

Ecobank Reports 1H 2026 Profit Before Tax of \$423m, Delivered Resilient Net Revenue Growth of 15% to \$1.3bn & ROTE of 21.1%

Half-Year Results Reflect Effective Execution of our GTR strategy, Disciplined Operational Efficiency, Pan-African Diversification Benefits, and a Relentless Focus on the Customer

- **Attributable profit to the shareholders of ETI** was \$198m, up 2%, with **EPS** at \$0.0080 (0.80 US cents).
- **Profit before tax (PBT)** was \$423m, up 6% year-on-year (YoY).
- **Tangible book value per share (TBVPS)** of \$0.075 (7.51 US cents), increased 24% YoY.
- **Return on average assets (ROA)** of 1.7%; **Return on average tangible equity (ROTE)** of 21.1%
- **Regional ROEs:** CESA 35.4%; AWA 29.0%, UEMOA 22.7%, and NIGERIA 3.0%.
- **Net revenue** of \$1.3bn, up 15%, with 41.4% of net revenue generated from stable, recurring non-interest revenue.
- **Payment revenue** up 10% to \$156m (accounts for 12% of net revenues), driven by a 14% increase in disbursements (wholesale payments) to \$77m, 6% growth in card-related fees to \$49m, and a 26% increase in merchant solutions fees to \$11m.
- **Cost-to-income (CIR)** of 48.4% improved from 49.1% in 1H25.
- **Value of digital transactions** increased by 33%, to \$78.5bn, with transaction volumes flat at 118m during the first half of the year.
- **Capital position remains sound**, with *estimated* Group Common Equity Tier 1 (CET1) and Total Capital Adequacy Ratio (CAR) ratios of 13.3% and 17.4% as of 30 June 2026.

Jeremy Awori, CEO of Ecobank Group, stated that "Ecobank's half-year results reflect continued execution of our GTR strategy, disciplined operational efficiency, benefits of diversification, and a relentless focus on serving our customers.

Net revenue grew 15% to \$1.3 billion, with strong performance across both our Corporate and Investment Banking (CIB) and Commercial and Consumer Banking (CCB) businesses, driven by treasury solutions, trade finance, and payments. We also grew low-cost current and savings account (CASA) deposits, improving our deposit mix, lowering our cost of funding, and supporting our net interest margin. We delivered profit before tax of \$423 million, up 6%, with earnings per share growth of 2% and a 24% increase in tangible book value per share. We again met our cost-to-income ratio target, improving it to 48.4% from the prior year.

In June, we issued a \$450 million Tier 2 Sustainable Agriculture and Natural Capital Bond on the London Stock Exchange: the world's first ICMA-designated Nature Bond issued by a commercial bank. Demand from international and African investors exceeded \$1.36 billion, close to four times our initial target. This showed the confidence investors have in the Group, and it allowed us to increase the size of the transaction and reduce our borrowing cost by 50 basis points, while strengthening our capital position. The proceeds will finance sustainable agriculture, natural capital and water infrastructure across 24 of our markets, supporting farmers and the communities whose livelihoods depend on healthy ecosystems.

Despite global political tensions pushing up energy prices and driving increases in inflation in many of our markets, we remained focused on strategic efficiency measures and putting our customers first as we implemented our transformation agenda, and this

helped drive our overall performance. In line with our strategy, we made disciplined investments in the tools, systems, and talent that help our people work smarter, strengthen operational efficiency, drive sales and deliver better outcomes for customers across the Group. We continued to invest in our technology foundation to scale our payments, data, and digital services, with support from our strategic partnership with Google to accelerate execution. Our focus on our technology architecture, redesigned to be modern, cloud-based, API-first, mobile-first, and AI-enabled, remains key to delivering best-in-class customer experiences whilst ensuring future flexibility and competitiveness.

From being named Best Bank in Africa by Global Finance to receiving the title of African Bank of the Year by African Banker, along with accolades for excellence in trade finance, foreign exchange, SME banking, digital financial services, and gender leadership, Ecobank's achievements in 2026 validate the effectiveness of our strategy and execution.

Geopolitics allowing, we remain confident in our momentum and outlook for the remainder of 2026, and in our ability to differentiate our capabilities and deliver exceptional service to our clients. I am deeply proud of, and thankful for, the work Ecobankers do every day for our customers," concluded Awori.

Other Key Highlights.

- **Customer Deposits** increased \$3.1bn year-on-year (or \$1.7bn year-to-date (YTD)) to \$27.0bn, with Current Account and Savings Account (CASA) deposits up \$3.1bn to \$22.9bn. CASA deposits constitute 85.0% (1H25:83.2%) of total customer deposits.
- **Gross loans and advances to customers** increased by \$840m YoY (or down \$337m YTD) to \$12.4bn.
- **Ample liquidity buffers** with a loan-to-deposit ratio of 46.1% (1H25:48.6%) and a loan-to-asset ratio of 35.0% (1H25:36.2%), reflecting Ecobank's capacity to support credit origination for our clients.
- **Non-performing loans (NPLs)** totalled \$945 million as of 30 June 2026, reflecting a 21% decrease from \$1.2 billion as of 31 December 2025. This reduction was largely driven by write-offs supported by some loan collections and recoveries. As a result, the ratio of non-performing loans to total gross loans significantly improved, declining from 9.4% at the end of 2025 to 7.6% as of June 2026.
- **Accumulated impairment charges for expected credit losses (ECL) on the balance sheet** of \$923m decreased 8% from 31 December 2025, primarily driven by part utilisation against the write-off of loans in the Resolution Vehicle.

Constant Currency - Ecobank Group prepares its financial results in US dollars, while its subsidiaries report in local currencies. When converting these results to USD, Ecobank uses current exchange rates, which change frequently. The "constant currency" method helps eliminate the effects of foreign exchange rate changes when comparing financial results over time. This method provides a clearer view of how the business is performing, without the confusion caused by currency changes. The percentage change in constant currency shows how the business would have performed if exchange rates had remained unchanged. To calculate constant currency, we convert the 1H 2025 local-currency financials using the average and spot FX rates for 1H 2026, as needed.

n.m. = not meaningful

Discussion of Ecobank Group's financial results: percentage comparisons noted in the commentary throughout this earnings release are calculated for the period ended 30 June 2026 versus 30 June 2025, unless otherwise specified.

Profit after tax attributable to shareholders of ETI increased 2%, to \$198 million during the first half of 2026, compared with the prior year period, with good growth of 16% in pre-provision, pre-tax operating profit (PPOP) offset by a significant increase of 40% in impairment charges, including incremental impairments centrally reserved to address potential emerging portfolio risks.

Profit before tax increased by 6% to \$423 million during the first half of 2026, compared to the same period last year. In the Corporate and Investment Banking (CIB) segment, profit before tax rose by 5% to \$339 million (not adjusted for consolidation), primarily due to effective balance sheet management and higher trading fees in Global Markets, particularly from global corporates and public sector sovereigns. This growth was partially offset by an increase in centrally reserved impairment charges. In the Consumer and Commercial Banking (CCB) segment, profit before tax decreased by 8% to \$200 million (not adjusted for consolidation) during the first half of 2026 compared to the same period last year. This decline was mainly driven by higher impairment charges and lower-than-expected revenue growth, influenced by weaker foreign currency sales revenue in the UEMOA region due to regulatory-imposed foreign exchange (FX) repatriation

rules. Under CCB, profit before tax for the Consumer and Commercial segments all saw a decline of 8% year-on-year.

Net revenue, *which is the sum of net interest income (NII) and non-interest revenue (NIR)*, increased by 15% to \$1.3 billion during the first half of 2026 compared to the same period in the previous year. Net revenue in the Corporate and Investment Banking (CIB) segment rose by 23% to \$709 million, primarily due to effective balance sheet, treasury, liquidity management, and increasing advisory and capital markets mandates. This increase was particularly supported by the rise in excess liquidity resulting from strong deposit generation. In the Consumer and Commercial Banking (CCB) segment, net revenue grew by 6% to \$609 million. The Consumer Banking segment experienced a 9% increase in net revenue, reaching \$286 million, driven by higher income from deposits and microloans—especially in Ghana—as well as credit card transactions and digital payments. In the Commercial Banking segment, net revenue rose by 4% to \$323 million, driven by trade finance loans and loans supported by Development Finance Institutions (DFIs) for small and medium-sized enterprises (SMEs), women-led businesses, and agribusinesses.

Net interest income (NII), *defined as the difference between the interest income earned on interest-earning assets and the interest expenses incurred on interest-bearing liabilities*, increased by 20%, to \$751 million during the first half of 2026 compared to the same period last year. This growth was driven by a 15% rise in interest income and a 6% increase in interest expenses.

The growth in NII was supported by higher margins resulting from an increase in low-cost CASA (current account savings account) deposits and a decrease in the cost of deposits. Additionally, effective balance sheet management and treasury and liquidity solutions, along with growth in term loans, trade finance, and microloans across various business segments, contributed to this improvement.

The net interest margin (NIM) stood at 5.7% for the first half of 2026, which reflects an increase of 11 basis points compared to the previous year. This rise was largely attributed to a 27-basis point reduction in the average interest rate paid on interest-bearing liabilities, which fell to 2.3%. This reduction was driven by the growth and mix of deposits, as well as lower costs.

Non-interest revenue (NIR) increased by 8% to \$531 million during the first half of 2026. Net fees and commissions rose by 14% to \$317 million, driven primarily by cash management and credit-related fees. Additionally, fees from net trading income and foreign exchange gains increased slightly by 1%, to \$191 million. Cards, trade services, and payment activities supported this growth. However, it was significantly offset by a decline in fees from client-driven foreign currency sales due to regulatory-imposed FX liquidity constraints in the UEMOA region. Furthermore, other income decreased by 11%, reaching \$23 million.

Operating expenses increased by 13%, to \$620 million in the first half of 2026 compared to the same period last year. Staff costs rose by 16%, to \$276 million, driven by continued investment in workforce capability building through training and upskilling initiatives, as well as targeted investments in more sales and service staff. Furthermore, other operating expenses increased by 12% to \$304 million, primarily driven by higher investments in technology. The cost-to-income ratio, which measures the efficiency of the company's operations, improved to a record 48.4%, down from 49.1% in the same period last year. This improvement was a result of net revenue growth outpacing the increase in operating expenses.

Pre-provision, pre-tax operating profit (PPOP), which is net revenue minus operating expenses, a key metric for assessing the bank's earnings power, increased by 16%, to \$661 million, reflecting net revenue momentum and prudent cost management.

Income taxes were \$52 million for the first half of 2026, up 6% from the prior year period. The effective tax rate (ETR) was 30.0%, flat from the prior year period.

Table 3: Group-wide impairments charges

For the period ended 30 June (in millions of US dollars)	2026	2025	% Chg 1H26 vs 1H25
Gross impairment charges on loans and advances	(314)	(176)	79%
Less: recoveries and impairment charge releases	117	54	117%
Net impairment charges on loans and advances	(197)	(122)	62%
Impairment charges on other financial assets	(41)	(48)	(15)%
Impairment charges on financial assets	(238)	(170)	40%
Cost-of-risk	3.13%	2.21%	

Gross impairment charges on loans and advances (*the amount of revenue set aside to cover potential credit losses in the loan book*) increased by \$138 million, or 79%, during the first half of 2026, to \$314 million, compared to the prior year period. The cost-of-risk (CoR) increased by 92 basis points to 3.13%. This increase primarily reflects additional impairments and increased centrally accumulated ECL reserves to address potential emerging portfolio risks. The amount of loans recovered, including reserves released from previously set-aside impairment charges, was \$117 million during the first half of 2026, compared with \$54 million in the prior-year period, reflecting continued aggressive loan remediation and recovery efforts. Conversely, impairment charges on other assets, excluding loans and advances, were \$41 million, compared with \$48 million in the prior year period.

(1) The year-on-year growth of the sum of the average last four quarters (EOP) of loans and customer deposits for the period. Showing averages help to smooth out any one-off spikes within the year. (2) ETI shareholders' equity divided by end-of-period ordinary shares outstanding (3) Tangible ETI shareholders' equity divided by end-of-period ordinary shares outstanding. Tangible ETI shareholders' equity is ETI shareholders' equity less goodwill and intangible assets. EOP = End -of-period. Average deposits and loans is on a quarterly basis

Loans and advances to customers (gross) increased by \$840 million year-on-year, representing a 7% rise (7% in constant currency), to \$12.4 billion as of 30 June 2026. In the UEMOA region, gross loans fell by 2% (a 1% increase in constant currency), to \$5.1 billion, with marginal growth driven by the CCB. In Nigeria, loan balances decreased by 5% (a 4% decline in constant currency) to \$1.5 billion. This reduction reflects management's decision to reduce lending to address legacy asset quality issues while executing a capital restoration plan that complies with regulatory requirements. In the AWA region, loans rose by 20% (26% in constant currency), reaching \$2.2 billion, driven by growth in the CCB business. Meanwhile, in the CESA region, loans surged by 32% (29% in constant currency) to \$2.8 billion, driven by expansion across all business lines. By business line, CIB saw a 5% increase in loans, to \$8.4 billion, primarily due to trade and term loans. In contrast, CCB experienced a 12% increase in loans, reaching \$4.1 billion, driven by growth in SMEs, local corporates, and microlending.

Customer deposits increased by 13% (14% in constant currency) to \$27.0 billion as of 30 June 2026. In the UEMOA region, deposits grew by 11% (14% in constant currency) to \$10.4 billion. In Nigeria, deposits rose by 12% (1% in constant currency) to \$2.6 billion. AWA achieved a remarkable 23% growth (29% in constant currency) in deposits, to \$6.5 billion, while CESA's deposits increased by 8% (in constant currency) to \$7.3 billion. In terms of business lines, CIB saw its deposits grow by 18% to \$11.2 billion, driven by strong anchor relationships across client coverage, particularly with International Organisations. CCB deposits rose by 10% to \$15.8 billion, fueled by expanding primary banking relationships, enhanced product cross-selling, and advancements in mobile money and digital banking capabilities. Overall, customer deposits remain stable and diversified. The proportion of 'sticky' and low-cost CASA deposits as a percentage of total customer deposits increased to 85.0% in the first half of 2026, up from 83.2% in the same period the previous year. This improvement reflects ongoing efforts not only to grow deposits but also to enhance the deposit mix and reduce the cost of customer deposits, which decreased to 1.8% in the current period from 1.9% in the prior year. Consequently, the overall average cost of funding for the first half of 2026 was 2.3%, down from 2.6% in the year-ago period.

Table 5: Asset Quality

As at: (in millions of US dollars)	30 Jun 2026	31 Dec 2025	31 Jun 2025	% Chg 1H26 vs 1H25	YTD*	% Chg in C. Currency
Gross loans and advances to customers	12,440	12,777	11,600	7%	(3)%	7%
Of which Stage 1	10,338	10,393	9,358	10%	(1)%	12%
Of which Stage 2	1,157	1,180	1,583	(27)%	(2)%	(31)%
Of which Stage 3 (Non-Performing Loans)	945	1,204	660	43%	(21)%	42%
Less allowance for impairments (accumulated expected credit losses, ECLs)	923	1,002	594	55%	(8)%	56%
Of which Stage 1: 12-month ECL	83	75	64	29%	11%	32%
Of which Stage 2: Life-time ECL	193	179	122	59%	8%	57%
Of which Stage 3: Life-time ECL	647	748	408	59%	(14)%	59%
Net loans and advances to customers	11,517	11,775	11,006	5%	(2)%	5%
NPL ratio	7.6%	9.4%	5.7%	-	-	-
Accumulated ECL as a % of gross loans and advances	7.4%	7.8%	5.1%	-	-	-
NPL coverage ratio	97.6%	83.3%	90.1%	-	-	-
Stage 3 coverage ratio	68.5%	62.2%	61.9%	-	-	-

Non-performing loans (NPLs): As of 30 June 2026, NPLs were \$945 million, representing 7.6% of total loans. This compares with \$1.2 billion, or 9.4%, as of 31 December 2025, and \$660 million, or 5.7%, as of 30 June 2025. The 21% YTD decrease in NPLs, mostly in the second quarter, reflects the impact of write-offs, loan collections and recoveries, staging upgrades, partially offset by an increase from interest accruals and stage migrations.

The **accumulated impairment charges for expected credit losses (ECL) on the balance sheet** increased by 55% year-on-year (YoY). However, they decreased by 8% year-to-date (YTD), to \$923 million as of 30 June 2026. This 8% decrease in accumulated ECLs YTD was primarily driven by utilising reserves against the write-off of loans in the Resolution Vehicle. Consequently, the total end-of-period accumulated ECL reserve as a percentage of gross loans fell from 7.8% as of 31 December 2025 to 7.4% as of 30 June 2026. In contrast, NPL write-offs led to an increase in the coverage ratio, which rose to 97.6% as of 30 June 2026, up from 83.3% in December 2025. The current period's accumulated ECL balance includes centrally accumulated ECLs totalling \$503 million, built over time to address potential emerging risks within the portfolio, particularly specific risks associated with Nigeria.

Table 6: Selected Capital and Liquidity Information

As at: (in millions of US dollars)	30 Jun 2026	31 Dec 2025	30 Jun 2024	% Chg 1H26 vs 1H25	YTD %
Capital:					
Total equity to all owners	2,761	2,864	2,362	17%	(4)%
Equity attributable to owners of ETI	1,888	1,931	1,535	23%	(2)%
CET1 ratio ¹	13.3%	13.2%	12.6%	-	
Tier 1 capital adequacy ratio ¹	13.9%	13.9%	13.3%	-	
Total capital adequacy ratio (CAR) ¹	17.4%	16.8%	16.7%	-	
Risk-weighted assets (RWA)	16,985	17,075	14,713	15%	(1)%
RWA density	48.3%	49.5%	52.6%		
Liquidity:					
Loan-to-deposit ratio	47.2%	50.5%	51.4%	-	

(1) Basel II/III CET1, Tier 1 and Total CAR ratios of 13.3%, 13.9% and 17.4% are estimates as of 30 June 2026 and subject to change.

We report regulatory capital ratios semi-annually (submission deadline of 30 April for CAR for 31 December and submission deadline of 31 October for CAR for 30 June) to the regulator, the Central Bank of West African States (BCEAO). 30 June 2026 CAR numbers will be finalised ahead of a 31 October 2026 deadline for submission to BCEAO

As of 30 June 2026, the **Group's equity attributable to ETI shareholders** was \$1.89 billion, a decrease of 2% from 31 December 2025, primarily driven by the \$40 million 2025 dividend, the negative impact of FCTR, partially offset by profit attributable to ETI shareholders of \$198 million for the period.

As of 30 June 2026, the Group's estimated capital adequacy ratios indicate that the Common Equity Tier 1 (CET1) ratio is 13.3%, the Tier 1 Capital ratio is 13.9%, and the Total Capital Adequacy Ratio (CAR) is 17.4%. The CET1 and Tier 1 CAR estimates for June 2026 remained largely stable compared to December 2025. The bank successfully issued a \$450 million Tier 2 bond, replacing the previous \$350 million Tier 2 bond. This transition resulted in a net increase of \$100 million in ETI's Tier 2 instruments, which contributed to a 60-basis point rise in the Total CAR for 30 June 2026 compared to 31 December 2025.

REGIONAL PERFORMANCE

We categorise the Group's pan-African operations into four geographical regions. These reportable regions are Francophone West Africa (UEMOA), Nigeria, Anglophone West Africa (AWA), and Central, Eastern and Southern Africa (CESA). Accordingly, the financial results of the constituent affiliates of Ecobank Development Corporation (EDC), the Group's Investment Banking (IB) and Securities, Wealth, and Asset Management (SWAM) businesses across our geographic footprint are reported within their country of domicile and therefore in the applicable regions of UEMOA, Nigeria, AWA, and CESA. In addition, the Group categorises its Paris banking subsidiary and representative offices in Beijing, London, and Dubai as International.

Ecobank Geographical Regions Summary financials for the period ended 30 June 2026 (In thousands of US Dollars)	UEMOA	NIGERIA	AWA	CESA	INTER- NATIONAL	ETI & Others ⁽¹⁾	Ecobank Group

Francophone West Africa (UEMOA)

UEMOA reported a *profit before tax* of \$178 million in the first half of 2026, marking a 1% increase compared to the previous year (or a 4% decrease when adjusted for constant currency). The annualised ROE for this period was 22.7%.

Net revenue rose by 6% to \$382 million, although this represents a 1% decrease in constant currency terms compared to the previous year.

Net interest income increased 14% (7% in constant currency), to \$262 million. Effective balance sheet management, treasury and liquidity solutions, and modest margin expansion supported this growth. However, it was partially offset by tighter credit underwriting requirements and episodic sales of government securities, which reduced interest-earning asset balances. *Non-interest revenue*, on the other hand, fell by 9% (or 14% in constant currency) to \$119 million. This decline was primarily due to a 56% decrease in fees from foreign currency sales, largely driven by regulatory-imposed foreign exchange liquidity constraints, despite a 13% increase in fees and commission income.

Operating expenses increased by 7% to \$182 million (or 1% in constant currency), driven mainly by employee-related expenses, statutory charges, business promotion and other operating expenses. The cost-to-income ratio was 47.6%, a slight deterioration from 46.9% in the prior year.

Impairment charges on loans and financial assets reached \$22 million, representing a 34% increase from the previous year and reflecting higher impairment charges in CCB.

Nigeria

Nigeria reported a *profit before tax* of \$6 million for the first half of 2026, marking a decrease of 38% (or 45% in constant currency) compared to the same period last year. This decline was primarily due to an increase in loan impairment charges during the current period. The annualised ROE was 3.0%, down from 6.5% in the previous year.

Net revenue rose by 23% (8% in constant currency), to \$91 million.

Net interest income increased by 13% (flat in constant currency) to \$58 million, as gains from treasury trading and liquidity were offset by margin compression, a halt in interest income accruals on specific loans, and significantly reduced credit generation. *Non-interest revenue* also grew by 43% (27% in constant currency) to \$33 million, driven by higher trade services transactions and digital banking fees.

Operating expenses rose by 9%, primarily due to currency translation effect. In constant currency, operating expenses decreased by 4%, reflecting ongoing cost management and efficiency optimisation strategies. As a result, the cost-to-income ratio improved significantly to 59.3% in the first half of 2026, down from 66.9% in the same period last year, as net revenue growth outpaced expense growth.

Impairment charges on loans and financial assets increased 105% (80% in constant currency), to \$31 million, largely attributed to higher impairment charges in the CIB business.

Anglophone West Africa (AWA)				
Period ended: (in millions of US dollars)	30 Jun 2026	30 Jun 2025	% Chg 1H26 vs 1H25	% Chg in C. Currency
Net interest income	229	196	16%	2%
Non-interest revenue	143	125	14%	5%
Net revenues	372	322	16%	3%
Operating expenses	(138)	(126)	9%	(5)%
Pre-provision, pre-tax operating profit	234	195	20%	9%
Impairment charges on financial assets	(13)	(20)	(35)%	(42)%
Profit before tax	220	175	26%	15%
Taxation	(70)	(54)	30%	-
Profit after tax	150	121	24%	14%
Ratios:				
Net interest margin (NIM)	7.5%	10.7%	-	-
Net fee & commission income as a % of revenue	19.8%	19.9%	-	-
Non-interest revenue as a % of revenue (NIR ratio)	38.4%	38.9%	-	-
Cost-to-income ratio (CIR)	37.1%	39.3%	-	-
Return on equity (ROE)	29.0%	30.2%	-	-

Anglophone West Africa (AWA)

AWA reported a *profit before tax* of \$220 million for the first half of 2026, reflecting a 26% increase (15% in constant currency) compared to the same period last year. The annualised ROE for this period was 29.0%, down from 30.2% in the previous year.

Net revenue increased by 16% (3% in constant currency), to \$372 million.

Net interest income also grew by 16% (or 2% in constant currency) to \$229 million. This growth was negatively affected by a compression of the net interest margin due to a lower interest-rate environment, particularly in Ghana. On the other hand, non-interest revenue rose by 14% (5% in constant currency) to \$143 million, mainly driven by higher client-led foreign currency trading and fees from account-based services.

Operating expenses rose 9% to \$138 million, although they decreased 5% in constant currency, mainly due to currency translation effects. In constant currency terms, the reduction in operating expenses demonstrates improved cost management. Consequently, the cost-to-income ratio improved to 37.1%, down from 39.3% in the same period last year, as net revenue growth surpassed expense growth.

Impairment charges on loans and financial assets dropped by 35% (42% in constant currency) to \$13 million in the first half of 2026. This decrease was primarily due to a 308% increase in loan recoveries, which helped mitigate an 81% rise in gross impairment charges.

Central, Eastern and Southern Africa (CESA)				
Period ended: (in millions of US dollars)	30 Jun 2026	30 Jun 2025	% Chg 1H26 vs 1H25	% Chg in C. Currency
Net interest income	264	210	26%	20%
Non-interest revenue	205	182	13%	6%
Net revenues	470	392	20%	13%
Operating expenses	(202)	(170)	18%	12%

Return on equity (ROE)	35.4%	37.4%	-	-

Central, Eastern and Southern African Region (CESA)

CESA, our best-performing region, reported a *profit before tax* of \$251 million, reflecting a 21% increase (or 16% when adjusted for constant currency). The annualised ROE was 35.4%, compared to 37.4% in the same period last year.

Net revenue rose by 20% (or 13% in constant currency) to \$470 million.

Net interest income increased by 26% (or 20% in constant currency) to \$264 million, driven by higher investment securities balances and a slight expansion in net interest margin (NIM). *Non-interest revenue* also grew, climbing 13% (or 6% in constant currency) to \$205 million, primarily due to increased fees from client-driven foreign-currency transactions and higher card- and deposit-related fees from elevated transaction volumes in the consumer business.

Operating expenses rose by 18% (or 12% in constant currency), totalling \$202 million. Exceptional costs mainly drove this increase. Notably, the cost-to-income ratio improved to 42.9%, down from 43.4% in the prior year, indicating positive operating leverage.

Impairment charges on loans and financial assets rose 13% (or 1 % in constant currency) to \$17 million.

1. The CET1 Capital Adequacy Ratios (CAR) for Basel II/III as of 30 June 2026 are estimates only. We report our regulatory capital ratios twice a year, on 31 December and 30 June. The submission deadlines for these reports to the regulator, the Central Bank of West African States (BCEAO), are 30 April and 31 October, respectively.
2. ROTE is profit available (attributable) to ETI shareholders divided by the average end-of-period (EOP) tangible shareholders' equity

About Ecobank Transnational Incorporated ('ETI' or 'The Group')

Ecobank Group is the leading private pan-African financial services group with unrivalled African expertise. Present in 34 sub-Saharan African countries, France, the UK, UAE, and China, its unique pan-African platform provides a single gateway for payments, cash management, trade and investment. The Group employs about 14,000 people and offers over 32 million customers, Consumer, Commercial, Corporate and Investment Banking as well as Payment's products, services and solutions across multiple channels, including digital. For further information, please visit ecobank.com.

Cautionary note regarding forward-looking statements

Certain statements in this document are "forward-looking statements". These statements are based on management's current expectations and are subject to uncertainty and changes in circumstances. Actual results may differ materially from those included in these statements.

Constant Currency - Ecobank Group prepares its financial results in US dollars, while its subsidiaries report in local currencies. When converting these results to USD, Ecobank uses current exchange rates, which change frequently. The "**constant currency**" method helps eliminate the effects of foreign exchange rate changes when comparing financial results over time. This method provides a clearer view of how the business is performing, without the confusion caused by currency changes. The percentage change in constant currency shows how the business would have performed if exchange rates had remained unchanged. To calculate constant currency, we convert the 1H 2025 local-currency financials using the average and spot FX rates for 1H 2026, as needed.

Earnings Call Information:

Ecobank will hold a conference call where Group Chief Executive Officer Jeremy Awori and Chief Financial Officer Ayo Adepoju will discuss the bank's financial results for the half-year ended 30 June 2026. This call is scheduled for **Thursday, 30 July 2026, at 14:00 GMT (15:00 Lagos time)**.

Joining the Investor Conference Call:

To participate in the investor conference call, please register in advance using the link below. Once you register, you will receive an email with joining information and the link to the call.

Registration link:
