VISION MISSION AND VALUES

MISSION

To help our stakeholders have peace of mind.

VISION

To be one of the top insurance companies of choice in Africa.

PRINCIPLES

Integrity

We will act with openness, fairness, integrity and diligence. We will always adhere to the applicable laws, regulations and standards of doing business.

Performance

We will promote a positive and challenging high performance culture. We will do this by encouraging personal accountability, development and measuring, reward and recognizing success.

Responsibility

We will act responsibly as individuals and as a Company. This applies to the management of our business, our approach to corporate interaction with key external stakeholders.

Values

Working in teams
Servicing our Customers
Respecting each other
Being proactive
Growing our people
Delivering to our Shareholders
Guarding against arrogance
Upholding the highest levels of integrity

OUR COMMITMENTS

Customers

A satisfied and loyal customer base is core to our business.

We are committed to:

- Delivering the consistent and reliable levels of customer service.
- Acting with integrity, due care and diligence.
- Communicating openly, honestly and with sensitivity and understanding.
- Listening to our customers.
- Handling complaints fairly and promptly.
- Respecting our customers' rights to privacy and confidentiality.
- Protecting our customers and our business from fraud.

Business Partners

We demand high standards from the companies we work with and believe that they should expect the same from us.

We are committed to:

- Carrying out our business with fairness and integrity.
- Being reliable and quick to respond.
- Awarding contracts and selecting business partners solely on the basis of fair and objective business criteria and having regards to high ethical standards.
- Respecting all obligations and confidentiality.
- Protecting our customers and our business from fraud.

Employees

Motivated and skilled employees are critical to our success.

We are committed to:

- Fostering a positive and challenging high performance culture.
- Rewarding superior performance.
- Encouraging personal development.
- Encouraging a culture of frank and honest communication.
- Encouraging teamwork and strong leadership.
- Providing a safe and secure working environment.
- Encouraging diversity and equal opportunities.
- Ensuring that grievances and unethical behaviour can be raised without fear of discrimination.

In return we expect our employees to:

- Act with integrity.
- Take responsibility and accountability for their own actions.
- Show support and commitment for change.
- Focus their energy in getting the best from themselves and others.
- Have the confidence and courage to act with conviction.
- Show understanding for and meet external and internal customers needs.
- Show a relentless desire for success.
- Create positive and effective working relationships.

OUR COMMITMENTS - CONTINUED

Regulators

We have an open, cooperative and transparent relationship with our regulators.

We are committed to:

- Dealing with our regulators in an open, cooperative and transparent manner.
- Managing our business with appropriate standards of risk management and controls.
- Preventing and reporting any instances of significant financial crime.
- Preventing breaches of relevant regulatory requirements.
- Complying with all set standards.

Community & Environment

We believe in continuous improvement of our environmental performance and in taking action around emerging environmental issues. Whenever we operate, we will seek positive engagement with local communities.

We are committed to:

- As a business, we have a responsibility to manage our impacts on the environment through appropriate use of resources such as energy, paper and water and the investment of our assets.
- We also have a responsibility to take proactive action on environmental issues that are likely to affect our business and community at large.
- In each of these areas, we will look to make continuous improvement and actively monitor our performance.

Shareholders

We are committed to fulfilling the aspirations of our shareholders through a commitment to business performance, and high standards of transparency, communication and corporate governance.

We are committed to:

- A culture of business performance, focused on delivering returns to shareholders.
- Comprehensive and transparent disclosure.
- Aiding Shareholder's understanding through the disclosure of relevant financial and non-financial information.
- Listening to the views of our shareholders.
- Managing our business with appropriate standards of risk and control.
- Ensuring due care in the selection of our third party advisers, including our auditors.
- Preventing and reporting any market abuse.
- Acting with due sense of responsibility on confidence entrusted to us.

GOLDLINK Insurance Plc

Veritas Kapital holds 1,268,064,351 (2023:1,268,314,351) ordinary shares representing 51.53% (2023:51.53%) holdings in Goldlink Insurance Plc as at 30 November 2025.

Goldlink Insurance Plc became associate company of Veritas Kapital in 2011 but was taken over by the regulatory authority - National Insurance Commission (NAICOM) for infraction of insurance regulations and its Board of Directors was dissolved in 2012.

Though Veritas Kapital holds majority shares in Goldlink Insurance Plc. (51.53%) the investment has been treated as an associate and accounted for using equity method at both the Company and Group level.

In arriving at the decision to treat the investment as an associate, the Board of Directors considered if Veritas Kapital has control over Goldlink Insurance Plc based on the requirements of IFRS 10. IFRS 10.5 states that an investor regardless of the nature of its involvement with an entity is required to determine whether it is a parent by assessing whether it controls the investee.

Specifically, IFRS 10 states that an investor controls an investee if and only if the investor has the following:

- Power over the investee;
- Exposure, or rights, to variable returns from its involvement with the investee; and
- The ability to use its power over the investee to affect the amount of the investor's returns.

Based on assessment carried out, Directors concluded that Veritas Kapital does not have the power over the investee because the relevant activities of Goldlink Insurance Plc are subject to direction of the NAICOM instituted Board of Directors. The Board of Directors report directly to NAICOM on all its activities and resolutions are subject to the NAICOM (IFRS 10:B37).

9 Property, plant and equipment - Continued

- a** Land and Building was independently valued by Jide Taiwo & Co, Real Estate surveyors (FRC/2012/00000000254) and signed by Apeh Jeremiah (FRC/2019/NIESV/00000019829), in December 2024 to ascertain the open market value of land and building .The carrying amount of the land and building as 30th November 2025 was N4.743million (2024: N4,754million) while the open market value of land and building as at 31 December 2024 was N4,754million

b Valuation technique and significant unobservation inputs

The following table shows the valuation technique used in measuring the value of the land & building, as well as the significant unobservable inputs used.

Valuation technique	Significant Observable Input	Sensitivity
The fair values are determined by applying market value approach. This valuation model reflects the current price on actual transaction for similar properties in the neighbourhood in recent time. References were made to prices of land and comparable properties in the neighbourhood.The data obtained were analysed and adjustments was made to reflect differences in site area and the actual location, quality of construction and off-site facilities.	-Price PER square meter. -Rate of development in the area. -Location of the building. -Commercial neighbourhood. -Specialised nature of the building -Accessibilty to transport links. - Physical condition	The estimated fair value would increase/ (decrease) if the rate of development in the area increases/ (decreases), quality of the building increases / (decreases), influx of people and/or business to the area increases/ (decreases)

a Analysis of movement		
Balance at 1 January	316,884	316,884
Balance at 31 March	<u>316,884</u>	<u>316,884</u>

The goodwill recognised on acquisition of Veritas Healthcare Limited (N69.56 million) has been fully impaired.

The calculation of value-in-use was based on the following key assumptions

- The cashflows were projected based on the company's approved budget. The cashflows were based on past experiences and were adjusted to reflect expected future performances of the company .

The key assumptions described above may change as economic and market conditions change. The company estimates that reasonably possible changes in these assumptions would not cause the recoverable Amount of either CGU to decline below The carrying amount.

Assessment of impairment on goodwill was developed by the management of the company.

11 Intangible assets

This comprises of acquired computer software which does not form part of a related hardware.

a Defined Benefit Scheme

Veritas Healthcare Limited has a non-contributory defined gratuity scheme whereby on separation, staff who have spent a minimum of five (5) years are paid a sum based on their qualifying emoluments and the number of years spent in service of the Company. The actuarial valuation of the scheme for 31 December 2024 was performed by PENMED Actuarial Consultants FRC/2014/NAS/0000000953 and signed by Bode Olajumoke (FRC/2014/NAS/0000000953).

Summary of membership data

	2026	2025
Active Members	8	13
Total annual emoluments	N108.8mn	N108.8mn
Average Liability duration over future service	18	18

Underlying assumptions

The rate used to discount Pre-retirement employment benefit obligations is determined in line with IAS19, with reference to market yields at the balance sheet date on high quality corporate bonds. The following are the significant assumptions adopted in the computations.

Valuation interest rate	22.0%
Salary increase rate	25.0%

	Group 2026 N'000	Group 2025 N'000
Benefit Liability		
(Deficit) / Surplus of Funded Plans	24,690	28,401
Liability Recognized	24,690	28,401

a Life insurance fund arose from the business of the defunct Kapital Insurance Company Limited that ceased life business in 2007 because the emerged Unity Kapital and then Veritas Kapital is not licensed to carry on life business. The fund was kept in abeyance pending transfer to a Life Assurance Company.

b Staff account balance is in respect, unremitted amount on behalf of staff to various PFAs for the month of December 2025 and deductions from staff salary to be remitted to their co-operative scheme administrator. As at January 2026, staff related benefits have been fully settled.

c Accrued professional fees include accrual for audit fees, tax review and actuarial fees.

d Pension protection fund represents pension protection fund maintained by the pension fund administrators as a cushion to Pensioner whose pension balance is not enough to guarantee at least 2/3 of the Federal Government minimum wage bill on retirement based on section 82 of the Pension Reform Act, 2014

e Suppliers and service bills payables relates to outstanding payments due to vendors and suppliers for services rendered.

24 Earnings per share

Basic (loss)/earnings per share (kobo)

The calculation of basic earnings per share was based on the profit after tax attributable to ordinary shareholders, and a weighted average number of ordinary shares outstanding on that date calculated as follow:

	Group 2026 N'000	Group 2025 N'000	Company 2026 N'000	Company 2025 N'000
Profit/(Loss) after tax attributable to equity holders N'000	<u>1,535,227</u>	<u>1,617,842</u>	<u>1,049,631</u>	<u>1,406,401</u>
Weighted average no. of ordinary shares at end of year '000	<u>6,933,333</u>	<u>6,933,333</u>	<u>6,933,333</u>	<u>6,933,333</u>
Basic (loss)/ earnings per share (kobo)	<u>0.22</u>	<u>0.23</u>	<u>0.15</u>	<u>0.20</u>

The Company does not have any instrument with a dilutive effect on its capital, Hence, the basic earnings per share is same as diluted earnings per share

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS - Continued

	Group	Group	Company	Company
	2026	2025	2026	2025
	N'000	N'000	N'000	N'000
25 Other contract liabilities				
Provisions for claims	-	-	-	-
Unearned/deferred premium	124,193	6,389	-	-
	124,193	6,389	-	-

Other contract liabilities includes the outstanding claims provision and the provision for unearned premium. The outstanding claims provision is based on the estimated ultimate cost of all claims incurred but not settled at the reporting date, whether reported or not, together with related claims handling. The provision for unearned premiums represents that portion of premiums received or receivable that relates to risks that have not yet expired at the reporting date.

44 Capital Management

The Federal Government of Nigeria, by Federal Republic of Nigeria Official Gazette, dated 29 August 2025, enacted the Nigerian Insurance Industry Reform Act, 2025. The NIIRA 2025 repealed the Insurance Act 2003, the Marine Insurance Act 2004, the Motor Vehicles (Third Party Insurance) Act, 2004, the National Insurance Corporation of Nigeria Act, 2004 and the Nigeria Reinsurance Corporation Act 2004. The Nigerian Insurance Industry Reform Act, 2025 was enacted to provide for a comprehensive legal and regulatory framework for insurance business in Nigeria; and for related matters. The words "Minimum Capital" was introduced in Section 15 of the Act. Section 15(1)(a) stipulates that a person shall not carry on insurance business in Nigeria unless the insurer has and maintains, while carrying on that business, a minimum capital, in the case of non-life insurance business, the higher of;

(i) NGN15billion or

(ii) Risk-based capital determined by the Commission ;

By the provision of section 15(5), minimum capital requirement means -

(a) in the case of existing company -

(i) the excess of admissible assets over liabilities, less the amount of own shares held by the company,

(ii) subordinated liabilities subject to approval by the Commission, and

(iii) any other financial instrument as prescribed by the Commission.

For this purpose, Admissible Assets are defined as:

Share Capital, Share Premium, Retained Earnings, Contingency Reserves, and any other admissible assets subject to the approval of the Commission.

45 Segment reporting

Identification of reportable segments

The business activities of Veritas Kapital Plc Group are first organized by product and type of service: insurance activities, asset management activities and Health Management activities.

Information regarding the results of each reportable segment is included below. Performance is measured based on segment profit (or loss) before income taxes, as included in the internal management reports that are reviewed by the Group's CEO.

Information reported to the chief operating decision maker (the CEO) for the purposes of resource allocation and assessment of segment performance focuses on types of goods or services delivered or provided. The Company's reportable segments under IFRS 8 are therefore as follows:

- Non-life business
- Pension Administration
- Health Care

Non-Life Business

The non -life reportable segment offers a wide variety of insurance products for both personal and corporate customers. The products offer range from engineering, aviation, marine liability, motor liability, oil and energy, bond, fire and property. The main source of income in this segment is the premium received from the insured on risk covered by the entity and the investment income earned on placements and deposit with financial institutions.

Pension Administration

This reportable segment include the administration and management of the retirement benefits of members. The administration includes making investment decisions, collection of contribution and making payment to retirees in-line with provisions of Pension Reform Act 2014. The revenue earned includes administration and management fees received and receivable on members' contributions and the Net Asset value of Funds under Management respectively.

Health Care

This reportable segment is a National Health Maintenance Organization (HMO) duly licenced and accredited by the National Health Insurance Scheme which provide Health Insurance Services to individuals and organizations in both the private sector and the formal sector under the National Health Insurance Scheme (NHIS).

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS - Continued

46 Risk management framework

(a) Capital management objectives, policies and approach

The Company has established the following capital management objectives, policies and approach to managing the risks that affect its capital position:

- (i) To maintain the required level of stability of the Company thereby providing a degree of security to policy holders.
 - (ii) To allocate capital efficiently and support the development of business by ensuring that returns on capital employed meet the requirements of its capital providers and of its shareholders.
 - (iii) To retain financial flexibility by maintaining strong liquidity and access to a range of capital markets.
 - (iv) To align the profile of assets and liabilities taking account of risks inherent in the business.
 - (v) To maintain financial strength to support new business growth and to satisfy the requirements of the policyholders, regulators and stakeholders.
 - (vi) To maintain strong credit ratings and healthy capital ratios in order to support its business objectives and maximise shareholders value.
- In reporting financial strength, capital and solvency are measured using the rules prescribed by the National Insurance Commission (NAICOM). These regulatory capital tests are based upon required levels of solvency, capital and a series of prudent assumptions in respect of the type of business written. The Company's capital management policy for its insurance and non-insurance business is to hold sufficient capital to cover the statutory requirements based on the NAICOM directives, including any additional amounts required by the regulator.

(b) Approach to capital management

The Company seeks to optimise the structure and sources of capital to ensure that it consistently maximises returns to shareholders and policyholders. The Company's approach to managing capital involves managing assets, liabilities and risks in a coordinated way, assessing shortfalls between reported and required capital levels on a regular basis and taking appropriate actions to influence the capital position of the Group in the light of changes in economic conditions and risk characteristics.

The primary source of capital used by the Company is equity shareholders' funds.

The Group has had no significant changes in its policies and processes to its capital structure during the past quarter from previous quarters.

The table below shows the available capital resources as at 30 September:

	2025	2024
	N'000	N'000
Total shareholders' funds	16,222,747	19,127,147
Regulatory required capital	3,000,000	3,000,000
Excess capital reserve	<u>13,222,747</u>	<u>16,127,147</u>

(c) Regulatory framework

The insurance industry regulator measures the financial strength of Non-Life Insurers using a Minimum Capital Requirement (MCR) or Risk Based Capital benchmark. The NAICOM generally expects non-life insurers to comply with the minimum capital requirement as stipulated in the Nigerian Insurance Industry Reform Act (NIIRA) 2025. Section 15 of the NIIRA 2025 defines the MCR of a non-life insurer as the higher of N15billion or risk based capital as maybe determined by NAICOM.

Financial risk management

The Company has exposure to the following risks arising from financial instruments

Credit risk
Liquidity risk
Market risk

(b)(i) Risk management framework

The company has an Enterprise -wide Risk Management (ERM) Framework that is responsible for identifying and managing the inherent and residual risks facing the Company. The Company's board of directors has the overall responsibility for the establishment of oversight of the Company's risk management framework. The board of directors has established the Risk Management Committee, which is responsible for developing and monitoring the Company's risk management policies. The committee reports regularly to the board of directors on its activities.

The Company's risk management policies are established to identify and analyse the risk faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and Company activities. The Company, through its training and management standards and procedures, aims to maintain a disciplined and constructive control environment in which all employees understand their roles and obligations.

The Company audit committee oversees how management monitors compliance with the Company's risk management policies and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Company. The Company Audit Committee is assisted in its oversight role by Internal Audit. Internal Audit undertakes both regular and ad hoc reviews of risk management controls and procedures, the result of which are reported to the audit committee.

(b)(ii) Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's receivables from customers and investment in debt securities. The carrying amount of financial assets represents the maximum credit exposure. In addition to credit risks arising out of investments and transactions with clients, Veritas Kapital Assurance actively assumes Credit Risk through the writing of insurance business. Credit Risk can arise when a client defaults on settlement of premium payments and can also arise when its own repayment capability decreases (as reflected in a rating downgrade).

Veritas Kapital Assurance's strategy as Insurance Company does not entail the elimination of Credit Risk but rather to take on Credit Risk in a well-controlled, planned and targeted manner pursuant to its business objectives. Its approach to measuring Credit Risk is therefore designed to ensure that it is assessed accurately in all its forms, and that relevant, timely and accurate Credit Risk information is available to the relevant decision makers at an operational and strategic level at all times.

At a strategic level, Veritas Kapital Assurance manages its credit risk profile within the constraints of its overall Risk Appetite and structured its portfolio so that it provides optimal returns for the level of risk taken. Operationally, the Insurance Company Credit Risk Management is governed by the overall risk appetite framework and aims to ensure that the risk inherent to individual exposures or certain business portfolios are appropriately managed through the economic cycle.

The organization is committed to:

- a) Create, and manage credit risk in a manner that complies with all applicable laws and regulations.
- b) Identify Credit Risk in each investment, loan or other activity of the Insurance Company.
- c) Utilize appropriate, accurate and timely tools to measure credit risk.
- d) Set acceptable risk parameters.
- e) Maintain acceptable levels of credit risk for existing individual credit exposures.
- f) Maintain acceptable levels of overall credit risk for Veritas Kapital Assurance's Portfolio; and
- g) Coordinate Credit Risk Management with the

Unsecured exposures to high risk obligors, transactions with speculative cash flows, loans in which the insurance Company will hold an inferior or subordinate position are some of the credit exposures that are considered undesirable by the organization.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS - Continued

(b)(ii) Credit risk - continued

The Group's credit risk can be analysed as follows:

	Group		Company	
	2026	2025	2026	2025
	N'000	N'000	N'000	N'000
Reinsurance receivables (see note (a) below)	6,160,294	3,279,213	6,160,294	3,279,213
Cash and cash equivalents (see note (b) below)	9,781,674	7,975,130	7,649,379	7,179,475
Debt Instruments (see note (c) below)	10,708,668	12,451,756	5,944,775	6,148,171
Statutory deposit	355,000	355,000	355,000	355,000
	27,005,636	24,061,099	20,109,448	16,961,859

Cash and cash equivalents

The Company's cash and cash equivalents are held with reputable banks and financial institutions.

Armotized cost

The Group's Debt instruments are investment in bonds with Government and reputable financial institutions. None of its investment was impaired as at 31 March 2026 (2025: Nil). However, provision for expected credit loss as required by IFRS 9 has been made on the financial assets.

The Company did not have any debt securities that were past due but not impaired as at 31 March 2026 (2025: Nil)

Veritas Kapital Assurance Plc is exposed to risk relating to its investment securities (Fixed deposits and receivables). Its receivables comprise trade receivables from customers, reinsurers and coinsurers recoverable and other receivables.

Collateral held and other credit enhancements, and their financial effect

The Group does not hold collateral or any other enhancements against any of its receivables as at 31 March 2026.

Trade receivables

The Group has placed more responsiveness on effective management of credit risk exposure that relates to trade receivables. In general, the regulator has laid great emphasis on "No Premium, No Cover" and this has positively changed the phase of credit management within the industry. The Company defines credit risk as the risk of counterparty's failure to meet its contractual obligations. Credit risk arises from insurance cover granted to parties with payment instruments or payments plan issued by stating or implying the terms of contractual agreement.

The Company has placed stringent measures to guard against credit default. Credit risk exposure operates from the level of brokered transactions with little emphasis placed on direct business. The Company's credit risk exposure to brokered business is very low as the Company requires brokers to provide payment within 30 days after which impairment trigger is identified and the receivable is assessed for impairment.

Sources of credit risk:

- Direct default risk: risk that the Company will not receive the cash flows or assets to which it is entitled because a party with which the Company has a bilateral contract defaults on one or more obligations.
- Downgrade Risk: risk that changes in the possibility of a future default by an obligor will adversely affect the present value of the contract with the obligor today.
- Settlement Risk: risk arising from the lag between the value and settlement dates of securities transactions.

Management of credit risk due to trade receivables

The Company constantly reviews brokers' contribution to ensure that adequate attention is paid to high premium contributing brokers.

The Company credit risk is constantly reviewed and approved during the Management Committee meetings. It also ensured that adequate provisions are taken in line with IFRS 9. Other credit risk management includes:

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS - Continued

(b)(ii) Credit risk - continued

- Formulating credit policies with strategic business units, underwriters, brokers, covering brokers grading, reporting, assessment, legal procedures and compliance with regulatory and statutory bodies.
- Identification of credit risk drivers within the Company in order to coordinate and monitor the probability of default that could have an unfortunate impact.
- Developing and monitoring credit limits. The Company is responsible for setting credit limits through grading in order to categorize risk exposures according to the degree of financial loss and the level of priority expected from management.
- Assessment of credit risk. All first-hand assessment and review of credit exposures in excess of credit limits, prior to granting insurance cover are subject to review process and approval given during MC meetings.
- Continuous reviewing of compliance and processes in order to maintain credit risk exposure within acceptable parameters.

Staged Approach to the Determination of Expected Credit Losses

IFRS 9 outlines a three-stage model for impairment based on changes in credit quality since initial recognition. These stages are as outlined below:

Stage 1: The Company recognises a credit loss allowance at an amount equal to the 12 month expected credit losses. This represents the portion of lifetime expected credit losses from default events that are expected within 12 months of the reporting date, assuming that credit risk has not increased significantly after the initial recognition.

Stage 2: The Company recognises a credit loss allowance at an amount equal to the lifetime expected credit losses (LTECL) for those financial assets that are considered to have experienced a significant increase in credit risk since initial recognition. This requires the computation of ECL based on Lifetime probabilities of default that represents the probability of a default occurring over the remaining lifetime of the financial assets. Allowance for credit losses is higher in this stage because of an increase in credit risk and the impact of a longer time horizon being considered compared to 12 months in stage 1.

Stage 3: The Company recognises a loss allowance at an amount equal to life-time expected credit losses, reflecting a probability of default (PD) of 100% via the recoverable cash flows for the asset. For those financial assets that are credit impaired. The Company's definition of default is aligned with the regulatory definition. The treatment of the loans and other receivables in stage 3 remains substantially the same as the treatment of impaired financial assets under IFRS 39 except for the portfolios of assets purchased or originated as credit impaired.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS - Continued

(b)(ii) Credit risk - continued

The Group does not originate or purchase credit impaired loans or receivables

Impairment Methodology

Calculation of Expected Credit Losses

Calculation of the expected credit loss is based on the key risk parameters of PD, LGD and ED according to the formula set below:

The calculation of ECL incorporates forward-looking information in all the ECL components. This forward-looking information will impact the various ECL components as follows:

ECL	=	PD	X	EAD	X	LGD
12 -month / lifetime Expected Credit Loss (ECL)		Probability of default		Exposure at default		Loss Given Default (after consideration of collaterals and recoveries)

Probability of default – The PDs will vary during various stages of an economic cycle. It is based on the likelihood that a borrower will default within one year (PD), assessment of the creditworthiness of the counterparty and transformation of 1 Year horizon into lifetime of the asset.

Loss Given Default – Collateral values will vary based on the stage of an economic cycle.

Exposure at default – Change in interest rates may affect the EAD e.g. higher interest rates may result in longer terms for loans causing a change in the EAD.

Loss Given Default

The Group applies historical experience to determine the expected loss given default ratios for each class of financial instruments. Where internal historical experience is not available, other sources, e.g. data available from rating companies as well as professional judgments are used to determine the LGD ratios that will apply. Collateral that is held against the financial assets is also considered in determining the LGD.

The Group management has resolved to use the recovery rates as published by Moodys credit analytics for all credit exposures to sovereign denominated in foreign currencies and all corporate exposures.

For sovereign exposures denominated in Naira which are assessed as low credit risk exposures, we have resolved to use LGDs within the range of 5-10% based on the Central banks of Nigeria's Revised Guidance Notes on Credit risk. Section 3.1 of the document addresses exposure to sovereigns and Central banks and states that financial institutions should assign a risk weight of 0% to the following:

- Exposures to Federal Government of Nigeria (FGN) and Central Bank of Nigeria (CBN);
- Instruments issued by other entities backed by express guarantee of the FGN;
- Inter-bank transactions guaranteed by the FGN or CBN; and
- Inter-bank transactions among supervised institutions collateralized by FGN Bonds, Treasury Bills or other similar sovereign bills.

Treatment of loans and other receivables

All loans issued fall within the scope of debt instruments as financial assets. This covers e.g. Inter-company loans, staff loans and mortgages etc.

Estimation of impairment on the loans based on expected loss is done in the three-stage approach with specific consideration for change in credit risk and forward-looking assumptions.

Intercompany loans are considered low credit risk if it meets the required conditions. Estimation and provision for impairment is based on simplified one stage approach. Loans are put in one bucket e.g. stage 1 and assess the 12 month ECL as long as there are no assets for assessed to have had significant increase in credit risk or the initial criteria for categorizing the asset as low risk has changed.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS - Continued

(b)(ii) Credit risk - continued

Significant increase in credit risk, default and cure

The Group continuously monitors all assets subject to ECLs. In order to determine whether an instrument or a portfolio of instruments is subject to 12mECL or LTECL, the Company assesses whether there has been a significant increase in credit risk since initial recognition. The Company considers that there has been a significant increase in credit risk when any contractual payments are more than 30 days past due. In addition, the Company also considers a variety of instances that may indicate unlikelihood to pay by assessing whether there has been a significant increase in credit risk. Such events include:

- Internal rating of the counterparty indicating default or near-default
- The counterparty having past due liabilities to public creditors or employees
- The counterparty (or any legal entity within the debtor's group) filing for bankruptcy application/protection
- Counterparty's listed debt or equity suspended at the primary exchange because of rumours or facts about financial difficulties.

The Company considers a financial instrument defaulted and, therefore, credit-impaired for ECL calculations in all cases when the counterparty becomes 90 days past due on its contractual payments. The Company may also consider an instrument to be in default when internal or external information indicates that the Company is unlikely to receive the outstanding contractual amounts in full. In such cases, the Company recognises a lifetime ECL. In rare cases when an instrument identified as defaulted, it is the Company's policy to consider a financial instrument as 'cured' and therefore re-classified out of credit-impaired when none of the default criteria have been present for at least twelve consecutive months.

There has been no significant increase in credit risk or default for financial assets during the year.

Expected credit loss

The Group assesses the possible default events within 12 months for the calculation of the 12mECL. Given the investment policy, the probability of default for new instruments acquired is generally determined to be minimal and the expected loss given default ratio assumed to be 100%. In rare cases where a lifetime ECL is required to be calculated, the probability of default is estimated based on economic scenarios.

Impairment losses on financial investments subject to impairment assessment

The table below shows the credit quality and the maximum exposure to credit risk per based on the Group's internal/Moody's credit rating system and year-end stage classification. The amounts presented are gross of impairment allowances. Details of the Group's internal grading system are also provided.

As at 31 March 2026, the Group had no asset reposed as security against asset. The group policy is to pursue timely realisation of collateral in an orderly manner in the case of default. The company does not generally use the non cash collateral for its own operations.

As at 31 March 2026, the Company has not pledged any of its assets as collateral for any liability or payable balance (2025: nil)

Amounts arising from ECL

Inputs, assumptions and techniques used for estimating impairment.

When determining whether the credit risk (i.e. Risk of default) on a financial instrument has increased significantly since initial recognition, the Group considers reasonable and supportable information that is relevant and available without undue cost of effort. This includes both qualitative and quantitative information analysis based on the Group's experience, expert credit assessment and forward looking information. The Company primarily identifies whether a significant increase in credit risk has occurred for an exposure by comparing the remaining life time probability of default (PD) as at reporting date with the remaining Life time PD for this point in time that was estimated on initial recognition of the exposure.

Whenever available, the Group monitors changes in credit risk by tracking published external credit ratings. To determine whether published ratings remain p to date and to assess whether there has been a significant increase in credit risk at the reporting date that has not been reflected in the published rating, the group also reviews changes in Bond yields together with available press and regulatory information about issuers.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS - Continued

(b)(ii) Credit risk - continued

Where external credit ratings are not available, the Group allocates each exposure to a credit risk grade based on data that is determined to be predictive of the risk of default (including but not limited to the audited financial statement, management accounts and cashflow projections, available regulatory and press information about the borrowers and apply experienced credit judgement. Credit risk grades are defined by using qualitative and quantitative factors that are indicative of the risk of default and are aligned with the external credit rating definition from Moody's and standards and Poor.

The Group has assumed that the credit risk of a financial asset has not increased significantly since the initial recognition if the financial asset has low credit risk at reporting date. The company considers a financial asset to have low credit risk when its credit risk rating is equivalent to the globally understood definition of "investment grade". The Company considers this to be B- or higher based on the Moody rating which is equivalent to an internal risk grade of standard grade or higher.

As a back stop, the Group considers that a significant increase in credit risk occurs no later than when the asset is more than 30 days past due. Days past due are determined by counting the numbers of days since the earliest elapsed due date in respect of which full payments has not been received. Due dates are determined without considering any grace period that might be available to the borrower. The Company monitors the effectiveness of the criteria used to identify significant increase in credit risk by regular reviews to confirm that:

- The criteria are capable of identifying significant increase in credit risk before an exposure is in default;
- The criteria do not align with the point in time when the asset becomes 30 days past due;
- The average time between the identification of a significant increase in credit risk and default appears reasonable

- Exposures are not generally transferred from 12- month ECL measurement to credit impaired and
- There is no unwarranted volatility in loss allowance from transfers between 12-month ECL and Lifetime ECL measurement.

Definition of default

The Group considers a financial asset to be in default when the borrower is unlikely to pay its credit obligations to the company in full, without recourse by the company to actions such as realizing security (if any is held); or the financial asset is more than 90 days past due.

In assessing whether a borrower is in default, the Company considers indicators that are:

- qualitative: e.g. breaches of covenant and the other indicators of financial distress;
- quantitative: e.g. overdue status and non-payment of another obligation of the same issuer to the company; and
- based on data developed internally and obtained from external sources.

Inputs into the assessment of whether a financial instrument is in default and their significance may vary over time to reflect changes in circumstances.

Incorporation of Forward looking information

The Group incorporates forward-looking information into both its assessment of whether the credit risk of an instrument has increased significantly since initial recognition and its measurement of ECL. It formulates a 'base case' view of the future direction of relevant economic variables and a representative range of other possible forecast scenarios based on advice from the Company's Investment and risk committee, economic experts and consideration of a variety of external actual and forecast information. This process involves developing three additional economic scenarios and considering the relative probabilities of each outcome. External information includes economic data and forecasts published by governmental bodies and monetary authorities in the Nigeria, supranational organizations such as the Organisation for Economic Cooperation and Development and the International Monetary Fund, and selected private-sector and academic forecasters.

The base case represents a best estimate and is aligned with information used by the Company for other purposes such as strategic planning and budgeting. The other scenarios represent more optimistic and pessimistic outcomes."

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS - Continued

(b)(ii) Credit risk - continued

Measurement of ECL

The calculation of the expected credit loss is based on the key risk parameters of Probability of default (PD), Loss given default (LGD) and Exposure at default (EAD)

To determine the Lifetime and 12-month PDs, the Group uses the PD tables supplied by Moody's based on the default history of sovereign and corporate obligors with the same credit rating. The Company adopts the same approach for unrated investments by mapping its internal risk grades to the equivalent external credit ratings. The PDs are recalibrated and adjusted to reflect forward looking information as described below. Changes in the rating for counterparties and exposure lead to a change in estimate of the associated PD.

Loss Given Default is the magnitude of the likely loss if there is a default. The Group estimates LGD parameters based on the history of recovery rates of claims against the defaulted counterparties. The LGD for sovereign fixed income exposures are based on publications by Moody's and the models consider the structure, collateral, seniority of claims and recovery of any collateral that is integral to the financial asset. For loans secured with properties or asset, loan to value ratios are key parameter in determining LGD. LGDs are calculated on discounted cash flow basis using effective interest rate as the discounting factor.

EAD represents the expected exposure in the event of a default. The Group derives the EAD from the current exposure to the counterparty and potential changes to the current amount allowed under the contract, including amortisation, and prepayments. The EAD of a financial asset is its gross carrying amount. As described in the accounting policy, and subject to using a maximum of a 12-month PD for financial assets for which credit risk has not significantly increased, the Company measures ECL considering the risk of default over the maximum contractual period (including any borrower's extension options over which it is exposed to credit risk, even if, for risk management purposes, the Company considers a longer period. The modelling of parameter is carried out on an individual basis or collective basis where the assets share same risk characteristics like instrument type, credit risk rating and grading, collateral type, date of initial recognition or remaining term to maturity or industry. The groupings are subject to regular review to ensure that exposures within a particular group remain appropriately homogeneous.

When ECL are measured using parameters based on collective modelling, a significant input into the measurement of ECL is the external benchmark information that the Group uses to derive the default rates of its portfolios. This includes the PDs provided in the Moody's or Standards and Poor default study and the LGDs provided in the recovery studies reports provided by the same rating agencies.

An overview of the approach to estimating ECLs is set out in Note 3 Summary of material accounting policies. To ensure completeness and accuracy, the Group obtains the data used from third party sources (Moody's, Standards and Poor, Economist associate etc.) and its investment team verifies the accuracy of inputs to the Company's ECL models including determining the weights attributable to the multiple scenarios.

(c) Liquidity risk

Liquidity risk is the risk that the Group will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset.

The Group's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

The Group uses activity-based costing to cost its products and services, which assists it in monitoring cash flow requirements and optimising its cash return on investments.

The Group aims to maintain the level of its cash and cash equivalents at an amount in excess of expected cash outflows on financial liabilities over the next 60 days.

The Group also monitors the level of expected cash inflows on trade and other receivables together with expected cash outflows on trade and other payables.

Exposure to liquidity risk

The following are the remaining contractual maturities of financial liabilities at the reporting date.

The amounts are gross and undiscounted, include contractual interest payments and exclude the impact of netting agreements.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS - Continued

Market risk

Market risk is the risk that changes in market prices - such as foreign exchange rates, interest rates and equity prices - will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the returns.

Currency risk

The Company is exposed to currency risk to the extent that there is a mismatch between the currencies in which premium and claims are denominated and the respective functional currencies of the Company. The functional currency of the Company is the Nigerian naira.

The currencies in which these transactions are primarily denominated are the Nigerian naira.

However, the Company receives some premium in foreign currencies and also pays some claims in foreign currencies. The foreign currencies the Company transacts in include euro, british pounds and united states dollars.

Exposure to currency risk

The summary quantitative data about the Company's exposure to currency risk as reported to the management of the Company is as follows:

In Thousands of	31 March 2026			31 December 2025		
	Carrying value	USD	NGN	Carrying value	USD	NGN
Cash and cash equivalent	9,781,674		9,781,674	7,975,130	3,968	7,971,162
Financial assets	-		-	-		-
Net statements of financial position exposure	9,781,674	-	9,781,674	7,975,130	3,968	7,971,162

The following significant exchange rates have been applied.

Naira	Period- end spot rate	
	2026	2025
USD 1	1422	1435

Sensitivity analysis

A reasonably possible strengthening (weakening) of the US dollar against all other currencies at 31 December would have affected the measurement of financial instruments denominated in a foreign currency and affected equity and profit or loss by the amounts show below. This analysis assumes that all other variables, in particular interest rates, remain constant and ignores any impact of forecast sales and purchases.

Effects in thousand of naira	Profit or Loss		Equity, net of tax	
	Strengthening	Weakening	Strengthening	Weakening
31 March 2026				
USD (10% movement)	0	0	0	0
31 December 2025				
USD (10% movement)	794	(794)	794	(794)

(c)(v) Interest rate risk

The Company adopts a policy of ensuring that all its interest rate risk exposure is at a fixed rate.

This eliminates the variability in the risks and returns on the Company's interest bearing assets and liabilities.

Exposure to interest rate risk

The interest rate profile of the Company's interest-bearing financial instruments as reported to the management of the Company is as follows.

The Company purchases reinsurance as part of its risks mitigation programme. Reinsurance ceded is placed on both a proportional and non-proportional basis. The majority of proportional reinsurance is quota-share reinsurance which is taken out to reduce the overall exposure of the Company to certain classes of business. Non-proportional reinsurance is primarily excess-of-loss reinsurance designed to mitigate the Company's net exposure to catastrophe losses. Retention limits for the excess-of-loss reinsurance vary by product line and territory.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS - Continued

Amounts recoverable from reinsurers are estimated in a manner consistent with the outstanding claims provision and are in accordance with the reinsurance contracts. Although the Company has reinsurance arrangements, it is not relieved of its direct obligations to its policyholders and thus a credit exposure exists with respect to ceded insurance, to the extent that any reinsurer is unable to meet its obligations assumed under such reinsurance agreements. The Company's placement of reinsurance is diversified such that it is neither dependent on a single reinsurer nor are the operations of the Company substantially dependent upon any single reinsurance contract.

The Group principally issues the following types of general insurance contracts: fire, motor, bond, personal accident, aviation, marine and oil and gas. Risks under non-life insurance policies usually cover twelve months duration. For general insurance contracts, the most significant risks arise from climate changes, natural disasters and terrorist activities. For longer tail claims that take some years to settle, there is also inflation risk. The above risk exposure is mitigated by diversification across a large portfolio of insurance contracts and geographical areas. The variability of risks is improved by careful selection and implementation of underwriting strategies, which are designed to ensure that risks are diversified in terms of type of risk and level of insured benefits. This is largely achieved through diversification across industry sectors and geography.

Furthermore, strict claim review policies and procedures exist to assess all new and on-going claims, regular detailed review of claims handling procedure and frequent investigation of possible fraudulent claims are all policies and procedures put in place to reduce the risk exposure of the Company. The Company further enforces a policy of actively managing and promptly pursuing claims, in order to reduce its exposure to unpredictable future developments that can negatively impact the business. Inflation risk is mitigated by taking expected inflation into account when estimating insurance contract liabilities.

The Group has also limited its exposure by imposing maximum claim amounts on certain contracts as well as the use of reinsurance arrangements in order to limit exposure to catastrophic events (e.g., hurricanes, earthquakes and flood damage).

The purpose of these underwriting and reinsurance strategies is to limit exposure to catastrophes based on the Company's risk appetite as decided by management. The overall aim is currently to restrict the impact of a single catastrophic event to approximately 50% of shareholders' equity on a gross basis and 10% on a net basis. In the event of such a catastrophe, counterparty exposure to a single reinsurer is estimated not to exceed 2% of shareholders' equity. The Board may decide to increase or decrease the maximum tolerances based on market conditions and other factors.

Key assumptions

The principal assumption underlying the liability estimates is that the Company's future claims development will follow a similar pattern to past claims development experience. This includes assumptions in respect of average claim costs, claim handling costs, claim inflation factors and claim numbers for each accident year.

We have adopted actuarial methods and assumptions that are consistent with those used in prior years. The level of reserve was determined after data cleansing by using our internationally accepted actuarial models.

The calculation of the reserves was conducted on both deterministic (assuming average historic experience would be reflected in the future experience without attaching probability or level of uncertainty of variations around such experience) and stochastic (allowing for likely future variation around the average expected experience) and stochastic approach uses Bootstrap-Mark method.

Chain Ladder Method (CL)

We have used the Chain Ladder method which is the most widely used method in loss reserving, and it is the starting point of the other reserving methods described in this report. The Chain Ladder also called Loss development triangle method uses statistical projection technique that relies on the setting of past known claim payments by year of origin (accident year) and year of payment (development year). Using historical claims paid for each class, we grouped the claims into 10 years cohorts, considering the age-age-claim amounts paid. These cohorts are called loss development triangles. Each left - right diagonal represents the total loss amounts paid in that year for losses reported in each accident year. The age-to-age claim amounts are then accumulated from the origin year to the valuation date. The cumulated incremental paid claims (2008-2017) to the valuation date are then projected to their expected ultimate claim estimate, using factors called link ratios or development factors. The gross claim reserves are then derived from the difference between the cumulated actual paid claims and the estimated ultimate claim. Variants of the chain ladder method were exploited to reflect adequately the key characteristics of the risks being reserved for by the company.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS - Continued

The IACL is a variant of the chain ladder method and it could be used with allowance for time value of money (discounting or no discounting). Under this method, the historical age -to- age paid claims are increased in line with relevant inflation index from their accident year or payment to the valuation year before being cumulated. The cumulated payments in money terms of the valuation year are projected into the future. The decumulated payments are then projected forward to their expected year of payment and ultimate claim estimate, allowing for future inflation. Published year - to - year inflation factors used in our projection is as stated in the assumptions section of this report. We have calculated for two types of this

Expected Loss Ratio Method

We estimated the ultimate loss ratio from historical data for each class of business and multiplied this by the earned premium for that class in each accident year to obtain the ultimate claim for each accident year. In arriving at the historical loss ratio, we considered the underwriter's views. We then deducted the actual paid claim amount to date to give the required outstanding claim reserve. This approach is considered appropriate for as it is not affected by distortions in data and although it is simplistic but gives an approximate estimate. We applied this method for classes where there is no sufficient mass of data to generate credible results using other more sophisticated methods.

Claims development table

The following tables show the estimates of cumulative incurred claims, including both claims notified and IBNR for each successive accident year at each reporting date, together with cumulative payments to date. The estimated technical reserves are derived statically through analysing the company's non-life policy data for policies underwritten and emerging claims over each of the past 6 (six) underwriting years.

In general, the uncertainty associated with the ultimate claims experience in an accident year is greatest when the accident year is at an early stage of development and the margin necessary to provide the necessary confidence in the provisions adequacy is relatively at its highest. As claims develop, and the ultimate cost of claims becomes more certain, the relative level of margin maintained should decrease. However, due to the uncertainty inherited in the estimation process, the actual overall claim provision may not always be in surplus.

	2,043,667	(2,043,667)	-	-

The analysis assumes that all other variables, in particular, foreign currency exchange rates remain constant.

Fair value sensitivity analysis for fixed-rate instruments

The Group does not account for any fixed-rate financial assets and financial liabilities at fair value through profit or loss. Therefore, a change in interest rates at the reporting date would not affect profit or loss.

Other market price risk

The Group is exposed to equity price risk, which arises from available-for-sale equity securities held for partially meeting the claims and benefits obligations.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS - Continued

The management of the Group monitors the proportion of equity securities in its investment portfolio based on market indices.

Material investments within the portfolio are managed on an individual basis and all buy and sell decisions are approved by the Risk Management Committee.

The primary goal of the Group's investment strategy is to maximise investment returns, both to partially meet the Group's claims and benefits obligations and to improve its returns in general.
