Earnings Analysis

- **Insurance revenue** increased 16.7% to ₦43.31 billion in the third quarter of 2026, from ₦24.47 billion in the corresponding period of 2025. - **Insurance service result** increased by 8.09% to ₦11.75 billion, compared with ₦10.87 billion in Q3 2025, reflecting improved underwriting performance supported by higher insurance revenue.
- **Net insurance and investment result**, which combines underwriting performance with returns on the Group's investment portfolio, declined by 4.4% to ₦13.50 billion from ₦14.12 billion in the prior-year period. This reflected higher net foreign exchange losses and lower fair value gains during the period against a strong comparative base in Q3 2025.

Financial Position

Outlook

Building on its solid operating performance in the third quarter of 2026, Cornerstone remains focused on deepening its underwriting franchise, strengthening its capital position and implementing its new group structure, separating the Group's life and general insurance businesses in line with regulatory requirements.
