyor & valuer) with FRC Number FRC/2013/NIESV/00000003307 as at 31st December 2025, based on valuation model in accordance with that recommended by the International Valuation Standards Committee. The determination of fair value of the investment property was supported by market evidence.

(b) The movement in investment properties are as follows;

(i) **Transfer/Reclassification***

During the financial year, the Company completed renovation works on its land and building previously classified under Property, Plant and Equipment (PPE) in accordance with IAS 16, with a carrying amount of N486.859 million.

Following the completion of the renovations, management determined that the property met the definition of an investment property under IAS 40, as it is now held to earn rental income and/or for capital appreciation rather than for use in the production or supply of goods or services or for administrative purposes. Accordingly, the asset was reclassified from PPE to Investment Property.

In line with IAS 40, the property was measured at fair value at year-end, resulting in a fair value of N550 million. The resulting fair value gain of N63.141 million has been recognised in profit or loss for the year.

The investment properties were independently valued by Messrs Benson Omoruyi & Co (a registered estate surveyor & valuer) with FRC Number FRC/2013/NIESV/00000003307 as at 31st December 2025, based on valuation model in accordance with that recommended by the International Valuation Standards Committee. The determination of fair value of the investment property was supported by market evidence.

Statutory deposit represents the amount deposited with the Central Bank of Nigeria in accordance with Section 9 (1) and Section 10 (3) of Insurance Act Act 2003. This is restricted cash as management does not have access to the balances in its day to day activities. Statutory deposits are measured at cost and attract interest rate at a rate determined by the Central Bank of Nigeria.

38 Segment reporting

For management purpose, the Company is organized into business units based on their products and services and two reportable operating segments as follows:

Following the management approach of IFRS the Company is organized into two operating segments. These segments distribute their products through various forms of brokers, agencies and direct marketing programs. Management identifies its reportable segments by product lines. These segments and their respective operations are as follows:

Non-life insurance business

The non -life reportable segment offers a wide variety of insurance products for both personal and corporate customers. The products offer range from fire, motor, general accident, engineering, aviation, marine liability as well as oil and energy. The main source of income in this segment is the premium received from the insured on risk covered by the entity and the investment income earned on placements and deposit with financial institutions.
