Interim sustainability disclosures

1. Introduction

1.1 Reporting entity and boundary

These interim sustainability disclosures form part of the unaudited condensed consolidated and separate interim financial statements for the nine months ended 30 September 2026.

The reporting boundary is unchanged from H1 2026 and comprises MTN Nigeria Communications Plc and its subsidiaries, including MoMo Payment Service Bank Limited and Yello Digital Financial Services Limited (the Fintech Companies) and XS Broadband Limited, which were consolidated subsidiaries throughout the period.

The Structural Separation Transaction, approved by shareholders on 30 April 2026, had not been completed as at 30 September 2026 and remains subject to regulatory approvals. The Fintech Companies remain within the consolidation and GHG emissions boundaries.

1.2. Sustainability disclosure policies

The Group's sustainability disclosure policies are unchanged from the FY2025 Annual Report. Interim disclosures focus on new information, events and circumstances and do not duplicate information previously reported in H1 2026 interim disclosures.

1.3. Statement of compliance

These interim sustainability disclosures have been prepared by applying IFRS S1 General Requirements for Disclosure of Sustainability-related Financial Information and IFRS S2 Climate-related Disclosures, as adopted for use in Nigeria, together with applicable FRC Nigeria implementation guidance.

Quantified nine-month Scope 3 emissions are not presented for the reasons set out in Section 5.2.

The Board of Directors authorised both the unaudited condensed consolidated interim financial statements and these interim sustainability disclosures for issue on 29 October 2026.

1.4. Time horizons

Unchanged: short term, 0 to 12 months; medium term, 1 to 3 years; long term, beyond 3 years.

1.5. Comparative information and approach to incrementality

These disclosures present incremental information arising in the quarter ended 30 September 2026 and cumulative nine-month metrics. They update, and should be read together with, the FY2025 Annual Report and the H1 2026 interim disclosures, which remain current except where stated here. Comparative interim information will be presented from 2027 where the corresponding prior interim period was prepared on a consistent basis.

1.6. Financial statement connectivity and cross-references

Cross-references to previously issued reports are used only where the referenced information is available to users on the same terms and at the same time as these disclosures.

Interim sustainability disclosures

2. Governance

Foundational disclosures in the FY2025 Annual Report, pages 166 to 169, and H1 2026 developments remain current.

2.1. Board and committee activity at the Q3 2026 meeting

Committee	Key matters considered
Board Audit Committee Statutory Audit Committee	Reviewed the interim sustainability disclosures for the nine months ended 30 September 2026 during the Q3 2026 meeting and recommended them to the Board for authorisation. Also reviewed the plan for limited assurance of selected KPIs across material sustainability topics for the FY2026 sustainability disclosures, as presented by the independent assurance practitioner, Ernst & Young (EY).
Social, Ethics and Sustainability Committee (SESCO)	Reviewed the September 2026 sustainability performance and Project Zero progress during the Q3 2026 meeting (Section 3.5).

3. Strategy

The FY2025 SRRO catalogue, materiality assessment, climate scenario analysis, resilience assessment and Project Zero architecture remain current except where updated below.

3.1. Significant events arising during the period

Event	Effect on sustainability disclosures
Structural Separation Transaction (pending completion)	See Section 1.1. No change to the reporting boundary or affected metrics. The effect on affected disclosures will be determined and disclosed in the period the Group ceases to control the Fintech Companies.
MTN Group proposed acquisition of the remaining 75% of IHS Holding Limited	Not completed as at 30 September 2026. During the quarter, the Nigerian Communications Commission granted MTN Nigeria an approval-in-principle subject to conditions; IHS Holding Limited shareholders approved the transaction on 4 August 2026; and the Federal Competition and Consumer Protection Commission granted conditional approval requiring MTN Group to sell down up to 30% of the Nigerian IHS business. Nigerian IHS subsidiaries remain third-party tower operators to the Group under the existing tower service agreements; tower-site generator emissions continue to be reported within Scope 3 Category 1. The boundary and classification are unchanged.

3.2. Materiality

The 2025 materiality assessment remains current.

3.3. Climate scenario analysis

No change from H1 2026.

3.4. Effects on financial position, performance, and cash flows

Nine-month quantitative effects identified by management are presented below by sustainability-related or climate-related risk or opportunity, cumulative from 1 January 2026. Amounts are those recognised in the unaudited condensed consolidated interim financial statements unless stated otherwise.

Interim sustainability disclosures

Financial statement line	Risk or opportunity	Nine months ended 30 September 2026
Property, plant and equipment (Note 15)	Energy transition (climate-related transition risk and opportunity).	N825.7 million: capital expenditure on BTS solar deployment and EV charging infrastructure.
Property, plant and equipment (Note 15)	Heat stress (climate-related physical risk).	N2.3 billion: capital expenditure on high-efficiency cooling units and inverter solutions.
Property, plant and equipment (Note 15)	Flooding and storm damage (climate-related physical risk).	Management assessed whether climate-related transition and physical risks indicated impairment of property, plant and equipment as at 30 September 2026. Physical climate events, including flooding and thunderstorms, resulted in a N0.97 million impairment of network infrastructure, which is included in the impairment charge in note 15. No other climate-related impairment indicators were identified.
Property, plant and equipment (Note 15)	Data privacy and security.	N7.0 billion: capital expenditure on IT and network security infrastructure.
Intangible assets (Note 17)	Data privacy and security.	N22.8 billion: capitalised IT and network security software costs.
Other operating expenses (Note 10)	Diversity, equity and inclusion.	N317.4 million: diversity and inclusion programme and Board development costs.
Other operating expenses (Note 10)	Climate-related opportunity	N34.4 million: digital climate advisory services pilot costs.
Other operating expenses (Note 10)	Flooding (climate-related physical risk).	N42.5 million: Insurance recoveries recognised for flood-related equipment damage related to the prior year.
Professional fees (Note 10)	Risk management and business resilience; sustainability disclosure compliance.	N139.8 million: Costs of external advisers engaged for business continuity planning and resilience-related consulting, sustainability related advisory services and ESG workshops, limited assurance and ESG ratings.
Provisions (Note 30)	ESG-linked remuneration.	N712.1 million: ESG-linked remuneration paid during the period. No change from H1 2026.
Direct networking operating costs (Note 7)	Energy transition (climate-related transition opportunity).	N8.3 billion: Management estimate of diesel cost avoided through energy-efficiency and energy-transition measures. This amount is not recognised in the financial statements.

Interim sustainability disclosures

Financial statement line	Risk or opportunity	Nine months ended 30 September 2026
Provisions (Note 30)	Emerging carbon regulation.	No provision was recognised. No carbon pricing mechanism applicable to the Group's operations had been enacted in Nigeria as at 30 September 2026.

3.5. Climate transition plan progress

Workstream	Nine months ended 30 September 2026
Renewable energy deployment	Renewable energy deployed across 24 locations; 4.4MW installed capacity.
CNG transition	9 locations transitioned to CNG-powered IPP or energy-as-a-service supply.
Fleet electrification	5 EV charging points deployed; 13 EVs, 80 hybrid and 6 CNG vehicles deployed.

3.6. Internal carbon price

No change from H1 2026, Section 3.6. No internal carbon price had been approved or applied in decision-making as at 30 September 2026.

4. Risk management

The enterprise risk management framework set out in the FY2025 Annual Report, page 169, remains unchanged.

4.1. Period activities

Management reviewed the events in Section 3.1 against the ESG risk register during the quarter. No new material sustainability-related risk or opportunity was identified and no residual risk rating changed.

4.2. Internal control over sustainability reporting

In line with SRG1, the Group continued to enhance its Internal Control over Sustainability Reporting framework during the quarter. These interim sustainability disclosures were subject to management review, validation and approval.

5. Metrics and targets

5.1 Sustainability-related metrics and targets

Target details are set out in the FY2025 Annual Report, pages 174 to 175, and the H1 2026 interim disclosures.

No	Material Topic	Metric	Target/disclosure basis[1]	FY2025	9M 2026
1.	Data Privacy and Security	Number of confirmed data breaches classified as critical under the Group's incident severity framework and assessed for NDPR/NDPA reporting	Zero annually	Zero	Zero
2.	Data Privacy and Security	Percentage of employees completing information security training (%)	>90% annually	100%	100%
3.	Customer Safety and Satisfaction	Net Promoter Score (NPS)	Maintain No. 1 position, measured quarterly[7]	1st position	1st position[8]

Interim sustainability disclosures

No	Material Topic	Metric	Target/disclosure basis[1]	FY2025	9M 2026
4.	Customer Safety and Satisfaction	Network availability/uptime (%)	>98.5% annually	Not reported[2]	99.19%
5.	Risk Management and Business Resilience	Reputation Index Score (%)	>75% annually	80.2%	Not measured in Q3 2026
6.	Risk Management and Business Resilience	Business resilience maturity index (%)	>90% annually	Not reported[2]	Not measured in Q3 2026
7.	Risk Management and Business Resilience	ESG Index: Risk Insights Rating	>3.5 annually	3.7	Not measured in Q3 2026
8.	Economic Performance and Market Presence	Economic value created and distributed (N million)[3]	No target set; monitoring metric	EVC: 2,966,354 EVD: 1,853,508	EVC: 2,922,039; EVD: 1,756,865
9.	Economic Performance and Market Presence	Taxes paid	No target set; disclosure metric	N878.7 billion	N956.2 billion
10.	Access and Affordability	Broadband penetration (%)	>95% by 2030	91.2%	91.23%
11.	Access and Affordability	5G coverage, percentage of population (%)	>40% by 2030	12.08%	13.19%
12.	Access and Affordability	Active MoMo wallets, millions	20 million by 2030	3.8 million	3.2 million[9]
13.	Talent Development and Labour Practices	Average training hours per employee	>45 hours per employee annually	Not reported[2]	24 hours
14.	Talent Development and Labour Practices	Employee voluntary turnover rate (%)	<10% annually	3.8%	3.5%
15.	Employee Health and Safety	Number of work-related fatalities (FTE)	Zero annually	Zero	Zero
16.	Employee Health and Safety	Number of work-related fatalities (Non-FTE)	Zero annually	Zero	Zero
17.	Employee Health and Safety	Lost time incidents (FTE)	Zero annually	Not reported[2]	1
18.	Employee Health and Safety	Lost time incidents (Non-FTE)	Zero annually	Not reported[2]	1
19.	Ethical Conduct and Anti-Corruption	Overall Compliance Acculturation Index (OCAI)	>95% annually	Not reported[2]	Not measured in Q3 2026
20.	Responsible Supply Chain Management	Local procurement, percentage of spend (%)	>70% by 2030	62.0%	63.0%
21.	Community Engagement and Social Development	Number of individuals reached through the Group's corporate social investment programmes	>2,500,000 cumulative individual beneficiaries by 2030[4]	538,448	1,012,816[4.1]
22.	Community Engagement and Social Development	Number of non-employees completing a basic, intermediate, or advanced digital skills training programme	>1,000,000 cumulative trained individuals by 2030[4]	62,284	133,469[4.1]
23.	Climate and Energy	Change in Scope 1 and Scope 2 emissions versus applicable SBTi baseline (%)	42% absolute reduction by 2030	-6.4% versus 2021 baseline[5]	Versus 2024 baseline; see Section 5.4
24.	Climate and Energy	Change in Scope 3 emissions versus applicable SBTi baseline (%)	25% absolute reduction by 2030	+84.6% versus restated 2024[6]	Versus 2024 baseline; assessed annually; see Section 5.2
25.	Climate and Energy	Percentage renewable energy in total energy mix (%)	>20% by 2030	0.05%	1.8%

Interim sustainability disclosures

No	Material Topic	Metric	Target/disclosure basis[1]	FY2025	9M 2026
26.	Diversity, Equity and Inclusion	Female representation (%)	>50% by 2030	43.4%	43.6%
27.	Diversity, Equity and Inclusion	Percentage of employees living with disabilities (%)	>2.5% by 2030	2.3%	2.2%
28.	Biodiversity and Ecological Impacts	Total water consumption, megalitres (ML)	No target set; monitoring metric	2,413.9 ML	1,566.2 ML
29.	Circular Economy and Waste Reduction	Total waste (non-hazardous) generated, tonnes	No target set; monitoring metric	345.5 tonnes	181.7 tonnes
30.	Circular Economy and Waste Reduction	Network equipment reuse rate (%)	>30% of annual decommissioned equipment scope	Not reported[2]	Not measured in Q3 2026

[1]The basis for comparative information and the reporting cadence are set out in Section 1.5.
[2] Not reported: the metric was not disclosed for FY2025.
[3] Economic value created comprises revenue and other income less bought in goods and services. Economic value distributed comprises value distributed to employees, providers of capital and government, and value retained in the business. Nine-month values are derived from the condensed consolidated interim financial statements. FY2025 values are as previously published.
[4] Cumulative targets to 2030 measured from 1 January 2025.
[4.1] Cumulative number from baseline of FY2025 till 9M 2026.
[5] FY2025 Scope 1 and 2 movement is measured against the 2021 SBTi baseline applicable to that year. FY2025 Scope 3 movement is measured against the restated 2024 baseline (footnote 6). All movements from 1 January 2026 are measured against the 2024 baseline for all scopes. The 2021 and 2024 baselines are not directly comparable.
[6] The 84.6% reflects the change from restated 2024 Scope 3 emissions of 232,937 tCO2e to 429,962 tCO2e; not measured on a like-for-like basis.
[7] From Q3 2026, NPS is measured quarterly. It was previously measured twice annually. Survey methodology is unchanged. The most recent prior result, H1 2026, was 2nd position.
[8] Q3 2026 only (1 July to 30 September 2026).
[9] MoMo wallets declined in Q3 following migration to a new platform and deactivation of legacy wallets.

5.2. Cross-industry climate-related metrics

Scope 3 activity data is collated monthly and quarterly, but completeness checks, supplier validation and reconciliation are performed through the annual Scope 3 measurement cycle. As at the reporting date, nine-month Scope 3 data was incomplete and had not been internally validated. Quantifying Scope 3 emissions from this data would not be based on reasonable and supportable information available at the reporting date without undue cost or effort and would not provide reliable or decision-useful information. The FY2025 Scope 3 figure of 429,962 tCO2e remains the most recent reported figure. Scope 3 emissions for 2026 will be measured through the annual cycle and disclosed in the FY2026 sustainability disclosures.

Scope 1 and Scope 2 activity data is sourced from internal fuel, electricity, vehicle and project records. Emission factors are selected for source specificity, geographic relevance, recency, data availability and consistency with the FY2025 methodology.

5.3. SBTi near-term targets

Unchanged from H1 2026, Section 5.3. Cumulative reduction progress against the 2024 baseline is reported annually.

5.4. GHG emissions performance and intensity metrics

Nine-month figures comprise actual data for January to August 2026 and estimated data for September 2026 (Section 6).

Metric	Unit	2024 baseline	FY2025	9M 2026
Scope 1 emissions	tCO_2e	55,190	53,180	42,470
Scope 2 emissions, from grid electricity†	tCO_2e	Not disaggregated	20,165	10,149

Interim sustainability disclosures

Metric	Unit	2024 baseline	FY2025	9M 2026
Scope 2 emissions, from gas-powered IPP electricity†	tCO_2e	Not disaggregated	33,244	34,758
Scope 2 emissions, total used for target tracking	tCO_2e	46,234	53,408	44,907
Scope 1 and 2 emissions, total	tCO_2e	101,424	106,588	87,377
Scope 3 emissions	tCO_2e	232,937	429,962	Not disclosed*
Scope 1 and 2 emissions per subscriberß	tCO_2e/subscriber	0.00125	0.00122	0.00092
Scope 1 and 2 emissions per N'billion revenueß	tCO_2e/N'billion	30.2	20.5	18.9

† Basis of calculation unchanged from H1 2026, Section 5.4.
* Not presented for the reasons set out in Section 5.2.
ß Denominators: subscriber count from the business performance report; revenue from the consolidated income statement. Nine-month intensity per subscriber is based on nine-month emissions and is not comparable with full-year figures.

5.5. Selected SASB industry-based metrics

Narrative responses disclosed at H1 2026, Section 5.5, remain current. Quantitative metrics are updated below.

Topic	SASB Code(s)	Metric	9M 2026
Environmental Footprint of Operations	TC-TL-130a.1 / TC-SI-130a.1	Total energy consumed	811,579 GJ
	TC-TL-130a.1 / TC-SI-130a.1	Percentage from grid electricity	11.84%
	TC-TL-130a.1 / TC-SI-130a.1	Percentage from renewable sources	1.84%
Data Privacy	TC-TL-220a.3 / TC-SI-220a.3	Total monetary losses from legal proceedings associated with customer privacy.	No monetary losses were recorded during the period. Three ongoing proceedings with undetermined outcomes were excluded[8]
Data Security	TC-TL-230a.1 / TC-SI-230a.1	(1) Number of data breaches;	Zero. No data breach recorded.
		(2) Percentage that are personal data breaches;	Zero. No data breach recorded.
		(3) Number of customers affected	Zero. No data breach recorded.
Competitive Behaviour and Open Internet	TC-TL-520a.1 / TC-SI-520a.1	Total amount of monetary losses as a result of legal proceedings associated with anti-competitive behaviour regulations	None
	TC-TL-520a.2	(1) Average actual sustained download speed of owned and commercially associated content;	30.50 Mbps
		(2) of non-associated content	30.50 Mbps
Managing Systemic Risks from Technology Disruptions	TC-TL-550a.1	(1) System average interruption frequency;	0.00000005
		(2) Customer average interruption duration	3hrs 13mins 20sec - MTTR - Average downtime per customer for severity 1 and 2 [8].

Interim sustainability disclosures

Topic	SASB Code(s)	Metric	9M 2026
Managing Systemic Risks from Technology Disruptions	TC-SI-550a.1	(1) Number of performance issues;	A total of 16 Severity 1, 2 and 3 incidents were reported for Q3 2026 for IT and Network. Excluding external third-party causes [8]
		(2) Number of service disruptions;	A total of 5 service disruptions - Severity 1 and 2 for IT and Network[8]
		(3) Total customer downtime	12hrs 53mins (sum of downtime for severity 1 and 2 outage)[8]

[8]Q3 2026 only (1 July to 30 September 2026).

5.6. Activity metrics

Code	Classification	Activity Metric	Response
TC-TL-000.A	TC-TL	Number of wireless subscribers	RGS 30: 87,675,491 RGS 90: 94,728,292
TC-TL-000.B	TC-TL	Number of wireline subscribers	RGS 30: 4,152 RGS 90: 4,330
TC-TL-000.C	TC-TL	Number of broadband subscribers	RGS 30: 1,885,533 RGS 90: 2,213,027
TC-TL-000.D	TC-TL	Network traffic	8,519.95 petabytes
TC-SI-000.A	TC-SI	(1) Number of licences or subscriptions	110.0
		(2) Percentage cloud-based	18.2%
TC-SI-000.B	TC-SI	(1) Data processing capacity	702 rack space
		(2) Percentage outsourced	32.3%
TC-SI-000.C	TC-SI	(1) Amount of data storage	48.9 petabytes
		(2) Percentage outsourced	0.04%

6. Judgements, estimation uncertainty, and changes in estimates

Significant judgements, estimation uncertainty and GHG measurement methodology remain consistent with the FY2025 Annual Report and the H1 2026 interim disclosures.

Nine-month Scope 1 and Scope 2 emissions comprise actual activity data for January to August 2026 and estimated data for September 2026, extrapolated from the January to August monthly average and adjusted for known operational changes. Estimated September data will be replaced once actual data becomes available and has been reviewed, and any variance will be reflected in the FY2026 disclosures.

Management has estimated the diesel expenditure avoided through energy-efficiency and energy-transition measures during the nine months ended 30 September 2026. The estimate involves judgement regarding diesel consumption that would otherwise have occurred and applicable diesel prices, and is subject to estimation uncertainty. It is disclosed for information purposes and is not recognised as a separate amount in the financial statements.

Interim sustainability disclosures

7. Assurance

No external assurance has been obtained over these interim disclosures. Sustainability data for the period has been subject to management review, CCSSO sign-off and oversight by the Board Audit Committee and Statutory Audit Committee.

The Group will obtain independent limited assurance over selected KPIs in its FY2026 sustainability disclosures in accordance with ISAE 3000 (Revised), consistent with the assurance requirements applicable under the FRC Nigeria Adoption Roadmap. The engagement scope and reporting criteria will be agreed with the independent assurance practitioner and disclosed in the 2026 Annual Report.

Tobechukwu Okigbo
Chief Corporate Services and Sustainability Officer

Notes to the unaudited condensed consolidated and separate financial statements

1. General information

MTN Nigeria Communications Plc (the Company) together with its subsidiaries (the Group) carry on the business of building and operating GSM Cellular Network Systems and other related services nationwide in Nigeria.

MTN Nigeria Communications Plc subsidiaries are MoMo Payment Service Bank Limited, Yello Digital Financial Services Limited and XS Broadband Limited. MoMo Payment Service Bank Limited and Yello Digital Financial Services Limited, provide mobile and digital financial services (fintech) and operated actively during the period under review, while XS Broadband Limited remained dormant; its principal activity is the provision of broadband fixed wireless telecommunication services. All subsidiaries are wholly owned by MTN Nigeria Communications Plc.

2. Basis of preparation

These condensed consolidated and separate financial statements for the nine months ended 30 September 2026 have been prepared in accordance with IFRS Accounting Standards and International Accounting Standards (IAS) 34 Interim Financial Reporting.

The condensed consolidated and separate financial statements do not include all the notes of the type normally included in annual financial statements. Accordingly, this report is to be read in conjunction with the audited annual financial statements for the year ended 31 December 2025 which has been prepared in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board (IASB), interpretations issued by the IFRS Interpretations Committee (IFRS IC) applicable to companies reporting under IFRS and with the requirements of the Financial Reporting Council of Nigeria (Amended) Act, 2023 and Companies and Allied Matters Act of Nigeria (CAMA) 2020.

The condensed consolidated and separate financial statements are presented in Naira and rounded to the nearest millions, except where stated otherwise.

The accounting policies applied in the preparation of the condensed consolidated and separate financial statements are consistent with those followed in the preparation of the Group's consolidated and separate financial statements for the year ended 31 December 2025.

The Group has not early adopted any standard, interpretation or amendment that has been issued but is not yet effective. Several amendments and interpretations apply for the first time in 2026, but do not have an impact on the condensed consolidated and separate financial statements of the Group.

3. New standards and interpretations

3.1 New and amended standards adopted by the Group

a) Classification and measurement of financial instruments - amendments to IFRS 9 and IFRS 7

Effective for annual periods beginning on or after 1 January 2026.

Key requirements
In May 2024, the Board issued Amendments to the Classification and Measurement of Financial Instruments (Amendments to IFRS 9 and IFRS 7), which:

- Clarifies that a financial liability is derecognised on the 'settlement date', i.e., when the related obligation is discharged, cancelled, expires or the liability otherwise qualifies for derecognition. It also introduces an accounting policy option to derecognise financial liabilities that are settled through an electronic payment system before settlement date if certain conditions are met Clarified how to assess the contractual cash flow characteristics of financial assets that include environmental, social and governance (ESG)-linked features and other similar contingent features.

- Clarifies the treatment of non-recourse assets and contractually linked instruments.

- Requires additional disclosures in IFRS 7 for financial assets and liabilities with contractual terms that reference a contingent event (including those that are ESG-linked), and equity instruments classified at fair value through other comprehensive income.

3. New standards and interpretations (continued)

The amendments do not have a material impact on the recognition, classification, measurement or disclosures of financial instruments in these condensed consolidated and separate financial statements.

b) Contracts referencing nature-dependent electricity - amendments to IFRS 9 and IFRS 7

Effective for annual periods beginning on or after 1 January 2026.

Key requirements

In December 2024, the Board issued Contracts Referencing Nature-dependent Electricity (Amendments to IFRS 9 and IFRS 7). The amendments:

- Update the 'own-use' requirements for in-scope contracts. Under the amendments, the sale of unused nature dependent electricity will be in accordance with an entity's expected purchase or usage requirements, if specified criteria are met

- Amend the designation requirements for a hedged item in a cash flow hedging relationship for in-scope contracts. The amendments will allow an entity to designate a variable nominal volume of forecast electricity transactions as a hedged item, if specified criteria are met.

- Add new disclosure requirements to enable investors to understand the effect of these contracts on a company's financial performance and cash flows. IFRS 7 has been amended to require specific disclosures relating to contracts that have been excluded from the scope of IFRS 9 as a result of the amendments.

The amendments only apply to contracts that reference nature dependent electricity. These are contracts that expose an entity to variability in an underlying amount of electricity because the source of electricity generation depends on uncontrollable natural conditions, typically associated with renewable electricity sources such as sun and wind.

The amendments do not have a material impact on the recognition, classification, measurement or disclosures of financial instruments in these condensed consolidated and separate financial statements.

c) Annual Improvements to IFRS Accounting Standards — Volume 11

IFRS 1 First-time Adoption of International Financial Reporting Standards

This became effective for annual reporting periods beginning on or after 1 January 2026. These include amendments to IFRS 1 relating to hedge accounting by first time adopters; IFRS 7 and the related implementation guidance clarifying certain disclosure requirements, including those relating to derecognition gains or losses, credit risk disclosures and consistency of terminology; IFRS 9 amendments clarifying the accounting for lessee derecognition of lease liabilities and the determination of transaction price by reference to IFRS 15; IFRS 10 amendments clarifying the assessment of de facto agent relationships; and amendments to IAS 7 replacing the term "cost method" with "at cost". The Group has assessed the impact of these amendments and concluded that they do not have a material impact on these condensed consolidated and separate financial statements, as the amendments are largely clarificatory in nature and do not result in changes to existing accounting treatments.

3.2 Standards issued but not yet effective

The new and amended standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Group's interim condensed consolidated and separate financial statements. The Group intends to adopt these new and amended standards and interpretations, if applicable, when they become effective. The amendments are set out below:

a) IFRS 18 - Presentation and Disclosure in Financial Statements
The objective of IFRS 18 is to set out requirements for the presentation and disclosure of information in general purpose financial statements (financial statements) to help ensure they provide relevant information that faithfully represents an entity's assets, liabilities, equity, income and expenses. Among other requirements, this new standard requires:

- income and expenses in the income statement to be classified into three new defined categories-operating, investing and financing-and two new subtotals-"Operating profit or loss" and "Profit or loss before financing and income tax".

3. New standards and interpretations (continued)

- disclosures about management-defined performance measures (MPMs) in the financial statements. MPMs are subtotals of income and expenses used in public communications to communicate management's view of the company's financial performance.

- disclosure of information based on enhanced general requirements on aggregation and disaggregation. In addition, specific requirements to disaggregate certain expenses, in the notes, will be required for companies that present operating expenses by function in the income statement.

The amendments are effective for annual reporting periods beginning on or after 1 January 2027. Upon adoption, the Group will change the extent of information disclosed in the notes to the financial statements to include management defined performance measures. The Group will also change the aggregation and disaggregation of certain expenses in the note to the financial statements. However, the standard is not expected to impact on the measurement of items reported in the financial statements. The Group does not plan to adopt the standard earlier than the effective date.

b) IFRS 19 - Subsidiaries without Public Accountability: Disclosures

IFRS 19, which permits eligible subsidiaries to apply reduced disclosure requirements while applying the recognition, measurement and presentation requirements in IFRS Accounting Standards.

An entity is eligible to apply IFRS 19 in its consolidated, separate or individual financial statements if it meets the eligibility criteria at the end of the reporting period.

The eligibility criteria are:

- the entity is a subsidiary (as defined in Appendix A of IFRS 10 Consolidated Financial Statements);
- the entity does not have public accountability; and

- the entity has an ultimate or intermediate parent that produces consolidated financial statements available for public use that comply with IFRS Accounting Standards.

An intermediate parent that does not have public accountability and meets the above eligibility conditions is permitted to apply IFRS 19 in its separate financial statements even if it does not apply IFRS 19 in its consolidated financial statements.
An entity has public accountability if:

- its debt or equity instruments are traded in a public market or it is in the process of issuing such instruments for trading in a public market; or

- it holds assets in a fiduciary capacity for a broad group of outsiders as one of its primary businesses.

The standard is effective for annual reporting periods beginning on or after 1 January 2027. The standard is not expected to have impact on these condensed consolidated and separate financial statements, because the Company is a listed entity.

3. New standards and interpretations (continued)

c) Sale or Contribution of Assets between an Investor and its Associate or Joint Venture – Amendments to IFRS 10 and IAS 28

In December 2015, the IASB decided to defer the effective date of the amendments until such time as it has finalised any amendments that result from its research project on the equity method. Early application of the amendments is still permitted.

Key requirements

The amendments address the conflict between IFRS 10 Consolidated Financial Statements and IAS 28 Investments in Associates and Joint Ventures in dealing with the loss of control of a subsidiary that is sold or contributed to an associate or joint venture. The amendments clarify that a full gain or loss is recognised when a transfer to an associate or joint venture involves a business as defined in IFRS 3 Business combinations. Any gain or loss resulting from the sale or contribution of assets that does not constitute a business, however, is recognised only to the extent of unrelated investors' interests in the associate or joint venture.

Transition

The amendments must be applied prospectively. Early application is permitted and must be disclosed. Although, the Group plans to defer adoption until the IASB finalises its research project on the equity method.

Impact

The amendments had no impact on these condensed consolidated and separate financial statements.

d) Translation to a Hyperinflationary Presentation Currency – Amendments to IAS 21

The amendments require translation from a non-hyperinflationary functional currency into a hyperinflationary presentation currency at the closing rate.

If an entity's functional currency is the currency of a non-hyperinflationary economy, but its presentation currency is the currency of a hyperinflationary economy, its results and financial position are translated into the presentation currency by translating all amounts (i.e., assets, liabilities, equity items, income and expenses) and all comparatives at the closing rate at the date of the most recent statement of financial position.

An entity whose functional currency and presentation currency are the currency of a hyperinflationary economy, restates the comparative amounts of a foreign operation, whose functional currency is that of a non-hyperinflationary economy, by applying the general price index, in accordance with paragraph 34 of IAS 29, to the foreign operation's comparative figures.

The amendments also introduce certain additional disclosure requirements.

The amendments apply for annual reporting periods beginning on or after 1 January 2027 and earlier application is permitted.

If an entity's functional currency and presentation currency are the currency of a hyperinflationary economy (or are the currencies of different hyperinflationary economies) and it translates the results and financial position of foreign operations whose functional currency is that of a non-hyperinflationary economy, then it is required to apply the amendments from the beginning of the annual reporting period in which it first applies the amendments. In addition, it restates the comparative amounts of its foreign operations included in the entity's previously issued financial statements by applying the general price index it applies to corresponding figures in accordance with paragraph 34 of IAS 29. The amendments had no impact on the Group's consolidated and separate financial statements.

The standard is effective for annual periods beginning on or after 1 January 2027 and the Group did not plan to adopt the standard earlier than the effective date.

Notes to the unaudited condensed consolidated and separate financial statements

3. New standards and interpretations (continued)

e) IFRS 20 – Regulatory Assets and Regulatory Liabilities

In 2025, the International Accounting Standards Board (IASB) issued IFRS 20 Regulatory Assets and Regulatory Liabilities, which establishes a comprehensive accounting model for entities that are subject to specified rate regulation. IFRS 20 replaces IFRS 14 Regulatory Deferral Accounts and introduces requirements for the recognition, measurement, presentation and disclosure of regulatory assets and regulatory liabilities arising from rate-regulated activities. The standard is effective for annual reporting periods beginning on or after 1 January 2029, with earlier application permitted.
The Group is currently assessing the impact of IFRS 20 on its consolidated and separate financial statements. Based on a preliminary assessment of the Group's operations and existing regulatory environment, the standard is not expected to have a material impact on the Group's financial statements, as the Group does not currently operate within a rate-regulated framework of the nature contemplated by IFRS 20. The Group will continue to monitor developments and evaluate the impact of the standard prior to its effective date.

4. Segmental information

An operating segment is a component of the Group that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the Group's other components, whose operating results are reviewed regularly by the Executive Committee (EXCOM), to make decisions about resources allocated to each segment and assess its performance, and for which discrete financial information is available. All costs that are directly traceable to the operating segments are allocated to the segment concerned.

The Group has identified three reportable segments that are used by the Executive Committee (EXCOM) to make key operating decisions. All operating segment results are reviewed regularly by EXCOM to make decisions about resources to be allocated and to assess its performance. The reportable segments are largely grouped according to customer type for which discrete financial information is available. The customer segments are as follows:
- Consumer Business Unit (CBU)
- Enterprise Business Unit (EBU)
- Wholesale Business Unit (WBU)

Operating results are reported and reviewed regularly by the EXCOM and include items directly attributable to a segment.

Customer segment	Description
Consumer Business Unit (CBU)	It consists of subscribers sitting in value propositions and tariff plans dedicated to three sub segments: Youth, High Value and Mass segments. All MTN customers are assumed to fall within CBU except where otherwise stated.
Enterprise Business Unit (EBU)	Enterprise customers are corporate, small and medium organisations whose business requires MTN products, services and solutions to serve their everyday business needs.
Wholesale Business Unit (WBU)	The Wholesale business serves customers who buy MTN telecom products in bulk with the intention to re-sell these products (mobile or fixed) to their external clients.

A key performance measure of the Group is gross margin. This is defined as revenue less direct costs. The table below presents revenue, direct costs and gross margin for the Group's operating segments for the nine months ended 30 September 2026 and 30 September 2025.

Notes to the unaudited condensed consolidated and separate financial statements

4. Segmental information (continued)

In millions of Nigerian Naira	CBU	EBU	WBU	Total
30 September 2026				
Segment revenue	4,030,927	418,639	163,757	4,613,323
Direct costs*	(482,019)	(33,229)	(51,278)	(566,526)
Gross margin	3,548,908	385,410	112,479	4,046,797
30 September 2025				
Segment revenue	3,011,997	502,215	216,791	3,731,003
Direct costs*	(411,681)	(27,823)	(63,483)	(502,987)
Gross margin	2,600,316	474,392	153,308	3,228,016

*Direct costs include interconnect cost, roaming costs, some regulatory fees (reported in direct network operating costs), costs of handsets and accessories, value added services costs and discount and commissions expenses.

Reconciliation of reportable segment revenue and profit or loss

Revenues

There are no significant reconciling items between the reportable segment revenue and total revenue for the period.
The revenue of the Company is generated majorly from one geographical location, Nigeria.
None of the Company's customers account for 10% or more of the total revenue of the Company.

In millions of Nigerian Naira	30 Sept 2026	30 Sept 2025
Segment gross margin	4,046,797	3,228,016
Less unallocated expenses:		
Operating expenses	(1,398,471)	(1,307,027)
Depreciation & amortisation	(631,949)	(476,455)
Impairment in financial assets	(23,872)	(2,751)
Finance income	82,579	33,259
Finance expense	(359,577)	(404,180)
Net foreign exchange gain	80,138	55,579
Profit before taxation	1,795,645	1,126,441

Segment assets and liabilities

The Group has not provided information on reportable segment assets and liabilities as they are not part of the items regularly reviewed by the Executive Committee (EXCOM) to make operating decisions.

(a) Data revenue includes mobile data, fixed broadband and data bundles. It does not include roaming data, which is reported under the interconnect and roaming revenue stream.
(b) SMS revenue includes bulk SMS and USSD services. It does not include inbound roaming SMS which is reported under interconnect and roaming revenue stream.
(c) Digital revenue includes revenue generated from the distribution of video, music, gaming and lifestyle content and e-commerce activities.
(d) Value added services includes airtime lending and mobile money (Fintech), subscriber identification module (SIM) back up services and voice based services.
(e) Rental income comprises of income from sites leased to other telecom operators and office space leased to MoMo PSB.
(f) Other revenue comprises revenue from cloud and infrastructure services, information and communication technology (ICT) revenue.
Except for rental income, which is accounted for outside the scope of IFRS 15, all other revenue streams are derived from contracts with customers and are recognized in accordance with IFRS 15 Revenue from Contracts with Customers.
Except for income from the sale of handsets and accessories, all other revenue streams are recognised over time.

6. Other income

Minimum tax disclosure:
The former minimum-tax provision under section 33 of the repealed Companies Income Tax Act ("CITA") generally imposed minimum tax at 0.5% of gross turnover for companies within its scope. CITA was repealed by the Nigeria Tax Act 2025 ("NTA"), which took effect from 1 January 2026.

Section 57 of the NTA now provides for a minimum effective tax rate ("METR") of 15%. Where a company's NTA effective tax rate is below 15%, the company must recompute and pay additional tax sufficient to bring the rate to 15%. The provision applies where the company:

- is a constituent entity of a multinational enterprise group with aggregate group turnover of at least £750 million or its equivalent; or
- has aggregate turnover of N50 billion or more in the relevant financial year.

For NTA purposes, the ETR is calculated as covered taxes divided by net income. Covered taxes include income tax and development levy, while net income is profit before tax adjusted to exclude franked investment income and unrealised gains or losses. As at September 2026, MTNN minimum effective tax rate exceeded the 15% threshold. Hence, no minimum tax liability.

Development Levy Disclosure:
Section 59 of the NTA imposes a development levy on the assessable profits of companies other than small companies and non-resident companies. The applicable rate is 4%. Development levy is computed at 4% of assessable profit, before the deduction of losses and capital allowances used in arriving at total profit.

Total cash outflow for property and equipment as at 30 September 2026 was N1trillion
Reclassification relates to assets moved from capital work in progress to other categories of property and equipment. Total reclassification for the period was N739.5 billion.
*Impairment loss relates to damaged and defective network infrastructure. The physical damage and defects were identified as indicators of impairment, resulting in a reassessment of the assets' recoverable amounts. As the recoverable amounts were lower than the carrying amounts, an impairment loss was recognized in accordance with IAS 36.

In millions of Nigerian Naira	30 Sept 2026	31 Dec 2025	30 Sept 2026	31 Dec 2025

18. Investment in subsidiaries

The following table lists the entities which are controlled by the MTN Nigeria				
XS Broadband Limited	-	-	500	500
Yello Digital Financial Services Limited	-	-	15,000	15,000
MoMo Payment Service Bank Limited	-	-	122,950	92,950
	-	-	138,450	108,450
Impairment of investment in subsidiary	-	-	(77,790)	(63,064)
	-	**-**	**60,660**	**45,386**

In quarter three of 2026, MTN Nigeria recognised an additional impairment of N14.72 billion in YDFS (September 2025: N62.56 billion).

19. Deferred tax assets

Opening balance	93,629	321,349	93,612	321,332
Credit/(charge) to profit and loss	45,357	(228,773)	45,357	(228,773)
Credit to other comprehensive income	94	1,053	94	1,053
Closing balance	**139,080**	**93,629**	**139,063**	**93,612**

Deferred tax credit recognised in the profit or loss for the period ended 30 September 2026 relates to timing differences arising from provisions, unrealised exchange differences, and fair value movements. The deferred tax credit recognized in other comprehensive income (OCI) relates to the tax impact of fair value movements on financial assets measured at fair value through other comprehensive income (FVOCI). In the prior year, it also included the deferred tax impact of actuarial gains recognised on employee benefit obligations.

20. Investments

20.1 Other non-current investments

Treasury bonds at amortised cost	21,028	17,863	9,766	6,253
Allowance for expected credit losses	(8)	(51)	-	(2)
	21,020	**17,812**	**9,766**	**6,251**

The expected credit loss (ECL) on the Company's treasury bonds was assessed as at the reporting date. Based on the assessment, the resulting impairment was not material to these financial statements.

20.2 Current investments

Treasury bills at amortised cost	212,260	92,387	170,256	85,548
NGN deposits at amortised cost	29,177	13,829	29,177	-
Allowance for expected credit losses	(257)	(291)	(192)	(226)
	241,180	105,925	199,241	85,322
Treasury bills and bonds at FVTPL	33,413	29,081	33,413	29,081
Treasury bills and bonds at FVOCI	56,156	27,249	5,410	2,490
	330,749	**162,255**	**238,064**	**116,893**

Notes to the unaudited condensed consolidated and separate financial statements

In millions of Nigerian Naira		Group		Company	
		30 Sept 2026	31 Dec 2025	30 Sept 2026	31 Dec 2025

21. Other non-current assets

Other non-current asset comprises of:					
Contract acquisition costs	21.1	14,500	12,319	14,500	12,319
Non-current prepayment	21.2	67,337	33,830	67,337	33,830
		81,837	**46,149**	**81,837**	**46,149**

21.1 Contract acquisition costs

Opening balance	12,319	9,344	12,319	9,344
Additions	9,423	11,047	9,423	11,047
Amortised in the period/year	(7,242)	(8,072)	(7,242)	(8,072)
Closing balance	**14,500**	**12,319**	**14,500**	**12,319**

Contract acquisition costs are incremental costs of obtaining a contract with a customer that would not have incurred if the contract had not been obtained. They include incremental commission fees paid to trade partners for SIM activations and the costs of virtual NIMC tokenization incurred during customer identity verification exercises at all service touchpoints.

21.2 Non-current prepayment

Prepaid road infrastructure tax credit (a)	62,449	27,910	62,449	27,910
Other non-current prepayments (b)	4,888	5,920	4,888	5,920
	67,337	**33,830**	**67,337**	**33,830**

(a) These are costs incurred towards the reconstruction of the Enugu-Onitsha expressway under the Road Infrastructure Development and Refurbishment Investment Tax Credit ("Road Tax Credit") Scheme. The Scheme is a public-private partnership (PPP) intervention that enables the Nigerian Government to leverage private sector capital and efficiency for the construction, repair, and maintenance of critical road infrastructure in key economic areas in Nigeria. MTN Nigeria shall be entitled to utilize the total cost incurred in the construction or refurbishment of an eligible road as a tax credit against their future Companies Income Tax (CIT) liability, until full cost recovery is achieved.
(b) This includes the non-current portion of the prepaid Indefeasible right of use (IRU) asset access to the West African Cable System (WACS).

22. Inventories

Handsets and accessories	40,290	24,202	40,290	24,202
Starter packs	12,428	11,507	12,428	11,507
	52,718	35,709	52,718	35,709
Inventory write-downs	(16,407)	(12,411)	(16,407)	(12,411)
	36,311	**23,298**	**36,311**	**23,298**

During the period, there was a write down of N4.00 billion (30 September 2025: N4.40 billion) for SIM starter packs, handsets and accessories. Inventory write-down is recognised in the other operating expenses line (note 10).

		118,858	126,729	139,563	173,627
Other receivables (c)		41,821	51,715	41,957	51,829
		160,679	178,444	181,520	225,456
Non-financial instruments:					
Sundry receivables and advances (d)		2,930	2,246	1,551	660
Other non-financial receivables (e)		140,750	108,822	129,608	101,043
Current prepayments (f)		100,234	107,517	99,209	106,557
		243,914	218,585	230,368	208,260
Total trade and other receivables		**404,593**	**397,029**	**411,888**	**433,716**

(a) During the period, the Group and the Company recognised an expected credit loss (ECL) expense of N15 billion (September 2025: N2.38 billion) on trade receivables. The higher impairment charge was mainly attributable to the reassessment of XtraTime receivables, leading to an increase in the expected credit loss provision recognized on those receivables. In addition, receivable balances of N3.2 billion were derecognised during the period, relating to historical reconciliation variances from legacy system issues that were assessed as unrecoverable.
(b) The impairment charge recognised during the period relates to expected credit losses on related party receivable balances, following management's reassessment of recoverability under the expected credit loss model in IFRS 9. Credit loss expenses are presented within impairment of financial assets (see note 9).
(c) Other receivables includes uninvoiced expenses covered for related parties and subsidiaries.
(d) Sundry receivables and advances includes advances to staff for travel expenses and other work related expenses.
(e) Other non-financial receivables includes contracted Advance Payment Guarantees (APGs) and performance bonds with vendors and withholding tax receivables.
(f) Current prepayments includes, prepaid operational costs, short term software licenses, insurance and the prepaid RITC cost of N53.56 billion.

24. Restricted cash

Restricted cash deposits for letters of credit (a)	29,970	16,940	29,970	16,940
Collateral on forwards (b)	-	20,123	-	20,123
Restricted cash - others (c)	1,451	644	1,251	444
	31,421	**37,707**	**31,221**	**37,507**

(a) This is usance letters of credit (LC) that is backed by restricted cash deposit (known as cash collateral) in US$ and Naira.
(b) This is the cash build up on forward contract.
(c) Restricted cash - others comprises of: the retention fee on purchase of Visafone Communications Limited (now liquidated) of N378.64 million; Outstanding balance of dividends received on shares acquired under the MTN Employee Share Scheme and held in trust by Vetiva Trustee Limited: N807.28 million (2025: N0.53 million) including garnishees against court judgments of N64.98 million (2025: N64.98 million). For Group, YDFS has a deposit of N200 million (2025: N200 million) with the Central Bank of Nigeria for access to the PSSP (Payment service solution provider) & PTSP (Payment terminal service provider) platforms.

For the purpose of cash flows, total net cash outflow from banks for restricted cash for Group and Company was N5.66 billion: (30 September 2025: net cash inflow of N67.64 billion).

25. Cash and deposits held for MoMo customers

25.1 Cash held for MoMo Customer

Cash held for MoMo customers	1,262	1,298	-	-

Cash held for MoMo customers represents funds received from customers to fund their wallets. Upon receipt of these funds, MoMo recognises a financial asset (representing the cash received or held) and a corresponding customer deposit liability, reflecting its obligation to repay the funds to customers (see note 25.2).
As at the reporting date, customer deposits amounted to N43.82 billion, of which N42.55 billion (December 2025: N8.54 billion) had been invested in treasury bills at fair value through OCI (Note 20.2). Under the applicable regulatory framework, customer deposits are restricted and may only be invested in permissible liquid instruments prescribed by CBN.

25.2 Deposits held for MoMo Customer

Deposits held for MoMo customers	43,815	9,842	-	-

Deposits held for MoMo customers represent deposit liabilities arising from funds received into customers' mobile money wallets. These deposit liabilities are either payable on demand or withdrawable at short notice, consistent with the nature of mobile money services. Accordingly, deposits held for MoMo customers are measured at amortised cost in accordance with IFRS 9. Mobile money customer deposit increased during the reporting period. The growth was driven primarily by increased wallet adoption and deposit mobilisation, reflecting shifts in customer funding behaviour, rather than any modifications to product terms or pricing. Deposits continued to be largely short-term and transactional in nature, with balances payable on demand.

26. Cash and cash equivalents

Bank balances	187,491	162,525	186,154	160,164

28.1 Summary of borrowing arrangements

MTN Nigeria maintains a diversified borrowing portfolio comprising debt securities issued under its Bond Issuance Programme and bilateral loan facilities secured from local financial institutions, including development finance institutions. These funding arrangements support the Company's capital expenditure requirements, working capital needs, and broader financing objectives. The details are as follows:

Facility	Details	Outstanding balance as at 30 September 2026
Bonds	Under the N200 billion Bond Issuance Programme, two series were issued on 5 May and 4 November 4 2021 comprising of: (a) Series I: N110.001 billion 7 Year 13% Bonds due 2028. (b) Series II: N89.999 billion 10 year 12.75% Bonds due 2031. (c) Series III: -Tranche A - N10 billion 4 year 13.5% bond issued in 29 September 2022 due in 2026. (d) Series III: -Tranche B - N105 billion 10 year 14.5% bond issued on 30 September 2022 due in 2032. As of 30th September 2026, the outstanding balance on the facility stood at N304.9 billion. MTN Nigeria has provided the lenders with a negative pledge over all existing and future assets, committing not to diminish such assets through sale, transfer, or the creation of security interests, except as specifically allowed under the terms of the facilities. No further security has been granted in relation to the bonds.	N304.9 billion
Bilateral loan facility (Bank of Industry)	A N25 billion bilateral financing facility (backed by bank guarantee) was secured from the Bank of Industry at a fixed interest rate of 15% per annum. Following a one-year moratorium, principal repayments commenced in May 2026 and are structured over 48 equal monthly instalments. As of 30 September 2026, the outstanding balance stood at N22.4 billion.	N22.4 billion

	2,459,674	**2,386,229**	**2,459,674**	**2,386,229**

The Group's leases include network infrastructure (including tower space and land), land and buildings and motor vehicles. The leases have varying terms, escalation clauses and renewal rights. Penalties are chargeable on certain leases should they be cancelled before the end of the agreement.
Short-term lease payments of N632 million (December 2025: N413 million) for Group and N199 million (December 2025: N282 million) for Company not included in the lease liabilities are included as rent, rates, utilities and other office running cost in other operating costs during the year. In all significant operating lease arrangements in place during the year, the Group acted as the lessee.

MTNN as a lessor

Leases in which MTNN does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease term and is included as revenue in the statement of profit or loss due to its operating nature.

.*This relates to the provision of sponsorships for sporting events, and youth engagement activities. They are constructive obligations arising from commitments made by the Group.
**Other provisions include provisions for some regulatory and tax matters, other consultancy and strategic advisory services payable to various consultants and legal advisers.

31. Employee benefits

Split between non-current and current portions				
Non-current liabilities	15,733	13,699	15,733	13,699
Current liabilities	10,497	6,003	10,497	6,003
	26,230	**19,702**	**26,230**	**19,702**

MTN Nigeria Communications Plc operates post employment benefit plans for non-contributory, long service award and staff retirement benefits. Employees are automatically beneficiaries of the long service award after completing five consecutive years of service with the Company. Employees' retirement benefits are calculated based on the number of years of continuous service, and upon attaining the compulsory retirement age of 60 years. The defined benefit obligation actuaries valuation is carried out annually by Alexander Forbes Consulting Actuaries Nigeria (FRC/2012/0000000000504) signed by Wayne van Jaarsveld (FRC/2021/002/00000024507).

Employment benefits comprise of the present values of :				
Defined Benefit Obligation- retirement benefits	12,071	10,037	12,071	10,037
Long service award	14,159	9,665	14,159	9,665
	26,230	**19,702**	**26,230**	**19,702**

Employee benefits reconciliation				
Opening balance	19,702	11,078	19,702	11,078
Current service cost	7,796	10,098	7,796	10,098

		91,015	**44,354**	**91,021**	**44,354**

* The cash settled share-based payments under the PSP and ESOP were measured at fair value on the vesting date, based on the closing share price of N837 as at 30 September 2026 (31 December 2025: N511).
**The cash settled share-based payment for Group PSP, GAN & LAN was measured at fair value on the vesting date using the appropriate share price.

MTN Nigeria Communications Plc operates a Notional Share Scheme, where qualifying staff receive the increase in a phantom MTN share price at exercise date as compared to the offer price. The scheme is a cash-settled share-based payment scheme. The share based payment liability relates to Locally Aligned Notional (LAN) shares and Group Aligned Notional (GAN) shares. MTN Nigeria also runs an Employee share scheme plan managed by Vetiva Trustee Limited.
The share-based payment liability consists of:

- fair value of options issued to employees under the LAN notional share scheme
- fair value of options issued to employees under the GAN notional share scheme
- the issue of shares held in Trust by Vetiva Trustee for employees under Performance Share Plan (PSP) and Employee Stock Ownership Plan (ESOP).

Share based liability is made up of:				
GAN share options	-	48	-	48

35. Current tax payable

Opening balance	355,175	25,012	354,801	24,713
Provision for the period/year - company income tax	581,931	291,480	581,931	291,480
Provision for the period/year - development levy	93,897	62,930	93,897	62,830
Tax paid	(295,364)	(21,546)	(295,255)	(21,546)
Road investment tax credit utilised	(23,948)	-	(23,948)	-
Withholding tax credit utilised	(1,545)	(2,701)	(1,545)	(2,676)
Others*	146	-	-	-
Closing balance	**710,292**	**355,175**	**709,881**	**354,801**

*Others relate to prior-year tax adjustments arising from MoMo PSB, recognised in the current year.

36. Contract liabilities

Opening balance	138,138	117,272	138,138	117,272
Payments received in advance of delivery of performance obligations	4,304,088	4,812,337	4,304,088	4,812,337
Revenue recognised on delivery of goods/services:				
-In relation to carry forward balance recognised	(138,138)	(117,272)	(138,138)	(117,272)
-Recognised on delivery of goods/services during the period/year	(4,130,610)	(4,674,199)	(4,130,610)	(4,674,199)
Closing balance	**173,478**	**138,138**	**173,478**	**138,138**

Contract liability relates to payments received in advance from sales of recharge cards and on Subscriber Identification Module (SIM) cards. Contract liabilities are recognised as revenue when the subscribers use the airtime for network services such as voice, SMS, data and digital services and when the SIM cards are activated on the network

37. Derivatives

Current liabilities: forward contract	198	2,224	198	2,224

All gains and losses from changes in the fair value of derivatives are recognised immediately in the profit or loss statement as finance income or cost. The Group uses derivative financial instruments such as forward contracts to hedge its foreign currency risks. Such derivative financial instruments are initially recognised at fair value on the date which a derivative contract is entered into and are subsequently remeasured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

38. Basic and diluted earnings per share

Profit attributable to owners of the company (N million)	1,165,174	750,185	1,137,337	687,334
Weighted average number of ordinary shares at the end of the period (million)	20,956	20,956	20,956	20,956
Basic and diluted earnings per share (N)	55.60	35.80	54.27	32.80

Earnings per share (EPS) is calculated by dividing the profit after tax attributable to owners of the company by the weighted average number of ordinary shares in issue during the period, excluding the average number of ordinary shares held as treasury shares (30 September 2026: 39,225,583 shares; 31 December 2025: 25,443,414 shares).

40. Related party transactions

Related party transactions constitute the transfer of resources, services or obligations between the Group and a party related to the Group, regardless of whether a price is charged or not.
Various transactions are entered into by the Company and its subsidiaries during the period/year with related parties. The terms of these transactions are at arm's length. Intra-group transactions are eliminated on consolidation.

40.1 Holding and ultimate holding companies

The Company's holding company is MTN International (Mauritius) Limited, a Company incorporated in the Republic of Mauritius and its ultimate holding Company is MTN Group Limited, a Company incorporated in South Africa. MTN Nigeria Communications Plc's subsidiaries are XS Broadband Limited, Yello Digital Financial Services Limited, and MoMo Payment Service Bank Limited. XS Broadband Limited provides broadband fixed wireless access services and high-quality telecommunication services, while Yello Digital Financial Services Limited and MoMo Payment Service Bank Limited offer mobile financial services (Fintech).

42. Fair value estimation

Where a financial asset or liability is carried on the statement of financial position at fair value, additional disclosure is required. In particular, the fair values need to be classified in accordance with the fair value hierarchy. This fair value hierarchy distinguishes between different fair value methodologies based on the level of subjectivity applied in the valuation. The fair value hierarchy is split into the following levels:
Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities (e.g. the price quoted on a stock exchange for a listed share),
Level 2: Valuation techniques with inputs other than quoted prices (included within level 1) that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (e.g. a valuation that uses observable interest rates or foreign exchange rates as inputs),
Level 3: Valuation techniques with inputs that are not based on observable market data (that is, unobservable inputs) (e.g. a valuation that uses the expected growth rate of an underlying business as input).
The financial instruments measured at fair value are presented below.

In millions of Nigerian Naira	Level 1	Level 2	Level 3	Total

	-	**2,224**	**-**	**2,224**

Financial asset at amortised cost and financial liabilities at amortised cost - The carrying value of current receivables and liabilities measured at amortised cost approximates their fair value. The fair values of the majority of the non-current liabilities measured at amortised cost are also not significantly different from their carrying values.
Treasury bills are valued at market prices listed on FMDQ daily quotation list while the fair valuation of the derivatives is derived by valuation models and consensus pricing information from third party pricing services and quotes to determine an appropriate valuation.
The Group and Company consider the carrying amounts of loans, and other non-current borrowings to approximate their fair value.

FX Forward Derivative

The Group enters into forward exchange contracts with counterparties. At the reporting date, the Group estimates the fair value of derivatives transacted with the counterparties using the discounted mark-to-market technique. All significant inputs into the valuation techniques are wholly observable. The derivative financial instruments are in level 2.

43. Financial instruments and risk management

43.1 Capital risk management

The Group seeks to optimise its capital structure by ensuring adequate gearing levels taking into consideration working capital, cash flow, existing loan covenants, operational requirements, business plan and broader macro-economic conditions.
It maximizes external borrowings on the back of its strong cash generating capacity. In line with its funding policy, the Group diversifies funding sources across local and international markets and ensures that new facility conditions comply with existing loan covenants.
Management monitors net debt to EBITDA and EBITDA to net interest in line with the financial covenants in the loan agreement while it seeks to limit refinancing risk by controlling the concentrations of maturing obligations in the short end of maturity profile. Equity approximates share capital and reserves attributable to the owners of the Company. EBITDA is defined as earnings before interest, tax, depreciation, amortisation and goodwill impairment/losses.
Gross debt relates to local borrowings, net debt is the gross debt less cash and cash equivalents and total funding is gross debt plus equity.

43.2 Credit risk

Credit risk or the risk of financial loss to the Group due to customers or counter parties not meeting their contractual obligations and is managed through the application of credit approvals, limits and monitoring procedures. The Group's maximum exposure to credit risk is represented by the carrying amount of the financial assets that are exposed to credit risk. The following instruments give rise to credit risk:

In millions of Nigerian Naira	Notes	Group		Company	
		30 Sept 2026	31 Dec 2025	30 Sept 2026	31 Dec 2025
Other investments	20.1	21,020	17,812	9,766	6,251
Trade and other receivables	23	160,679	178,444	181,520	225,456
Current investments	20.2	330,749	162,255	238,064	116,893
Restricted cash	24	31,421	37,707	31,221	37,507
Cash and cash equivalents	26	380,992	632,501	379,669	630,219
		924,861	1,028,719	840,240	1,016,326

Cash and cash equivalents and restricted cash

The Group's exposure and the credit ratings of its counter parties are continuously monitored and the aggregate values of investment portfolio is spread amongst approved financial institutions. The Group's Cash investment activity is based on the SLY (Safety, Liquidity and Yield) principle while it also limits its cash holdings in a financial institution to a maximum of 20% of total investment portfolio to manage concentration risk. The exposure is controlled by counter party exposure limits derived from the facility amount provided to the Group, the credit rating of the lending institutions as well as the cash collection by each of the institutions.

For Group, total estimated credit loss as at 30 September 2026 stood at N294 million (30 September 2025: N240 million) while credit loss expense to profit or loss for the period is N100 million (30 September 2025: N208 million).
For Company, credit loss as at 30 September 2026 stood at N280 million (30 September 2025: N12 million) while credit loss expense to profit or loss for the period is N165 million (30 September 2025: credit loss expense of N20 million).

43. Financial instruments and risk management (continued)

Trade receivables

Customer credit risk is managed by each business unit subject to the Group's established policy, procedures and control relating to customer credit risk management. The credit quality of a customer is assessed based on an extensive credit rating scorecard and individual credit limits are defined in accordance with this assessment.

An impairment analysis is performed at each reporting date using a provision matrix to measure expected credit losses. The provision rates are based on days past due for groupings of various customer segments with similar loss patterns (i.e., by geographical region, product type and customer type). The calculation reflects the probability-weighted outcome, the time value of money and reasonable and supportable information that is available at the reporting date about past events, current conditions and forecasts of future economic conditions.

For Group and Company: ECL for gross trade receivables of N113.34 billion (December 2025: N114.66 billion) was N39.1 billion (December 2025: N27.30 billion).

For Group: ECL for gross related party receivables of N53.36 billion (December 2025: N39.36 billion) was N8.74 billion (December 2025: nil).

For Company: ECL for gross related party receivables of N92.30 billion (December 2025: N86.90 billion) was N26.97 billion (December 2025: N0.64 billion).

The Group holds collateral as security for trade receivables relating to trade partners. These are bank guarantees held with banks with credit ratings of AAA to BBB-. A total of N10.59 billion was held as collateral for the same value of receivables as at 30 September 2026 (December 2025: N9.75 billion). Trade partners are to pay within seven days of credit advanced. In the event of default, the bank guarantee is recalled immediately to offset the credit.

Current and other non-current investments

Current and other non-current investments are all liquid assets that consist of marketable securities. They are primarily selected based on the funding and liquidity plan of the Group and from issuers with the least known credit and default risk. In connection with investment decisions, priority is placed on the issuer's very high creditworthiness and the present yield/interest rates offered. In this assessment, the Group also considers the credit risk assessment of the issuer by the rating agencies such as Fitch, Standards and Poor (S&P). The Federal Government of Nigeria (FGN) has one of the lowest credit risks known in the country and in a possibility of default, it could simply increase the circulation of money in the country or borrow from international sources to pay off its local debt. In line with the Group's risk policy, its investments in treasury bills have no historical rate of default and the investments can be liquidated and sold at the prevalent market rates at that point in time. The rating for the FGN by S&P Global Ratings rates the FGN 'B' (upgraded from 'B-' on 15 May 2026) on its long-term foreign and local currency sovereign credit ratings, with a stable outlook. Current investments are thus not subject to a material credit risk and are allocated to stage 1 of the impairment model.

Expected Credit Losses (ECLs) are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original effective interest rate. In determining the cash flows that the Group expects to receive, the Group apply the probability of default (default rate) based on rating by international credit rating agencies like S&P, Moody's and Fitch as well as local ratings by Agusto and Co.

For Group, total estimated expected credit loss for current and other non-current investments as at 30 September 2026 stood at N265 million (31 December 2025: N342 million) while the credit loss for the period stood at N30 million (30 September 2025: credit loss of N111 million).
For Company, total estimated expected credit loss as at 30 September 2026 stood at N192 million (31 December 2025: N228 million) while the credit loss reversal for the period stood at N36 million (30 September 2025: reversal of credit loss N124 million).

The national scale long-term credit ratings of the counterparty financial institutions with which the Group's current and other non-current investments are held range from AAA to BBB-, as assigned by Fitch Ratings, S&P Global Ratings, Agusto & Co. or GCR Ratings on their respective Nigerian national rating scales.

43.3 Liquidity risk

Liquidity risk is the risk that an entity will be unable to meet its obligations as they become due. The Group's approach to managing liquidity risk is to ensure that sufficient liquidity is available to meet its liabilities when due under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation.

The Group ensures it has sufficient cash on demand (currently the Group is maintaining a positive cash position) or access to facilities to meet expected operational expenses, including the servicing of financial obligations; this excludes the potential impact of extreme circumstances that cannot reasonably be predicted, such as natural disasters.

43. Financial instruments and risk management (continued)

43.4 Interest rate risk

Interest rate risk is the risk that the cash flow or fair value of an interest bearing financial instrument will fluctuate because of changes in market interest rates. Financial assets and liabilities that are sensitive to interest rate risk are cash and cash equivalents, short term investments and borrowings. The interest rates applicable to these financial instruments are on a combination of floating and fixed basis in line with those currently available in the market.

The Group's interest rate risk arises from the repricing of the Group's floating rate debt, incremental funding or new borrowings, the refinancing of existing borrowings and the magnitude of the significant cash balances which exist. The Group manages its debt on an optimal mix of local and foreign borrowings and fixed and floating interest rates.

The Group however adheres to its policy on interest rate mix of fixed and floating rates percentages on borrowings to minimize the impact of interest rate risk.

Profile
At the reporting date the interest rate profile of the Group's financial instruments is as follows:

	30 September 2026			31 December 2025		
In millions of Nigerian Naira	Fixed rate instruments	Variable rate instruments	Non interest bearing	Fixed rate instruments	Variable rate instruments	Non interest bearing

43. Financial instruments and risk management (continued)

Interest rate sensitivity

The following sensitivity analysis has been prepared using a sensitivity rate which is used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates. All other variables remain constant. The sensitivity analysis includes only financial instruments exposed to interest rate risk which were recognised at the reporting date. No changes were made to the methods and assumptions used in the preparation of the sensitivity analysis compared to the previous reporting period.

The Group has used a sensitivity analysis technique that measures the estimated change to profit or loss of an instantaneous increase or decrease of 1% (100 basis points) in market interest rates, from the rate applicable as at the end of the period/year, for each class of financial instrument with all other variables remaining constant.
The Group is mainly exposed to fluctuations in the following market interest rates: SOFR (formerly LIBOR) and NIBOR. Changes in market interest rates affect the interest income or expense of floating rate financial instruments. Changes in market interest rates only affect profit or loss in relation to financial instruments with fixed interest rates if these financial instruments are recognised at their fair value.

A change in the above market interest rates at the reporting date would have increased/(decreased) profit before tax by the amounts shown below. The analysis has been performed on the basis of the change occurring at the reporting date and assumes that all other variables, in particular foreign currency rates, remain constant. The analysis is performed on the same basis for prior year.

Group and Company	30 September 2026			31 December 2025		
	Increase/(decrease) in profit before tax			Increase/(decrease) in profit before tax		
	Change in interest rate	Upward change in interest rate	Downward change in interest rate	Change in interest rate	Upward change in interest rate	Downward change in interest rate
	%	N'million	N'million	%	N'million	N'million
SOFR	1	-	-	1	(1,081)	1,081
NIBOR	1	-	-	1	(2,633)	2,633

As at 30 September 2026, MTN Nigeria Communications Plc had fully repaid all foreign currency denominated debt and, accordingly, had no exposure to SOFR linked interest rate risk. MTNN has an all fixed rate loan portfolio hence no exposure to NIBOR.

Currency risk

Currency risk is the exposure to exchange rate fluctuations that have an impact on cash flows and financing activities. The Group manages foreign currency risk on major foreign denominated purchase orders through the use of Letters of Credit. The Group has also entered into a currency swap arrangement to enhance dollar liquidity to address critical operational requirements.

Sensitivity analysis

The Group is mainly exposed to fluctuations in foreign exchange rates in respect of the US Dollar, being the significant foreign denominated currency. The Group has used a sensitivity analysis technique that measures the estimated change to the income statement of an instantaneous 5% strengthening and 20% weakening in the Nigerian Naira against the US Dollar, from the rate applicable as at period/year end, for each class of financial instrument with all other variables, in particular interest rates, remaining constant.

A change in the foreign exchange rates to which the Group is exposed at the reporting date would have increased/ (decreased) profit before tax by the amounts shown below. The analysis has been performed on the basis of the change occurring at the start of the reporting period. The analysis is performed on the same basis for the Company. Transactions in foreign currencies other than US Dollars were not significant.

Group and Company	30 September 2026		31 December 2025	
	Increase/(decrease) in profit before tax		Increase/(decrease) in profit before tax	
In millions of Nigerian Naira	20% weakening in Naira resulting in a decrease in profit before tax	5% strengthening in Naira resulting in an increase in profit before tax	20% weakening in Naira resulting in a decrease in profit before tax	5% strengthening in Naira resulting in an increase in profit before tax

44. Prior year adjustments - MoMo PSB

Subsequent to the approval of Group's 2025 Annual Financial Statements, additional expenses of N299 million were identified in respect of MoMo PSB's 2025 financial statements. The adjustment was assessed as not material to the Group's 2025 financial statements.

45. Commitments for the acquisition of property, equipment and software

	Group		Company	
In millions of Nigerian Naira	30 Sept 2026	31 Dec 2025	30 Sept 2026	31 Dec 2025
Approved but not contracted	17,243	1,108,304	17,243	1,108,304
Contracted but not Capitalised	252,270	-	252,270	-
Total commitments for property and equipment, software and intangibles work in progress	**269,513**	**1,108,304**	**269,513**	**1,108,304**

This committed expenditure relates to acquisition of property and equipment, software and intangibles work in progress. Capital expenditure will be funded from operating cash flows, existing borrowing facilities and, where necessary, by raising additional facilities.

46. Going concern

During the reporting period, the Company delivered a strong financial performance, with revenue increasing by 23.4% year on year, representing an absolute increase of N873.22 billion. Operating profit increased by 36.7% year on year to N1.97 trillion, reflecting improved operating leverage and cost efficiency. The Company also recorded profit after tax of N1.14 trillion (30 September 2025: N687.33 billion). The Company's financial position strengthened, with shareholders' funds increasing to N856.05 billion (31 December 2025: N588.44 billion). Overall, these results reflect sustained growth in operations and improved operational efficiency.

As at 30 September 2026, the Company reported net current liabilities of N1.50 trillion (31 December 2025: N994.63 billion). The Directors assessed this position and concluded that it arises primarily from working capital dynamics and the classification of certain liabilities as current and does not indicate an inability to meet obligations as they fall due. Notwithstanding the net current liability position, the Company generated net cash flows from operating activities of N2.31 trillion during the period (30 September 2025: N1.55 trillion). Based on detailed cash flow projections covering at least the next twelve months, the Directors are satisfied that the Company has adequate liquidity and resources to meet its obligations as they fall due.

In performing the going concern assessment, the Directors considered available financing facilities, projected cash flows, and ongoing operational and strategic initiatives aimed at sustaining profitability and maintaining adequate liquidity. The assessment also considered events and conditions that could, individually or collectively, cast significant doubt on the Company's and the Group's ability to continue as a going concern, including the following:

- Fixed-term borrowings approaching maturity are expected to be repaid as they fall due.
- The Company and the Group continue to comply with the terms of their loan agreements, and no borrowings have been renegotiated.
- There are currently no changes in legislation or government policies that are expected to adversely affect MTN Nigeria Communications Plc.
- There were no substantial operating losses during the period, nor was there any significant deterioration in the value of assets used to generate cash flows. Macroeconomic conditions remained relatively stable, with the exchange rate appreciating by 7.33%, from N1,435.76/US$ to N1,330.47/US$, during the period ended 30 September 2026.
- MTN Nigeria Communications Plc has secured set-off arrangements with Group entities to reduce its intercompany payables.

The Directors also assessed forecast cash flows and financial projections, including the potential impact of internal and external uncertainties and sensitivities in the underlying business plans. The forecasts indicate that the Company and the Group are expected to generate sufficient cash flows from operations and maintain adequate liquidity to meet their obligations as they fall due over the assessment period.

Based on the above assessment, the Directors have a reasonable expectation that the Company and the Group have adequate resources to continue in operational existence for the foreseeable future and to discharge their liabilities in the normal course of business. Accordingly, the unaudited condensed consolidated and separate financial statements for the period ended 30 September 2026 have been prepared on a going concern basis.

Notes to the unaudited condensed consolidated and separate financial statements

47. Securities trading policy

MTN Nigeria Communications Plc has in place a Securities Trading Policy which guides the Board and employees when effecting transactions in the Company's shares. The policy provides for periods for dealing in shares and other securities, established communication protocols on periods when transactions are not permitted to be effected on the Company's shares as well as disclosure requirements when effecting such transactions.

Insiders covered in this policy have not notified the Company of any dealing in the Company's securities within this period and the Company is not aware of any breach of this policy within the period.

48. Shareholders and their interest

Share range	Number of shareholders	% of shareholder	Number of holdings	% shareholding
1 - 10,000	359,681	97.2350	151,392,293	0.72
10,001 - 50,000	7,263	1.9635	149,229,084	0.71
50,001 - 100,000	1,147	0.3101	79,726,267	0.38
100,001 - 500,000	1,301	0.3517	270,724,389	1.29
500,001 - 1,000,000	186	0.0503	136,194,739	0.65
1,000,001 - 5,000,000	227	0.0614	488,476,309	2.33

500,000,001 - 1,000,000,000	2	0.0005	1,085,049,582	5.17
1,000,000,001 - above	1	0.0003	15,409,486,001	73.39
	369,909	100	20,995,560,103	100

As at 30 September 2026, MTN International (Mauritius) Limited with total interest of 73.39% shareholding (31 December 2025: 73.39%) held more than 5% of the issued share capital of the Company.

49. Free float information

MTN Nigeria Communications Plc with a free float value of N3,325,737,419,595 as at 30 September 2026 (30 September 2025: N1,592,126,318,538) is compliant with the Exchange's requirements for free float for companies listed on the Premium Board.

50. Contingent liabilities

Contingent liabilities represent possible obligations that arise from past events whose existence will be confirmed only by the occurrence or non-occurrence of uncertain future events not wholly within the control of the Group in accordance with IAS 37 Provisions, Contingent Liabilities and Contingent Assets.
As at 30 September 2026, the Group has N1.69 billion (31 December 2025: N1.00 billion) contingent liabilities arising from claims and litigations in the ordinary course of business. The increase in contingent liabilities is primarily attributable to revisions to existing claims during the period.
Pending litigation and legal claims against the Group are being vigorously defended in various courts, and in the opinion of the directors, based on legal advice, are not expected to result in material liabilities. Accordingly, no provision has been made in these financial statements, as the likelihood of an outflow of economic resources is not considered probable.

51. Events after the reporting period

There were no subsequent events that materially impact these financial statements.
