Share premium	594,113	594,113	594,113	594,113	594,113	594,113

The nature and purpose of the reserves in equity are as follows:

(b) Share premium: Premiums from the issue of shares are reported in share premium.

(c) Retained earnings: Retained earnings represent undistributed profits, net of statutory appropriations attributable to the ordinary shareholders.

(d) Statutory reserve: This represents the cumulative amount set aside from general reserves/retained earnings by the Bank and its subsidiaries. This amount is non-distributable. The Bank's appropriation is in line with BOFIA 2020 which stipulates that an appropriation of 30% of profit after tax be made if the statutory reserve is less than the paid-up share capital and 15% of profit after tax if the statutory reserve is greater than the paid-up share capital. In the current period, a total of N36.37 billion (31 December 2025: N121.96 billion) representing 15% of Zenith Bank's profit after tax was appropriated.

Other Non-Nigerian subsidiaries also make appropriation which is base on their profit and in line with the requirement of their Central Bank.

(e) SMIEIS reserve: This reserve represents the aggregate amount of appropriations from profit after tax to finance equity investments in compliance with the directives issued by the Central Bank of Nigeria (CBN) through its circulars dated July 11, 2006 (amended).

The SMIEIS reserve was maintained in compliance with the Central Bank of Nigeria's requirement that all licensed banks set aside a portion of the profit after tax in a fund to be used to finance equity investments in qualifying small and medium scale enterprises. Under the terms of the guideline issued in July 2006, the contributions were 10% of profit after tax and were expected to continue after the first 5 years after which banks' contributions were to reduce to 5% of profit after tax.

The small and medium scale industries equity investment scheme reserves are non-distributable.

(f) Fair value reserve: Comprises fair value movements on equity and debt instruments that are carried at fair value through Other Comprehensive Income.

(g) Foreign currency translation reserve: Comprises exchange differences resulting from the translation to Naira of the results and financial position of Group companies that have a functional currency other than Naira.

(h) Credit risk reserve: This reserve represents the cumulative difference between the loan provision determined per the Prudential Guidelines of the Central Bank of Nigeria and the central Bank of other subsidiaries vis-a-viz the allowance/reserve for the loan losses as determined in line with the principles of IFRS 9.

As at 31 March 2026, the cumulative credit risk reserve of the Group and Bank was N114.32 billion and N104.11billion respectively (31 December 2025: Group N114.32 billion and Bank 104.11 billion).
